New assignments: Cooper (package redesign of product line), Colgate Palmolive (Ajax All Purpose Cleaner, Ajax Power Pad, Cold Power Liquid Detergent, Pine Action Disinfectant, Sta-Soft Fabric Conditioner).

Coffee consumers drink more in '79

By JOHN C. MAXWELL JR.

Retail prices for regular coffee in 16-oz. cans declined for the second consecutive year in 1979, dropping 5.4% from 1978.

Per capita consumption figures for 1977 and 1978 (*see chart*) have been revised and now indicate consumption at 28.1 gals. and 27.1 gals., respectively. The 1979 figures is 28 gallons, or 10.8 lbs.

- This amount represents a recovery from the declines of the two previous years that were partly linked to price increases. We believe that the slight 1979 increase still reflects a long-term downtrend.

The consumption figures are based on a three-year moving average to counterbalance inventory swings. Absolute numbers indicate consumption at 27.1 and 29.7 gals. per capita for 1978 and 1979, respectively.

Figures for coffee drinking by age group show a substantial decline for each segment over the 17-year period from 1962 to 1979, with the largest drop in the 15-to-19 group (down 75.2%). Coffee drinking for all ages rose 4.6% for 1978-79, but dropped 34% for 1962-79.

In the regular coffee area, General Foods remained in the No. 1 position in 1979 with a 31.5% share of market. In the instant segment, General Foods lost share points (its current share is 47.5%) but maintained its lead. Its Maxwell House brand also maintained its strong lead with a 23.4% share of the instant market. #

U.S. per capita coffee consumption

MPA adds 1 associate, 15 members in January

The Magazine Publishers Assn., New York, has added 15 new members and one international associate in January, bringing its member companies count to 171, representing about 650 publications, and the international associates to 22, representing more than 200 publications.

The new members are: Americana Magazine Ltd.; GPI Publications, publishers, of *Guitar Player, Contemporary Keyboard* and *Frets;* HMA Publishing, publishers of *Hawaii After Dark* and *Island Dining Guide;* Intercommunications Inc., publishers of *Coaching: Women Athletics; Journal of Applied Management;* Marco Communications, publishers of *Financial World;* U.S. Glass Publications, publishers of *U.S. Glass* and *Metal Glazing;* Walt Disney Publications, publisher of *Disney News;* Windsor Communications, publishers of *Impressions;* deMenil Publications, publishers of *Houston City;* Dolmatch Publications, publishers of *Barbara Cartland's World of Romance; Grantsmanship Center News; The International Review of Food & Wine Associates;* Palucci Publications, publishers of *Attenzione,* and *Prime Time.* The international associate added is Nederlanse Organisatie van Tijdschrift-Uitgevers, Amsterdam, the Netherlands.

Burrill agency relocates

John Burrill Associates, West Hartford, Conn., agency has moved to 630 Oakwood Ave., West Hartford 06119.

THE LOOK OF SOMEONE WHO WAS EXPECTING A TIMEX BUT GOT A CARAVELLE
CARAVELLE

Dig at Timex

Bulova is attempting to wrest market share from the wrist of Timex with a new campaign for its Caravelle low-price line. The campaign is the first work from Scali, McCabe, Sloves which won the Caravelle account last year.

Weisz changes name

Weisz/Greco Advertising is the new name of Thomas J. Weisz Ltd., following the formation of a partnership between Mr. Weisz and Tucker Greco, who joined the Weisz agency as creative and marketing manager two years ago. The agency, at Paradise Lane, New Paltz, N.Y. 12561, lists as clients IBM, Grolier Publishing, Sheaffer Eaton Textron, Raytheon medical imaging and the Ferroxcube division of Amperex Electronic Corp.

NINE REASONS TO CONTACT YOUR HARVEST FARM UNIT REPRESENTATIVE.

On March 1, The Harvest Farm Unit was appointed Advertising Representative for The Texas Farmer-Stockman and The Oklahoma Farmer-Stockman for most of the U.S.

The Farmer-Stockman Publishing Company and The Harvest Publishing Company have made a joint commitment to position each of these state farm magazines as a major agricultural influence in their respective states.

The Harvest Publishing Company represents over 100 years of agricultural experience in state farm magazine publishing and is pleased to be able to offer this prime media buy which includes state farm magazines in Texas and Oklahoma plus Kansas, Missouri, Kentucky, Ohio, Michigan, Pennsylvania and Florida… a total farm market of more than $34 billion…over 28% of the total U.S. farm income.

Contact your Harvest Sales representative today. You'll find that Harvest is a great place to do business.

Twin troubles ended

Donmoor Stain-Less knit shirts makes its point with twins in a local tv and print campaign from Marsteller Inc. that seeks to increase awareness of a new soil-release finish. While one twin gets more stains, shirts come equally clean, ad from Donmoor Inc., New York, notes.

Census: '77 agency receipts 73% higher than '72

WASHINGTON—Advertising agency receipts (gross income) were up 73% and employment was up 52% between 1972 and 1977, according to results of the 1977 census of business that have just been made available by the Bureau of the Census.

A compilation of data for leading standard metropolitan areas shows continued decentralization, with New York's share of total agency receipts off from 38.9% to 37.5% and its share of agency jobs down from 33.3% to 30.5%.

▪ Decentralization was also reflected in combined totals for the three leading SMSAs in the two censuses. While the top three in 1972 (New York, Chicago and Detroit) had 55.6% of the industry's receipts and 48% of the jobs, the top three in 1977 (New York, Chicago and Los Angeles) accounted for only 53.1% of the receipts and 46.3% of the jobs.

Total receipts for all U.S. ad agencies with payrolls (receipts include commissions on media, materials and services; pr and service fees, and miscellaneous income) reached $3,168,560,000 in 1977, compared with $1,831,536,000 in 1972. The number of agencies with payrolls increased from 7,188 to 8,089. Employment was up from 74,566 to 82,515, and payrolls went from $961,562,000 to $1,467,071,000. The census was taken early in 1978.

Receipts of New York agencies went from $717,769,000 to $1,171,106,000. The number of New York agencies declined from 1,038 to 963, but employment increased from 25,169 to 25,413, and payrolls went from $372,548,000 to $549,807,000.

Agency count, receipts, employment and payroll results are available for 75 SMSAs. For others, including Minneapolis and St. Louis, which were eighth and ninth respectively in 1972, confidentiality considerations barred any disclosure beyond agency count. Chicago is available only consolidated with Gary, and Seattle has been consolidated with Tacoma. Officials explain that separate publication of Chicago and Seattle SMSA data might enable users to identify confidential facts about one of the six Gary or eight Tacoma agencies.

Growth rates varied widely. Among the top 10 SMSAs where data was reported, receipts increased in a range from 40.3% in Detroit to 130.3% in Atlanta. New York and Chicago, with increases of 63.2% and 56.9% respectively, remained unchallenged first and second. Los Angeles, up 75.8%, moved from fourth to third, displacing Detroit. Philadelphia, with a 67% gain, advanced from sixth to fifth, while San Francisco, up 57.5%, slipped to sixth.

Cleveland, which had ranked seventh in 1972, registered a gain of only 27.1%, and dropped to 11th in the 1977 listing. Boston and Dallas-Fort Worth, which had been 10th and 12th respectively in 1972, were up 90.7% and 106% respectively, and appear in seventh and eighth places in the new listings. Atlanta, 13th in 1972, ranks ninth, and Houston, up 85.1%, moved from 11th to 10th. #

RIAA makes revisions on gold record awards

To make its gold and platinum record awards "more useful as marketing and merchandising tools," Recording Industry Assn. of America, New York, is delaying certification of such awards to 60 days after release. Last July, RIAA dropped its "instant" certifications in the wake of so many "hit" records suffering thousands of retailer returns as unsold; in the interim, RIAA had required record companies to wait 120 days before being awarded gold records. To receive a gold record, 1,000,000 singles or 500,000 albums must be proven as sold by audit, RIAA said, while a platinum record goes to titles selling 2,000,000 singles or 1,000,000 lps.

Beecham tries new line

Beecham Inc., Clifton, N.J., is introducing VitaEuropa Hydro-Therapeutic bath and shower gelee in recognition of the increased number of sports and exercise enthusiasts in the U.S. The line is priced higher than Beecham's other bath line, Vitabath, and is handled by the same agency, Shaller Rubin Associates.

Top agency execs read signs of recession

An Advertising Age roundup

Though indications are that the long-awaited recession finally has begun to make its appearance, some agency executives say they can't find hide nor hair of it.

A number have adopted a see-no-evil, feel-no-evil attitude but others believe the prevailing economic winds contain cold breezes that may soon turn to icy gusts.

The signs include some softening among various media (AA, April 14). Ad pages have begun to slip for some areas of the business and consumer press, some newspapers cite dips in local advertising and, in some markets, radio has found the going tough.

Other preliminary signs of an economic shift include the movement of dollars from marginal to lead brands and a growing number of advertisers who are keeping their media plans flexible.

The recession "has started its squeeze," said Doyle Dane Bernbach chief Neil Austrian in New York. "Some budgets are being cut back, not significantly yet, but it is a trend." Mr. Austrian, a former Wall Street financial man, would not say how deep the cuts were nor which accounts were affected.

But he did admit that the elements coursing through the economy today have him worried. "A slowdown with interest rates of 20%? We've never seen a situation like this in American history, ever," he said. "We're looking at a major credit crunch which should be followed by a drop in spending and purchasing ability. Then advertisers will have to make some decisions." He expects this will occur in the second quarter.

At Interpublic Group of Cos., chief Philip H. Geier Jr., who earlier cautioned that 1980 profits may not be as dramatic as those of 1979, said that so far there have been no cuts. But, he said, he hears talk that some advertisers may move money from "behind marginal brands to leaders," and also may "sharpen their already sharp media buying pencils."

Despite research to show that ad expenditures actually grew in three of the past four recessions, and that marketers who kept their ad weights up when the gross national product went down came out winners, and even surveys that show that today's advertisers are believing and acting on these findings, the agency execs admit to growing unease.

"We're not getting any recession-inspired cuts, and no patterns attributable to a recession are emerging yet," said John E. O'Toole, president of Foote, Cone & Belding Communications. "There's no doubt that these are perilous economic times, and everybody's watching developments like crazy."

Those sentiments were echoed by the largely financial-oriented Doremus & Co., as well as J. Walter Thompson Co. and BBDO.

▪ Ogilvy & Mather chief William Phillips hasn't seen a hangman yet, but he has seen signs of the gallows going up in the marketplace. "We're seeing some selective budget cuts here and there, but for the most part the consumer products which we're very strong in are unaffected by economic swings."

The O&M chief noted that "a small number of clients for whom advertising is less directly related

Credit cards start to unsell

By JOSH LEVINE

NEW YORK—With unrestrained use of credit nudging out gas guzzling as the nation's No. 1 consumer crime, Visa USA and Interbank, MasterCard's licenser, have joined oil companies in the ranks of advertisers whose primary task is unselling the products they market—at least for now.

Since March 14, when federal regulations put credit card use on an anti-inflation enemies list, Visa has been trying to dispose of the network time it had bought earlier for a "heavy duty" summer campaign.

Interbank opted instead to replace the broadcast spots it had scheduled for its own campaign with a 30-second message from Russell Hogg, Interbank's president. In the new commercials, created by William Esty Co., Mr. Hogg soberly urges MasterCard holders to limit use of the card to "necessities and emergencies."

At the same time, issuers of the three top travel and entertainment cards—American Express, Diners Club and Carte Blanche—regard the summer hibernation of the two bank card licensers and the banks that issue those cards as an opportunity to snare new cardholders. Issuers of t&e cards, as they are known, are bound by the current federal restraints, but the heavy skewing of their cardholder base toward business customers and their nonissuance of revolving credit reduces the impact.

In the case of both Visa and Interbank, the recent advertising shifts were carried out at the behest of member banks, which are taking whatever steps they can to deflate unprofitable charge card volume.

Even before the March 14 anti-inflation program, the high cost of

last minute news

Firestone names BBDO; spending drop expected

AKRON, O.—Firestone Tire & Rubber Co. has named BBDO, New York, as its agency, effective Nov. 1, with responsibility for passenger tires, automotive services and corporate image advertising, previously handled in-house and by Murray & Chaney Advertising, Hudson, O. Murray & Chaney continues as the agency for truck, farm and off-highway tires. Firestone reportedly spent $20,000,000 on advertising last year, but that figure is expected to decline. Work on a one-year campaign for Firestone's 721 tire by James Jordan Inc., New York, has been completed.

Sony reportedly talking to agencies

NEW YORK—While Sony America denies it is considering an agency switch, its consumer products division reportedly has been in contact with Young & Rubicam, Doyle Dane Bernbach, and Wells, Rich, Greene to determine each agency's interest in the $10,000,000-plus account, which went to McCann-Erickson from DDB early last year.

Adams expected to replace Hesse at Four A's

Campbell-Ewald unit wins bidding

Paris store auctions ad budget

By CAROLYN PFAFF

PARIS—In a move without precedent in the French marketplace, the troubled department store chain Manufrance has just auctioned off its 1980 ad budget of $5,250,000 to Publi-Service/-Campbell-Ewald in return for a $1,000,000 investment in the company.

Thus the Interpublic agency in Paris, which recently suffered a dramatic $10,000,000 drop in business, becomes a stockholder in a chain of 80 stores that last year lost FF33,500,000 ($7,950,000).

In fact, Publi-Service was one of 10 agencies approached by the management of Manufrance to help save a desperate situation. None of the other agencies approached, including the big French agencies, was interested in investing the required amount, although eight asked to bid on the ad budget.

Manufrance employs 1,925 persons and has been in serious financial difficulties on and off for five years. It was restructured last year with a new president and new stockholders but it has been unable to secure more necessary cash from the banks. In recent weeks, it has had difficulty meeting its payroll.

The Campbell-Ewald participation has been prominently played up in French newspapers under the title: "The American advertis-

'Unfair' out as FTC bill nears

WASHINGTON—Senate and House negotiators were reported moving last week toward agreement on legislation which clips "unfair" from the Federal Trade Commission's rulemaking jurisdiction over advertising, and establishes a two-house veto over any rules the commission issues.

Defying hints of an impending presidential veto, the formula developed by the Senate commerce committee leadership also restricts FTC's power to regulate funeral directors, agricultural cooperatives, life insurance, trademarks and standards-writing organizations.

Threats of a veto do not appear to upset Sen. Howard Cannon (D., Nev.), the Senate commerce committee chairman, who calls the bill "balanced and responsible." House leaders are not commenting, but there are signs agreement is near.

▪ The White House has indicated that a two-house veto is less objectionable than other restrictions proposed for FTC, but that the President will veto a bill which "substantially weakens" the commission. Since FTC's funds run out April 30, the congressional message to the President is that his veto might put FTC out of business.

Ad industry associations are particularly interested in sections of the formula which limit FTC ad rules to "deceptive" ads, instead of "unfair or deceptive." The change knocks out the proposed rule on children's advertising, and reassures cigaret industry executives who fear "fairness" could become the basis for future action against their ads.

"Unfair or deceptive" would remain as a basis for individual cases. FTC would also have power to use "unfair" for rules against tv ads to children for "a product found by a federal agency with jurisdiction over the product to be unsafe." #

50 sponsors await alternate fare

NBC mulls Olympic fill-in

By JAMES P. FORKAN

NEW YORK—NBC boss Fred Silverman is looking for the programing momentum to enable NBC-TV to keep its Moscow Olympics sponsor and ratings losses to a minimum.

Although NBC has leaked word that it is discussing "alternate advertising plans" with the 50 or so Summer Olympics accounts—thereby confirming what agency execs had long been anticipating (AA, Feb. 25)—the network officially is keeping quiet lest it jeopardize its Lloyds of London insurance policy.

Under terms of the policy, NBC would recover 90% of its $87,000,000 investment if the games are cancelled, terminated in progress, or if the U.S. team does not go.

NBC feels it should say nothing formally till the late May deadline when the U.S. Olympic Committee, which has voted not to send U.S. athletes, must inform the International Olympic Committee of its intentions. (When the insurance policy was written, fears that the 1980 Olympics might be a victim of U.S.-U.S.S.R. cold war friction stemmed from the Jewish dissidents' problems in Russia several years ago.)

After an Olympian sales effort that brought in more than $170,000,000 in sales for the 152 hours of coverage spanning July 19 to Aug. 3, NBC now must scramble for replacement fare without "going overboard" and advancing titles that might help in the fall Nielsen wars, some sources noted.

The "skeleton plan" NBC unofficially is giving inquiring agencies for the 67 hours of prime time Olympics substitutes calls for regular programing in the 8 p.m.-to-9 p.m. slot and movies and first-run long-form fare every night after 9 p.m. No titles are mentioned as definite.

CBS' Daly looks to fall with confidence

By COLBY COATES

NEW YORK—CBS Entertainment president Bob Daly plans two ratings victory parties this week. Then it's back to the screening room to resume the nonstop dash to May 1, the day CBS unveils next fall's prime time schedule.

Going into the final weekend with a razor-thin ratings lead, Mr. Daly last week suggested that "whatever the manner of judging, we've taken the position that we've won. We overcame the World Series, the Olympics, everything they threw against us."

At this point, CBS' top programer claims to have a better notion of who shot "Dallas" bad guy J.R. Ewing than the new schedule's makeup.

"We're at least a week away from having any strong feelings about the new schedule," he said. "Most of the pilots of our new properties are just being delivered now. Although we're very encouraged with much of what we know about the new properties, we haven't reached the point of pulling the schedule together."

▪ So while there are plenty of question marks about the 40 or so projects that are fall candidates (but have still to face any kind of prime time test), there is no confusion about the strategy CBS will employ next fall.

"I've become a firm believer in nurturing the viewing habit. I just don't think it's healthy if the viewer has to keep going back to a tv listing to find out what's on," he continued. "I can't say that our big nights (Sunday, Monday and Friday) will stay exactly intact, but the likelihood is that they will."

Although looking to "strengthen" Tuesday and Wednesday lineups, Mr. Daly ruled out any major shuffling "that would break up our present strength." Likewise, the CBS exec promises to resist further sweeping changes once ABC and NBC release their schedules, pledging not to "rip our schedule apart."

Even though Mr. Daly has been an advocate of a less rigid new show introductory process—and has even posed the possibility of premiering new programs either in late summer or after the baseball playoffs and World Series—upcoming plans depend on how many new programs are taped and how many are on film. Moreover, deep

Mello Yello closing on Pepsi entry

ATLANTA—The next major marketing battle between archrivals Coca-Cola Co. and Pepsi-Cola is breaking out on the citrus-flavor drink front as Coca-Cola rolls out Mello Yello into more than 50% of the country by next month.

David Reddick, national brand manager for Mello Yello, said he expects his brand to overtake Pepsi's Mountain Dew by the end of this year.

He said the brand, touted as the "world's fastest soft drink" in advertising, ended 1979 with a 0.6% market share despite its limited distribution. If it had been national, its share would have been 2%, compared with the 2.4% share chalked up by Mountain Dew, according to Mr. Reddick.

In one major new market, New York, advertising begins running at a $20,000,000 annual national rate this week after some limited airing of tv spots during the last two weeks. In addition to commercials that ran in other markets earlier, Coca-Cola has filmed new spots showing athletes in a Mello Yello chugging contest.

Special ads have also been created for major markets. For example, transit and outdoor ads in New York note, "You've gotta be fast to make it in New York." McDonald & Little is the Mello Yello agency. BBDO handles the Pepsi entry. #

Gillette puts Swivel into razor warfare

By LOUIS A. FANELLI

ANDOVER, MASS.—Gillette Co. will mount major advertising drives for a disposable razor called Swivel and a self-adjusting shampoo called Silkience this year.

Swivel, a pivoting-head, disposable razor patterned after Gillette's highly successful Atra razor, will make its debut during the July 8 All-Star baseball game. For the introductory period, Gillette will be spending at an $11,000,000 annual rate for Swivel. Benton & Bowles, New York, handles Swivel; the agency already has Gillette's disposable Good News! razor.

Silkience shampoo (AA, Dec. 31) follows the tresses of Silkience conditioner, which was introduced last year by Gillette's personal care division. Gillette will spend $19,000,000 in promotion and another $10,000,000 in advertising when its Silkience shampoo campaign breaks June 30. That's the biggest budget ever for a shampoo in Gillette's history. Advertising to Women, New York, handles the Silkience line.

The new shampoo is called self-adjusting because it's formulated to clean hair where cleaning is needed and condition where hair is dry.

▪ Promotional plans of both products were revealed by Gillette at its annual meeting here last week.

Swivel marks Gillette's third entry into the men's disposable razor field. It joins Good News!, the largest-selling disposable, and the Gillette Single Blade disposable, still in test markets.

The newest razor is expected to retail for between 59¢ and 75¢ for two razors. It will compete in the double-blade disposable category with Warner-Lambert's Schick Ultrex, recently introduced, and Gillette's own Good News!. Bic Corp., Gillette's chief competitor in the disposable field, markets a single-blade disposable that sells for about 19¢.

During its introductory period, Swivel's purchasers will be offered a full money-back refund and a 15¢ coupon for the next purchase.

Some observers have suggested that the money-back offer may

GROCERY MARKETING

Carting the supermarket into the '80s

BY THEODORE J. GAGE

CHICAGO—Some experts have said the "superstore" will characterize the grocery business during the 1980s. Others say box and warehouse stores are the wave of the future. Still others disagree, saying the standard full-service grocery store will continue to dominate.

As the supermarket industry celebrates its 50th anniversary in 1980, it faces a cornucopia of questions about its future.

"Until recently, there was a widespread feeling that superstores and box stores were the way to go," says Henry Jicha, a grocery specialist with Bache, Halsey, Stuart, Shields, New York. "Today, there's more of a feeling that any number of formats are valid. It's just a matter of deciding the right kind of store to fit a particular location."

Although retailers in this $206 billion industry have one common goal—making a profit—they are taking a number of paths toward achieving that goal.

The options

During the past few years, there has been heavy speculation that superstores would dominate grocery marketing in the coming decade. Generally speaking, the industry defines a superstore as having more than 30,000 sq. ft. of selling area, weekly sales that exceed $120,000 and 30% or more of the selling space devoted to nonfood items, or general merchandise.

Superstores offer a number of advantages to the consumer and store owner. For the customer, a large store with items ranging from imported cheeses to ironing boards offers the possibility of one-stop shopping. That means added convenience and less gasoline consumption. If the store, because of its high volume, can offer bargain prices, so much the better for consumers.

▪ For the retailers, superstores can mean increased profits. Statistics show that overhead does not increase proportionally to increases in a store's selling area. Also, superstores sell more general merchandise than conventional grocery stores, and general merchandise has a higher profit margin than food items.

Those factors combine to give superstores a profit advantage. In 1978, they had an average of $6.11 in sales per square foot, compared with the conventional stores' $5.64, according to the Food Marketing Institute, Washington.

In most cases, companies that make a commitment to superstores design and build their facilities—as opposed to buying and redesigning an existing facility—in suburban or low population density areas. They often stand as the major food retailing outlet in a five to 10-mile radius.

Using the superstores' increased volume and variety, retailers hope to get a bigger percentage of the customer's dollar. They also count on the nonfood items to create better profit margins for the entire outlet. But there are other ways retailers can increase profitability.

▪ "The quest people have been on is to maximize sales per square toot," says Robert Wunderle, economist and vp-public affairs with Supermarkets General Corp., Wood-

Marketing mix adds a pitch to food editors

BY CAROL GALGINAITIS

CHICAGO—Take one overworked food editor, add a generous helping of culinary conscious readers; set aside. Gather myriad corporate-based recipes and feature stories; separate brand names from copy. Discard former, toss latter with reserved editor and readers; mix well. Release on Wednesday night.

The resulting Thursday food section will be one of the most heavily read parts of the newspaper, a fact not lost on marketers. Many of their execs are well aware of the publicity they will garner from, for instance, a recipe built around fresh citrus or frozen spinach.

▪ The companies, therefore, provide editors with a vast array of material ranging from recipes and press releases to background data and free samples.

But how do the editors respond to this barrage of literature? Do their silent vetoes affect subsequent offerings? Are some approaches more popular with editors, and thus more effective from the marketer's advertising point of view?

To the marketer trying to answer these questions, recipe campaigns seem to offer many advantages. They appeal to consumers, they aid the overworked, understaffed food editors, they can be tied to seasonal promotions and they occasionally offer the chance for brand name identification.

"Women today look for convenience but still want to do something on their own," explains Mary Lynn Coyle, public relations manager of The Kitchens of Sara Lee, Deerfield, Ill. "So we develop recipes using our products to which people can add their own finishing touches. For instance, we have a recipe for turning a cheesecake into a fruit flan. We try to look for

bridge, N.J. "There are a couple of ways to do that."

The first, he explains, is to build a large store and attempt to attract a bigger percentage of the shopper's dollars. The second, which is completely opposite to the superstore concept, is to sell only a limited amount of goods and to cut out extras such as meat, produce and frozen food sections. These outlets, called box stores, limited assortment or warehouse stores, usually have far fewer employes than conventional supermarkets, carry a smaller assortment of items and display the items in their cut-away shipping cartons instead of on shelves.

The box store increases its profits by cutting down significantly on overhead, especially wages.

Box stores, moreover, are easy to start and can turn a profit with relatively low sales volume. Whereas conventional grocery stores may need $110,000 sales per week and superstores need more than $150,000 sales per week to make a profit, industry experts say box or no-frills stores can turn a profit with sales as low as $20,000 a week.

A retailer also can open a box store for as little as $50,000, according to industry estimates, while it may take $500,000 or more to open a conventional supermarket and at least $1,000,000 to open a superstore.

"You can take out a short-term lease on a building, spruce it up a little, stock it with boxed items and start selling," says Fredrick W. Kopf, a retail investment analyst with Dean, Witter, Reynolds, New York. "If it works, great. If it doesn't work, you retreat and lick your wounds without taking much of a financial loss."

The choices

Bargain stores and superstores have helped revolutionize the grocery business during the 1970s. Conventional supermarkets, of course, still dominate the industry. But as energy costs and inflation threaten to steal away dollars once reserved for the weekly food budget, retailers are looking at every marketing alternative. Which one should they choose? That depends on corporate philosophy, store location and available capital.

"We are committed to superstores," says Peter Magowan, chief executive officer of Safeway Stores, Oakland, Cal., the nation's largest food chain. "This is the right philosophy in an era of gasoline lines and working wives."

Safeway has made a strong move toward the superstore concept. Although the number of Safeway stores has remained near 2,000 for the past few years, the average square footage per store has increased.

In 1978, Safeway had 26 superstores—by the company's definition, stores with at least 35,000 sq. ft. and a minimum of 1,100 lineal ft. of grocery items and 600 lineal ft. of nonfood items. Today, the company operates 350 superstores, and a Safeway exec says the majority of its 140 stores to be built in 1980 will be superstores.

- Another chain following the same line is Supermarkets General. Its 114 Pathmark supermarkets, located on the Eastern Seaboard, are all superstores, as will be 10 new outlets planned for 1980.

Pathmark, like many other chains that have adopted the superstore format, got into it by acquiring a drugstore chain in 1964. Safeway and Lucky Stores, Dublin, Cal., both acquired drugstore chains and consequently offered more nonfood items.

"Food chains were big on acquisitions and diversification in the early and mid-1970s," said one industry executive. "Some came out all right; others failed miserably. Jewel didn't succeed with its Turnstyle stores, and Kroger failed at making the superstore concept work eight years ago because it didn't have enough people who knew how to market general merchandise. Today, Kroger is succeeding with nonfood sales, even though it hasn't acquired anybody, because it has brought in people who know how to market general merchandise."

Grocery chains, agree industry officials, have indeed become much more sophisticated in marketing techniques during the past few years. "You can sell appliances, auto products and so on in a supermarket," says Mr. Kopf of Dean Witter. "But you have to be competitive on price, display it properly, make sure it gets sold properly and provide service if it breaks. You can't just put this stuff on a shelf and expect it to walk off by itself.

Yet, although many of the major chains have at least dabbled in the superstore format, there are some

1980s supermarket? Trends are unclear

(Continued from Page S-53)

notable exceptions.

The prime example is Winn Dixie stores, Jacksonville, Fla., one of the nation's largest grocery chains. None of Winn Dixie's 1,200 outlets stocks a significant number of nonfood items, other than such standard household items as sponges, work gloves and car wax. The chain's largest store, moreover, is only 30,000 sq. ft.

■ "We are running the kind of stores we know best," says B.L. Thomas, president of Winn Dixie stores. "We are in the food business, and we have plenty of room to improve that without worrying about anything else."

So, while analysts may have spent the 1970s trying to decide which trend would revolutionize the grocery marketing business, they may spend the 1980s trying to figure out what company will lean toward which format and why.

"Clearly, there is a trend to build larger supermarkets with increased amounts of nonfood merchandise," says Robert J. Schweich, vp-research with Wertheim & Co., New York, brokers. "Moreover, some large entities like Winn Dixie are sticking primarily to the store format, emphasizing traditional supermarket items, including more limited amounts of nonfood items."

Or, in other words, Mr. Schweich says, "there are no clearcut trends anymore." The percentage of superstores and limited assortment outlets may increase in proportion to the total number of supermarkets, but they may never grab 40% of the grocery market, as some industry officials predict.

An increasingly popular move—especially with new construction costs skyrocketing and financing either unavailable or at 20% interest rates—is to refurbish existing stores.

"Dumping existing stores in favor of building new superstores used to be an easy move," says an executive with a major grocery chain. "But when we need to borrow a million bucks and 23% interest stares us in the face, we think two or three times about building."

Such talk of the economy brings to mind the box store alternative, and suggests that a worsening economy might give that a push.

■ "The superstore has a greater ability to satisfy the customer's everyday needs," says Willard Bishop, president of Willard Bishop Consulting Economists, Barrington, Ill.

But he says there has been "no great clamor for one-stop shopping, even with the gas crisis."

Because superstores need a large site, they are usually located away from populated areas. "Would a consumer rather drive 16 miles to one big store or make four trips of four miles and get the chance to shop for the best price at a variety of stores?" he asks.

The box store is attractive, he explains, because it can be located in heavily populated areas and offer lower prices to cost-conscious shoppers who don't mind going elsewhere to buy produce, meat and dairy products. He doesn't agree with the widely held opinion that box stores can succeed only in suburban areas with shoppers who can lay out $200 each trip to realize a $15 or $20 savings.

"Contrary to what some analysts say, box stores tried in the city have been very successful," he says. "Consumers don't have to buy big volume to know they're saving money."

Many chains have adopted this no-frills concept. Great Atlantic & Pacific Tea Co., Montvale, N.J., opened its first limited assortment store—Plus Discount Foods—in August, and plans to have 100 open by the end of 1980. They are moderate in size, averaging 9,000 sq. ft. of sales space.

Jewel Cos. discount-style outlets, called Jewel T, carry a limited assortment of items at low prices. Jewel, Melrose Park, Ill., is also experimenting with no-frills stores different from the Jewel T stores. Five of them now being tested in the Chicago area have no frozen foods or fresh meat and require customers to bag groceries, but they do have produce and dairy sections.

The outlook

The 1980s will call for some astute planning by supermarket chain execs. "There will be no easy way to increase profitability," says analyst Mr. Kopf. "A company will have to examine every store and every location to find just the right formula."

In some locations, he explains, a conventional supermarket, backed up by aggressive advertis-

ing, spruced up with redecorating and bolstered by outstanding service, may be the answer. In other locations, consumers may respond most favorably to stores that promote a cut-rate image and offer cut-rate prices.

"There's little doubt that competition for the consumer's attention and dollars will get more and more fierce—particularly if inflation continues at its present rate," says Alex Wilson, general manager of Dansico Associates, a marketing/promotion company with a number of food industry clients. "Superstores and limited assortment stores have their ways to get a competitive edge—the very nature of their formats appeals to certain market segments. We're trying to give conventional supermarket chains a competitive edge through effective marketing."

In analyzing the current state of grocery marketing, Mr. Schweich of Wertheim & Co. agrees that strong merchandising efforts by conventional supermarkets could keep them from losing out to the alternative stores.

"There is some evidence that the large, well managed supermarket chains have developed effective competitive merchandising measures," he says. "This might preclude the rapid, sustained expansion of these [alternative] formats."

Some of the merchandising techniques include games, copper cookware, intrastore stamp redemption that rewards consumers for their loyalty by giving them discounted food items when they present a certain number of stamps and aggressive advertising that emphasizes a store's service and selection.

Point of purchase advertising may also play a key role in keeping conventional supermarkets healthy. Attractive floor and shelf point of purchase displays that are easy to assemble should become increasingly popular among store managers, says Howard Stumpf, president of the Point Of Purchase Advertising Institute (POPAI), New York. "Self-contained sales units let store managers cut down on the amount of time and manpower they might otherwise need to arrange shelf displays and so on," he explains.

■ Although POPAI has a vested interest in promoting point of purchase items, industry observers agree that p.o.p. will play a major role.

"Box stores and the like may be great," said one company executive, "but people are still going to have to go to a regular store for milk, meat, frozen foods and produce. There's still a very big place for conventional stores, and how well they do depends on how well they advertise and what they do with the customer once she's in the store."

As one analyst puts it: "Inflation and zooming energy prices have cast a cloud over the entire industry. Anyone who claims to know the future of the grocery business is lying."

But one or two conclusions are obvious. The supermarket industry will become increasingly segmented, with a variety of format stores to appeal to various consumer needs and wants. And strong merchandising efforts will be crucial to the success of any supermarket or chain, no matter what formats they use. #

Bread supplies meals — and the messages

BY HENRY R. BERNSTEIN

DALLAS—The average consumer may not attempt to eat the morning newspaper for breakfast or last week's news magazine for dinner, but there is a medium that's made to be eaten, is tasty and right with any meal. It's bread.

The bakers across the country—not unlike publishers, broadcasters and other members of "the media"—are always working to improve their product to attract both consumers and advertisers.

While a publisher may worry about pictures being off register and a broadcaster may worry about the quality of a signal, the baker has the problem coupons, which are printed in dull, bland colors (approved by the Food & Drug Administration) and may get crumpled and be partially hidden in the bread bag.

■ A new Dallas company, Target Group, hopes to solve bread's media problems with Vu-Pak, a packaging method developed by its parent company, Glopak Industries of Montreal, Canada.

Target Group's Lee Pearlman, who, along with A. Leonard Goffman, has been traveling the country preaching the virtues of his company's product to both bakers and advertisers, admits unabashedly that he considers Vu-Pak "to be the Cadillac of couponing."

Vu-Pak offers a "new method of fixing a coupon in permanent position inside a bread bag," he explained. The coupon can be removed without destroying the bag, which is good for the baker and the consumer, and it can be seen from outside the bag. "That means lots of impressions for the couponer," he said.

Bakeries now use equipment to blow a coupon into a bag. "The problem with that method is that it's not 100% accurate. Some bags will end up without coupons—and the method slows down the automated packaging process. We will be far more accurate, and the bakeries will get the bags with the coupons already inside," he said.

■ Target Group is aiming for a summer launch of its program, offering a weekly drop of 6,500,000 digest-size coupon pages through participating bakeries. The program offers only 104 positions a year—one coupon on each side of the digest size page—per market. "We are the antithesis of coupon clutter," Mr. Pearlman said. A major objective of using the page, which is folded, is to get the impact of a full page ad with the coupon.

Because the coupon page is enclosed within its own pouch inside the bread bag, the page does not come in contact with the bread. For the advertiser, this Vu-Pack feature means bright inks can be used in the ad printing to achieve magazine quality. By contrast, standard blow-in coupons, because they come in contact with the bread, must be printed with the duller FDA-approved inks.

Almost everyone seems to know someone who is dieting these days, and dieters often talk about cutting back on bread. In an atmosphere like that, why would an advertiser want to put his money in a bread bag? To Mr. Pearlman the answer is simple.

Although bread news hasn't been all good in recent years, there seems to be no reason to call bread a dead medium. "Bread targets your market and it is the third most frequently purchased item in the supermarket," he said. "Bread is purchased and consumed fresh. The person buying today is likely to be back within a week buying another loaf.

"We reach the markets because bread goes into practically every home in the country, including rural areas not served by Sunday newspapers."

■ It's no secret to anyone who has visited a supermarket bread section in recent years that the medium has been converting from a traditional plain white to color. It reflects the fact that per capita consumption of white bread has been declining for several years and that to some extent the decline has been offset by increasing consumption of variety breads, buns and muffins.

The total retail value of bakery goods is estimated by *Bakery Pro-*

Henry R. Bernstein is an ADVERTISING AGE *senior editor based in Dallas.*

The hot dog market

(Continued from Page S-43)

A more underlying problem is cited by Pat Ciez, vp-marketing and sales, Peter Eckrich & Sons, Fort Wayne, Ind. Mr. Ciez points out that many homemakers worry about just how nutritionally adequate hot dogs are and about the kind of preservatives and meat that go into them. This concern, which sparked much controversy in 1972 after the appearance of critical articles in "Consumer Reports" and *Life*, appears to be increasing again.

■ "When you talk about hot dogs to the consumer, his impression is not where we like it to be," said Mr. Ciez. "He does not see them as being that nutritious a product for the family. But when you get into specific brands, that kind of changes things around. Consumers do trust certain brands of hot dogs as having better ingredients than others."

He said the company has attempted to bolster a good image by appearing on a number of tv shows trying to present a story for the processed meat industry, not just Peter Eckrich.

"We've just been working on extensive media tours in which we covered a number of markets," he added. "We've conducted surveys in given markets to determine what kind of information and perception consumers had of products *vs.* what the facts were.

"Beyond that, we've gone to nutritional labeling on all of our hot dog packages. We've also gone to considerable length in our tv advertising to communicate quality about our hot dog. We are very concerned about communicating, 'Hey, these hot dogs are good. They're good tasting and they don't have bad stuff in them.' "

■ Eckrich puts out all meat and beef franks in 12 and 16-oz. packages. They are marketed in the Midwest, Southeast and Southwest and eventually will be distributed nationally. More than 90% of Eckrich's advertising budget is in tv, with the rest in radio and print.

"It's anywhere from 3% in a new market to 35% in some markets where we've been doing business for some time," said Mr. Ciez. "In many Indiana markets we're up in the 30s."

One of the company's main concerns is its competitors' increasing use of poultry in hot dogs.

"They have not affected us, at

duction & Marketing at $17 billion. Of that total, an estimated 8% is sales at the growing number of instore supermarket bakeries, which bake on premises. The publication estimates that the instore bakery percentage of the total retail volume of bakery goods will probably double in the next five years.

At the instore bakeries, an estimated 35% of the sales are for bread and rolls, 35% represent cake sales, 15% doughnuts and 15% sweet goods, including cookies and pie.

In sheer tonnage, America is continuing to eat plenty of bakery products. Using figures from the Census of Manufacturers of the Department of Commerce, *Bakery Production & Marketing* projects that total bakery foods will reach 24.7 billion lbs. in 1982, up from 23.5 billion lbs. in 1977 and 22.8 billion lbs. in 1972. The publication projects that total bread and rolls will hit 15.4 billion lbs. in 1982, up from 14.9 billion lbs. in 1977 and 14.8 billion lbs. in 1972.

▪ As a part of the total bread and roll tonnage, white bread—continuing its trend—is projected by the publication to hit 5.7 billion lbs. in 1982, down from 6.7 billion lbs. in 1977 and 8.6 billion lbs. in 1972. At the same time, variety breads (not including hearth bread) are projected to hit 2.6 billion lbs. in 1982, up from 2.0 bilion lbs. in 1977 and 1.5 billion lbs. in 1972.

The "hot 'n' ham" market, otherwise known as hot dog and hamburger bun business, is projected to hit 3 billion lbs. in 1982, up from 2.6 billion lbs. in 1977 and 2.3 billion lbs. in 1972. (There are said to be 20 plants across the U.S. that make a single product—buns for McDonald's hamburgers.)

The hard crust hearth breads and rolls which include Italian and French bread, is projected to hit 2.6 billion lbs. in 1982, up from 2 billion lbs. in 1977 and 1.1 billion lbs. in 1972.

Championship race driver Cale Yarborough appears in commercials for Campbell-Taggart bread.

A subcategory of this group, brown and serve rolls, has apparently been losing ground in the marketplace to variety bread and is projected by the publication to hit 185,000,000 lbs. in 1982, down from 264,000,000 lbs. in 1977 and 376,000,000 lbs. in 1972.

▪ Meanwhile, in the highly competitive and very regional bread business, according to U.S. government figures, there were 3,062 wholesale baking plants in the U.S. in 1977, most of them small. *Milling & Baking News*, in its Baking Directory, lists only 781 plants with more than $1,000,000 in annual sales.

In an effort to keep up with apparently changing consumer inter-

(Continued on Page S-46)

---

this point," Mr. Ciez said. "They represent 6% to 10% of the business. They're sold primarily because of the price. That's a good price point for shoppers interested in buying less expensive hot dogs."

From a food service point of view, meanwhile, the market is in "real good shape," says Larry Dessyn, products manager at Dubuque Packing Co., Dubuque, Ia.

▪ The cost of hot dogs, compared with other types of sandwiches, and the ease of their preparation are advantages for this segment of the industry.

"These are the things we try to utilize every day as sales tools when we're trying to get people to put hot dogs on their menu," said Mr. Dessyn. "They're a terrific standby for any kind of restaurant or fast-food operation."

Dubuque markets meat and beef hot dogs but has done some tests with chicken.

Dubuque is also trying a new strategy through its "Super Mex Dog." "Mexican food," Mr. Dessyn said, "gives us another beautiful outlet for sales of hot dogs. I've had some positive comments from a couple of research departments, and I think someone will, if they go on with this, try to use a smaller hot dog to keep the total cost down. It shows a lot of potential to me."

Mr. Dessyn's version of the Super Mex is a quarter pound hot dog inserted in a folded burrito shell. It is topped with taco meat, lettuce, tomatoes, cheese and hot sauce.

▪ For its part, Armour & Co., Phoenix, is—for the first time in its history—taking a new road in its marketing attack: It is sponsoring network tv specials. The first came last month with the Bob Hope special.

"In the past we have done network tv advertising," said Kathy Meell, director of media relations. "But for these specials we have a 90-second corporate commercial about our entire food product line.

"We also do point of purchase, newspaper couponing, spot tv and radio for our hot dogs."

One point of purchase promotion in January was a knitted cap and scarf for $4.95 and two proofs of purchase of any size Armour Star hot dogs. "Usually there is something else around the Fourth of July but it is still undecided as to what it will be," said Ms. Meell.

Americans and hot dogs have had a love affair for years and this apparently won't abate much, if at all. Good products brought in at both the premium and regular price ends will keep this alive. The major concern is the higher prices the consumer must pay, but comparing this to other meat products, hot dogs are a bargain. And they are still doggone good eating. #

We Deliver Houston On Thursdays

Food Today
Peppers: when they're hot, they're HOT!

- 117,000 Homemakers
- 346,000 women
- 172,000 adults in homes with incomes of $35,000 or more
- 239,000 adults clipping newspaper coupons
- 648,000 adults who shopped for groceries in the past month.

We delivered over 18,000 contest entries from a single Thursday issue of our FOOD TODAY.

We deliver Houston everyday so well that The Post is the fastest growing metropolitan newspaper in the United States.

We'll deliver for you, too.

Bread, baked products still American favorites

(Continued from Page S-45)

ests, bakeries have been willing to try new ideas for expanding the market. Because of the growth of variety breads during the 1970s, *Bakery Production & Marketing*, in a 1978 survey, zeroed in on that segment of the business and found that more than three-quarters of the bakeries produced one or more types of variety breads and had plans to introduce more.

Whole wheat is the most popular variety nationally, with raisin bread running second in most parts of the country. Preferences differ by region, however. For example, in the 1978 survey, cracked wheat was baked by almost 68% of the bakeries in the western states, ranking third in popularity. But cracked wheat didn't make the top six among bakeries in the Northeast and South. Franchise variety breads were found to be produced by 45% of the bakeries, with Roman Meal the most widely franchised, followed by Hollywood.

In the early 1970s, as Americans went on a health kick that called for more fiber in the diet, bakeries responded with high fiber variety breads. For a few years, fiber breads looked as if they would be the greatest development in the business since sliced bread and by 1978 they were the sixth most popular variety bread.

> "People buy (bread) for taste, not health. That's why fiber bread hasn't taken off."

■ What some saw as the promise for fiber bread, however, did not develop, and 1978 proved to be something of a peak year. Commented one industry observer: "It's never been more than just another variety bread." Commented another: "People buy for taste, not health. That's why fiber bread hasn't taken off."

It isn't known whether a well publicized squabble between the federal government and ITT Continental Baking Co., Rye, N.Y., over Fresh Horizons, the leading fiber product, might have dampened consumer interest in the category. After its introduction in 1976, Fresh Horizons, with strong ad support, rose to the top in the category and has remained there despite the fights with the government.

In March, 1979, ITT Continental agreed to Federal Trade Commission demands that Fresh Horizons ads disclose that its highly promoted fiber content comes from wood or the pulp of trees. Before the agreement with the FTC, the Food & Drug Administration required the addition of the term "special formula" to the labeling because Fresh Horizons did not meet the standard definition of a bread product.

Elsewhere, as part of the push to keep up with consumers in the 1970s, bakers added yogurt bread to supermarket shelves. Then last year, Mrs. Baird's Bakeries, Fort Worth, Tex., began testing the first use of processed cottonseed kernels in a bread, ProTeina. The product continues to be available in supermarkets served by Mrs. Baird's, but ad support has been suspended. The product is believed to have suffered from both a lack of strong, sustained ad support and pricing problems.

■ When ProTeina, a franchised bread from Feuer Food Products, Northfield, Ill., was launched with newspaper, radio and point-of-sale advertising, the strength of Mrs. Baird's in Texas, and the ability of company president and on-camera spokesman R. Vernon Baird to move its products, suggested that consumers would snap up ProTeina if Mr. Baird would feature it in one of his tv spots. But Mr. Baird didn't make the spot. ProTeina was launched as a premium price bread, but the price rapidly escalated, breaking the $1 barrier.

While bakers have been trying new products, an old product—English muffins—is enjoying the growing interest in variety breads. At S.B. Thomas, subsidiary of CPC International, the major product is English muffins, delivered fresh daily. Dick Zuver, director of marketing, wouldn't disclose research figures, but admits the market has been "growing quite rapidly over the past decade."

■ As the market grows, so do the ways people serve muffins. The Thomas company, Totowa, N.J., has at times advertised various serving suggestions, but the product remains primarily a breakfast item. Current Thomas advertising—on television—suggests "Thomas tastes better than toast."

English muffin preferences—like preferences for other bread products—vary by region. But the basic regular flavor continues to hold a lion's share of the business. #

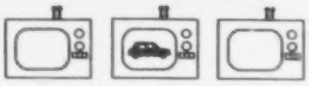
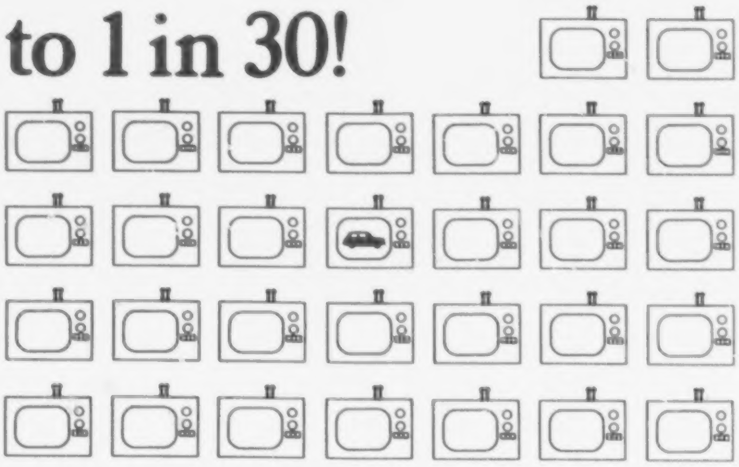
The chance of having your product seen by Tulsa TV viewers has dropped from 1 in 3



to 1 in 30!



When cable TV came to Tulsa, it was good news for the viewer, but bad news for TV advertisers. Suddenly, the chance to expose your advertising message to a viewer was divided among thirty stations.

If you want prime, unfragmented exposure to over a half-million people in the Tulsa area, advertise in the Tulsa World and The Tulsa Tribune.

Atlanta up 14.7% in spot tv $

By MAURINE CHRISTOPHER

NEW YORK—Atlanta evidenced the greatest strength in spot tv prices in the April SQAD analysis of prime time buying on affiliates in the top 20 markets. Nine other markets also registered double-digit gains over 1979 levels.

In Atlanta, buys on affiliates were averaging an $86 cost per household rating point—a hike of 14.7% over April 1, 1979. Next in line in terms of increases were: Tampa, 13.2%; Miami, 13.1%, and Baltimore, 12.5%.

This monthly budget and buying guide covers the country's 51 largest markets. It is based on schedules placed by 14 major ad agencies through March 28.

Subscribers also get a budget planner offering projected cpps for 200 markets for the next six quarters. The estimates are broken down for various time periods.

Marvin Richfield, president of Spot Quotations & Data, noted that prime prices in the largest cities continued to show seasonal increases but not on the same "dramatic scale" as in the last mid-March report.

In the No. 1 market, New York, he saw the transit strike affecting retail advertising slightly. However, he pointed out that most major stores have suburban branches within the viewing area, and retailers reportedly plan to advertise heavily to get customers back in once the buses and subways are running again.

Late news in this city—and lots of people certainly weren't getting home in time for the early news—continued to climb. Estimates there ranged from $240 for April to $243 for May.

And ABC's new late night newscast continued to boost the rates for spot fringe periods following the show, Mr. Richfield said. The newscast itself carries some spot availabilities for local sale.

- Random late news cpps for other cities in April and May include: Los Angeles—$162, April, and $163, May; Chicago—$141 and $145; Boston—$130 and $131; Philadelphia—$121 and $123; San Francisco—$120 and $121; Dallas—$91 and $93; Houston—$82 and $83; Baltimore—$64 and $65, and San Diego—$47 and $48.

Next to New York, late fringe was commanding the highest fees in April in Los Angeles at $120; Boston, $108; Philadelphia, $107; San Francisco, $96; Chicago, $85, and Detroit, $68.

Mr. Richfield characterized the second quarter as "looking normally strong." Some second quarter prime time estimated cpps in markets below the top 20 are: Denver, $76; Hartford, $69; Sacramento, $60; Phoenix, $59; Portland, Ore., $53; Buffalo, $48, and Cincinnati, $46. Affiliates are included in all these estimates; independent stations are excluded from day and prime time breakouts. #

April 'street' prices for spot tv on net affiliates

Average cost per household rating point for 30-second spot

Nielsen market rank	Prime time '80 vs. '79
1. New York	$348 (+ 7.7%)
2. Los Angeles	276 (+ 7.4%)
3. Chicago	203 (+ 9.1%)
4. Philadelphia	149 (+ 8%)
5. San Francisco	166 (+ 5.7%)
6. Boston	158 (+10.5%)
7. Detroit	123 (+11.8%)

What we do best is what you need most: accurate research at a reasonable cost.

Research is useful only if it is accurate. That's why RICI centralizes all research functions in one location. Centralization allows RICI tighter control and direct supervision over the entire research process. The result is consistently accurate research without the "breakdown of communication" problems often found in non-centralized systems. Centralization also gives RICI an efficiency advantage that, in many cases, can translate into lower costs for you.

For more information, contact Hilda Barnes, Mary Ann May, Tom Mohl, Robert Snider, or John Uhles (602) 248-5430.

C-P sets $49 million for Fresh Start

By NANCY GIGES

NEW YORK—Colgate-Palmolive's decision to invest $49,000,000 in advertising and promotion for the national launch of Fresh Start laundry detergent is indicative of new management's contention that the company's future lies in its traditional businesses.

Following the annual meeting here last week, Keith Crane, who added the title of chairman to that of president and chief executive officer, reiterated his philosophy that "we must spend time against basics." He told stockholders this means a revival of the "dynamics of the basic fundamentals that made this company great, [including] attention to product quality, to better creative media advertising and much more of it, attention to better selling and distribution methods, attention to business-building programs and area marketing." Last year media spending worldwide rose 9% to $273,000,000.

■ According to Colgate, Fresh Start is getting the biggest introductory budget in company history. Of the total, $19,000,000 is going into advertising and the remainder into promotion.

A company spokeswoman noted that the heavy promotion budget is "designed to generate immediate consumer trial to capitalize on the brand's extremely high conversion rate." In recent expansion areas, the brand has attained a share that puts Fresh Start among the leaders, the spokeswoman noted.

Colgate-Palmolive restructures to follow trend to less internal competition among brand managers. Exclusive report, Page 88.

The brand, which previously was in 60% of the country, is exceeding a 5% market share in many areas, making it Colgate's biggest selling heavy-duty detergent. Nationally, the market totals $1.8 billion.

In older markets, a Kenyon & Eckhardt-created campaign has just replaced introductory advertising. New commercials open with a song, "Start the day fresh, America, get a Fresh Start every day." Morning scenes involving fabrics include a man donning a t-shirt, a woman getting out a tablecloth. An announcer notes, "Now you don't have to wake up to the same gray dingy clothes. Fresh Start combines the best of powders and liquids to clean the gray even the leading detergent leaves behind."

Fresh Start is the first one-quarter cup concentrated granular detergent. It is packaged in a clear hard plastic bottle.

■ Commenting on Colgate's divestiture efforts, Mr. Crane expressed hope that he can soon announce the sale of its Helena Rubinstein subsidiary. Other companies that do not fit into Colgate's plan and have been or are being divested are Ram Golf, Leach Racquetball, Lum's and Ranch House Restaurants and Hebrew National. #

New FTC plan

President keeps kid tv issue alive

WASHINGTON—President Carter's personal intervention apparently has broken the deadlock over the future of the Federal Trade Commission.

The compromise reached suspends rulemaking on "unfair" ads for three years, but leaves a spark of life in the commission's children's tv rule.

Negotiators from the House and Senate were rushing toward the draft of a "final" bill last weekend after an Oval Office meeting where the President warned that he would not sign any bill that terminates ongoing FTC proceedings. Both congressional negotiating teams indicate agreement on a formula likely to be acceptable to the President, and there were predictions that the issues would be resolved before FTC runs out of operating funds April 30, barring a floor fight in either House.

■ The big battle over Congress' right to veto FTC rules apparently was resolved, with all groups accepting last week's Senate team proposal for a two-house veto procedure (AA, April 21). Rep. Elliott Levitas (D., Ga.), who led the fight for a one-house veto, indicates he will accept the two-house alternative "if it includes expedited procedures" that assure that veto motions are not locked in committee.

Another key compromise apparently involved the future of FTC's power to issue rules regulating advertising on the basis of "fairness" as well as the future of the children's ad rule. Ad industry groups, alarmed by FTC's attack on advertising addressed to chil-

Ugly duckling fable with a new twist

A duck that was different from all the other ducks is taken home to the refrigerator in this tv "fable" from Carling National Breweries promoting its Red Grape and Apple Malt Duck. Campaign began April 21 in Greensboro, N.C., and moves to New York, Philadelphia and Tallahassee this week. Other markets will be added later. Agency is W.B. Doner & Co., Baltimore.

Life Savers tries saccharin gum

By NANCY GIGES

NEW YORK—Life Savers Inc. is aiming to breathe new life into the declining sugarless gum market by introducing what it terms a better-tasting entry called Supradent.

The move comes on the heels of a thrust in the sugarless candy/-mint market, which Life Savers' senior vp-marketing Lawrence K. Hathaway claims has put his company in the No. 1 slot.

The new gum, available in five flavors, gets its better taste from the use of saccharin as a sweetening agent.

Supradent is the first major entry to return to saccharin, which most companies replaced with manitol and/or sorbitol two years ago, when animal studies indicated potential health risks.

Until that time, the sugar-free gum market had been growing about 25% a year. By the end of 1978, when the switch occurred, unit sales were down about 4%, and last year the market eroded another 14%. Major marketers recognize that the declines are due primarily to the inferior taste of the reformulated gums.

■ Mr. Hathaway said that his company believes consumers want the option of a better-tasting sugarless gum and will buy it despite the warning it must bear: "Use of this product may be hazardous to your health. This product contains saccharin, which has been determined to cause cancer in laboratory animals."

Supradent is now being presented to the trade. A campaign to break this summer has not been finalized, according to Mr. Hathaway. He said several copy approaches are still under consideration, and no decisions have been made on whether the advertising will be comparative.

Since Life Savers already markets the leading sugarless gum—Care*Free, with a 44% share—a comparative effort most likely would name archrival Trident, marketed by Warner-Lambert's

DDB admits Heinz role

NEW YORK—Doyle Dane Bernbach has admitted that it participated in the H. J. Heinz Co. income juggling scheme by "prebilling and issuing bills that did not accurately or adequately describe services performed." In addition, DDB "at times received payment from the client."

The agency, one of eight agencies and marketing consulting companies that are part of Heinz audit committee investigation into improper income management practices, admitted its involvement in a 10-K report filed with the Securities & Exchange Commission.

The income juggling practices reportedly were arranged to assure Heinz U.S.A. managers that they would get their results-related bonuses even in lean times. When they met their goals in one specific period, the operating managers would pre-pay expenses to get a head start on the next period.

When Heinz learned of the practice, it notified the Internal Revenue Service and the SEC, and it asked its audit committee, made

Competitors hit movie tie

Getty cable plan draws fire

By MAURINE CHRISTOPHER

NEW YORK—Despite cries of "price-fixing," "antitrust" and "illegal-cartel," Getty Oil Co. and four top Hollywood movie houses are moving full speed ahead to launch their new pay cable satellite network (AA, April 21).

Negotiating one major obstacle with ease, Getcom Inc., which plans a Jan. 1 start, has leased a transponder on the much fought-over, crowded, No. 1 cable bird, RCA's Satcom I.

The Justice Department said it will investigate anti-trust charges leveled against Getty and its movie associates by the three largest pay cable networks. Their charges will be included as a part of a probe started in 1978 following complaints of excessive dominance in the catv industry by the top programer, Home Box Office, which claims more than 4,000,000 of pay cable's 6,400,000 subscribers.

Ed Taylor, president of Satellite Syndicated Systems, has sublet nighttime on transponder 21 to the newcomers for $5,000,000 a year. This provides him with capital for two uhf subscription tv start ups.

- Mr. Taylor will keep daytime for his advertisers-supported Satellite Program Network, but some SPN shows, such as the upcoming "Women's Channel" and "Video Concert Hall," may have to be shifted to Comstar D-2.

Current pay cable networks' charges of illegality against their prospective rivals stem mainly

ABC, CBS plot fall lineups

By COLBY COATES

NEW YORK—The midnight oil was burning away along network row over the weekend as ABC and CBS entertainment execs strung together next fall's prime time schedules.

NBC executives, however, hied to the West Coast for their planning sessions. The latest word had NBC announcing on May 8.

Honors for being first out of the gate go to ABC, which unveils its schedule this morning at the Waldorf Astoria. Although some agency executives are more interested in seeing the final programing package than knowing just individual program titles, there was a flurry of guessing games late last week. More often than not, the hot program titles noted by one agency were the same ones being talked about elsewhere.

The hottest news about ABC was that "Mork & Mindy" might not return next fall. Reports that star Robin Williams is becoming "too uncontrolable" and is more interested in playing Robin Williams than "Mork" has ABC execs asking whether the ratings will outweigh the grief.

Two movie spin-offs, Paramount's "Foul Play" and Fox' "Breaking Away," were said to be among the strongest contenders for the ABC lineup. With Deborah Raffin and Barry Bostwick starring, the hour "Foul Play" was viewed as either an 8 p.m. or 9 p.m. show, possibly allowing ABC to insert it in a perrenial problem area, 8 p.m. to 9 p.m. Friday or Saturday. "Breaking Away," which some sources had seen as a possible solution to ABC's chronic Sunday 7 p.m. to 8

Nielsen study plays back videocassette data

By JAMES P. FORKAN

NEW YORK—A.C. Nielsen Co.'s new HomeVideo unit, in issuing its first study on videocassette owners, has come up with findings to please and concern those involved in or competing with the vcr business.

Dwight Cosner, assistant to the Nielsen Station Index exec vp, gave ADVERTISING AGE a preview of the report's data before shipping free copies to several thousand NSI and Nielsen Television Index advertiser, agency and station clients this week.

The executive, after formally unveiling the vcr presentation April 28 before the Radio & Television Research Council here, will note that nonclients can obtain the study for "giveaway" prices ranging from $50 (for those buying its pay cable reports) to $200 for most nonsubscribers and $750 for vcr marketers. Other reports on nonbroadcast media such as discs are likely, but "nothing is on the drawing boards," he said.

- Nielsen undertook the project for its own purposes, as well as to help its clientele cope with new technology. Advertisers want to know what effects vcrs may have on commercial exposures; broadcasters worry about impact on viewing patterns, and Nielsen wants to be sure its own methodology keeps up with changing technology, Mr. Cosner explained.

"There are lots of implications on our future methodology," Mr. Cosner said. Nielsen some day may issue special diaries to vcr homes to learn audience composition for shows played back after taping off the air. "The meters accurately record time and duration of off-air recording and playback," he said. "We know what's recorded, although we don't know what's played back." The meters already can distinguish between vcr's and videogames, so that's one less problem to worry about, he added.

Asking questions of greatest interest to advertisers and their agencies, Nielsen learned that "commercials were deleted [to some degree] by 14% of the vcr households using the pause control." But, Mr. Cosner emphasized, sponsors are not losing exposures entirely, since the commercials "had to be seen to be removed." Another 22% evaded "some or all"

Taste

That's key to Schlitz drive

By JACQUES NEHER

MILWAUKEE—Despite stockholder complaints about the current advertising for Jos. Schlitz Brewing Co.'s ailing flagship brand, the company will continue to advance the "Go for it!" theme this year, while supplementing it with some "specialized advertising" that reportedly will feature president Frank Sellinger in taste test situations (AA, April 14).

New commercials already have been shot "that speak to the quality and good taste of Schlitz," chairman Daniel McKeithan Jr. told stockholders at the company's annual meeting last week. They will go on the air, he added, "as soon as the research is in." According to sources, the company had prepared some blind taste test commercials last year in which drinkers learned to their amazement that they had picked Schlitz, but the campaign was scrapped after pretesting in focus groups showed the commercials to be beyond belief.

Sources report that the new commercials, to run nationally through May, will feature Mr. Sel-

Banks & trust companies	1980 1979	2,524,264	1,902,933	+ 621,331	+ 32.7

This Flash Report of newspaper advertiser investment, compiled for ADVERTISING AGE by Media Records, is derived from tabulations that cover 35 dailies and 25 Sunday editions in 15 cities—Atlanta, Baltimore, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, Miami, New York, Philadelphia, Pittsburgh, San Francisco and Washington. The report indicates marketplace strengths and weaknesses.

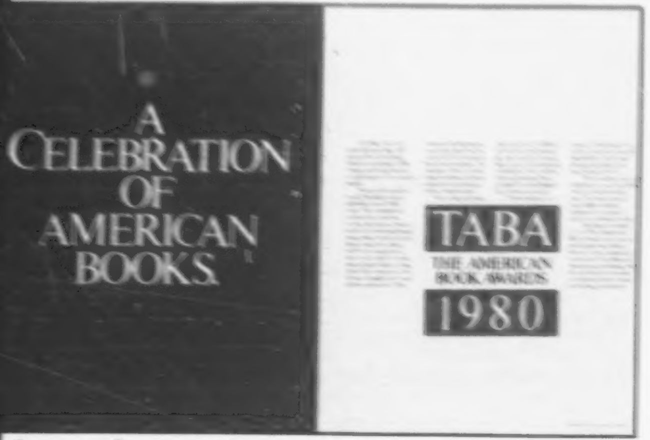
Public service utilities ads jump 60.8% in Feb.

NEW YORK—Public service utilities newspaper advertising showed a 60.8% increase in dollar spending during February, 1980, compared with February, 1979, according to the February Flash Report prepared for ADVERTISING AGE by Media Records, Inc.

Of the 16 categories monitored for AA by Media Records, 12 showed increases and four declined in February ad volume in the 15 cities whose newspapers are measured (see chart).

Department stores, newspapers' leading dollar category, dropped 2.7%. Of the remaining four categories in the top five dollar group (furniture and furnishings, amusements, food stores, and general merchandise stores), general merchandise stores showed a 7.8% dip while the rest gained.

■ Percentage gains of 15% or better were registered by banks and trust companies (32.7%), sporting and leisure time equipment (30.2%), eating and drinking places (27.8%), real estate (24.2%), amusements (16.5%) and building contractors (15.3%). #



Awards controversy

This ad for The American Book Awards (TABA) is running in consumer magazines such as *Time*, *The New Yorker*, *New York*, *Book Digest* and *Playboy*. The first of four consumer and trade press ads, it explains the new book awards program, successor to the National Book Awards. Several of the nominated authors have asked to have their books withdrawn from consideration, charging that TABA is too commercially oriented. Herman & Rosner Enterprises, New York, handles TABA's account.

Hewlett debuts computer

Hewlett-Packard's Corvallis, Ore., division is set to introduce a portable electric typewriter-size personal computer with national ad backing in *Scientific American*, the *Wall Street Journal* and technical publications via Dancer Fitzgerald Sample, San Francisco.

Hanes rolls Winteralls

Hanes Hosiery Underalls division, Winston-Salem, will launch its Winteralls brand nationally this September via agency Case & McGrath. Network tv will support the brand, which previously had been in test.

Govatos/Dunn moves

Govatos/Dunn, a Washington advertising agency, has moved to 441 N. Lee St., Alexandria, Va. The agency also announced creation of Govatos/Dunn Public Relations.

U.S. potential in French Africa unlimited

By RAYMOND FRANJOU

PARIS—If you go on a trade mission to French-speaking Africa, you will see American equipment and products there—but you won't see many, and that will surprise you.

A look at the figures shows American exports to French-speaking Africa account for less than 1% of total U.S. exports and that figure is decreasing.

But there is a market for American industries, and some U.S. companies are already well established: Equipment items, particularly equipment for public works (Caterpillar); electrical equipment (Motorola); transportation equipment (Beechcraft); data processing (IBM); electrical materials (Union Carbide); air-conditioning equipment (General Electric); food products (Africa buys U.S. orange juice and peanut butter, as well as cereals); synthetic textiles; paper; and tobacco.

- Consider which products France, itself, imports from the U.S. These items comprise a list of product areas in Africa, in which the French do not compete. There is also the fact of America's new energy sources (water pumps, solar energy), all of which are well adapted to Sahel (tropical) Africa.

Moreover, new French-speaking African countries produce oil. Algeria and Gabon are producers today, and tomorrow there will be Cameroon and Congo Brazzaville (both at more than 5,000,000 tons, and they export 3,000,000), and even the Ivory Coast (already rich thanks to cacao and coffee). Uranium is also produced, in Niger and Gabon. Tomorrow these new resources will be used to buy either equipment or food products.

While the American commercial presence is weak in this area on an over-all basis, it is variable, depending on the African countries in question. It is respectable in Algeria, whose per-capita GNP makes it an intermediate country with more than $1,000 per year per inhabitant, and in Morocco. Due to a political choice at the beginning of the century, Morocco is traditionally open to all exporters (per-capita GNP is more than $500 a year). The U.S. sells equipment to Algeria and Morocco, but could also export food products.

U.S. exports to the other French-speaking countries are very low even though some of these nations are not truly poor, with per-capita GNPs between $500 and $1,000: Senegal, Ivory Coast, Gabon, Cameroon, Congo Brazzaville, Tunisia. They all need equipment and food products. Others are very poor, with per-capita GNP of less than $500: Mali, Chad, Upper Volta, Benin, Guinea, Central African Republic, Togo, Madagascar, Zaire, Ruanda and Burundi. They can buy only small quantities of appropriate equipment, *i.e.*, solar energy equipment, while they lack money for buying food products—with the possible exception of cereals.

But if America sells so little, the reasons are not merely technical and financial ones. As Deputy Assistant Secretary of State for African Affiars Lannon Walker observed in Paris last December after returning from an African tour of French-speaking countries organized by the International Communication Agency (ICA), American businessmen have little experience in the African markets, where they are "subject to misadventures."

It is time for America to discover French-speaking Africa.

A varied composition

What do we mean by "French-speaking Africa," with its population of 135 million inhabitants? First there is French-speaking North Africa, the "Maghreb," *i.e.*, Algeria, Tunisia and Morocco. Although these are Arabic-speaking countries, business is done in French.

Then there is French-speaking Africa south of the Sahara. People who are not French say West Africa and Central Africa; French businessmen say "Africa" for this region. The members are former French colonies. The currency, the CFA franc or, simply, CFA, meant French Colonies of Africa before becoming African Financial Community. Oddly enough, this Africa includes Madagascar in the Indian Ocean!

Finally, there is the new French-speaking Africa, in which not all the countries use French, such as Guinea-Bissau and Cape Verde (Portuguese-speaking), but in which others use it: Zaire, Rwanda, Burundi (all three formerly Belgian), Mauritius (in the Indian Ocean, formerly British), and Dijbouti and Mayotte (formerly French).

As a matter of curiosity, Haiti in the Americas is part of the same agencies as French-speaking Africa; but French Guyana, French Antilles, New Caledonia, Tahiti, etc., are French territories.

The French system

In economic terms, the French are colonizers, They Frenchify and turn countries into "Little Frances." They do not distinguish cultural aspects from economic. They sell machines through schools and in marketing language, they sell a machine that speaks French.

There are 50,000 French teachers, outside of France (five times more than the U.S. has), 90% of whom are based in Africa, and two ministries, each of which has an embassy for one country, an aid and cooperation mission for another, several banks for aid credits and export credits, and specialized government companies for technical assistance by professional sectors.

Instructors, businessmen and government administrators all have a strong attachment to France and long experience of Africa (some of them were born there, as were their parents). From a technical viewpoint, they have good knowledge of the tropical soils, climate, appropriate equipment, and of the psychology of African industrial workers.

Afro-French ties were not broken when countries gained independence. Abidjan (Ivory Coast) had 10,000 Frenchmen before independence; now there are more than 50,000. Oddly enough, the French language and economic system are making progress in the English-speaking countries of Africa, as well. The currency of West Africa and Central Africa, the CFA, a stronger unit than those of its English-speaking neighbors, remains linked to the French franc (1F.CFA = 0.02 FF) at a fixed parity and there is no exchange control between the countries.

U.S. exports to Africa (000,000)

	1978	1977		1978	1977
Egypt	$1,134.1	$ 982.4	Liberia	$107.8	$ 90.9
South Africa	1,079.6	1,054.4	Gabon (F)	96.6	29.6
Nigeria	985.4	958.3	Ivory Coast (F)	92.8	89.2
Libya	425	313.7	Canaries	91	84.6
Morocco (F)	406.4	371.6	Tunisia (F)	83	111.3
Algeria (F)	374	526.5	Zaire (F)	82.6	113.9
Sudan	156.8	87.1	Cameroon (F)	52.1	53.6
Kenya	137.7	76.2	Tanzania	48.3	38.7
Ghana	124.8	145.5	Senegal (F)	48.3	36.3

(F) French-speaking

- Certain manufacturers in the U.S. have talked about a "French private reservation," and its impenetrability. There are two reasons why this is not the case. First is the fact that many of these African governments seek economic independence, and secondly, France is in favor of it. Perhaps France realizes it is not the best competitor in certain technical fields. Indeed, in many of these fields, France imports its own equipment from the United States.

The only real obstacles to American exports to Africa are lack of information and psychological misunderstanding.

In 1979, a U.S. trade mission went to Central Africa and came back without contracts—but then, none of its members spoke French correctly. Participants told me they "had not understood anything about African public administration copied from the French system," and yet they wanted to sell to the state.

- Take, by contrast, a small U.S. firm involved in data processing equipment which asked a French consultant to find a partner for it in West Africa. The consultant found three in a week.

These two examples are a good illustration of the commerical situation of U.S. companies in French-speaking Africa. American businessmen must understand the French-speaking cultural-economic complex. The idea that you can do business in English (the world language for business) is not true in this region and an attempt to sell to government agencies without an understanding of their structure and philosophy is bound to fail. Passing up the help of French companies and consultants is giving up a strategic trump card. #

Raymond Franjou is director for Africa of CEGOS *management consultants, Suresnes (near Paris), which has branches in Algiers, Tunis, Casablanca, Abidjan and Libreville, with branches in Dakar, Yaounde and Douala in formation. Specialized departments for Africa include public management (organization of governments), business organization, training and technical assistance, and market surveys.*

O&M to launch Camels in China

WINSTON-SALEM—Reynolds International recently announced the appointment of Ogilvy & Mather to handle advertising for the launch of Camel Filters in the People's Republic of China. The account will be handled by O&M's Hong Kong office, which already handles Camel Filters in Hong Kong and Macau.

HOW TO IMPROVE MEDIA PLANNING SKILLS

CHECK INTO THE MEDIA SCHOOL. One day intensive media training for account executives, brand managers, top management, media trainees and media salespersons who want to contribute more to media decisions. Telmar's Media School gives you the practical knowledge you need. From basic audience data to modern computer methods. Plus a worksnop that puts you in the planner's seat. Small classes, multi-media techniques. Curriculum designed by Media expert Erwin Ephron, education director.

Real estate ads face reality—Page 3

Introduction *Rance Crain* 1

PART I: Advertising and Society

Advertising and Social Change
Ronald Berman, Ph.D. 7

A noted social scientist and analyst of the American social structure takes an exhaustive look at advertising's role and finds it useful and valuable

What Is Advertising?
S.R. Bernstein 28

A long-time observer and commentator on the advertising scene and a former editor of Advertising Age defines advertising in terms of how it works and what it does, and refutes some misconceptions of its role

How Advertising Helps Promote the 'Good Life'
Louis F. DeMarco 46

The publisher of Advertising Age celebrates advertising's role in promoting material things that add to life's pleasures

Advertising's Movers and Shakers 48

The first of four pages picturing leaders of advertising, marketing and communications through the years. Additional pictures are on Pages 66, 82 and 134.

The Saga of Ivory Soap
Nancy Millman 50

How Procter & Gamble has marketed Ivory Soap through a century and more and kept it as an enduring example of pleasant, effective and truthful advertising

How Advertising Achieved Respectability Among Economists (Well, Almost)
Richard H. Holton Ph.D. 56

A noted economist, consumer counselor and authority on marketing and economic development reviews economists' concepts of advertising and believes they are beginning to give it serious consideration

The Impact of Advertising on the Social Sciences
Florence Skelly 68

The executive vice-president of Yankelovich, Skelly & White, motivational researchers, takes a look at how advertising has been affected by the social sciences, and vice versa

How Market Research Came to Advertising 68

Charles Coolidge Parlin introduced market research into advertising while attempting to sell Campbell Soup Co. a schedule in the *Saturday Evening Post*

Advertising and the Arts
Stephen O. Frankfurt 74

The fine arts—painting, photography, music, film making, etc.—have played major roles in the development of modern advertising, and conversely, the demands of advertising have greatly influenced the arts

Want to Sell Point of View? Use Advertising
Norman Cousins 78

Famed editor, writer and lecturer delves into his personal experience to relate how advertising can sell ideas as well as products

A Portfolio of Advertising Through the Years 85

Sixteen pages of color advertising demonstrating how style and content have changed through the years

Advertising Increasing in 'Non-Commercial' Uses 104

The Advertising Council makes huge contribution to public service; other groups rely more and more on advertising to inform the public and seek support

Parker Pen's Annual Report Tells About Advertising 116

Four full pages, replete with color illustrations, informed Parker Pen stockholders of the importance of advertising in the company's 1978 annual report

Ads Helped GM's Chevy from Sputtering Start to Purring Preeminence 118

The car named after a Swiss-French race driver made good use of advertising in its rise to first place in U.S. automobile sales

Marketing Coke and a Smile 120

A quick look at the promotional activities of the pioneer soft drink

Armstrong, Jenner Help General Mills Growth 124

How a set of celebrities—some real, some imaginary, have served General Mills well

Swift (Now Esmark) Changes Pace 128

A heavy user of advertising since its founding in 1868, Esmark still promotes Swift products vigorously

Volks Called Biggest Success; Edsel Gets Booby Prize 130

Ad Age readers, teachers and others pick marketing successes and failures of the past half century

Ad Growth Mirrors Rise in World Living Standard
Craig Endicott 136

Advertising called most successful American export as developed nations improve living conditions and make greater use of ad mechanism

PART II: The Growth and Development of the Advertising Business

Proliferation, Localization, Specialization Mark Media Trends in Past Fifty Years
Herbert Zeltner 147

The media may not be the message, but there can be no message without the means of transmitting it. A state of flux best describes the current state of all advertising media, both print and broadcast

John Crichton Leaves Ad Age for the Four A's 149

A page of pictures of a notable leave-taking

Broadcast Changes Face of Advertising, Selling
Bruce Robertson 158

Nothing has had so vast an impact on life and living in the past half century as the advent of radio and television; and its impact on advertising and advertisers has been almost equally profound

Successive Threats Peril Magazines; Editorial Values Keep Medium Vital
Theodore Peterson 166

Radio and television made their greatest impact on national magazines and were responsible for the death of the "generals," but specialization has kept the industry alive and expanding

'Printers' Ink' Editor Recalls How It Was in Advertising in 1930
C. B. Larrabee 172

Editor and publisher of leading advertising paper of 50 years ago reviews the situation as Advertising Age enters the scene

Newspapers Fight Off Broadcast Challenge, Survive and Prosper
Leo Bogart 176

Radio and television affected newspapers, as they did all other media, with particular emphasis on evening papers, but the medium as a whole has not only survived, but prospered

Business Papers Visualize Multimedia Moves in the '80s
Charles S. Mill 181

Following four years of record growth, the nation's business press looks forward to new services and extension of its operations into new fields

Outdoor: Old Medium Still Lively
William J. Colihan Jr. 185

Harassed by legislative and power problems, this medium still looks forward with confidence to an important place in the advertising mix

Direct Marketing: 'Way Beyond Catalogs
Robert F. DeLay 188

Direct marketing, spurred on by a variety of electronic/computer adaptations and new distribution methods, has been the "wonder child" in growth during recent years. And the outlook for the future appears amazingly bright.

Fifty Years of Retail Advertising: Aim More Direct, Graphics Improve
Budd Gore 194

An intensive review of advertising and promotion practices in the retail field during a half century in which vast changes have taken place in all phases of retail business

Sales Promotion Grows to $40 Billion Status
Louis J. Haugh 199

Another aspect of marketing—sales promotion—has been becoming more and more influential in recent years. Its future seems assured of additional rapid growth.

Agencies Change as Adland Matures But Old Principles Still Hold Sway
William R. Hesse 204

A veteran advertising agency executive reviews the agency world during the past half century, notes important changes

Advertising Regulation: Changing, Growing Area
Stanley E. Cohen 213

Government regulation of business and advertising grew consistently during the past half century, and so has self-regulation developed by the industry itself

PART III: Ad Age Chronicles The Advertising/Marketing Scene

Ad Age Marks Its 50th; Tells Steps Along the Way 221

Significant Developments in Half Century
S. R. Bernstein 224

Here's a Capsule Chronicle of Ad World's Hectic Half Century 228

A careful summary of each of the 50 years in Ad Age's history, giving an over-all picture of the significant and the important, as mirrored in the weekly's pages

PART IV: Statistics of Advertising

Some Basic Statistics Relating to Major Advertisers, Agencies and media 261

PART V: Index

A Name and Company Index of the Persons and Organizations Included in This Volume 271

Miniature 'Case Histories' of Some 50-Year-Old Products

Costs of cigaret advertising: 1978-1972

Per carton and per million cigarets sold

Copyright 1979 by Crain Communications Inc.

The top cigaret brands based on 1978 sales, related to the amount invested for each brand in general magazines, newspapers (including Sunday sections), network tv, spot tv, network radio, spot radio and outdoor. The figures are not offered as complete records of expenditures; tobacco companies spend large sums for point of purchase materials and in other nonmeasured media. Sales figures for this study were taken from the 1978 Maxwell Report. Advertising expenditures were compiled from figures supplied by Broadcast Advertisers Reports; Institute of Outdoor Advertising; Leading National Advertisers; Radio Advertising Bureau; Radio Expenditure Reports, and Television Bureau of Advertising. Newspaper expenditures for 1975, 1976, 1977 and 1978 were supplied by sources in the tobacco industry; newspaper totals for the years previous to 1975 were compiled from figures supplied by the Newspaper Advertising Bureau (compiled by Media Records).

Packing it in

FTC commissioner Paul Rand Dixon packed up key documents when the agency was ordered shut down May 1. Emergency funding legislation put FTC back in business the next day.

B-M, AHP fight Tylenol

Aspirin capsules rolling

By NANCY GIGES

NEW YORK—Bristol-Myers and American Home Products are making another attempt to reverse their eroding analgesic shares by introducing extra-strength capsule forms of their Excedrin and Anacin brands.

These companies have not been able to stem the declines of their brands since Johnson & Johnson's Tylenol nonaspirin analgesic became an advertised brand some five years ago. Extra-strength capsules—until now represented by a single major brand, Tylenol—have been the fastest growing segment of the market.

▪ Both Anacin Maximum Strength Capsules and Excedrin Extra Strength Capsules are expected to get heavy media support this summer. During the introductory period, AHP is expected to devote the majority of the Anacin budget to them.

Last year AHP invested $34,000,000 in adult strength Anacin, $1,700,000 in Maximum Strength tablets, $4,800,000 in Arthritis Pain Formula and $3,200,000 in Anacin-3 nonaspirin pain reliever. House shop John F. Murray Advertising handles adult and Maximum Strength Anacin; William Esty Co. Anacin-3.

In the last year, Extra-Strength Tylenol has boosted its share to 17% from 14.8%. The only other brands to gain have been Bayer aspirin to 9.5% from 9.3% and Maximum Strength Anacin, which

May 1, the day that FTC died

By STANLEY E. COHEN

WASHINGTON—Mixed feelings of anger and relief predominated at the Federal Trade Commission last week as the long fight over the commission's future reached a dramatic—and almost comic—climax, which shut down FTC entirely for one day.

Fundless on April 30, with Congress still deadlocked on legislation, FTC got orders from the Attorney General to shut down. On May 1, the commission and its staff, in an almost carnival atmosphere, went about carrying out that instruction with enthusiasm.

The shutdown was short-lived. When word went out that FTC intended to self-destruct May 1, President Carter personally reentered the battle. Before breakfast, he phoned Rep. Jamie Whitten (D., Miss.), whose appropriations committee had voted that FTC would not get another dime until the deadlock over its future power was resolved. Before noon, the committee reversed itself and voted enough money to fund FTC for another 30 days. The House and Senate leadership teamed up to get the emergency funding resolution to the President before nightfall.

Ad execs happy with new FTC bill

By RICHARD L. GORDON

WASHINGTON—There are no signs of celebration, but executives of the major advertising industry associations appear satisfied with the gains they've made in the Federal Trade Commission compromise bill heading for final passage this week.

While still awaiting the exact legislative language, top officials at the American Assn. of Advertising Agencies, Assn. of National Advertisers and the American Advertising Federation mentioned these as major items for advertisers in the compromise package:

- Suspension through Sept. 30, 1982, of the commission's authority to write rules against "unfair" advertising, with Congress promising that advertisers will have a chance to argue for permanent restrictions before the suspension expires.
- The two-house congressional veto, which provides a new safety valve for business targets of FTC rules by permitting the Senate and House, acting jointly, to kill rules before they take effect.
- Regulatory reforms aimed at making FTC's rule-writing process, heavily criticized by industry attorneys, more reasonable and fair.

▪ If there is disappointment, it is because Congress left FTC's controversial children's tv advertising rulemaking wobbling but alive. "Obviously, we all would have wished that section of the bill to be a little stronger," said AAF exec vp Jonah Gitlitz.

Suspending FTC's power to write rules against unfair ads means that FTC staffers must drop their initial theory that FTC could regulate, and even ban, otherwise truthful tv ads to children simply because it is "unfair" to advertise to such a vulnerable audience.

Under the new ground rules, FTC staffers must propose a rule targeted to actual deceptive ad practices, a switch that could still leave the door open for attacks on sugared food ads to children that don't disclose sugar content or carry dental health messages.

But the ad association execs aren't yet fretting over the shortfalls in the FTC package.

"We feel satisfied by the results of the conference," said Four A's vp Robert Purcell. "It contains the basic principles we were supporting: The legislative veto and doing something about 'unfairness'."

The Four A's, he said, will probably urge Congress to permanently forbid FTC from writing industry-wide rules against unfair ads when the legislators open their inquiry into what more should be done.

ANA president Peter Allport and AAF's Mr. Gitlitz were both optimistic that reforms in the way FTC goes about developing its rule proposals will help ease causes of friction with the industry.

"From our point of view, the

Affiliates ready CBS news fight

By COLBY COATES

NEW YORK—For the 200-plus CBS-TV affiliates converging on Los Angeles for the annual network-affiliate love-in, the recent prime time victory over ABC, the first in four years, is worthy of a celebration that would rival Perle Mesta's best.

However, some cheering affiliates say the merriment won't dissuade them from screaming loud and long if the network pushes for an expansion of the 30-minute evening newscast at the expense of the station's local access time. Even the dangerously seductive prospect of being part of the ceremonial passing of the anchorman's baton from Walter Cronkite to Dan Rather can't stem the opposition that's based both on economic and philosophical concerns.

▪ Those affiliates upset by the idea of surrendering from 15 to 30 minutes of "their" time can take comfort in the Westinghouse Broadcasting Corp.-orchestrated anti-expansion effort. As the company that fought hardest to get that access time in the first place, not to mention the one most responsible for pressuring the Federal Communications Commission to launch its current network inquiry, Group W could be a formidable opponent if it decides to take one of its strong stands.

Listening to CBS execs, however, suggests that drawing battle lines may be unnecessary, or at the very least, premature.

"We simply have no plans to make any sort of announcement to the affiliates about news expansion," said Gene Mater, vp-assistant to CBS Broadcast Group president Gene Jankowski.

"Of course we're going to talk about it, but we're not going there with any plans."

▪ Mr. Mater said there has been no substantive talks about news ex-

No-frills 'recession Safeway' plan mulled

OAKLAND—Safeway Stores is preparing to try out what execs are calling a "recession Safeway" concept by opening a cash-only, no-frills Food Barn store in San Francisco. City approval is needed for elimination of item pricing for this Jewel T-type store. Initially in-house ads support. Botsford Ketchum handles Safeway advertising and new approaches chainwide.

Bergin not talking on rumored shift to McCann

NEW YORK—SSC&B exec vp-creative director John Bergin would not comment on reports that he planned to move to sister agency McCann-Erickson to head the Coca-Cola business worldwide. "Those rumors are all over the place, but right now I'd have to say no comment," he said. Currently, Charles J. Hamm, based in Atlanta, is exec vp-worldwide for all the soft drink marketer's brands. A McCann spokesman said, "We've heard the rumors too, but they're not true."

Europeans thirst for big U.S. liquor market

By JOSH LEVINE

NEW YORK—The British and the French are scrapping over the colonies again, but the current skirmish between Grand Metropolitan and Pernod Ricard for all or part of Liggett Group's liquor business could be only the beginning of a broader foreign push for outposts in the U.S. wine and spirits field, analysts say.

In addition to the U.K.'s Grand Met and France's Pernod Ricard, Germany's Peter Eckes Co. is forming Eckes International to distribute the huge beverage marketer's brandies and cordials in the U.S. Eckes is joined by Anton Riemerschmid Distillers, also looking to control distribution of its own cordial line here.

U.S. liquor consultants report that their phones are ringing with calls from European clients looking for a gateway here, either through acquisition of existing U.S. companies, like Liggett, or formation of independent subsidiaries.

▪ "The U.S. is still the land of opportunity as far as Europeans are concerned," said R.G. Sheniker, an industry consultant with several thirsty clients overseas. "The American flirtation with imported brands is deepening, while current exchange rates make foreign acquisitions here extremely profitable."

Despite the declining percentage of U.S. disposable income spent on beverage alcohol in recent years, the American drinker's reputation for free-spending self indulgence hasn't suffered in the slightest. But whereas European concerns have long sought a match with eligible American distribution companies, the dowry always has been too high. It isn't anymore.

"Look at the valuation of U.S. stocks and you can see why it has always been prohibitively expensive to buy into the U.S. market," a liquor exec said. "The same companies are a bargain today."

Far from daunting European suitors, the declining disposable income allocated to liquor is seen

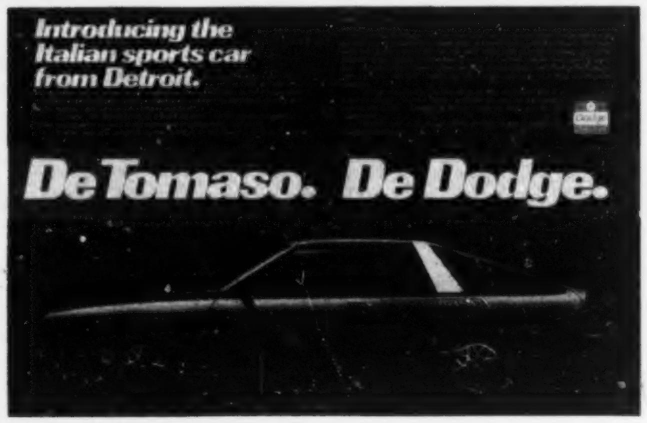
Trial by Television
KAISER ALUMINUM & CHEMICAL CORPORATION

Rap at ABC

Kaiser Aluminum & Chemical, Oakland, Cal., placed page ads in 16 newspapers in 10 markets criticizing an ABC "20/20" report that Kaiser says wrongly accused it of selling unsafe aluminum house wiring. The ads, via Allen & Dorward, San Francisco, asked for a "satisfactory retraction." An ABC spokesman said last week the network "has no response at this time."



Semi-foreign

If people are buying imports, Chrysler Corp. won't deny them at least a semi-import. "Introducing the Italian sports car from Detroit" is the headline for the "De Tomaso. De Dodge." Colors of the Italian flag are used in the Kenyon & Eckhardt ad with white headline on green bar and red against a black background. Ad will appear in buff books. Underneath the paint, lettering, louvers and other trim, the car is really an Omni O 24.

Bic seeks shaver rebound

By LOUIS A. FANELLI

NEW YORK—After sustaining losses on its disposable razor for three consecutive years, Bic Pen Corp. expects to turn the corner on profitability next year via a price increase retail to 24 cents and better distribution.

According to the company's annual report, its low-price single blade disposable razor has lost over $22,000,000 since its 1977 introduction.

The company notes that while the shaver's distribution has improved from 50% to between 60% and 65% last year, "One of the obstacles to faster expansion of the Bic shaver market share has been the difficulty of establishing adequate distribution against the dominant competition."

▪ According to a Wall Street analyst, however, Bic's distribution problems stem from its low price—previously advertised at 19¾ cents. The low price, she said, makes it more difficult to distribute because of the lower profits to the trade.

Previously, the price to the trade was approximately 7¾ cents per shaver. With the price increase, the cost will be about 10.8 cents each to the trade.

Bic notes that "Thus far, profitability has been more difficult to achieve than was the case for the [Bic] lighter, which was an immediate success and instantly profitable." Continuing, the company said, "In contrast, the shaver is a new product concept in essentially a stable blade market which exhibits a high degree of brand loyalty. As a result, the pace of shaver progress has been slower than we saw with the lighter. However, we have seen a substantial shift in sales momentum occurring in the latter half of 1979, both at the retail and wholesale level."

▪ While Bic has been able to capture an estimated 11% share of the 2 billion-unit blade market, industry sources estimate its dollar share at about 4½%.

Meanwhile, Gillette Co., Boston, the leader in the disposable field with its Good News! double blade, has approximately a 12% to 13% unit share and about a 10% dollar share due to its higher price.

Although Bic maintains that disposables could grow to 40% of the blade market in the U.S., analysts

Vol. 51, No. 20—Advertising Age (ISSN-001-8899) is published weekly except semiweekly the third week in March, the first week in September and the third week in December at 740 Rush St., Chicago, Il. 60611 Second class postage paid at Chicago and additional mailing offices.

Wendy's to tout taste, new items

By RICHARD KREISMAN

CHICAGO—In a new advertising campaign to be unveiled this week at its national franchisees meeting in Las Vegas, Wendy's International will tell consumers about the taste and quality of the fast-food chain's entire product line, not just its "hot 'n juicy" hamburgers.

The commercials, described by one informed source as "upbeat and entertaining in the same way as Dr Pepper's are," reportedly feature singing and dancing and attempt to give the chain a flexible campaign that can be adapted later this year when Wendy's introduces its salad bars nationwide.

At its annual meeting last week, Wendy's officials said the chain—founded on a limited menu concept—additionally is testing breakfasts, a breaded chicken sandwich, a fish sandwich, a children's menu featuring smaller portions called the "Fun Feast" and developing a dessert that may be tested this summer.

Although the chain's execs refused to comment on the new ad campaign, William Leiter, vp-fin-

Favorites flex muscles in Nielsen syndie ratings

By MAURINE CHRISTOPHER

NEW YORK—The Nielsen syndication rankings for the February sweeps demonstrate once again the strength of entrenched favorites in local station time periods. But they also include many clues that should help a patient buyer hone in on the precise people his client wants to reach most. (See table.)

If homes ratings are to be the chosen yardstick, the first three ribbons go to Group W's "PM Magazine" with an 18.3, ITC's "Muppets" with 15 and 20th Century-Fox' "M*A*S*H" with 14.9. If estimated total homes reached per average telecast in the designated market areas are to be the standard, the rank order becomes "Muppets" (10,353,000); "M*A*S*H" (9,847,000), and Yongestreet's "Hee Haw" (9,133,000).

"PM Magazine," which mixes features provided by the syndicator with a local wraparound, still has quite a way to go to reach the station lineup level of "Muppets" or "M*A*S*H." Both were rated on more than 140 stations on this report. "PM Magazine" had 43 stations in February but this is expected to be up to 95 by September.

If women are the advertiser's meat, "PM Magazine" looked enticing in all age categories. This 30-minute strip was first with females 18 to 49 and 25 to 54 and second with the 50-plus category.

Since women do so much of the shopping, these subdivisions may get a great deal of study from spot tv buyers and planners as well as from reps who use these detailed audience data to advise their stations on viewing trends and scheduling strategy.

Lawrence Welk, distributed by Don Fedderson for advertisers like Geritol, is still the most striking example. He ranked first with older women, drawing a network-like rating of 21.9 with them on 189 stations. For women 18 to 49, he was in 61st place, with a 3.2. For women 25 to 54, he was 35th with a 4.6.

For men, Nielsen offers only a contrast of the 18-to-49 and 50-plus categories, there is no 25-to-54 pullout. An Operation Prime Time drama, "Top of the Hill," fared well with young men, placing 13th. Oldies like "Kung Fu" (Warner Bros.) and "Star Trek" (Paramount) also made this top 20 list.

Sitcoms scored resoundingly with teens, taking eight of the top 13 spots. "I Love Lucy," a hit of more than a generation ago, and "Hogan's Heroes," from a somewhat later period, tied for 17th with a 6.4 score.

Children appeared most likely to be watching cartoons or situation comedies. The "Muppets" during February were pulling an average of 6,349,000 children 2 to 11 nationally per telecast. There were few surprises on this list, but one of them may have been "PM Magazine" as the 25th ranked show with an 8.5, unless the youngsters were the captive audience of the grownups.

- In the hotly contested talkers rivalry, Multimedia's Phil Donahue, on the basis of measurements on 181 stations—but not his full list—was credited with almost twice as many homes as runner-up Mike Douglas. Mr. Douglas came in about 100,000 homes ahead of Metromedia's Merv Griffin. Both of them had homes totals more than double that of Fox' Dinah Shore.

Paid religion, an increasingly significant source of spot revenue for stations, included 57 programs for the survey month. The leaders here were Oral Roberts, 1,943,000 homes; Rex Humbard, 1,576,000; Billy Graham's "Hour of Power," 1,444,000, and Jimmy Swaggart, 1,132,000. #

Sportschannel moving into pay cable's court

NEW YORK—Pay cable, mixed with commercials, is inching forward in this area as Sportschannel, which pioneered in this sales concept, adds new systems to its metropolitan New York-New Jersey coverage.

The most recent additions are Teleprompter Manhattan, covering uptown New York, and Suburban Cablevision of East Orange, N.J.

Headed by cable systems operator Charles Dolan, Sportschannel provides feeds of nonbroadcast games of the baseball Yankees and Mets, basketball Nets, hockey Islanders and soccer Arrows, as well as St. John's and Columbia University meets.

- Sportschannel already is running on five suburban systems, including several owned by Mr. Dolan's Cablevision group. He has told industry associates that adding commercials and charging a premium for sports previously available as a part of the basic monthy cable fee of about $10 has not lost him one subscriber.

Teleprompter Manhattan began offering this sports service to its 60,000 subscribers May 1 at an extra fee of $5.95 monthly. Twelve events, mainly pro baseball, are on the month's schedule.

Whenever a premium sports pay tier is added, the basic subscriber usually loses something he may have wanted when he signed up for cable in the first place. In Teleprompter's case, according to systems manager Chris Conley, only the Islanders games will be pulled out of basic for inclusion in pay. The Knicks and the Rangers stay in the basic menu.

- Teleprompter Manhattan this season has carried most of the Islanders games, including the playoffs. Janet Foster, program director for the system, attributed the trend to tiering sports on the high cost of rights, which, unlike other cable fare, cannot be amortized over several repeats. Team owners negotiate pay rights based on how well the specific events sell to subscribers; in the case of basic cable, rights are predicated on the total number of subscribers on the system, she noted.

Sportschannel cablecasts are produced by Nassau Sports Productions with Jay Merkle as president. He also sells the local network to advertisers. His technique has been to pitch not the entire package, but a specific team's games, since advertisers are accustomed to buying in that fashion in spot tv.

- The biggest attraction with sponsors so far has been the New York Islanders, one of this area's few pro teams with something to rejoice about of late. The games carry 12 national minutes, plus three for systems' commercials. Minutes are priced at $400. Sponsors include Budweiser, Chemical Bank, Chevrolet, Eastern Airlines and Wendy's. #

Review of new products

Backe out; what bugged Paley this time?

By MAURINE CHRISTOPHER

LOS ANGELES—Having fired his last two choices, the 78-year-old William Paley is searching for still another executive to take over when he finally steps down as chairman of CBS Inc.

John Backe's departure as president and chief executive late last week was as abrupt as that of Arthur Taylor in 1976. Wednesday night, Mr. Backe—the only man to whom Mr. Paley ever surrendered the ceo title—was here at the gala affiliates convention banquet celebrating CBS-TV's return to the top in prime time ratings.

▪ The next day, back in New York, the onetime publishing executive got off the plane to hear he was through at Black Rock, the CBS headquarters. The shock reverberated from coast to coast but no one, except Mr. Paley, appeared to know why he asked Mr. Backe to resign.

Speculation centered around a *TV Digest* interview in which Mr. Backe had confirmed CBS' long-rumored plan to move promptly into satellite cable programing. Mr. Backe also said in a session with affiliates that CBS was checking with Washington to see if it could get the rules revised to allow the parents of the major tv networks to own cable systems.

Affiliates accepted CBS' cable aspirations fatalistically, but Mr. Paley was said to be "off the wall" at the prospects of what these new technology projects might do to his beloved television network.

Other reasons suggested for Mr. Backe's downfall: The president may have settled the antitrust programing suit with the Justice Department without clearing with the chairman; even good financial reports (though first-quarter profits were down) weren't impressive enough for Mr. Paley.

However, veteran Paley watchers suspect that the founder of CBS is having trouble turning over his corporate child to anyone. Mr. Taylor's 1976 departure was never clearly explained, but it was believed Mr. Paley did not feel Mr. Taylor was the one he wanted eventually to take the reins of CBS.

There was no doubt on Wall Street that Mr. Backe was fired solely on the "bizarre" decision of chairman Paley.

Analysts speculated a variety of

(Continued on Page 66)

Hits Supradent

W-L plans counter to saccharin

By SAM HARPER

NEW YORK—Originally expected to offer a new gum with saccharin to counter Life Savers' introduction of Supradent, Warner-Lambert Co.'s American Chicle division has turned the tables on its long-time rival by announcing a marketing campaign that will emphasize its Trident brand contains no saccharin.

Scheduled to break this summer, the Trident broadcast and print campaign will conflict with Life Savers' multi-million-dollar effort on behalf of its new gum (AA, April 28).

While a Chicle statement issued last week indicated the campaign is meant to eliminate possible confusion between Trident and Supradent, which have packaging similarities, an industry source said the campaign was created to minimize the effectiveness of the Life Savers effort by questioning the use of saccharin.

▪ The main focus of the campaign will be a boldly designed sticker, applied to all Trident packages, stating that the brand "contains no saccharin."

Life Savers' president W. Mack Morris is confident that the use of saccharin in its product is safe. "We feel that our actions in the market are socially responsible," he said, "Especially when you consider that one 12-oz. can of diet soda has about the same saccharin content as 200 pieces of Supradent."

Mr. Morris added that a report conducted by a group of health organizations, including the National Cancer Institute, proved that the moderate consumption of saccharin is not harmful to human beings. "With those reports in

(Continued on Page 66)

Dancing crew and celebrities praise Wendy's 'taste'

"Wendy's has the taste," tout the singing and dancing crew members in a new national campaign scheduled to break June 1 (AA, May 5). The new spots feature the fast-food chain's full menu as well as its new salad bars. Such celebrities as Peggy Cass, Kaye Ballard and Jack Carter are shown, but not identified, in the spots. Ads are the first for new agency Colarossi/-Griswold-Eshleman, New York. Total budget put at $48,000,000.

Allstate: No security breach by Burnett

CHICAGO—Both Leo Burnett Co. and client Allstate Insurance Co. said there is no conflict between the two over the fact that Burnett sent ads for a nonsmoking insurance policy to another client, Philip Morris, before the campaign began.

"Whether or not direct contact was made between Burnett and Philip Morris is irrelevant, since no attempt was made to keep our campaign under wraps, either inside the agency or outside," said a statement attributed to both Archie Roe, chairman of Allstate, and Burnett chairman C. R. (Jack) Kopp.

"We are absolutely not concerned that the tobacco industry had advance notice of the campaign," the statement continued. The two executives said they consider the issue a "a non-problem."

The statement further noted that "It is Allstate's intention to distribute its advertising in the widest possible manner to its agents and employes before any campaign begins."

Mr. Kopp told ADVERTISING AGE the matter revolved around "an interpretation of whether or not the campaign was public." Mr. Kopp

(Continued on Page 66)

last minute news

Armour-Dial to test Spirit deodorant soap

PHOENIX—Armour-Dial will test Spirit, a scented deodorant soap similar to P&G's Coast, in western Michigan markets including Grand Rapids, Kalamazoo and Muskegon. Tv support for the bath and family-size bars, through Foote, Cone & Belding/Honig, San Francisco, breaks June 16. Packages, carrying a 10¢-off coupon, tout Spirit's "unique droplets of natural liquid scent." Sampling also is planned.

GF gives Bates $24,000,000 in billings

WHITE PLAINS, N.Y.—The eight-month General Foods search for a fifth agency ended with Ted Bates & Co. winning $24,000,000 in billings: Maxim coffee, $7,500,000, and Good Seasons, $7,500,000, both from Ogilvy; Mellow Roast, $4,500,000, from Grey, and Log Cabin, $4,500,000, from Y&R. GF also added two products to the Benton & Bowles list: Yuban coffee, $3,500,000, from Grey, and Gaines Full Course dry dog food, from O&M. Full Course, now in test, may get $10,000,000 in ad support as it rolls national. FCB was runner-up to Bates.

(Continued on Page 8)

Korda wants residuals for writers

PALM SPRINGS—Noting that all the talent used in broadcast commercials get residual payments based on how often the commercial is used, creative expert Reva Korda proposes that agency copywriters get residuals, too.

Ms. Korda, head of Reva Korda Associates, an independent subsidiary of Ogilvy & Mather, plans to make her unusual proposal next Saturday at the Western States Advertising Agencies Assn. conference here.

Admitting that her suggestion is "prompted by greed," she added that "if writers got residuals I guarantee the commercials they wrote would be better.

"Good campaigns, sound campaigns, tend to stay on the air a long time," she continued. "Despite the most valiant efforts of changing creative directors and nomadic brand managers, the really excellent commercials manage to last."

If writers got residuals, "I bet you'd see a lot more basic thinking, a lot less babbling about positioning and psychographics, a lot more talking to the consumer and a lot of happier faces on clients," she predicted.

▪ Ms. Korda admitted that such rewards for the copywriter would lead to the question of similar remuneration for "the art director and the agency producer and the nice young account man who hovered around them urging them on and the research people who pointed the way.

"We can deal with that down the road," she said. "Right now I'm talking about somebody especially dear to my heart—the copywriter."

She added that she refused to worry about the complicated bookkeeping for residual payments. "Agencies that don't already have computers can get together and share time. What they cannot get together and share is the kind of exceptional talent and intuition that leads to a campaign so strong and simple that no sane client will allow anyone to take it off the air."

Ms. Korda has a bagful of copy-

NEWSPAPER

Recovery and then some

BBDO on a hot streak

By BERNICE KANNER

NEW YORK—At 10:48 on the morning of March 1, 1979, Chrysler Corp. chairman Lee Iacocca stepped out of a board meeting to telephone Batten, Barton, Durstine & Osborn chairman Bruce Crawford with some bad news—the No. 3 U.S. auto maker was ditching its agency of 35 years to move in with Kenyon & Eckhardt.

The internal memo carrying the "stunning news" bemoaned Chrysler's ax as "a bad move for BBDO and the advertising agency business," warned that "consequences will be very significant" but vowed that BBDO "will not only survive but continue to flourish."

- Just over a year later, BBDO has shown the world more than a stiff upper lip. It has shown, in the words of its flaxen-haired leader, that the Chrysler loss "hasn't meant a damn thing to BBDO or the agency business; it's turned out to be a nonevent." The reason, of course, is BBDO's astounding recovery.

- In the last month, the domestic agency, with 1979 domestic billings of $625,000,000, set a blistering new business pace, bringing in five additional accounts with an estimated worth of more than $50,000,000. Following the loss of Chrysler the agency had added three new chunks of business estimated to bill $60,000,000 in 1979.

Though BBDO lost its largest client in March 1979—Chrysler billings were $80,000,000 in 1978—an almost immediate business gain helped cushion the blow. Jos. Schlitz Brewing Co. turned its Old Milwaukee beer and about a $5,000,000 budget over to BBDO. The brand previously had been at Cunningham & Walsh (AA, March 12, '79).

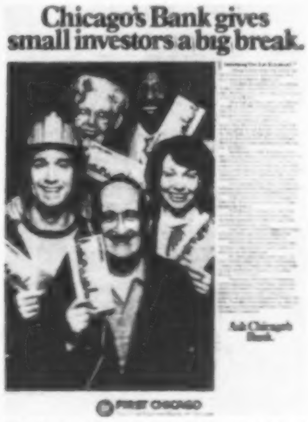
Then, after months of "suffering silently," the agency, which had brought good things to life for General Electric consumer products, won GE ranges, ovens, refrigerators and home laundry business. The new assignments, previously at Young & Rubicam are expected to ring up another $25,000,000 in the BBDO billings register this year (AA, Sept. 17).

Two months later, the R. J. Reynolds Tobacco Co. Camel strolled out of William Esty Co. into BBDO following the move of the Winston brand from Dancer Fitzgerald Sample to Esty (AA, Dec. 3). The dromedary is believed to carry a $25,000,000 allowance.

- But the first sign that the agency had really started to sizzle came in early April when Timex Corp.

(Continued on Page 65)

Guiding the rebound of BBDO are agency chairman Bruce Crawford and newly named president Allen Rosenshine.



Chicago's Bank gives small investors a big break.

FIRST CHICAGO

Aiming at small investors, the First National Bank of Chicago last week introduced its "First Rate Investments," short-term, discounted portions of banker's acceptances yielding interest rates similar to money market funds. Foote, Cone & Belding handles.

Givens waves red flag—will Detroit heed?

By RALPH GRAY

DETROIT—When Chrysler's Jack Givens said that it is Detroit's own fault U.S. car sales are down and import sales up (AA, May 5), the response here was similar to that given the "emperor's new clothes."

Though some execs thought the marketing clothes are merely ill-fitting, others—like the urchin in the fable—said it was about time somebody noticed the "emperor" was naked.

Mr. Givens told his marketing peers at the Adcraft Club of Detroit that importers "are out-marketing us in our own backyard. They've beaten us at our own game. Their cars offer the ambience, the practicality and the operating economy that Americans want.

"People are buying imports today because they like them, because they're right for the times. Any other excuse we use for their success just won't hold water."

It was the first time a top-level auto exec has admitted that and it drew a standing ovation from the packed house. Later reaction also has been favorable, Mr. Givens said. Asked why he spoke out, Mr. Givens replied, "It seemed appropriate. The industry is in trouble and it seemed like a timely topic." Not everyone completely agreed.

Mr. Givens was "overly harsh on the industry. We've moved as swiftly as humanly possible," one veteran marketer maintained. "In a couple of years, American manufacturers will be able to compete more aggressively in the segments owned by the imports," he predicted.

That may be true, countered another seasoned marketer, but right now, the industry lacks true import fighters in any quantity. The Chrysler K-car (Aries and Reliant) seemingly are aimed at General Motors X-body compacts and Ford won't have enough subcompact Escorts and Lynxes to make a dent on imports. "We're going into model 1981 and they still ain't ready," he groused.

Another ranking automotive marketer said Mr. Given's Detroit mea culpa was "pretty tough but that says it. We have been competing with ourselves and not going after the real problem. We had warnings 10 years ago. The West Coast has always been a trend setter.

"It's nonsense to say things will straighten out by themselves. They won't unless we do it. Givens is dead on when he says the imports are beating us on quality and efficiency. Now the imports are out to get us on design. They're after us on this.

"The pity is now the sleeping giant [Detroit] has awakened, there is no way to beat the time lapse. We'll get there [fully competitive]—no question about it. But it will be painful in the meantime."

Officially GM, Ford Motor Co., American Motors, Toyota, Datsun and Volkswagen had no comment on the speech by Mr. Givens, director of marketing for Chrysler Corp. He previously had been the head of Wells, Rich, Greene on the West Coast and a long-time Ford marketing exec.

Speaking from those years of experience, Mr. Givens charged that "For too long, Detroit has been more a seller than a marketer." He defined selling as "preoccupied with the seller's need to convert his product into cash." Marketing is "assessing consumer needs and wants, developing and designing products to meet them and advertising those products.

"We in Detroit look at consumer trends, appraise consumer needs and assess their wants. But all of us

Latin American countries, while certainly having their differences in the political-economical-social spectrum, exhibit considerable similarities. While solutions to problems for marketers may be different in each particular culture, the problems are somewhat generic to the vast continent. These ideas are central to the group of articles appearing in Section 2/Latin America, which begins opposite Page 36.

PBS eyes cigs, liquor as sponsors

By RICHARD L. GORDON

WASHINGTON—Public tv sales specialists eager to tap more corporate advertising/pr budgets are eyeing two of commercial tv's untouchables—cigaret and liquor companies.

Public Broadcasting Service execs are talking to local stations this month about a possible policy switch that would make the cigaret and liquor marketers eligible to underwrite public tv shows.

Public tv also is considering dressing up its drab, plain-text only, on-air ID's for underwriters to make them more productive by including corporate logos as well.

PBS senior vp Neil Mahrer said last week he can't predict how the stations will react to the cigaret/-liquor proposal, but he said the logo plan is getting "100% support" inside the public tv system.

Federal Communications Commission approval would be needed to put the logos on the air.

- Worried about financing in the future, PBS and the public tv stations have been regularly reviewing their underwriting codes

FEDERICO ORTIZ

OSCAR MARCOVECCHIO

(Continued from Page S-4)

vestments on a weekly basis.

Endicott: What areas do you, if any, see offering potential for imports?

Ortiz: I don't think it is easy to come here in main consumer product categories, even though the packaging is bad and the distribution systems are extremely complicated and merchandising very primitive. There are a lot of things missing in the consumer products universe, but it is always a question of jockeying in. It is expensive. Advertising is expensive. This is a country where for the last 15 years everyone has been using shampoos and brushing their teeth, which is not the case with Brazil.

Daschuta: If you walk into some little general stores in the Catamarca (in the Andean area of Argentina) you will find just about everything on the shelves. There is some technology missing, but an incoming marketer would have to have a clear technological advantage, otherwise it would be very difficult to compete against those who have already established themselves in a market where distribution patterns in relation with trade are a very delicate matter requiring a sort of intuitive knowhow. Anyway, even in the main consumer products, not even 25% of what is produced goes to supermarkets. This is a country of the small grocer.

Carou: A distinct opportunity does exist in supermarket development, however. There are very few supers here. The ones we had went bankrupt for lack of sufficient capital, a problem related to what we call "bicycling" in Argentina—using negative working capital provided by one's suppliers. These former supermarket owners would get funds from suppliers, and not necessarily through the best fair trade practices either, and use the money to buy and/or build new outlets. Things would go well until they had to pay back the money. Not having it anymore, they paid the suppliers with funds borrowed from somewhere else, *i.e.* the bicycle funds. It is called bicycling because when you get on top of this contraption you have to keep peddling so you won't fall off. Our supermarket owners were the greatest cyclists of all times. They never had a red cent. They sold merchandise on consignment, some on a 90-120 day basis which invariably took 180 and 210 days to repay.

I'd say the trend of the future will be increased buying through supermarkets. This will take a change in consumer attitudes, but I think people will respond to the convenience and good service of supermarkets. Unfortunately the ones we have at present have not worked.

Ortiz: There are opportunities in small categories like confectioneries. The candy bar is very popular. Cake mixes have been poorly marketed along with icings and toppings. These would be very small markets initially. We've looked into opportunities in such products and they do look good.

Whittaker: An area with unlimited possibilities would be amusement parks. We don't have anything like the theme parks in the States.

Endicott: In Brazil, marketers allow for a surge in initial sales of a new product for the first three months as people rush to buy the item because of its newness. Then sales begin to decline rapidly. Does a similar pattern exist in Argentina?

Tait: The Argentine consumer is a very good judge and very demanding. This is a very European market with special characteristics. In that sense we are somewhat isolated from the rest of Latin America. Half of our population, for example, is considered middle class.

Ortiz: We are suspicious by nature. In that way we are very much like the French. But in some massive consumer categories like cigarets and beverages, we usually give the products a pretty good trial.

Marcovecchio: But unlike the French, our suspicion enters the picture on the first repeat buy. Our tendency is to buy the first time because the product *must be good*. Our curiosity gets the best of us. We somewhat confidently say after the first buy that the product was as bad as we had suspected.

Ortiz: You know, the real reason for this traces back to the rough times of the '70s when all prices were frozen. Any new launch came out at "x" price, a price whose profit margin continued to dwindle since your costs depended on factors beyond the government control such as imported basic products. So what happened? You left your product at the same price and deteriorated it in quality. Then you launched a new product that would be profitable for the next six months before you had to let it go like the other ones.

Marketing

Endicott: It almost sounds as if you market goods by-guess-and-by-golly, with a sort of intuitive feeling. How is market research brought into play?

Ortiz: Marketing is not in the paleolithic, but neolithic era. It pays lip service to everything—to research, packaging, promotional activities, merchandising. But there is really a great deal to be done.

Carou: We require a definite improvement in the marketing services field. Research companies here are in a more primitive state than companies marketing products.

Tait: I think you will agree as well that there was a primitive demand toward those companies as there was a primitive demand towards the ad agencies.

Ortiz: We have a great deal of difficulty buying market research. I think it is a cultural problem. The main problem with market research is that all those who have gone into market research are very academic. They are mostly psychologists, when not psychiatrists, and seem to believe that, unless market research comes packaged as a great intellectual exercise, it is no good. Hence, you have to work your way through wads and wads of paper.

There is obsessive preoccupation with very deep down questions of conviction and a lot of Peruvian stuff gets thrown into dance. These are tremendous sociological exercises. This is ridiculous! When it comes to most consumer products, 25% of the people buy completely by impulse anyway. Whether they adopt a product or not probably depends on what elements of the product you push to strengthen their con-

Growth in Mexican supers stimulates promo use

By RUBEN TREVINO

MONTERREY—Mexican food sales have long been dominated by the corner store in which selection is limited and marketers can find their poster material hung from walls and pillars like so many pieces of fine art, whether or not their products are on display.

But consumer habits are not as stubborn in Mexico as they are in Argentina, for example, where supermarkets have come and gone while housewives persistently make their daily trek to the neighborhood mini market for fresh produce. Mexicans have championed the advent of the supermarket.

While the small grocer is still most popular, with some 375,000 existing on street corners today, supermarkets are moving in rapidly and now number 550, some 320 of those located in the three biggest cities, Mexico City, Monterrey and Guadalajara. Supermarkets in these three cities, for example, have charted a marked growth in numbers since 1975, showing an increase of 63%.

Add the increasing acceptance of convenience stores in Mexico, where Southland Corp.'s 7-Eleven stores already number seven in the market, and one can safely chart the growth of below-the-line promotional activities in Mexico.

Now that a competitor's products parade side-by-side in heavily trafficked aisles, marketers have turned to direct marketing techniques with considerable results. While statistical data is limited, with respect to how successful promotional activities have been in pesos, a casual observance of the response made by one competitor to another's new promotion is enough to ascribe success to such advertising adventures.

- For example, Gamesa's Pronto, the nation's leading cake mix, with 45% share of market, introduced an in-pack promotion which offered prizes (color tv sets, kitchen gadgets, washing machines, etc.) if consumers got the lucky coupon inside the pack.

Not to be outdone, Lance, a manufacturer just bought out by Ralston Purina, and producer of Tres Estrerrellas, a hotcakes mix, introduced an in-pack promotion in which packages of hotcakes mix contained 16 different animal-shaped molds. In turn, Gamesa, the market leader, has just launched a strong advertising campaign to build up the image of its hotcakes flour.

- Kellogg's introduction of a highly successful on-pack promotion game called Turisteando, the object of which is to collect each of the 16 different pieces of a map of Mexico in order to play a "travelog" sort of game, attracted a response in kind from Maizoro, a competitive brand. Maizoro packs contained mini calculators.

Store space crowded with competitors also has encouraged new package design. One of the most intriguing designs has come from General Foods, which packaged two years ago its Tang orange drink in a reusable 1-liter pitcher. The response apparently has been good, because GF has just come out with a half-litre sized pitcher for Tang and a similar, though lemon-flavored drink, Limolin.

Direct mail is a growth area, although its potential is still stunted by the poor postal system. One of the more popular vehicles for direct mail, given the reluctance of marketers to use the post office, is popular magazines. *Alarma* and *Vanidades*, which like most magazines are distributed almost solely on newsstands, often carry a marketer's sole effort in direct mail promotion.

While old habits may die easily for Mexicans in general food purchasing, Mexicans still have not cottoned on to coupons as a money-saving device. Manufacturers are reluctant to use them because the rebate is hard to handle, especially given the fact that most Mexicans still do most of their buying at the corner store.

Advertisers believe the answer to this problem will come through consumer education. Such instruction should meet with less resistance among Mexicans who continually see inflation eating up the value of their pesos.

There is a chance for advertisers, too, to piggyback government efforts in this area. The government's consumer protection forces in fact have just launched a $500,000 media campaign to show consumers how to make better buys. #

Mr. Trevino Martinez is the assistant lecturer of sales promotion at the Instituta Tecnologico de Monterrey; president of the Consorcio de Mercado Tecnia Integra, a marketing company; and manager of marketing research at Gamesa S.A., a large biscuit company.

Toiletries prop Beecham's sales in Venezuela

(Continued from Page 15)

cham in a big way to a new distribution system through perfumeries. Condess is already on the shelves of the more than 700 half-drugstore, half-cosmetic counter operations, but a Jovan hit could provide the entree for Beecham to properly merchandise 2nd Debut through the popular perfumeries. 2nd Debut is Beecham's up-market skin conditioning cosmetic that came with the acquisition of Fleetwood in 1974.

Beecham plans to support Jovan sales in the perfumeries during high traffic times (Mother's and Father's days, Christmas) with sales personnel, a very expensive proposition, but one that Beecham hopes will become permanent. Such a personalized sales force could give 2nd Debut a fresh face-lift at the counters. "It is neither fish nor fowl," he says, referring to 2nd Debut's heavy-duty nature and product positioning (aimed at older women). "This way we will be able to market it like a toiletry and price it like a franchise cosmetic."

Jovan bears the same package as its U.S. equivalent and same heterosexual image conveyed in the JWT advertising stateside. Tv is the prime medium, although Beecham is looking into outdoor to "show off" the distinct packaging.

Beecham, while expecting the lion's share of its growth to come from this new thrust in the toiletries sector, is trying to revitalize its traditional breadwinners which have become somewhat stagnant as a result of the general economic malaise.

At the head of the revamp list is Brylcreem, which totally dominates the men's hair cream market, a market if there ever was one in need of a new coiffure. To change Brylcreem is to change men's grooming habits. In a way, that is just what Beecham intends by shifting its thrust away from the "young guy" to men in their 30s and 40s "who probably used Brylcreem years ago but stopped during the '60s when hair dressings gave way to daily shampooing and the dry look," says Mr. Fraioli.

Second Debut skin products, with limited distribution in major chain stores, hopes to ride the Jovan launch into the perfumeries. But to stay there it must modify its image of a heavy duty product for older women with wrinkles to include a younger audience where the buying clout is heavier (half the population is under 18)—more in line with one of Beecham's chief competitors, Oil of Olay. In fact, it is against Oil of Olay that Beecham pulled off a bit of marketing chicanery. Recently anticipating an Oil of Olay launch into Venezuela, Beecham infused extra ad bolivares into print for 2nd Debut, producing Oil of Olay-type ads with the 2nd Debut imprint, of course. Beecham likes to think the ripoff threw this rival off balance. Studies show 2nd Debut has yet to lose any of its 12% market share to Oil of Olay (2%).

- Mistral is a mature deodorant in the women's sector, and because a line extension or companion men's deodorant might "prove confusing to the customers," according to Mr. Fraioli, no changes are in the works.

Eno, which was first produced in Venezuela under license in the early 1900s, remains in a sector—proprietary drugs—still under government controls. Beecham has not been able to raise the price of this antacid product since 1958. Eno has retained its 40% market share, according to Beecham, through new production equipment, automation and packaging changes including thinner foil for the envelopes. All advertising has stopped now that Beecham has run out of cost-saving measures.

Little wonder the new interest in toiletries and general product re-evaluation at Beecham, especially given the fact that 25% of the company's sales come from proprietary products like Eno, and given the fact that the boys back in Middlesex in the U.K. might demand sales be more "useful." #

One of the 700 drugstore/cosmetic shops in Venezuela

Advertisers reject fixed commission bid

CARACAS—The economic conditions which are making it difficult for agencies to hold down operating costs prompted them last year to seek from their clients an across-the-board 20% fixed commission on production costs.

Advertisers tended to pooh-pooh the idea, citing that "freedom is a constitutionally recognized principle in Venezuela and in all democratic countries ... and that freedom of contract between parties concerned should be respected."

- The advertisers, through their association, the Asociacion Nacional de Anunciantes-Venezuela, also took issue with an agency association agreement with the two private television stations, that advertisers would not be given discounts for their purchases of space. "They (the advertisers) are the actual purchasers of space and therefore have a legitimate right to enjoy the discounts and other benefits accruing on account of the volume and duration of their contracts," said a prepared ANDA rebuttal to the agency move.

One local advertiser told AD AGE that "the larger agencies are doing okay, but the smaller ones are hurting. They are moving into fees as remuneration and smaller advertisers are even paying higher commission. Good people are incredibly expensive here. I can understand how the small to medium-sized agency is having a rough go."

His own company, a major consumer goods business, and one of the country's largest advertisers, holds the position that "if there is a profitability problem for the agency on our account, we expect the agency to come to us and talk about it. We recognize their right to make and our obligation for them to make a profit."

Such words, however, may be little comfort for the beleaguered small to medium fry shop. #

Free market liberates Chilean economy

SANTIAGO—The economic system here has undergone a thorough transformation the past half decade since Chile turned away from the controlled environment imposed on the country by Marxist president Salvador Allende Gossens.

Elements of the new economic model now include a free competitive market void of price controls, import incentives through reductions in customs duties and less red tape for consumer and capital goods as well as services, and the fact that private enterprise as opposed to the state is now the prime generator of economic development.

Such a model runs full circle to conditions the first half of the decade when the popularly elected Allende government nationalized much of the nation's industries and put up high customs barriers to shut off imports.

The advertising business, reflecting general economic conditions, ground to a halt. Most multinational agencies withdrew from the market, leaving local associated agencies as representatives. For example, in the beginning of 1974, just after the military overthrow of Allende, only McCann-Erickson, represented by local unit C.C.C., and Sertec/K&E were in the market. These shops have been joined the past five years by J. Walter Thompson; Grey, associated with Fabres; Ogilvy, associated with Promoplan; Unitros; Lintas, associated with Northcote, Merino y Silva.

- Advertising, like the general business climate, has shown steady improvement since 1975. While per capita income has increased from 1975 to 1979 (estimated figures) from $587 to $1,050, inflation dropped from 340.7% to 38.9%, unemployment dropped from 16.5% to 12.5% and the Gross Domestic Product accelerated from $9.2 billion to $11.4 billion, advertising was making its general comeback. Ad expenditures have shot up from $60,000,000 in 1976 to an estimated $126,000,000 this year, with some 74% of that placed through agencies; as a percentage of GNP, ad expenditures have risen from 0.56% in 1975 to an estimated 1.04% this year; and per capita ad expenditure has jumped from 3.2% in 1969 to 10.4% in 1979.

Once the economy was "liberated," new products gushed onto the market, according to Henry G. Northcote, board chairman of the ACHAP (Assn. of Chilean Advertising Agencies) and managing director of Northcote, Merino y Silva agency. As controls came down, banking sector growth shot up to the point where virtually all major international banks are now represented in Chile. Services and fast foods also experienced considerable growth as expendable income increased.

"Our market, which is relatively small, is virtually flooded with quality goods and competitive brands. For example, we now have strong competition among 50 financial institutions, 22 different automobile models, 105 different wines, 25 competitors in the chocolate market, 20 in soaps, 25 in beers and 10 in margarines," says Mr. Northcote.

"This highly competitive environment has forced the agency business to upgrade itself, both in human and in technological resources. Chilean agencies, lacking sophisticated production facilities for cinema and tv commercials at home, have been travelling to Spain, Brazil, Argentina and the U.S. for such services. But such an exodus is not expected to continue, given the fact that Chilean production houses are beginning to attract quality personnel and equipment.

As in Argentina, a certain amount of reaccommodation has asserted itself among Chilean advertisers. Efficiency is paramount in this highly competitive market, now that strong external pressure from imports—customs duties now do not exceed 10% except in the automotive industry—are bumping products from less efficient producers off the shelves.

"There is ever-increasing pressure from multinational North American, European and Japanese companies, especially in the area of household appliances, electronics, soft goods and automobiles. This has forced national companies to improve production and marketing as well as their executive and administrative capacity, often incorporating executive personnel with international experience, contracting new licenses and introducing advanced technologies," says Mr. Northcote.

The accent today is on the consumer, he says. The interest of the consumer is paramount, ranging from production and market research to finished product. Catering to consumers are new marketing formulas—hypermarkets, modern promotion systems—and new credit systems for soft goods and services, including for the first time in Chile the recently introduced credit card systems, Diner's Club, Visa and American Express.

Television has been the big growth area, especially since the introduction of color in April 1978. Color penetration now is 80% of the upper and upper middle class in Greater Santiago, while black and white sets are held by 95% of the upper and middle class in urban areas and 80% of the lower class in the urban zones. The rush to get into tv, especially when color was inaugurated, produced considerable clutter, which brought about the need for an anticlutter policy backed successfully by the ACHAP. At present, 12 minutes of advertising is accepted per hour.

The popularity of tv as an ad medium is seen in the fact that 70% of the media billings of tne 10 principal Chilean agencies is absorbed by tv, which took some 39% of total ad pesos in 1978 (the last available data, which also ranked newspapers No. 1 with 41% of the total) but takes in considerably more today.

Radio has increased penetration, though still small. For example, fm radio presently covers 13% of the zones monitored for electronic media. Press and magazines have remarkably improved their printing techniques, but still have a long way to go, says Mr. Northcote. #

Chile ad agencies

Agencies	Billings
J. Walter Thompson	$14,436,954
Northcote Merino Silva/Lintas	11,033,000

THE $600,000,000 BONUS.

Advertisers in Diario Las Américas, in addition to the 2.5-billion dollar Greater Miami Latin Market, get an extraordinary bonus:

The over $600 million spent annually, since 1978, by more than 575,000 Latin Americans who flocked to Greater Miami in search of merchandise.

And these shopping-oriented Latin Americans buy everything under the South Florida sun: Television sets and radios, sound components, calculators and electronic equipment, office supplies and industrial goods. Home furnishings, decorator items, major and minor appliances. Toys. Clothing, shoes, accessories, watches and jewelry, cosmetics. Food products. Even such big-ticket items as cars and yachts.

The list is endless.

These Spanish-speaking visitors have made Greater Miami the shopping center of all Latin America.

And during their stay in Miami, the one daily newspaper these Latin American visitors read, to keep up with the news back home, is Diario Las Américas.

Find out how your advertising dollar can also get a piece of this lucrative bonus. Just call us or write for our free brochure with all the facts and figures.

Multinationals press on quietly in Mexico

MEXICO CITY—Trying to get the multinationals operating in Mexico to talk about themselves in print is often an impossible task.

They fear damaging attacks from the left wing of Mexican politics and press if they are too much in the public eye. "We don't want to be known as a glamor company," said the American board chairman of a U.S. multinational.

"We are one of the 25 largest companies in Latin America. We have gotten where we are through quiet responsibility and by conservative methods . . . It looks to me as though the communists have a strategy of countering anything favorable they read about us, so we don't speak much," he added.

- A few days before, page 4 of *Excelsior*, one of Mexico's major newspapers, had carried the headline: "Large multinationals decide agricultural production." The story quoted Jorge R. Serrano, said to be a member of the Center of Economic Studies of the Third World, noting that credit, water and land in Mexico is principally at the disposal of "important farmers and 'transnationals,' " as the press in Mexico usually calls the multinationals.

Such companies, he added, decided what should be produced "but do not concern themselves with improving the living conditions of the workers nor with improving the consumer's nutrition. They are only interested in profits."

- The Center of Economic and Social Studies of the Third World is in southern Mexico City, a couple of blocks from the home of former Mexican president Luis Echeverria, who established it upon leaving office at the end of 1976.

Echeverria, highly critical of Mexico's private business sector when he was president, also saw himself as a Third World leader. The *Excelsior* story was one of many on the clash between corporate and Third World policies that have appeared in the Mexican press in recent years.

Of the 100 leading advertisers in the United States, 55 or so have major operations in Mexico, a fact which emphasizes this country's importance as a consumer market.

- "As far as such companies' business volumes are concerned, it has to be an awful lot," said Edward Noble, head of Noble y Asociados, one of Mexico's leading ad agencies. "In some cases it must be up to 40% of their total business."

Nevertheless, the Mexican government applies strict rules under which the multinationals must operate. In 1973 the Echeverria administration pushed through a "Mexicanization" law, which insisted that at least 51% of all companies' stock had to be sold into Mexican hands.

- "When the law came out we studied it," said the board chairman. "We said we would attempt to adopt the measures the government had outlined. We said we would submit our plan for the government's approval and we did. We complied with the letter of the law."

The money earned from the sale of 28,000,000 of his company's shares was reinvested in Mexico. Plants were expanded and re-modelled and the company's services extended throughout the country.

"Mexico is a great market," said the board chairman. "It's growing very rapidly and it is suffering from this. The infrastructure is not sufficient. There is a cash squeeze, a capital investment squeeze. This has created inflationary pressure."

- Said Jim Stanton, 65-year-old chairman and director general of Corporacion Interpublic Mexicana: "Business in general has been increasing this year. But it's a bit of a contradiction because, while industry as a whole is growing, we are all suffering from the effects of a tremendous shortage of money.

"The interest rates are very high and, even at these enormously inflated rates, the banks do not seem to have the funds available. It has been like this since late last year. We thought things might improve this year but the first quarter has shown little relief.

"We still have hopes this will be a growth year. Some industries are able to grow much faster than others. But the market's there in most industries."

- Corporacion Interpublic, known as McCann-Erickson-Stanton until December, 1976, closed 1979 with total billings equivalent to about U.S. $30,500,000.

"This year we estimate at least a 15% growth," said Mr. Stanton.

The new corporation functions with three divisions—McCann-Erickson, Campbell-Ewald and Marplan, which is a research division.

"Interpublic has experienced incredible growth the last two years," said Mr. Stanton, an American who recently celebrated 30 years in advertising in Mexico. "Not only have we acquired new business but our clients have expanded their business and increased their advertising budgets accordingly . . .

> ***"We thought things might improve this year but . . ."***

"There are great social problems in Mexico but I feel optimistic about the future. The blessing of having found an incredible amount of oil in the country will give the government the funds it needs to take care of a large proportion of the population that is really marginalized now."

That in turn would boost demand for many products, he added.

Mexico's proven oil reserves are about 50 billion barrels and the government expects to be exporting 1,000,000 barrels per day sometime this year.

Indeed, Mexico would have been in trouble had it not been for its oil exports. Gustavo Romero Kolbeck, president of Banco de Mexico, the central bank, said in his annual report that petroleum exports in 1979 were worth $3.7 billion—42.5% of total exports.

"The value of non-petroleum exports increased 13% which, in real terms, is equivalent to a virtual stagnation," Mr. Romero Kolbeck said.

The main reason was an increase in internal demand and "without doubt a reduction in the external demand."

As a result, the central bank's current account deficit was U.S. $4.2 billion, 61% higher than the previous year.

The positive side of the economy was a 6% real growth in the Gross Domestic Product and 7.5% increase in employment.

"But, for the moment, there is not the diversification that is needed," said an official closely connected with government policy-making.

"The growth rate of internal demand has been very high. That's why part of our traditional exports have stayed in the country. For example, five years ago we were net exporters of steel products. We are net importers now. The same is happening with cement. Imports of food are increasing." #

Argentina recovers

(Continued from Page S-23)

be that they simply want to see their product in color. But that will be the first six months and then the factor of higher rates will dilute the color advertisers.

Kodak does plan to take full advantage of color tv. Color is basic to our product. We've always been strong in cinema. We will increase our participation in television with color. Currently our ad budget allows us about two or three tv campaigns a year. #

Philips, doing battle with Japanese color set manufacturers in Argentina, is positioned as having "natural color," as opposed to the more glamorous and high-contrast color tv delivered by most Japanese sets. Agency: Ortiz, Scopesi y Cia.

Brazilians toss luck into car buying pool

SAO PAULO—Brazil, which is trying to climb rapidly out of the past into an industrialized future, has adopted many of industrialized West's values, including the penchant toward materialism: possessions are a sign of upward mobility.

Brazil's '71-'78 media ad expenditures

	1971	1973	1975	1977	1978
Television	39.3%	46.6%	53.9%	55.8%	56.2%
Magazines	17.0	15.6	14.1	12.4	12.4
Newspapers	24.8	20.9	19.8	20.2	20.2
Radio	12.7	10.4	8.8	8.6	8.0
Cinema	0.9	1.4	0.7	0.6	0.5
Outdoor	5.3	5.1	2.7	2.4	1.5

But how has a nation, where about 30% of its people are actual "consumers," and annual family income no more than $1,500, managed to purchase an average of one tv set per every two households and buy all those cars that produce bumper to bumper traffic in Sao Paulo?

You don't apply industrialized West's system. The classic example of this "necessity" being the mother of invention is illustrated in a peculiar way of buying cars called the Consorcio, a real *jeito* Brazilian method.

The Consorcio was invented in 1967 because the middle class lacked resources to purchase automobiles. The first groups were created privately among friends. Later the activity was recognized legally, and began to be handled by specialized firms. Today the Consorcio competes with automobile financing as a means of purchase, being used by about 10% of all buyers.

Every automobile maker has its own Consorcios, as do many authorized dealers, but the lion's share continues in the hands of the specialized firms. The largest Brazilian Consorcios deal in automobiles, trucks, tractors, boats and even aircraft. (Note: Brazil is the world's third largest market for private airplanes.)

A typical VW Consorcio works this way: a group of 72 persons who want the same model is formed; each makes payments for 36 months. The payments include a 10% administration charge plus a 2% reserve against drop-outs, and are corrected when the price of the car is increased.

Each month two cars are distributed, one by drawing and one by bidding (the high bid gets the car). After 36 months, everyone has received a car by one means or the other.

The principal advantage of the Consorcio is to open up new market segments to people who could not buy normally—with large downpayments and co-signers. The participants pay no interest, and leave the time of delivery of the car for luck to decide. #

Top 10 Brazilian Agencies

Agency	Gross Income 1979	Gross Income 1978

Brazil's Editora Abril

Publisher sees future in newsstand sales

SAO PAULO—Editora Abril has never lacked vision. Ever since Victor Civita called on Donald Duck to launch his publishing empire in 1950, the company has made a beeline toward the future.

Today from the company's massive printing and editorial office compound on the outskirts of Sao Paulo, corporate officers seek out any available street corner spots for potential newsstands—viewed as a locomotive factor for the future.

"This company was built on newsstands. Some 60% of our total revenues are still based on newsstand sales, and we plan to add 1,000 more per year," says Roberto Civita, son of the founder, who still keeps a hand on company movements.

The lion's share of those newsstand sales comes from Editora Abril publications, which accounted for total sales of $100,000,000 in 1979. In short, Editora Abril produces the Brazilian equivalent of *Business Week (Exame), Time (Veja), Playboy (Homen), Cosmopolitan (Nova), Good Housekeeping (Claudia), Road & Track (4 Quatro)* and *Sports Illustrated (Placar).*

▪ The remainder comes from a bevy of publishing-related operations including the publishing of a number of "great thinkers" series (the company has sold more than 170,000 volumes of Plato's philosophy), and classical records—all this in newsstand sales although catalog sales are entering the initial stages.

However, when Robert Civita talks of adding newsstands to Editora Abril's distribution network he now talks of company-backed operations and not of wholesale arrangements.

The company only recently began its packaged kiosk whereby it teaches small operators, or even wholesalers, how to get a newsstand, set one up and finance it, with Editora Abril financing the stand on a long-term basis with a six-month grace period before payments begin.

▪ "We also have offered our competition a 'free ride' if they want to take us up on our offer to help them set up newsstands," says Mr. Civita. When taking the whole market, Editora Abril rests right at the top as a wholesaler. There are 600 wholesalers of print material in Brazil. Editora Abril has Sao Paulo locked in its camp, which is a pretty good indication of its power.

Newsstands dominate magazine distribution in Latin America

The '80s also will bring in higher prices as paper, printing and distribution costs continue their march upward. So far Robert Civita has simply tackled that issue on average of every three months by raising the cover price on his magazines.

He also has little fear of competition from television. "We make no bones about it, if you want to sell soap you don't need us. Cars, yes. Brazil has a great advantage over the U.S. in magazines. We reach the elite, not the masses. Those with purchasing power read magazines, or, put more simply, they read. We don't reach deep into the pyramid," he remarks.

▪ Part of the 1980s, at least the unfurling of the decade, will probably see a flurry of skin magazines enter the market now that overt censorship has been lifted. The minister of justice, who handles such moral censorship, called publishers this February to deliver the words; "You're on your own now, see you around," chuckles Roberto Civita.

Brazil press had been under stern moral censorship since the mid-'60s when the military took over the government.

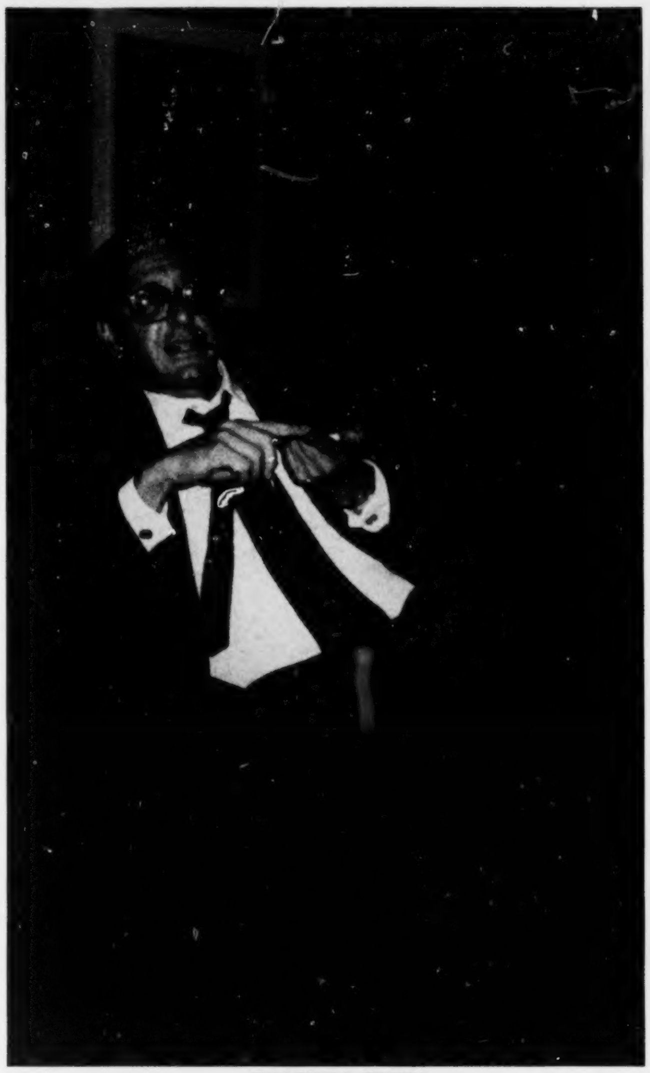
"Now you can get clobbered after you publish," Mr. Civita says. "The onus has shifted. Our girls will still coyly cross their legs," he continues, citing Editora Abril as selling advertisers while 'other' skin magazines don't. "We could sell twice the copies we now do by adopting the open-leg school of publishing."

▪ While most of the Editora Abril magazines rely on newsstand distribution, two magazines, *Exame* and *Veja* increasingly are finding stronger sales by subscription.

"It is just more convenient to get business and newsmagazine weeklies at the office or home," says Mr. Civita, who can thank a remarkably improved postal service for making such a venture possible. *Veja* now has 238,000 subscription sales, compared to 66,000 on the newsstand.

Exame is in the process of converting its circulation from non-paid controlled to paid controlled. *Exame*, which is the only magazine in Brazil that can provide its readers a quarterly audit, now has 53,544 controlled circulation.

One area of business launched in the '70s may indeed have "changed the face of Brazilian publishing" as Robert Civita fondly puts it—a book club. There are now 700,000 members in the club, who read an average of seven to eight books a year from Editora Abril, which launched the club in tandem with the big German publishing house, Bertelsmann. #



ROBERTO CIVITA

Growth Rates of the Brazilian Economy in %

Period	Agriculture (Primary Sector)	Industry (Secondary Sector)	Commerce (Tertiary Sector)	Transports & Communi-cations	National Product in Real Terms

io-iô

Italian company, Star, entered the Brazilian market about a year ago by buying out small local fruit producer Agis. Agency Y&R, itself a late-comer in Brazil compared to other big American-based agencies, lived up to its full-service billing and then some by taking Star's popular chocolate spread in Europe (Nutella in Spain and Ciao Crem in Italy), giving it a new name (Io-Io crem), registering the name, designing the package, handling promotional aspects and working with distribution channels to market this sticky, dark brown, greasy kids stuff. Within one year of launch, Io-Io crem has grabbed sales larger than the whole market category prior to its entry.

Mild cold cereal growth seen

Bv JOHN C. MAXWELL JR.

Cold cereal volume in 1979 was up possibly 1% in pounds, but grew some 9% or so in dollars. The year's dollar volume probably approached $2.25 biilion against about $2.05 billion in 1977.

We anticipate that this year's unit volume probably will grow modestly, possibly in the 1% to 2% range, and price increases again will probably be in the 7% to 8% area.

Last year Kellogg Co. went national with Most, a fortified cereal that is covered under "all others" in our table, and with Graham Crackos. In test are Raisins, Rice and Rye and Smart Start (fortified with iron); Honey & Nut Corn Flakes is rolling national. While Kellogg has continued to lose market share in recent periods, we presume that these new products may help stabilize or increase share.

General Mills this year went national with Honey Nut Cheerios and it quickly became the company's most successful introduction. General Mills now has Crispy Wheat 'n Raisins rolling national. It was the only company to meaningfully increase share in 1979, and this situation continues.

- Quaker Oats went national with Quaker Corn Bran. Ralston's Cookie-Crisp seems to be flattening out at around a 1% share, and Ralston also has gone national with Honey Bran. In fact, it should be pointed out that most of the "all others" category belongs to Ralston. Obviously, if this is added to Ralston's own category, the company's market share now approaches that of Quaker Oats.

It is interesting to note that the top ten products as a whole have lost share over the past few years. This is contrary to most consumer areas, where the top sellers have been growing to the detriment of "all others."

- According to a 1978-79 Simmons Market Research study, on a national basis 80.7% of female homemakers report they purchase cereal at least once a month.

Given the high rate of usage of cereal already achieved, we continue to expect the cold cereal industry will grow at only a moderate rate. However, the recent baby boom may have longer-term positive ramifications. #

Mr. Maxwell is associated with Lehman Brothers Kuhn Loeb Research, New York.

Pernod spreads French 'scourge'

(Continued from Page 60)

in France as long as he could keep the government on his side. From the beginning he kept up a high powered image-making campaign, establishing a foundation to promote art and culture (rare in France), building a car racetrack, ceding over islands in the Mediterranean to the government for the benefit of tourists, sponsoring world yacht races and paying increasingly heavy taxes without protest.

In 1973, the old-fashioned Pernod company merged with the dynamic Ricard group and is now run by Paul Ricard's son, Patrick, 35.

- Since the 1973 marriage—"it was the equivalent of a merger between General Motors and Ford," says Jean-Jacques Bouffard, sales director of Pernod Ricard's export division—the company has embarked on a colossal reorganization and diversification.

As well as Pernod and Ricard aperitifs, which account for 46% of sales, the company makes Dubonnet (except in the U.S. where the rights were sold some 50 years ago), Cinzano, Suze, Cognac Bisquit and Ambassadeur. Through the purchase of Campbell it now sells White Heather and Glen Campbell whisky worldwide. In France it distributes Coca-Cola and owns an important soft drink group, and through another affiliate, Cusenier (8.5% of earnings), distributes Cutty Sark, Smirnoff, Old Crow and Gilbey.

But Pernod Ricard has some very pressing reasons for taking the export route. Not only is it taxed to the eyeballs at home but it also is constantly in need of good public relations *vis-a-vis* the French government and the French consumer. These days, the way to the government's heart is to help France's balance of payments problem.

However, in order to export pastis, the first step is to create a demand. "We find that foreigners are motivated by traditional drinking habits," Mr. Bouffard says. "Licorice or aniseed in a drink is very strange for them. Our tests show that media can stimulate a demand that already exists but it cannot create one."

- This year Pernod Ricard is spending $47,960,000 in Europe, particularly in England, Spain and Germany. The largest part of the budget will go toward public relations, point of sale promotions and gimmicks. In the four years of its export drive, the company has managed to bring foreign sales up to 18% of turnover.

In England, where Pernod always has had a small following, the results have been encouraging (sales up 34% last year). Pernod has thus managed to squeeze into 20th place in the hit parade of alcoholic drinks across the channel, although, to the Frenchmen's horror, the British have taken to mixing it with orange juice, Schweppes or even cassis.

- Added to the difficulties of changing national drink preferences is the distribution problem, which has been solved in Britain with the purchase of the Parkington Co., longtime Pernod supplier.

As for the states, Pernod Ricard president Patrick Ricard says that the Austin, Nichols purchase is the result of a two-year search during which he almost bought a vineyard in California.

Meanwhile the company has been testing pastis in the Boston area. Comments Mr. Bouffard dryly: "We are obliged to admit that our efforts have not been crowned with success at the moment."

Now, with the Austin, Nichols deal signed and sealed, it will be interesting to see how the famed Ricard flare for public relations and publicity will be applied to the challenge of the U.S. market. #

GF, B-M put backing behind new WPIX net

NEW YORK—General Foods and Bristol-Myers each has allocated $1,000,000 annually to get WPIX' new Independent Network News starting off looking healthy.

Leavitt J. Pope, president of WPIX, said the network will be operated as a division of the station. Heading the venture will be John Corporon, vp-news.

INN premieres June 9 with a nightly Westar III feed of a 30-minute newscast to 30 independent stations across the country. GF and B-M each bought a nightly 30-second position.

Produced here by WPIX, the program will star its current anchors, Pat Harper, Bill Jorgensen and Steve Bosh. The show will air here and in a number of cities at 10 p.m. (EDT).

- A news bureau is to be opened in Washington and foreign feeds will be secured from UPI and Visnews via satellite. Outlying stations will transmit stories to New York for use in the program.

Mr. Pope said transmission via the domestic bird can start promptly to most stations since they own or have access to the earth terminals required to pick up the show. A few still must get their dishes ready to receive.

The WPIX president stressed that this will bring the country its first national prime time tv newscast. (Cable News Network starts June 1, but with about 3,000,000 homes on the cable subscriber list.) The indies included in the initial lineup for Independent Network News together can be seen by 40,000,000 homes—or more than half the total number of U.S. households.

INN will have three minutes to sell at $4,000 a 30, and the stations will have three minutes. Between the local telecasters and the network, it's a straight swap.

- Mr. Pope thinks, with luck, this could be the start of that much-looked for fourth over-the-air tv network. Expansion hopefully will come on the station list as well as in the program lineups. Next on the schedule might be a second daily newscast, he said, or an extension of the first to seven days a week.

Also under consideration for this WPIX division: Independent Network Sports and Independent Network Special Events. #

WILLIAM MORIARTY

NAPA, CAL.—William F. Moriarty, 62, former ad manager in San Francisco for *Fortune*, died here on April 16. A native of Chicago, Mr. Moriarty served with *Fortune* in Chicago and Cleveland before transferring to San Francisco.

HELEN DEITCH

NEW YORK—Helen H. Deitch, 72, former co-owner of William Douglas McAdams Inc., the health care advertising agency, died of cancer on April 27 at her home here. Mrs. Deitch, who retired in 1972, joined the agency in Chicago in 1929 and served as a senior vp.

BARBARA PHILLIPS

NEW YORK—Barbara Phillips, 58, account executive at Doyle Dane Bernbach since 1965, died here May 5 after a long illness. Mrs. Phillips also had served at Grey Advertising and the old Clyne Maxon agency. At DDB, she worked on Polaroid, Avianca and the United Way Tri-State campaigns. #

Major W-L boost backs new candy, gum entries

NEW YORK—Warner-Lambert plans to boost ad spending 25% to $522,000,000 worldwide this year, with a major portion of the increase supporting new and reformulated candy and gum products.

According to Joseph D. Williams, president, the company plans to increase media spending for candy and gums in the second half of this year 30% over the same period in 1979. Mr. Williams' remarks were made here at the company's annual stockholder's meeting. Last year, W-L ad spending rose only 6% over the previous year to $415,900,000.

Mr. Williams noted that Freshen-Up liquid center gum and Trident sugarless mints have both been reformulated and Chewels liquid center sugarless gum has just rolled national.

The company next month plans to begin testing a new sugarless mint in the breath protection segment. Trident Candy Fruits sugarless roll candy positioned in the taste segment remains in test.

Another of W-L's most successful businesses, Entenmann's baked goods, is rolling into Atlanta to add another 2,000,000 consumers to its reach. Plans call for expansion into Pittsburgh in June.

- In Atlanta, Entenmann's plans an outdoor and newspaper effort intended to reach 80% of consumers 12 times during the introductory period. More than 1,000,000 coupons will be distributed, and advertising is set to appear on 77 outdoor boards. J. Walter Thompson Co. is the agency. The Pittsburgh introduction calls for a similar advertising and promotion program.

In response to a stockholder question, a W-L exec said the company has no plans at this time to enter the fast-growing weight control market. However, the company has applied for a trademark for Waistline in the appetite control product category. #

Kummel · Matthews · Upson · Wheeler · Jenkins · English · Foley · Walsh

With the Greenbrier in the background, American Assn. of Advertising Agencies president Leonard Matthews welcomes incoming chairman Gene Kummel of McCann-Erickson International and outgoing chairman Stu Upson of Dancer Fitzgerald Sample. Visitors on hand for the Four A's annual meeting included David Wheeler of the Institute of Practitioners in Advertising, London; Geof Jenkins of Spitzer, Mills & Bates, Toronto; Mike English of Ted Bates Ltd., London; Larry Foley of the Institute of Canadian Advertising, and Oliver Walsh of the Institute of Advertising Practitioners in Ireland. A record number of agency people attended the Four A's meeting. Photos by Mary Cairns.

Time to trim down, Four A's told

WHITE SULPHUR SPRINGS, W.VA.—The advertising agency business, meeting here under sunny skies, felt the chill of recession as the American Assn. of Advertising Agencies' leadership spoke publicly of reduced client budgets, slower pay, lower profits and the need to improve advertising effectiveness and productivity.

Stu Upson, outgoing Four A's chairman and chairman of Dancer Fitzgerald Sample, predicted a "rough" recession—rough on agencies, its people and profits—because current ad budgets and new product investments will be trimmed.

Agency costs for rent, taxes, transportation and "mainly salaries" must go up, and he warned that if the agencies' best people can't keep up with their personal costs on their present salaries "they will find a job which pays more."

Mr. Upson also called on agency managements to "rethink your structure and operations. Are you too heavy at the top? Are there too many internal approval layers? Do your future stars have a clear growth path?" He advocated productive evaluation systems, avoidance of meetings "which should take ten minutes and take half an hour."

Once the agency house is in order, he said, clients can be approached with ideas for increasing productivity, such as: Be certain strategies are tight and agreed upon, eliminate excessive alternatives (they are costly) and develop an annual "mutual evaluation program" to deal with waste and problems before they get out of hand.

Mr. Upson also said agencies mustn't waste time on new products or concepts until management has agreed they are "rational opportunities," should "travel fewer people on both sides," and work with clients to streamline approval layers so that "the true decision maker sees the work early."

Mr. Upson concluded, "The only way to offset inflation is to enhance productivity, and productivity to us is a better use of our only asset, our great people and their very, very valuable time."

In his opening address, Four A's president Leonard S. Matthews warned that although billings and dollar profit volumes were on the rise, profit margins were not.

After noting that some 83% of the member agencies reported increased billings last year and 71% increased dollar profits, he said 40% of the 30 largest member agencies contacted in the last two

NBC asking $275,000 for Super Bowl spot

NEW YORK—NBC-TV is asking $275,000 per 30-second spot on its coverage of Super Bowl XV on Jan. 25. With a 6 p.m. (ET) start, the game originating from New Orleans will spill over into prime time. Among clients already booked is Chrysler. Last season, CBS charged $234,000.

Mandel to Hearst; report 'Media People' folding

NEW YORK—Charles Mandel, founder and publisher of *Media People*, has signed on at the Hearst Corp. as publisher for the magazine development group. It includes *Science Digest*, *Country Living* and other test projects. *Media People* reportedly has suspended publication.

Nadine Peterson leaves DDB, forms consultancy

NEW YORK—Nadine Peterson, senior vp-creative director, Doyle Dane Bernbach, is leaving the agency, effective May 31, to form her own consulting company. Ms. Peterson said her departure is based on personal considerations. No successor yet.

(Continued on Page 8)

United Vintners joins trend

Soft wines in hard drive

NEW YORK—When United Vintners talks about the "soft" wine market it will attempt to stimulate with an aggressive comparative campaign, they're not referring to half-hearted consumer demand.

Just the opposite, in fact. Soft, in this case, describes a line of three, low-alcohol generic wines that the Heublein subsidiary is pitting against two of the leaders in the brisk table wine market. The comparative tests that form the basis of United Vintners' campaign in three test markets have convinced the company that demand will be anything but soft.

Commercials with the theme, "Softness you can actually taste," feature consumers who rate the generic soft chablis over Paul Masson and Almaden offerings. While the three soft wines contain 10% alcohol or less, United Vintners has opted to focus on the sweeter, fruitier flavor of the new wines in positioning the product in the U.S.

- The three Lejon brand wines—a chablis with 10% alcohol, a burgundy with 8% alcohol and a rose with 9.5% alcohol—are being tested in Albany, N.Y.; Milwaukee and Seattle. The tv spot from McCann-Erickson promotes only the chablis and is due to break during the first week in June.

In pursuing a three-year yen to market the low-alcohol wines—an ambition hampered by California law until last December—United Vintners had a model for success in the category.

California regulations forbade the production of wines with less than 10% alcohol, but that didn't mean that Americans couldn't drink them. The most popular imported brand—Riunite—and the most popular import category—lambrusco—qualify as soft wines, though few consumers are aware

Paley in no hurry for successor

By MAURINE CHRISTOPHER

NEW YORK—Communications and financial circles continue to speculate over how, when and why John Backe was forced out as president and chief executive officer of CBS Inc. But William Paley, the founder and real boss there, showed no signs of being in a hurry to find a successor.

However, Mr. Paley is a master of surprise and could fool nearly everybody as he did when he started the events that led to Mr. Backe's departure the day after the CBS president had triumphantly returned from the CBS-TV affiliates meeting in Los Angeles.

Mr. Paley would not talk about what happened to change his mind about the man touted as a "wise choice" to head the CBS empire in the 1979 Paley autobiography. Mr. Paley was equally silent about what happens next.

- After a week of digging, reporters were being led to believe that Mr. Paley and the CBS board, which traditionally supports him, had been looking for a new president for some time and that Mr. Backe had jumped before he was pushed. But there is no successor in sight.

Industry observers like Mike Dann, former CBS-TV program chief, pointed out that Mr. Paley, relying on group and division presidents, would not miss Mr. Backe "all that much."

Supporting this theory was the fact that Mr. Paley, an active chairman who has always been the boss whatever his title, is quite comfortable running Black Rock in the interim until another president is found. And while talk of uncertainty at the top and Wall Street concern over a corporation which keeps dumping young heirs-apparent floated over his head, the man in charge obviously felt no instability.

- At CBS the main concern now rests with the May prime time sweeps and Bob Daly is in charge of that. So far, the Nielsens have CBS slightly ahead with a 16.4 homes rating to 16.2 for ABC and 15.2 for NBC.

Here and in Los Angeles, CBS sources noted how well Mr. Paley gets along with Mr. Daly, the president of the entertainment division. As a result, Mr. Daly has been mentioned as a Backe successor (though not as chief exec)—if a top Hollywood production name, say Mike Eisner of Paramount—can be hired to replace Mr. Daly.

Mr. Backe was not talking to reporters. He reportedly has a silence clause in his $1,000,000-plus settlement. Some people think it's more like $2,000,000-plus since $1,000,000-plus was what his predecessor, Arthur Taylor, left with when he was abruptly dismissed four years ago.

Such liberal settlements usually include prohibitions against working for the competition, but few, if any, people in broadcasting have been aggressive enough to put them to the legal test. Mr. Taylor has returned to an earlier career—high financing, setting up his own company to work with the Rockefellers and others. #

Two spots test new brew

Adolph Coors Co. is using two commercials in the test markets for its new Herman Joseph's 1868 beer (AA, May 5). The spot at top introduces a "big night" theme, when a big Herman Joseph character arrives. The other has two girl watchers deciding on the new beer over Lowenbrau and Michelob for that "once in a lifetime" occasion. Ted Bates & Co. handles.

DMMA discards Sat. mail

WASHINGTON—A Direct Mail/-Marketing Assn. group seemed ready to abandon Saturday mail delivery with few regrets last week, especially when its demise is linked to easing pressure for higher postal rates.

The more than 100 DMMA members, here for their annual government affairs meeting, showed their sentiments when Postmaster General William Bolger asked for a show of hands on the Saturday mail issue.

While the group split about evenly on continuing six-day delivery, the balance shifted strongly in favor of ending Saturday mail the moment the postmaster general suggested the service cutback could be a tradeoff for higher rates.

- DMMA members were meeting just as Senate and House budget committee members were trying to nail down a joint position on how deeply they will cut federal postal subsidies to balance the federal budget next year.

The exact size of the subsidy cut, observers said, could easily be in the $600,000,000-to-$700,000,000 range, more than enough to force the postmaster general to begin the process of ending six-day de-

Cable hopefuls crowd in

By MAURINE CHRISTOPHER

DALLAS—Is there room in the expanding cable universe for Getty Oil, CBS Cable, another Home Box Office maxi service, Showtime, Warner Amex—and all the smaller names that are programing for wired tv?

That question is sure to come up repeatedly as the National Cable Television Assn. meets here for its biggest convention to date.

At a press conference, Getty's Getcom and its movie producer associates presumably will talk specifics about pricing and timetables for their upcoming Premiere pay cable network (AA, April 21). HBO will unveil a second service that is said to be somewhat more highbrow than the original HBO network.

CBS Cable, by contrast, just introduced to the catv industry via page ads in trade magazines, will come in quietly with a delegation of five. Leading the group will be Robert Shay, vp-general manager (AA, May 12), and his contingent will include Charlotte Schiff Jones, vp-marketing, a former exec with Teleprompter and *People*. They do not have a booth and will attend as observers.

Just when CBS will get rolling and with what is not clear. "We're enlarging our orbit" proclaims the

Vol. 51, No. 22—Advertising Age (ISSN-001-8899) is published weekly except semiweekly in the third week in March, the first week in September and the third week in December at 740 Rush St., Chicago, IL 60611. Second class postage paid at Chicago and additional mailing offices.

Grey/2 acquires Conahay

NEW YORK—Grey/2 a subsidiary of Grey Advertising, is acquiring Conahay & Lyon for a reported $1,400,000. The two $10,000,000 shops will combine to form a $20,000,000 agency known as Grey, Conahay & Lyon Advertising.

Although the reported purchase price is considered high, it was said to be justified by the healthy cash-at-hand situation at Conahay & Lyon. The Interpublic Group of Cos. is rumored also to have been hotly in pursuit of C&L.

Effective July 1, the two shops will merge their account rosters and move to expanded headquarters in the Chrysler Bldg. on Lexington Ave.

Conahay & Lyon, which lost the $11,000,000 IBM corporate print account last October (AA, Oct. 29), has such clients as Borden Inc.'s chemical division (Elmer's glue, Krylon sprays and Wall-Tex wall coverings), Carter Products division of Carter-Wallace for new products, Pakistan International Airways, Times Mirror Publishing Co. magazines and Crane Co. plumbing fixtures.

(Continued on Page 125)

Top 23 Research leaders up 18%

Revenues of the U.S. marketing/advertising research industry grew 18% in 1979 over 1978. Since inflation was 13% in '79, this suggests a "real growth" rate of 5% compared to 12% in both 1977 and 1978.

This fifth annual compilation is based on the individual records of 23 leading for-profit organizations known to have had research revenues of $5,000,000 or more in calendar 1979. All are U.S.-owned, and their main function is the development of marketing and/or advertising research. (The total revenues of each, including nonresearch activities, are noted in the individual profiles that follow.)

research beat

BY JACK HONOMICHL

Industry growth, however, looks much different if based on the records of those 22 organizations other than A. C. Nielsen Co. Nielsen alone, as the table shows, had '79 research revenues of $302,100,000, or 42% of the 23-company total of $719,500,000. Nielsen's volume, in fact, is more than that of the next eight largest organizations combined.

Nielsen in 1979 had a growth rate of 22%, thanks in part to a built-in price escalation clause, based on government inflation rates, in many syndicated service contracts. Also, since much of Nielsen's research revenue comes from outside the U.S., revenues expressed in U.S. dollars were influenced by changing currency exchange rates.

The remaining 22 organizations had a combined growth rate of only 15% in '79—a bit ahead of the 13% inflation rate. In fact, only eight of the 22 organizations other than Nielsen had a 1979 growth rate in excess of 13%, and three are believed to have had a revenue decline.

▪ As the table shows, nine of the 23 research organizations showed significant revenues coming from operations outside the U.S. In total, these foreign revenues were about $205,900,000, or 29% of the total. Since the 23 alone account for about $720,000,000 in research revenues, it suggests a total industry size well exceeding $1 billion. To pin that total down, information would be needed on (1) approximately 350 other for-profit research organizations which are smaller than these 23, (2) nonprofit research organizations, (3) research conducted in-house by large manufacturers such as General Mills and General Foods, (4) research conducted directly by U.S. advertising agencies and (5) research conducted directly by agencies of the U.S. Government, and especially the

Charting Charter's growth

Eller's 2nd time around

By BERNICE KANNER

NEW YORK—Though Karl Eller has a reputation as a swashbuckling wheeler-dealer, Mr. Eller considers himself to be, above all else, an ad salesman

These sales skills plus tender loving care are the tools this modest, even shy, 52-year-old native Chicagoan plans to trade on as he begins fashioning a broad-based media empire from the economically lackluster foundation of Charter Media Co.

For Mr. Eller, CMC holds the promise of rebirth. This communications magnate—who began as an outdoor salesman in Tucson—by uncanny purchasing decisions and unparalleled financial finesse parlayed a shoestring operation into a multi-million-dollar public company, Combined Communications.

Within a decade of his outdoor board sales days, Mr. Eller had put together a group to buy two of the company's outdoor subsidiaries—and then borrowed enough to buy out his backers. After that he started racking up bank loans and snapping up radio and tv stations (beginning with Phoenix where his headquarters remain), newspapers, including the *Oakland Tribune*, and a raft of other outdoor companies. At the time of the purchases, the investment community shook its head and tsked about the steep prices; no one tsked later.

Mr. Eller's largest purchase—and some (but not Mr. Eller) say the one that did him in at Combined—was the *Cincinnati Enquirer*. To add the daily to Combined's properties, he had to trade away a significant portion of the company to *Enquirer* owner Carl Lindner. Reportedly, he and other outside investors collectively pressured Mr. Eller to sell Combined for a windfall. Mr. Eller

"I just couldn't stay away from the media business"
—Karl Eller

Free tv and ABC will prevail, affiliates told

By COLBY COATES

LOS ANGELES—Although ABC-TV Network affiliates heard Leonard Goldenson, chairman of the board, ABC Inc., promise that free, over-the-air tv will "prevail" over "new technological competitors," they still reserved their loudest cheers for a dramatic appearance by the members of the U.S. Olympic gold medal-winning hockey team.

Emotions aside, however, Mr. Goldenson's reference to new technology as "aggressive competitors with nothing to lose and everything to gain out of ou. hides" was something the affiliates will remember long after they forget that Jim Craig was the hockey team's goalie or Mike Eurizone, the captain.

ABC's commitment to "free advertiser-supported tv" was also on exec vp Fred Pierce's mind. He told affiliates that despite rising programing costs and economic uncertainties, ABC management understands that to be competitive requires loosening the purse strings.

The ABC-TV boss gave another strong vote of confidence to Entertainment boss Tony Thomopoulos, but made no attempt at "glossing over our disappointment" about the results of the just concluded season. In addition, in what some interpreted as "sort of a comment" on the firing of John Backe as CBS president, Mr. Pierce stressed "the stable management of ABC," where "leadership depends on the quality of people, not only the quality of the programs."

▪ In looking to the 1980-81 season, Mr. Pierce promised affiliates, "We will prevail next fall in what promises to be the toughest season ever."

Network president James Duffy, in the opening address to the 207 ABC affiliates, picked up on what's become the network's rallying cry, No. 1 from sign-on to sign-off. He said ABC will continue as the full-day leader because of the "strength we have across the board in every category of programing."

Squire Rushnell, vp-early morning and children's programing, announced another first for "Good Morning America"—it surpassed NBC's "Today" as the leader in delivering the young male audience. "GMA" already has the women locked up, earning the biggest ratings among women 18-to-49 years for the last seven consecutive quarters.

As part of the network's effort to insure that the sign-on strength of "GMA" continues, Mr. Rushnell revealed that "French Chef" Julia Child and newsman Hughes Rudd are joining the program as regular contributors. He also said a permanent replacement for Sandy Hill, now a "GMA" special correspondent and ABC Sports personality, would be named by August.

Continuing the "across the board" concept, ABC Entertainment vp Seymour Amlen told affiliates that for the first four months of 1980, ABC daytime fare delivered 3,760,000 women, 18-49 years, per average minute, compared to CBS, which reaches 2,360,000, and NBC with 1,890,000. In addition to

(Continued from Page 3)

Demographic Survey Division of the U.S. Bureau of the Census, which alone does from $60,000,000 to $70,000,000 in survey research each year.

Based on the 23 organizations in this year's listing, the U.S. research industry is controlled by public corporations. Of the total revenues of $719,500,000, 58% is accounted for by stand-alone public corporations, and another 20% is accounted for by subsidiaries or divisions of larger public corporations. About 3% is attributable to organizations which are part of a larger, privately held corporation, and only 19% is accounted for by stand-alone privately held corporations. The image of a cottage industry populated by smail mom-and-pop operations is a myth.

There was significant change in this year's listing due to mergers and acquisitions. The most newsworthy was the sale of three research operations—AdTel, Market Audits and BASES—by Booz, Allen & Hamilton to Burke International Research Corp. This dropped Booz Allen out of its 7th place in last year's listing. However, another Booz Allen-owned research organization, National Analysts, continues on this year's listing.

Also in 1979, Equifax Inc., a public corporation based in Atlanta, acquired Elrick & Lavidge, a Chicago-based survey research company. A research subsidiary of Equifax, Marketing Information Service, was then merged into E&L, resulting in a combined operation with revenues exceeding $7,000,000 and a 20th place listing in this compilation.

Market Facts, another Chicago-based company, No. 6 on this year's listing, recently rebuffed an acquisition offer by Automated Marketing Systems, a Chicago-based communications service company.

The average age of presidents of the 23 organizations in this year's listing was 49, same as last year.

There follows a brief profile on each of this year's 23 leading U.S. research companies, along with their plans for expansion in 1980.

No. 1. A. C. Nielsen Co., Northbrook, Ill. Public corporation traded o-t-c; founded in 1923. Research revenues: $302,100,000, up 22% over '78.

Gross revenues of Nielsen for the 12 months ending Nov. 30, 1979, were $420,500,000, and, based on data from its fiscal year ending July 3, 1979, 71.8% of that, or $302,100,000, was attributable to the two Nielsen research divisions—86% from the marketing research group and 14% from the media research group. (Note: The revenues of two subsidiaries—Compumark and Coordinated Management Systems—which are not strictly engaged in marketing research are included by Nielsen in marketing research group revenues.) About 58% of Nielsen research volume is in the U.S.; the balance comes from 22 foreign countries through subsidiaries.

In addition to the traditional custom and syndicated store audit and tv audience measurement services, Nielsen has a Store Observation Service (reporting on on-shelf conditions) and two new facilities—one in Rochester, N.Y., another in Seattle—which utilize data from UPC scanner-equipped stores. In Rochester, there is a consumer panel which links specific store purchases to individual households. Overseas, during 1979, Nielsen expanded its Household Appliance Index service to four new countries and its Photo Index service to four more.

In the U.S., starting this summer, Nielsen plans to launch a national product movement service based on a sample of all of the approximately 1,200 UPC scanner-equipped supermarkets.

It is estimated that about 12,300 Nielsen employes are engaged in research activities.

President is N. Eugene Harden, 45, a graduate of Lawrence University. Chairman and chief executive officer is Arthur C. Nielsen, Jr., son of the founder.

No. 2. IMS International, New York. Public corporation traded o-t-c; founded in 1954. Research revenues: $88,800,000, up 18% over '78. Gross worldwide revenues were $141,800,000, of which $88,800,000 came from market research activities through wholly owned subsidiaries in 51 countries. IMS America, the U.S. subsidiary, had research revenues of about $28,400,000.

IMS is to the world's pharmaceutical/medical industry what the A. C. Nielsen Co. is to the packaged goods industry. Research services include (a) retail outlet measures of ethical pharmaceutical sales; (2) panels of doctors reporting on diagnosis and treatment of patients; (3) customized audits of purchases by, for instance, hospitals and laboratories, and (4) custom studies, including surveys. The U.S. company also has an audit service of alcoholic beverage warehouse withdrawals in New York and Chicago; this will be expanded to California this year. Also, during 1979 the company developed an on-line data access system for clients.

There are about 2,150 IMS employes engaged in its research activities. President and ceo of IMS is David Dubow, 61, who resides in London. He is a graduate of the Columbia University Graduate School of Business. President of IMS America is Frank Osgood Jr.

No. 3. SAMI, New York. Wholly owned subsidiary of Time Inc.; founded in 1966.Research revenues: $54,400,000, up 13% over '78.

The basic activity of SAMI is to amalgamate warehouse withdrawal data to produce continuous movement data for thousands of individual brand items in each of 39 U.S. market areas. There are about 450 corporate clients for this service.

A new service, SIFT, for the institutional food market, was expanded from four to ten markets in 1979. Another new service, Scanner Store Data Service, which captures continuous store movement data from UPC scanner-equipped stores, was started in Kansas City during 1979; Portland, Me., is now being opened. Further, in Kansas City, SAMI started the Electronic Consumer Panel, which links specific store purchases to individual households. Early in '79, SAMI announced the intention of starting its basic service in Canada; this has not materialized to date.

SAMI has 400 fulltime salaried employes located in three offices.

President of SAMI is John A. Watters, 54, who is a graduate of the Columbia University Law School.

No. 4. Arbitron Co., New York. Wholly owned subsidiary of Control Data Corp.; founded in 1949. Research revenues: $44,100,000, up 25% over '78.

Arbitron had gross revenues of $47,900,000, of which 92% was attributable to research services.

The main business of Arbitron is measurement of television viewing and radio listening audiences at the local market level. Most of these data are collected via diaries placed in-home (supplemented by telephone interviewing), and about 2,000,000 households are contacted each year.

New in 1979 are services for local and national cable-wired households and a special survey, conducted in tandem with Video Probe Index, which will gather information on cable, pay cable, videocassette, videodisc, electronic games, subscription tv, and other electronic developments impacting viewer habits. In its basic radio services, Arbitron instigated during 1979 quarterly measurements (available in 22 markets in spring, 1980). Four markets—New York, Los Angeles, Chicago and San Diego—will be measured 48 weeks out of the year in '80. In addition, Arbitron has started Qualidata, which gives advertisers qualitative audience measures. A county coverage study, started in 1978, will again offer audience information on every county in the U.S.

There are about 600 fulltime employes at Arbitron engaged in research activities.

President of Arbitron is Theodore F. Shaker, 58, who is also a vp of the parent company. He has attended Colgate, Northwestern, and New York Universities.

No. 5. Burke International Research Corp., Cincinnati. Privately held corporation; founded in 1947. Research revenues: $42,600,000, up 15% over '78.

In August of '79 Burke bought four research operations from the Chicago-based consulting company of Booz, Allen & Hamilton: AdTel, Market Audits, BASES and the telephone research center in Cincinnati, which was later closed down.

The revenues cited above are annualized for all of 1979 and include the four Booz Allen properties plus the parent Burke volume, domestic and international. The growth rate was calculated against the same base for 1978.

In April of this year, Burke's principal owner, Donald L. Miller, announced that, according to a letter of intent, ownership would pass to a group of Burke employes in mid-year, and the new ownership had plans to sell off five Burke International subsidiaries in western Europe. Burke also has been divesting its interest in international subsidiaries in South America. However, the numbers above reflect, basically, the Burke situation as it existed during most of 1979.

The domestic operation, Burke Marketing Research, said it spent well over $1,000,000 in 1979 to produce market-by-market measures of radio listening audiences in competition with Arbitron; this service was abandoned in mid-year due to lack of industry support.

The basic business of BMR continues to be custom survey research in the areas of marketing and advertising, and especially day-after recall of tv commercials on-air, all of which is done by telephone surveys. All together, the Burke units had 250 fulltime salaried employes on average during 1979.

President of BIRC since mid-'79 has been Jack E. Brown, 35; he attended the University of Cincinnati. Previously, he was with Booz, Allen & Hamilton.

No. 6. Market Facts, Chicago. Public corporation traded o-t-c; founded 1946. Research revenues: $19,300,000, down 7% from '78.

These revenues include a wholly owned subsidiary, Market Facts-New York, but do not include Market Facts of Canada, in which the parent owns half interest. If Canada were added, total Market Facts revenues would be about $22,000,000.

MF activities include (a) field surveys, (2) Marketest store audit system, (3) national telephone center (CRT interviewing via WATS), (4) consumer mail panel (increased to 100,000 households in '79), and (5) Consumer Opinion Forum (three mail facilities).

MF has 556 fulltime salaried employes in seven offices (a client service office was opened in Dallas during '79).

In March, 1980, MF rejected a purchase offer of approximately $4,600,000 made by Automated Marketing Systems, Chicago.

President and ceo of MF is Jack Abrams, 49, who has an M.B.A. degree from Northwestern University.

No. 7. Westat Inc., Rockville, Md. Employe-owned corporation founded in 1961. Research revenues: $14,400,000, up 50% over '78.

Most of Westat revenues come from survey research studies conducted via personal interview, tele-

phone or mail for civilian agencies of the U.S. Government.

The company employs about 170 salaried professionals, as well as a telephone interviewing, support and survey processing staff (averaging about 250 employes), and a national field force (averaging about 150 employes).

During 1979, Westat developed samples and staff resources for studies of business establishments and added a focus group and organizational behavior staff.

President and ceo of Westat is Joseph A. Hunt, 44, who holds an M.S. degree from Massachusetts Institute of Technology. Edward C. Bryant, founder of Westat, continues as chairman.

No. 8. Audits & Surveys, New York. Privately held corporation; founded in 1952. Research revenues: Estimated at $14,000,000, up about 8% over '78.

This estimate for the parent includes the survey division, Test Audit division, National Total-Market Audit division, and CRT telephone interviewing facility, which in total have over 200 fulltime employes. It is not meant to include other organizations in which A&S or its principals have a position: A&S Latinoamerica, Total-Market Index in Canada, Market Probe International, a service bureau that also has survey research business, and Integrated Computer Systems, a service bureau.

During 1979, A&S discontinued TRAC-7, an attempt to enter the local-market radio audience measurement business.

President of A&S is Richard L. Lysaker, 47, who is a graduate of the University of Minnesota. Solomon Dutka, founder of A&S, is chairman.

No. 9. Marketing & Research Counselors, Dallas. Partially owned subsidiary (founded in 1965) of Tracy-Locke Co. Research revenues: $13,100,000, up 13% over '78.

M/A/R/C, a full-service, custom research house, utilizes a telephone survey WATS facility with 200 positions, 15 mall locations and five computers. There are 136 staff professionals, 216 hourly staff professionals and 1,500 hourly employes.

During 1979, M/A/R/C added offices in Boston and Sacramento, bringing the total to 12. Other new developments included the addition of a statistical services department and the completion of a CRT on-line interviewing and topline tabulation system.

President of M/A/R/C is Cecil B. (Bud) Phillips, 55, who is a graduate of Southern Methodist University.

No. 10. ASI Market Research, Los Angeles. Privately held corporation founded in 1962. Research revenues: $12,300,000, down 6% from '78.

Gross revenues in '79 were $14,800,000, 83% of which were attributable to research activities. About 90% of research revenues were domestic, with the balance coming from subsidiaries in Tokyo, Hong Kong, Seoul and Frankfurt.

ASI, originally founded as Audience Studies Inc., specializes in controlled audience pretesting of tv commercials, pilot films and phonograph records. In addition, the company does on-air testing of tv and radio commercials, print advertising pretesting, surveys and focus group interviews.

During 1979, ASI divested its operations in Tokyo, Seoul and Frankfurt—although it still maintains ties with those organizations—and this impacted revenue levels.

Alfred Goldman
National Analysis

Herbert Marsch
Opinion Research

Robert Lavidge
Elrick & Lavidge

There are 310 fulltime salaried employes and about 740 parttimers.

Chairman and ceo of ASI is Pierre Marquis, 53, who is a graduate of Boston University School of Law. President is Gerald Lukeman.

No. 11. Chilton Research Services, Radnor, Pa. Wholly owned subsidiary of American Broadcasting Cos.; founded in 1957. Research revenues: $12,000,000, up 93% over '78.

Ownership of this survey research organization changed in May, 1979, when ABC acquired the parent, Chilton Co.

CRS basically consists of a large-scale CRT/WATS interviewing system and personal, face-to-face interviewing (about 40% of total volume). There are two syndicated services: AGTRACK, a monthly survey of farmers, and (2) ADCHART, a longitudinal ad measurement program.

During 1979, Chilton opened a new 50-station telephone interviewing facility in Arlington Heights, Ill., and two new offices in Philadelphia related to personal interviewing. All told, the company has 170 fulltime employes, 700 parttimers.

Since April, 1979, the general manager of CRS has been Dean J. Kilpatrick, 35, who has an M.B.A. from the University of Delaware. He is also a vp of Chilton Co.

No. 12. Yankelovich, Skelly & White, New York. Wholly owned subsidiary of Reliance Group; founded in 1958. Research revenues: $11,800,000, up 26% over '78.

This survey research company, acquired by Reliance in 1969, does marketing and social research for industry, media and government. Standardized services include: (1) Laboratory Test Market, a simulation facility; (2) Monitor, tracking surveys of special social segments; (3) Corporate Priorities, tracking surveys on public policy issues; and (4) Market Alert, tracking surveys re consumerism pressures.

There are 206 fulltime YSW employes located in seven offices, one of which is in London. About 1% of the company's business is done outside the U.S.

Founder and president of YS&W is Daniel Yankelovich, 53; he is a

graduate of Harvard University.

No. 13. Ehrhart-Babic Associates, Englewood Cliffs, N.J. Privately held corporation founded in 1958. Research revenues: $10,400,000, up 13% over '78.

These revenues do not include an E-B service bureau subsidiary, E-B Data Services, but they do include those of National Retail Tracking Index, a wholly owned subsidiary.

E-B specializes in custom store audits, controlled mini-market store tests and syndicated distribution studies in a variety of retail outlets. During 1979, the company expanded its NRTI service to Canada. A new service planned for later in 1980 will take Ehrhart-Babic into scanner checkout data systems.

There are 136 fulltime employes and about 2% of revenue comes from outside the U.S.

President of E-B and one of the founders is Louis J. Babic Jr., 47, a graduate of Boston University. The other founder, Thomas A. Ehrhart, is chairman.

No. 14. National Family Opinion, Toledo. Privately held corporation; founded 1946. Research revenues: Estimated at $10,000,000, about the same as '78.

NFO does not cooperate with this industry roundup, but best estimates are that 1979 revenue showed no growth and perhaps declined a bit in 1979.

Main NFO activities are a standing mail panel of about 150,000 households and telephone interviewing via a WATS facility with about 100 stations, much of which is housed in a new facility in Greensboro, N.C. Other activities include syndicated diary panel service for a group of textile manufacturers; a national panel of auto owners, Automotive Petroleum and Aftermarket Services; and SIP (Share of Intake Panel) for the beverage industry.

There are about 350 employes, about 90 of whom are fulltime, salaried, located in seven offices.

President of NFO is Jack A. Trumbull, 53, son of the founder, Howard A. Trumbull. He attended the University of Toledo.

No. 15. NPD Research, Floral Park, N.Y. Privately held corporation; founded 1967. Research revenues: $9,700,000, up 16% over '78.

Services offered by this company, which specializes in continuous diary panel research, include the following syndicated services: Package goods diary service, Toy market index, textile and apparel market index, gasoline market index, record/tape market index, wine market index and CREST, which measures the away-from-home institutional food market. In development are two new services: National Eating Trends Report which will measure in-home preparation of food dishes, and a basic mail panel for mail survey research and product testing.

NPD employs about 400 people, of whom over 100 are fulltime marketing and computer specialists, and 200 are fulltime coders.

President-ceo of NPD is Tod Johnson, 35, who has an M.S.I.A. degree from Carnegie-Mellon University. Chairman is Henry Brenner.

No. 16. Data Development Corp., New York. Privately held corporation; founded in 1960. Research revenue: $9,600,000, up 13% over '78.

Included in addition to the parent, Data Development, are revenues from three affiliates: Central Location Testing, Field & Facts and the Telephone Centre. Together, these four organizations employ 120 fulltime salaried employes and from 70 to 90 hourly employes, who are located in three offices.

The company is planning to in-

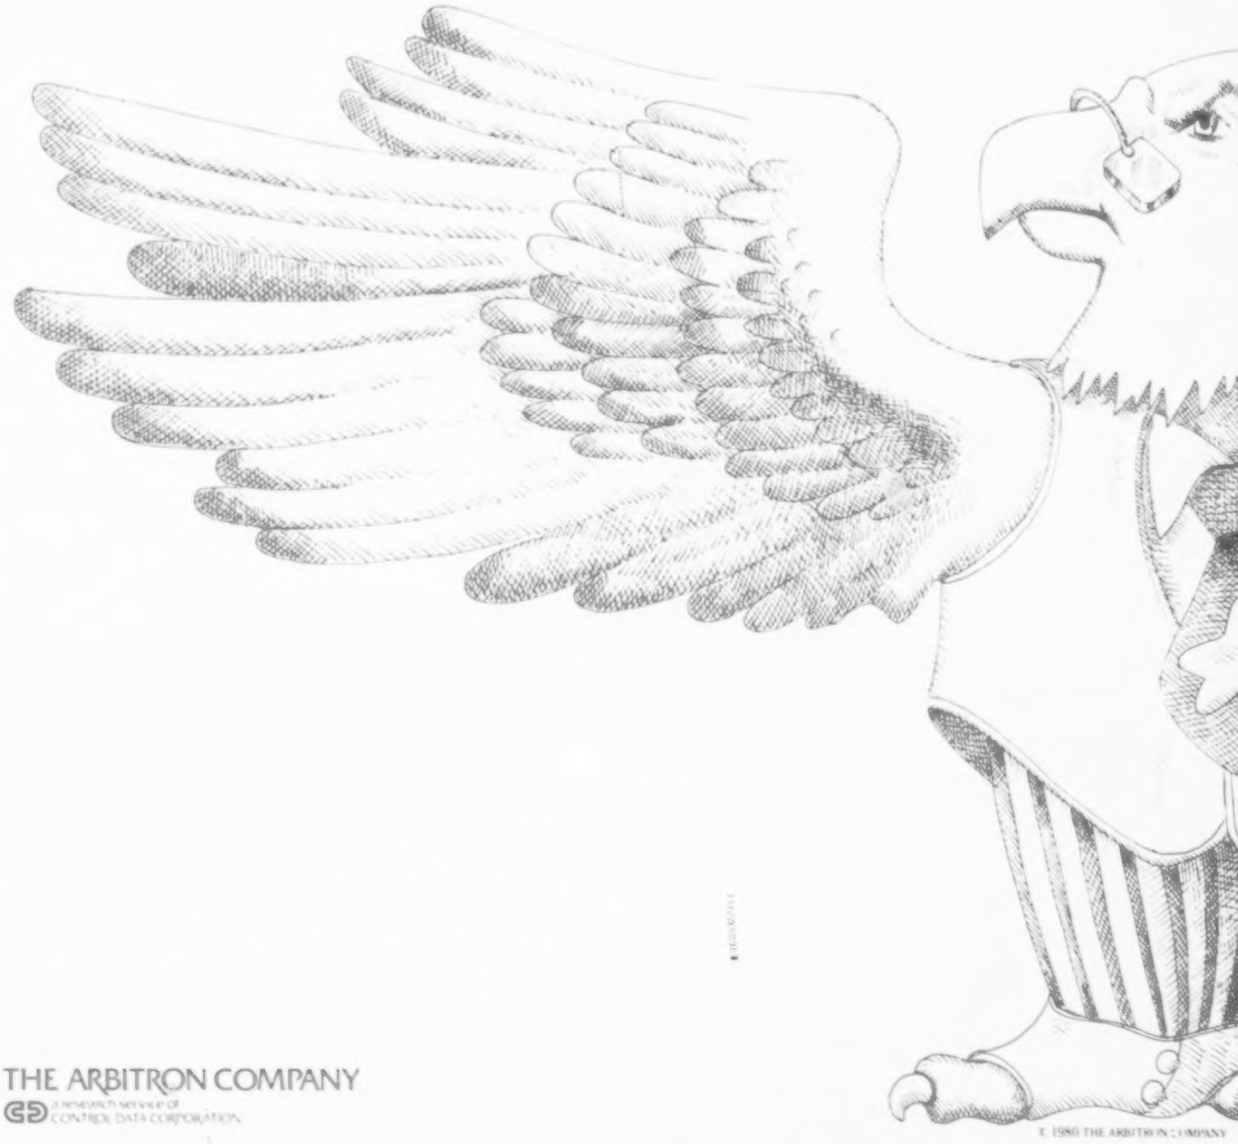
THE ARBITRON GUIDE TO THE BEASTS OF THE RATINGS JUNGLE

THE STAR-SPANGLED CLAIM CHECKER

ONE OF A SERIES



THE ARBITRON COMPANY
a research service of CONTROL DATA CORPORATION

© 1980 THE ARBITRON COMPANY

crease the capacity of its WATS telephone facility (now at 30 to 40 stations) in 1980 and enter into CRT interviewing.

DDC is jointly run by chairman Jerry Rosenkranz and president Joseph Goldstein. Both are 44 and graduates of the College of the City of New York.

No. 17. Louis Harris & Associates, New York. Wholly owned subsidiary of Gannett Co.; founded in 1956. Research revenues: $9,300,000, up 3% over '78.

About 30% of this survey research company's volume came from studies done outside the U.S., mostly through a London-based subsidiary, Louis Harris International. There are 135 fulltime employes.

LH&A conducts a variety of custom and syndicated surveys in the areas of public opinion, corporate policy and marketing research for business and nonprofit clients. Data collection is via personal interviewing by telephone through the 60-position National Center for Telephone Research facility in New York. During '79, the company opened a new office in Washington.

President and ceo of LH&A is Louis Harris, 59, the well-known pollster. He is a graduate of the University of North Carolina at Chapel Hill. Chief operating officer is Humphrey Taylor.

No. 18. National Analysts, Philadelphia. Subsidiary of Booz, Allen & Hamilton; founded 1943. Research revenues: $8,700,000, up 9% over '78.

This survey research organization, which was acquired by Booz Allen, the management consulting company, 1970, has 170 fulltime employes located in three offices. One especially large project for the U.S. Department of Agriculture accounted for about 25% of '79 revenues (50% in 1978).

NA does both quantitative and qualitative work in the fields of marketing and social science research, a good deal of which is in conjunction with Booz Allen consulting projects. In 1979, NA started Executive Associates, a group of semiretired executives trained to conduct in-depth interviews on technical subjects.

President is Alfred E. Goldman, 54, who has a Ph.D. from Clark University.

No. 19. Opinion Research Corp., Princeton, N.J. Subsidiary of Arthur D. Little Inc.; founded in 1938. Research revenues: $8,200,000, up 7% from '78.

This survey research company, which was acquired by ADL in 1975, has 146 fulltime employes located in four offices. Work is divisionalized as follows: Corporate research, employe relations research, marketing research, marketing profile service, Caravan Surveys (syndicated surveys), government research and political/-public policy research.

President of ORC is Herbert Marsch, 55; he is a graduate of the University of Cincinnati.

No. 20. Elrick & Lavidge, Chicago. Wholly owned subsidiary of Equifax Inc.; founded in 1951. Research revenues: $7,100,000, up 5% over '78.

In October '79, Elrick & Lavidge was sold to Equifax, and a research division of that company, Marketing Information Service, Atlanta, was merged into E&L. Revenues of the merged organizations have been annualized for 1979.

In total, this combined survey research organization has 99 fulltime salaried employes located in seven offices. A new addition to E&L's mall operation, the Opinion Center, was opened near Phoenix during 1979. The MIS WATS interviewing capacity in Atlanta was expanded to include 30 positions over those related to a new TELSAM operation.

President and ceo is Robert J. Lavidge, 58, one of the two founders of E&L. He has an

(Continued on Page 96)

DESCRIPTION OF STAR-SPANGLED CLAIM CHECKER: Also known as the Broadcast Rating Council, this is one of the more helpful and beneficial denizens of the ratings jungle. Can be spotted by its wisdom and constant devotion to making sure that rating services "do what they say they do."

HABITS: Assures that ratings services make full disclosure of their procedures and that they meet certain research standards.

Rating services are audited yearly, and those that meet these conditions earn accreditation and are eligible to carry the Council's double check symbol on all reports.

CARE AND FEEDING: Arbitron believes that species such as the Star-Spangled Claim Checker deserve special care and attention. We are constantly listening to the Council's suggestions to make sure our services meet the highest research standards.

The Board of Directors of the Council is composed of representatives of the following industry groups: ABC, CBS, NAB, NBC, NRBA, RAB, the SRA and the TVB.

In addition, observers from the 4A's and the ANA attend board meetings.

For more information on the Star-Spangled Claim Checker and other beasts in the ratings jungle, contact your Arbitron representative. ARBITRON

Top 23

(Continued from Page 95)

M.B.A. degree from the University of Chicago. John F. Harris of MIS is exec vp.

No. 21. Walker Research, Indianapolis. Privately held corporation, founded in 1964. Research revenues: $7,000,000, up 1% over '78.

This custom survey research company, collecting data mainly through mall facilities and telephone interviewing, has 133 fulltime employes (58 of whom are salaried)and 746 parttimers located in six office sites and three WATS interviewing facilities.

The company is divided into four divisions: Custom research, utility research, data collection, and administrative/financial services.

Frank Walker
Walker Research

W. J. Wilson
Starch INRA

Bernie Levine
Decisions Center

President and ceo is Frank D. Walker, 45, son of Mrs. Tommie Walker Anderson, who founded the predecessor company, Walker Research Service, in 1939. Mr. Walker graduated from DePauw University.

No. 22. Starch INRA Hooper, Mamaroneck, N.Y. Public corporation traded o-t-c, founded in 1923. Research revenue: $5,500,000, up 24% over 1978.

This survey research organization is composed of six divisions: The Starch Ad Readership Service, INRA (International Research Associates), Associates in Diagnostic Research, C. E. Hooper, Daniel Starch (Canada) Ltd. and Media Audience Research. About 16% of revenue was from outside the U.S.

During 1979, the company launched a new syndicated service, National Readership Service, which is designed to measure the primary and total audiences of some 50 publications.

SIH employs 150 fulltime salaried employes.

President and ceo of SIH is William J. (Jay) Wilson, 43, who is a graduate of Yale University.

No. 23. Decisions Center Inc., New York. Privately held corporation; founded 1965. Research revenues: $5,100,000, up 9% over '78.

This custom survey company, which has 83 fulltime employes, is divisionalized as follows: DCI Qualitative, DCI International, DCI Youth Research, and Facts Center, a field and tab operation.

Currently, DCI is adding a WATS line telephone interviewing facility.

Co-ceo's at DCI are Bernie Ruderman, 48, who has an M.S. degree from Pennsylvania State University, and Bernie Levine, 54, who has an M.B.A. from New York University. #

BPA adds 7 members

Business Publications Audit of Circulation, New York, verifier of all-paid, all-controlled or paid-controlled combination circulation figures, has added seven publications as members. *California Business*, California Business News, Burbank, Cal.; *Microelectronic Manufacturing & Testing*, Lake Publishing, Libertyville, Ill.; *Mobile Times, Two Way Radio Dealer*, Titsch Publishing, Denver; *Oil & Gas Digest*, Hutton Publishing, Houston; *Pacific Goldsmith*, Allen-Pacific Co., San Francisco, and *Today's O.R. Nurse*, Charles B. Slack Inc., Thorofare, N.J. BPA publication members now number 778, up from 728 in March, 1979.

'New Shelter' plans fall expansion to newsstands

New Shelter magazine will increase its circulation rate base to 350,000 from 250,000 this fall. The monthly, aimed at environment and energy-conscious home improvers, is published by Rodale Press, Emmaus, Pa.

It will begin newsstand tests with the September issue, putting 70,000 copies on the stands. Its current circulation is 98% subscription. Cover price is $1.50.

'Science' ups frequency

Science 80, Washington, will increase its frequency from six to 10 times a year in November, its first anniversary. The publication of the American Assn. for the Advancement of Science guarantees 400,000 readers.

Direct Mail forms unit

Direct Mail Corp. of America, St. Louis, has formed Autodata Fulfillment, a new division that will supply literature, merchandise and premium items for U.S. distribution. The unit is at 701 N. 15th St.

TWENTY YEARS OF TEST MARKET EXPERIENCE IN LESS THAN TWENTY MINUTES

For over 20 years, The Ehrhart-Babic Group has conducted mini-market and controlled sales tests. That's longer than any other market research firm.

You might say we "wrote the book" on controlled testing, because we have. The book is titled "Prerequisites of A Controlled Sales Test Operation." In the twenty minutes it takes to read this publication, you will find the rules to follow for a successful test market study, from who should be involved in the planning stages, to how to handle leftover product.

Once classified for inter-office use only, the booklet is now available to you at no charge. For your copy call (201) 461-6700 or complete the attached request form, and we will mail it to you at once.

Mail to: The Ehrhart-Babic Group, 120 Route 9W, Englewood Cliffs, New Jersey 07632

Please send me a free copy of
"Prerequisites of a Controlled Sales Test Operation."

Wyman takes giant step to CBS

Thomas H. Wyman moves from foods to broadcasting.

By COLBY COATES

NEW YORK—Once approached about a potential seat on the board of directors of CBS Inc., Thomas H. Wyman has instead ended up as the company's fifth president in nine years, and the second exec besides chairman William S. Paley to hold the chief executive officer's title.

"The scope and dynamics of the businesses of CBS" attracted him to the historically trouble-plagued job, he said in a telephone interview, "categorically" declaring himself a believer in the new technologies of the modern communications world.

Mr. Wyman also sought to dispel any "mythical questions" about "who's for new technologies and who's not at CBS," adding, "cable, videodisc, broadcasting, teletext are the dynamics of our business."

As John Backe's successor at the helm of the company that had 1979 revenues of $3.7 billion and net income of $201,000,000, Mr. Wyman reportedly will earn $800,000 per year, a $1,000,000 sign-on bonus, plus an arrangement for compensation for an additional two years should he be fired.

- According to a statement from Mr. Paley, the selection of the Pillsbury Co. vice-chairman concludes "an intensive reevaluation of the qualifications of the ceo post at CBS." Mr. Wyman's extensive experience in U.S. and international marketing, financial, technological and policy-making administrative posts are "the management talents CBS desires at the helm as the company faces the future," Mr. Paley said.

Mr. Wyman's broad-based background includes stints as president-ceo of Green Giant Co. and a variety of posts at Polaroid Corp. culminating in senior vp, general manager and chairman of the executive committee. At one time or another, he was widely touted as the heir apparent to Polaroid founder Edwin Land and Pillsbury chairman William Spoor.

He admits to having his work cut out for him at CBS, figuring "I'll be working very hard for the next two years understanding all of CBS' businesses." However, he already knows that "a central part of the management job at CBS is in understanding what happens in Washington.

"The regulatory function there must be managed with thought," he said, adding, "I'm very much in favor of building bridges between regulators and business and treating each other in a non-adversarial way."

With his consumer products background, it could be expected that Mr. Wyman is "obviously a believer in the enormous power of advertising," but he thinks that it also "must be used constructively and managed with responsibility. That goes for the media as well,"

Pepper also vies for Crush

P&G bids for soft drinks

By LARRY EDWARDS
and JACQUES NEHER

CHICAGO—Procter & Gamble Co. made its expected jump into the soft drink business last week with a bid to acquire Crush International's U.S. and international (excluding Canada) businesses for $46,000,000.

But Dr Pepper Co. muddied the situation Friday morning with a bid for Crush that bettered P&G's price by $10,000,000. Canadian businessman James Pattison, who controls 65% of the Toronto-based company, was meeting with his board of directors in Vancouver later in the day—apparently on other business—and declined to discuss the situation.

The Cincinnati company responded to the news of Dr Pepper's offer by pointing out that it had a contractual agreement with Crush, already accepted "in good faith," and said it expected the transaction to "be closed promptly."

Dr Pepper--ironically with a new president, Charles Jarvie, recruited from P&G's food division—stated in making its bid for Crush that it offered the latter "single-minded" interest in the soft drink business.

Observers Friday were betting that Crush would stick with the P&G deal. P&G's statement added, "We do not expect any third party to interfere with our contractual arrangements."

The buy would give P&G immediate entry in the $12 billion-plus market with Orange Crush, Hires root beer and Sun Drop lemon-lime soft drinks.

As if P&G's planned entry isn't enough to worry Coca-Cola, Pepsi-Cola and the other soft drink giants, General Foods is expected to bring out a carbonated soft drink this year. Its Country Time lemonade is already available to bottlers.

- P&G is bidding for the vehicle through which it might apply the technological work it has been doing on carbonated drinks for possibly the last 10 years. Although the more celebrated activity has been P&G's "carbonated cup" (AA, Jan. 24, '77), the more recent and probably more viable work has

Grand jury looks at Riedl collapse

By JOHN J. O'CONNOR

NEW YORK—A federal grand jury in Newark, N.J., is investigating whether criminal conduct was involved in the 1978 financial collapse of Riedl Associates, a New Jersey ad agency.

According to a source, the grand jury action has zeroed in on Everest Industries, an investment group about which little is known, and its former chairman, Frank Dell'Aglio.

Mr. Dell'Aglio and Everest surfaced in June, 1978, when it was announced that Riedl, a Clifton, N.J., agency, and Meltzer, Aron & Lemen, another Everest-controlled shop, were to become the nucleus of a nationwide network functioning under the direction of the then newly formed Adolph Toigo Group.

- From the outset, ATG, headed by Adolph Toigo, then 72, was hampered by disclosures concerning Everest and Mr. Dell'Aglio. The most damaging revelations included Mr. Dell'Aglio's one-year federal probation in a securities fraud case in 1976 and an Everest "investors list" that contained names of execs who subsequently

Five shops get assignments in race for Contac

PHILADELPHIA—SmithKline's Menley & James division has given creative assignments to five agencies in a competition for its $15,000,000 Contac cold remedy business. Agencies are James Jordan Inc.; Grey; Avrett, Free & Fischer, Ayer, and incumbent O&M.

Groves leaves Chilton for new Thomson unit

PHILADELPHIA—Richard H. Groves has resigned as Chilton Co. exec vp to become president of International Thomson Business Press Inc., a new U.S. subsidiary here of the London-based International Thomson Organization. At Chilton, Mr. Groves' duties go to vp-finance James Miades and vp-general manager of publications division Robert O. Sward, who become exec vps.

Dailey to aim for 'young at heart' Reagan image

LOS ANGELES—Reagan for President ad strategists, under new head Peter Dailey of Dailey & Associates, say they will aim for middle-of-the-road positioning of the candidate on most issues and a "young at heart" image to attract under age 40 voters. Mr. Dailey, who headed the Nixon presidential drives, will direct a Campaign '80 in-house Reagan agency now being organized. Ruth Jones Ltd., New York, will no longer be involved in Reagan's media handling, a campaign source said. C.T. Clyne Co. split with the Reagan campaign earlier.

IAA hears warning on ad attacks

By CAROLYN PFAFF

DURBAN, SOUTH AFRICA Multinational bodies such as the United Nations and the World Health Organization are currently considering major new controls on advertising, which may have serious implications for the advertising industry, several speakers warned the 27th World Congress of the International Advertising Assn.

The MacBride Commission, whose members were appointed by UNESCO in 1977, has just released its report on communications and advertising, calling for ways and means to reduce the influence of market and commercial considerations in national and international communications.

IAA delegates also were informed about an action by the World Health Organization, which has drawn up an advertising and

President expected to sign

Congress sends FTC bill along

By STANLEY E. COHEN

WASHINGTON—Congressional leaders assured each other last week they have done a remarkable job of reconciling their differences over the future of the Federal Trade Commission, but they aren't getting thanks from the White House.

The three-year battle ended last Thursday as the Senate voted 74-15 to accept the negotiated compromise, which suspends FTC's power to regulate "unfair" ads with industrywide rules and establishes closer congressional supervision of FTC, including a two-house "veto." Less than 24 hours earlier, the House voted 272-127 for the compromise.

Sen. Wendell Ford (D., Ky.), the principal architect of the bill, insisted during the debate, "The legislation does not reduce any of the powers the commission has traditionally exercised."

But the White House remains sufficiently uneasy that President Carter is expected to forego the usual public signing, with its handshakes, photo opportunities and souvenir pens.

▪ "We are relieved that the bill is above the bottom line which the President drew," a White House source said. "But we are concerned about procedures reflected in this legislation where Congress demonstrates its willingness to shortcircuit the regulatory process." It is likely the President will elaborate his views in a published statement when he signs the bill.

Sen. Ford expressed confidence that the decision to suspend

Candidates running last lap on tv

By LEAH ROZEN

NEW YORK—Presidential candidates George Bush, Jimmy Carter and Edward Kennedy will use tv ads to span the country as they scramble for delegates in California, Ohio and New Jersey primaries, all scheduled for June 3.

Ronald Reagan, the former governor of California, also is a candidate in all three races, but he will be using little tv or radio time. Mr. Reagan has nearly reached the primary spending limit of $14,700,000 and apparently has collected enough delegates to put him over the top when the Republican National Convention begins July 14. The Democratic convention begins a month later, on Aug. 11.

Mr. Reagan's advertising hiatus will not be copied by his rival, former congressman and diplomat George Bush, nor by Democratic hopefuls Sen. Kennedy and President Carter. All three are busy selling themselves in 30 and 60-second bursts to primary state voters.

▪ The difference, however, between this final three-state primary contest and previous primaries is that the multiweek ad campaigns (a familiar feature from the New Hampshire, Illinois, Pennsylvania and New York primaries) have disappeared. California, Ohio and New Jersey voters who turn on their tv and radio sets will be exposed to only 10 days or so of political advertising.

"The local media keeps saying this primary is a big deal, but we haven't seen it yet and money is the only thing that talks," said Rick Lowe, general sales manager at WCMH-TV, Columbus, O. Mr. Lowe said his station had received a "small order" from the Carter campaign for some 30-second spots that wil' begin running this week. Mr. Lowe said he has yet to hear from the other candidates.

Conversations with the media advising staffs and time-buying agencies of the three candidates late last week revealed confusion as to just how much advertising was being planned. This was especially true of the Bush forces, a condition possibly due to Mr. Bush's reported consideration of withdrawing from the race now that Mr. Reagan is the apparent victor. If Mr. Bush stays in the race, it appears that he will concede Mr. Reagan's home state and concentrate on Ohio and New Jersey.

The Bush campaign, worried about money, has not made any new ads for the Big Three primary contest. It also canceled production on a planned 30-minute tv question and answer session with the candidate that would have cost about $50,000. Such sessions were first aired in the Pennsylvania primary; Mr. Bush ran 10 of them in his successful Michigan primary campaign.

▪ Jerry Greenberg, head of Allscope, the New York time-buying service that has been working with Bush forces throughout the primaries, said last week that he was still awaiting word from the campaign headquarters on whether to schedule spots.

President Carter began running spots in Ohio on May 14. He will conduct a relatively heavy campaign in the Buckeye state, according to a spokeswoman at the Rafshoon agency in Washington, which handles the campaign. Spending for Ohio is put at less than $500,000. The Carter campaign is runing the same spots for the June 3 primary that it ran in previous contests. These include

Hoge new publisher of 'Sun-Times'

By JACQUES NEHER

CHICAGO—James Hoge, editor-in-chief of the *Chicago Sun-Times*, apparently managed to pass his courses at Harvard Business School.

Mr. Hoge, 44, last week was elected publisher of the *Sun-Times*, a move expected earlier this year when parent Field Enterprises sent him to Harvard for an intensive three-month management curriculum (AA, Jan. 28). The change is effective June 10.

Mr. Hoge, a 21-year veteran with the paper on the editorial side, replaces Marshall Field V, who is giving up the post he has held for the last 10 years. As the newspaper's fourth publisher, Mr. Hoge is the first who is not a member of the Field family.

▪ Mr. Field said he had "mixed feelings" about breaking with family tradition, but added he had "no reservations" about handing the reigns over to his top editor, under whom the *Sun-Times* garnered five Pulitzer Prizes.

FCB recruits Deutsch shop

By BERNIÇE KANNER

NEW YORK—Foote, Cone & Belding Communications has recruited a new family member—Deutsch, Shea & Evans, a recruitment ad agency.

In a session following its annual meeting here last week, Arthur W. Schultz, the 58-year-old chairman of the ninth largest agency worldwide, noted that the deal was for cash, but he would not reveal the price. Earlier, DS&E execs had confirmed the shop was holding talks but said that "nothing had culminated" (AA, May 19).

The 41-year-old recruitment shop headquartered here billed about $22,000,000 last year. It will continue under its own name and management, with Arnold Deutsch as chairman and Van Evans as president, and will include FCB's existing recruitment operations in Los Angeles, Salt Lake City and San Francisco. The $918,000,000 Chicago-based agency set up its domestic recruitment group in 1978; it now bills around $8,000,000.

▪ The move is in keeping with big agencies scouring the recruitment specialty field. Doyle Dane Bernbach last year purchased half of Bernard Hodes Advertising, and J. Walter Thompson Co. bought World Wide Agency. Then, FCB expressed interest in the field, but figured the way to go about it was to build its own in-house operation rather than buy outside.

At that time, sources claimed that FCB had tried to snag World Wide for itself and, failing in that, had turned its attention to the Santa Monica, Cal.-based North American Creative Recruitment Advertising (AA, Dec. 24).

To complicate matters further, Ogilvy & Mather then disclosed that it had talked acquisition with DS&E. Now, O&M chairman William Phillips said that his agency is talking to several recruitment specialty shops, with other sources suggesting that an arrangement with North American is imminent.

"We've been interested in the recruitment advertising business for a couple of years," FCB's Mr. Schultz said in an interview. "We've been in this business in Europe successfully and we've tried it on our own on the West Coast to get a feel for it. We surveyed the field and talked to a number of agencies and determined that Deutsch, Shea & Evans is the only one we wanted to be in with," he said, calling the newest FCB family member "the Rolls-Royce of its field."

During the annual meeting, Mr. Schultz pointed with pride to FCB's earnings growth in 1979 and in the first quarter of 1980. The agency's earnings of $9,741,000 last year represented a 25.4% growth over year-earlier periods to pace the agency field. The Interpublic Group of Cos. followed with a 19.6% increase.

FCB set new profit and revenue records for the 1980 first quarter with net income of $1,610,000, a 58% jump over 1979.

Shareholders also elected 17 directors, including five newcomers. They are: Abbott C. Jones, 45, an exec vp at the agency; Norman Brown, 49, exec vp-general manager, FCB/Chicago; Thomas F. Randolph, 49, president, FCB/-Honig; Newton N. Minow, 54, partner of Sidley & Austin, attorneys, and Robert D. Campbell, 62, retired chairman of Newsweek Inc., and now a management consultant.

In a session afterward, FCB president John O'Toole downplayed the possibility that Pizza Hut would reopen an agency review in the wake of recent key personnel shifts. Last month the agency retained the $14,000,000 account after a controversial agency review (AA, April 14).

"I doubt they'll hold another agency review," Mr. O'Toole said, noting that a new campaign currently was being readied. He acknowledged that as a result of the close call, some new personnel had been put on the fast-food account, but added, "People were not the problem on the Pizza Hut business. We creative people have to take the blame. We didn't do some commercials as well as we should have."

While foregoing the chance to make a year-end projection, Mr. Schultz noted that business was holding up in the face of a recession and that there were "no surprises yet—nothing significant yet."

He added that he was "very bullish about the future of advertising." He feels it will become more important "because the need to communicate is growing." #

Sunbeam to introduce food appliance this fall

Sunbeam Appliance Co., Oak Brock, Ill., is introducing a Food Preparation Center, complete with mixer, food processor and blender. The unit, with suggested retail of $279.95, will be shown at the July Housewares show, and a $1,000,000 ad campaign via Foote, Cone & Belding, Chicago, is scheduled to break this fall.

Landey shop acquired by Geers Gross

NEW YORK—London-based Geers Gross Ltd. has acquired Martin Landey, Arlow Advertising.

It is the second U.S. shop in what appears to be shaping up as a network here for the publicly traded U.K. agency. The first was Richard K. Manoff Inc., purchased in January, 1978. A year later the 26-year-old shop, billing over $40,000,000, was renamed Manoff Geers Gross.

Like Manoff, Martin Landey, Arlow Advertising will operate autonomously, as an independent unit, with the prospect that certain resources of the Geers Gross network may be combined at a later date.

▪ The 14-year-old Martin Landey agency last year billed $33,000,000, of which $2,000,000 was foreign. The agency will be renamed Landey Arlow Geers Gross and will continue with Martin Landey as president and chief executive officer. Arnold Arlow remains exec vp-creative director; Myron Poloner, who recently joined the shop from N W Ayer ABH, continues as exec vp-client services and Burt Zaretsky stays as exec vp-operation.

Robert Gross, chief executive for Geers Gross, is chairman of the new subsidiary. All other senior executive personnel continue in their management roles.

The Landey agency, best known for its Coty cosmetics, Fortunoff and *Cosmopolitan* ads, has railed against the disadvantages faced by smaller agencies in competing for big accounts. Mr. Landey also has complained that a mid-size agency gets seconds on network inventories—the firsts going to the bigger spenders. Earlier this month, he stated that getting acquired was one way of making it into the big time. #

41-50	277	6.04

Source: Spot Quotations & Data, 950 Third Ave., New York 10022. Average cpps for a 30-second spot were determined from ad agency conventional buys on affiliates as of April 29. Excluded are spots bought on a 52-week basis or calling for 150-plus gross rating points weekly. These averages are a yardstick and not a listing of the market's lowest price. Ratings used are an Arbitron/Nielsen average. These guides can be applied to 60s—200%—and 10s—50%. Percentage gain over May, 1979, report is shown in parentheses.

National spot prices seen 'holding up'

By MAURINE CHRISTOPHER

NEW YORK—On the basis of schedules set through the end of last month, Marvin Richfield, president of Spot Quotations & Data, predicts that national spot prices will "hold up nicely" at least through mid-June.

For retail he sees a pause of sorts before the medium starts to build again for Father's Day and graduation.

Despite the widespread talk of recession, the medium continued to show higher cost per thousand household (cpp) rating point levels in all the top 20 markets for the May report. And the markets that have looked exceptionally vibrant throughout the spring continued to do so.

The largest cpp percentage gains for prime time 30s came in Detroit, up 14.2% to $129 and Atlanta, up 13.8% to $91. Next were Miami (up 12.5%), Minneapolis (up 12.2%) and Chicago (up 10.9%). This covers business on affiliates only.

SQAD's "street prices" reflect buying in the marketplace as reported by a sample of 14 major ad agencies. The report covers activity in 51 major markets. That basic buying guide is accompanied by a 200-market planning report giving projected costs for the next six quarters.

Below the top 20 markets, prime time seemed strong in Denver at $78, Hartford at $71, San Diego at $63 and Phoenix and Sacramento, both $62.

Late news 30s remain a hot commodity with quotations, these covering independent stations as well as affiliates, ranging from $13 in Wilkes-Barre to $245 in New York. Other listings for this shopping period ended April 29: Los Angeles, $165; Chicago, $147; Boston, $132; Philadelphia, $124; San Francisco, $122; Dallas, $94; Houston, $84, and Detroit, $81.

Late fringe was ahead of early news and early fringe in the big markets. Highest prices in this category were: New York, $164; Los Angeles, $123; Philadelphia and Boston, both $108, and San Francisco, $99.

▪ Mr. Richfield pointed out that the second half of this month, which will be covered in the June SQAD report, will be a rather unsettled time for the spot market. Advertisers who were to have been on the Olympics are in the midst of deciding whether to stay with what NBC offered instead, shift the money—or part of it—to spot or save some ad dollars.

And, of course, there are those political dollars rolling into tv in states such as California where primaries are still to come. #

'Time' tries new system

Time Asia now delivers 170,000 copies from a Hong Kong printing plant due to its system of electronic transmission of four-color material by satellite from New York. The new technique is the first in international publishing to permit transmission of color material by satellite.

New dog food skips tryouts

Carnation bites back

By JOHN REVETT and LARRY EDWARDS

LOS ANGELES—Understood to be irked at competitors grabbing its product ideas from test markets and rushing national with their own versions, Carnation Co., here, is going straight into national distribution with a new dry dog food, skipping market tryouts.

And it will go right up against Ralston Purina Co.'s new Blend line.

Carnation is introducing to the trade new Come'n Get It, a four-flavor blend product, and will back it with an advertising/promotion program breaking in August that retail sources describe as "in line" with what it takes to battle market leader Ralston Purina. Given the current state of competition in the $1.3 billion category, industry execs report the total budget must be in the $15,000,000-to- $20,000,000 range.

Advertising, via SSC&B here, will include heavy tv, print and couponing. Extensive trial sampling will feature an 18-oz. size at retail, prepriced at 39 cents.

▪ The premium-price Come'n Get It (in beef, liver, chicken and cheese flavors) seems to follow the same strategy that has proven fairly successful of late for Carnation in dry cat foods. Its recent Fish Ahoy! and Chef's Blend entries offer one more flavor in the mix than Purina's Ocean Blend, Country Blend and Meow Mix cat foods.

With this rollout, Carnation again is going directly against Purina. Aside from its current heavy push for Mainstay dry dog food, the St. Louis company has been restaging existing Dog Chow flavor mix extension items into an umbrella blend line.

This week, Purina begins national introduction of new Home Style Blend, a beef, chicken and egg mix. It is joining Butcher's Blend (beef, liver and bacon), which was launched last fall as a Dog Chow item, and beef, bacon

Cutbacks?

'Normal' reductions fueling rumor mills, agencies say

An Advertising Age Roundup

Trying to track advertising agency layoffs is a little like trying to come up with a body count in the Vietnam War. It depends on which side you're on.

Last week, reports of mass firings at agencies rippled through the advertising grapevine. When contacted, agency managements pooh-poohed the numbers as grossly overblown and chalked up "occasional" pink slips to employe performance rather than the economy.

"I suspect there are layoffs throughout the industry because I hear so-and-so got rid of this number of people and so-and-so let go so many," said Della Femina, Travisano & Partners chief Jerry Della Femina in New York. "But I can't see how you'll get an accurate fix." Recently, as Della Femina's fiscal year ended, the agency fired nine people. "We heard it played back as 10 to 15 times that number," Mr. Della Femina said.

An axed employe, he continued, "likes to think he's part of an army. No one goes looking for a job saying, 'I was one of three people laid off'."

▪ The discrepancy is heightened by agency management reluctance to fess up to hard times.

Grey Advertising is making "selective cutbacks" because of the economy, "but no more so than other agencies," a spokesman said, while declining to provide numbers. "We are definitely not unique in this. We're being just as inundated with resumes from people let go at other agencies as they are from ours," he added.

Doyle Dane Bernbach, also a subject of rumors, denied it had sacked a large number of workers. "You can count on one hand the number of people terminated here in the last two months," said personnel director Dick Kane. "Just about all our Wrangler and Avis people [the two big accounts DDB lost recently] have been placed on other business. That's not to say we're not taking a closer look at filling new jobs," Mr. Kane added.

Sometimes rumors circulate before the fact. "There was talk on

(Continued on Page 78)

France adds a bit of NCK

NEW YORK—Sometime over the weekend, if all went as planned, Belier, the seventh largest ad agency in France, acquired a minority interest in Norman, Craig & Kummel Worldwide.

"We're giving up 10% of NCK Worldwide with the possibility of it developing into 20% over two years," chairman Dan Rodgers confirmed in a phone interview last week. No management changes are expected.

Belier is 45% owned by the giant Eurocom Group, in which the French government has a minority holding. The group includes the Univas network, which earlier tried to come to Madison Ave. via purchase of Kelly-Nason.

▪ Mr. Rodgers minimized the impact of Belier's equity in New York. "It gives them an international presence they haven't had before, and it gives us an additional creative force upon which to draw. But we don't expect to be servicing any of their clients."

What will affect the New York operation more materially, he said, is the acquisition of another shop here. "We are talking to agencies in New York with the idea of strengthening this operation," an operation Mr. Rodgers concedes fills a relatively smaller portion of worldwide operations than it should. He declined to identify prospects, but noted that these agencies "come in all sizes."

Reports had circulated here for months that NCK's New York office was to be acquired, but the

last minute news

Burnett resigns $15 million in Swift business

CHICAGO—Leo Burnett Co. announced it resigned the Swift & Co. business it has had for seven years over differences in operating procedures and compensation practices. Burnett handled Butterball poultry, Peter Pan peanut butter and Soup Starter, a total of $15,000,000 in billings.

P&G's Pert conditioner ready for test market

CINCINNATI—Procter & Gamble will soon move Pert creme rinse and conditioner into test in Milwaukee and Nashville, with tv breaking July 28. Supplements and couponing follow in August. Agency undetermined; Compton handles Pert shampoo, now national. The conditioner claims easier wet combing, fewer tangles, soft and manageable hair and prevention of damage. Yellow bottles shaped like Pert shampoo (green) come in 7-oz. and 11-oz. sizes and three formulas.

Gillette sets support for appliance rebate program

BOSTON—Gillette Co. will launch a heavy network tv and print campaign during the second half of 1980 to support the appliance division's $20,000,000 rebate program. In addition, the division will introduce its deluxe Heat Wrap/Cold Wrap, its third entry into the health and fitness product category. Rebates ranging from $2 to $10 will be available on 13 products. Grey-North, Chicago, handles.

Wilson Foods moves to M-E's Houston office

OKLAHOMA CITY—Wilson Foods Corp. has chosen McCann-Erickson's Houston office as its new agency on its $3,500,000 food products account.

Dart gives Kraft diversity

By JoELLEN GOODMAN and SUSAN GUREVITZ
Crain News Service

CHICAGO—Joseph Kraft would be proud.

The small cheese company he sold to National Dairies in 1930 is gambling on a bold multi-billion-dollar merger with Dart Industries to reach its badly needed goals in one swoop: Produce higher profit margins, enter faster growing markets and make a significant diversification into consumer products.

"It's diversification in spades," said Kraft chief executive John M. Richman. "Given our druthers, we would much rather do this than make a number of [smaller] acquisitions."

▪ Drexel Burnham Lambert analyst Arthur Kirsch added, "It's no longer the same company."

The move frees Kraft from a retail food market that is expected to average a meager 1%-to-2% annual growth in the long-term and an industry with the slimmest profit margins in American business.

The new company, to be called Dart & Kraft, will be headquartered near Chicago, and Kraft directors will hold a majority on the combined 23-member board. Justin Dart, 72-year-old founder of the Los Angeles-based consumer goods company, will be chairman of the executive committee, but Mr. Richman will be chairman and

In battle with 'N.Y. Post'

'News' plots editions

By [illegible]

New York—The morning New York Daily News is leaning strongly toward starting both an afternoon newspaper and a zoned Manhattan edition, possibly as early as mid-August. [illegible]

[illegible] fend ourselves and come out with a morning paper. I think we would have more opportunity in the morning than the News has in the afternoon."

The News and Post have been involved in an acrimonious circulation battle ever since Rupert Murdoch purchased the Post in [illegible] [illegible] that took direct aim at the News' audience.

Since that time, News circulation has continued to decline while Post circulation (especially of late) has climbed. The latest Audit Bureau of Circulations figures put the News at [illegible]

(Continued on Page [illegible])

'Casual' vs. 'hard core' audience

Why reader data differs

By [illegible]

Chicago—The raging controversy over the top disparate methods for measuring magazine readership may be quelled in a few weeks with the finding that the techniques measure two entirely different kinds of readers.

The Advertising Research Foundation, concluding its own research to mediate the battle between the two methods—through-the-book and recent reading—will issue a report that breaks down the components and characteristics of each in order to allow advertisers and agencies to determine for themselves which technique is best for a particular kind of advertising. It will not, however, make a judgment itself as to which method is best.

ARF's delays on comparability "a scandal" . . . Page 60

Douglas Banik, vp-research for the ARF, announced at the organization's midyear conference here last week that the "key factors" of the two methods will be published "in three to four weeks" and that a final report, to be published soon after that, will determine whether or not the audience numbers produced by each method can be calibrated or made equal by using some mathematical formula.

The reports will conclude a $425,000 study initiated by the ARF's Magazine Research Development Council following an uproar over widely divergent

product from Procter & Gamble.

'Patented extra step'

Copy in this color page ad for High Point, running in lead markets, explains the "extra step" taken to enhance the coffee's flavor. Ads will soon break nationwide, via Compton.

P&G begins point attack on GF's Sanka

By LOUIS A. FANELLI

New York—With Folger's ground roast securely holding the No. 1 position, Procter & Gamble Co. is hoping to deliver a second blow to General Foods' Maxwell House division with its national rollout of High Point decaffeinated coffee (AA, May 12).

High Point has set its sights on Sanka, GF's second largest selling coffee brand after Maxwell House. However, any serious challenge to Sanka is a formidable task. Sanka has become so well entrenched that its name is synonymous with decaffeinated coffee in consumers' minds.

The introduction of High Point instant following five years of test marketing is expected to be backed by more than $[illegible] in advertising support and all the creative and marketing muscle the [illegible] giant can muster. P&G continues to test High Point [illegible] ground roast in Portland, Ore., and St. Louis.

Spot tv for High Point instant will break June 23, followed by network tv July 7. The tv buy—consisting of 1,200 gross rating points per week for a year—is said to be the largest ever for a single P&G product.

In addition to page ads in women's magazines during August, the New York area alone will be flooded with a [illegible] coupon drop beginning [illegible], trade sources said. A similar drop recently was made in Los Angeles. Compton Advertising handles.

Using the theme, "Hearty robust flavor to decaffeinate the ones you love," High Point will be going after what is said to be a growing decaffeinated market.

According to industry sources, consumption of caffeinated coffee has been steadily declining for a number of years. The decline is related, in part, to the growing awareness of decaffeinated coffee and of health concerns.

According to trade sources, High Point instant attained a respectable 2% share in test markets. This figure may be even more significant when compared with Sanka's market share, which has been declining since 1976. Last year Sanka held a combined [illegible] share of the overall instant freeze-dried market, approximately the same as in [illegible], according to Leading National Advertisers. [illegible]

NATIONAL ADVERTISING INDEX—1979 AND FIRST QUARTER, 1980 12

Vol. 51, No. 25—Advertising Age (ISSN-001-8899) is published weekly, except semiweekly the third week in March, the first week in September and the third week in December at 740 Rush St., Chicago, IL 60611. Second class postage paid at Chicago and additional mailing offices.

First 3-net buy honors to Ralston

By COLBY COATES

New York—Tradition, and the theory that he who buys first buys best, once again has led the Ralston Purina Co. to cut the first three-network upfront deal of the 1980-81 prime time season.

Ralston's long-term sponsorship package is thought to be in the neighborhood of $40,000,000 and, according to a buyer who may well make the next major deal with all three networks, "this is what the market has been waiting for. This one starts the season."

Although this deal is the first to be written with all three networks, American Home Products and NBC announced a two-year, $125,000,000 upfront deal at the NBC affiliates meeting (AA, May 26).

Handling the deal for Ralston were William Claggett, vp-director of advertising-marketing services, Lee Zingale and Mary Howard of Checkerboard Advertising (Ralston's in-house agency) and the Paul Schulman Co., a subsidiary of Gardner Advertising's Advanswers. In addition to Mr. Schulman, Tom Winner and Les

Advertising Age, June 9, 1980

First '80 figures show media ads continue to rise

By ROBERT J. COEN
Senior vp, McCann-Erickson

The index of [illegible] advertising [illegible] major media [illegible] opening quarter [illegible].

The general index has been moving [illegible] trend line [illegible] of 1975. Though there have been pauses in economic growth since then, and in the second quarter of last year a real drop in Gross National Product occurred, advertising growth has not yet been significantly interrupted.

In the opening months of 1980, the economy was far from robust, and it is now generally acknowledged that a real recession has finally arrived. The advertising industry is concerned about whether the impact of these conditions on advertising will be mild or severe. Since advertising tends to lag rather than to lead the economy, the answer will not be clear for a number of months.

- The data through the first quarter of this year indicate major media developments as follows:

Magazines

The first quarter of this year was very good relative to the first quarter of last year. Cigarette ad pages were up and automotive magazine revenues were well above their first-quarter 1979 levels.

However, in last year's second quarter, the automotive category was exceptionally strong as a result of the introduction announcements for the new fuel-efficient, small domestic models. When the second-quarter 1980 magazine data becomes available, it is likely that the gains in comparison with 1979 will be a lot more modest than these posted for the opening quarter.

For the year as a whole, there probably will be some large gains for some of the new magazines that began to appear in the last few years. However, most of the established older publications will show little change in ad pages, but their revenues will be up because of rate increases. At the moment, a

First '80 ad data

(Continued from Page 3)

fair year for the magazine medium appears most likely for 1980.

Newspapers

Newspaper advertising rates have been rising, but they do not fully explain the exceptional revenue growth of the first quarter. National advertisers increased their budgets sharply to cover more linage as well as higher rates.

The most noteworthy developments have been the expanded activity of airline and cigaret advertisers. Both appear to be using advertising in a different manner than many marketers might have employed under similar business conditions in the past.

The cigaret manufacturers appear to be speeding up the introduction of low-tar brands to increase their share of market as total sales volume plateaus. The airlines are promoting their schedules intensely.

In the months ahead the national newspaper activity will undoubtedly slacken from the first-quarter pace, but we don't expect the kind of cutbacks experienced in previous recessions.

Spot television

The Winter Olympics and primary election activity helped hold up the demand for nonnetwork television advertising. The first-quarter activity appears to be relatively good compared with levels a year ago.

The extra stimulus from primaries, congressional elections and the presidential contest will be felt for most of the rest of this year. The cancelation of the Summer Olympics and the worsening economy may cut back the growth rate posted in the opening quarter, but the persisting battles for market share in many large package goods categories should combine with election demand to bring about fair results for spot television.

Network television

The indexes for network television spending moved up sharply in the latter half of 1979 as the 1979-80 season approached. The present season officially began in October, 1979, and extends through the summer months of 1980.

The expenditure levels for the network segment have been largely determined by the negotiations for "upfront" or advanced commitments that were worked out last spring and summer. The present indications point to a maintenance of the latest index levels through the second quarter of this year.

Due to the softening of the economy and the cancelation of the Summer Olympics, there may be some modest slippage in these seasonally adjusted indexes in the third quarter. In the fourth quarter, the network spending levels should turn up again as a result of higher prices for the upcoming new television season.

However, growing buyer resistance may result in a much smaller upturn than in the last few years.

Summary

The upward trend in national advertising expenditures has continued through the first quarter of 1980. Throughout 1979, there had been a great deal of uncertainty about future business health, but it is now apparent that advertising budgets were not adversely affected by these past concerns.

In the first quarter of '80, consumer finances were under pressure from soaring fuel costs and sharp rises in gasoline and transportation bills. In the second quarter, the economy has been slipping further, in real terms, and unemployment is rising. The impact of these developments is just beginning to make an appearance in some of the major media.

There are some obvious slowdowns in the advertising of high-ticket durables, but the competition for share of market in many of the most heavily advertised package goods categories is still quite intense.

The outlook for the year as a whole continues to be reasonably good at the moment. The developments in the next few months should determine whether the upward trend in advertising will continue uninterrupted: #

Economy hurts tv, aids radio

National spot radio soars, nets gain 30% in period

NEW YORK—If the first quarter is any indication, 1980 is going to be very, very good to radio.

Despite a recession or, as some execs contend, partially as a result of it, the medium enjoyed a 45% gain in national spot, putting the quarter's billings at $100,000,000. A combination of "new" dollars adding weight to current campaigns, plus the return to buying of major advertisers is powering the drive higher, industry sources reported.

Other segments are thriving as well. Network radio, on its way to annual billings in excess of $160,000,000, posted a first-quarter gain of over 30% for estimated billings of $55,000,000. Business on the local side—following a mediocre first month and a half—steadily built, with March up nearly 30%. The quarterly gain was estimated at 20%.

Though the news is generally good, there are a few hitches. Sources noted that while the top 25 markets are more than holding their own, there is concern about a softer pattern developing in lower ranked markets. And that is directly a result of uncertainty about the economy and its effect on the numbers for the second and third quarters.

Though a matter of some debate, the industry also is closely following the rise of

(Continued on Page 83)

Olympics loss shares blame for soft July in net tv

NEW YORK—July is shaping up as one of the softest network tv sales periods in recent history, with the grim third-quarter outlook contributing to the molasses-like pace of deal-making for next season's upfront market.

Network and agency sources alike confirmed the bad times, citing the unique juxtaposition of the American boycott of the Olympics with the recession as the key reason for the downturn.

As could be expected of the network that expected to carry the Summer Olympics, the outlook is bleakest at NBC where, sources say, as many as 50 prime time units per week are unsold in July and about half as many still open in August. At CBS, as many as 15 30s per week are said to be available, with a slightly smaller number open at ABC.

Based on a rough formula where each network has approximately 260 units per prime time week open for sale, an inability to sell 50 units could cost NBC about $3,750,000 per week, using $75,000 as a rough estimate of the cost of one unit. Potential losses to CBS and ABC, meanwhile, would be in the neighborhood of $1,000,000 per week.

Triumph trumpets taste test

By SAM HARPER

NEW YORK—While R.J. Reynolds Tobacco Co., Philip Morris U.S.A. and American Brands continue their donnybrook in the ultra low-tar segment, Loews Corp.'s Lorillard division will take a shot at low-tar brands from two of those companies in a campaign for its 3mg Triumph brand.

In an apparent effort to bring Triumph's market share up to the level of its burgeoning Kent III brand, Lorillard will kick off a national advertising campaign today which claims that Triumph was preferred in taste tests over RJR's Winston Lights and Vantage and PM's Marlboro Lights and Merit brands.

Ads claim that 60% of the smokers tested preferred Triumph over 8mg Merit, and 62% preferred the 3mg brand over 11mg Vantage.

▪ While PM and RJR focus their marketing efforts on taking share away from ultra low-tar segment leader, Carlton, with their Now and Cambridge brands, Lorillard's primary goal seems to be directed at grabbing share away from PM and RJR in the low-tar, or 5mg to 15mg, category. While Triumph is technically in the same segment as Now, Carlton and Cambridge, Lorillard's marketing focus has been on taste rather than "lowest" tar claims.

Triumph's campaign will include color page ads in Sunday supplements, plus outdoor and magazines, all touting the year-old

'A grave lack of courtesy'

French Havas buys into Publicis

By CAROLYN PFAFF

PARIS—In a move kept deadly secret, the giant French Havas group has acquired on the stock exchange 50% of the publicly owned shares of their main competitor, Publicis Conseil, the No. 1 French agency.

The last to get the word was Publicis, who knew someone had been buying a lot of shares since January, but thought until last week it was an investment fund. After the bombshell news, Publicis immediately put out a press release pointing out that Marcel Bleustein-Blanchet, founder of the company, still personally held 78.5% of the capital. Only 21.5% of the shares are traded.

Nevertheless the French ad world was agog. Commenting on the affair, Claude Marcus, administrator director general of Publicis, says: "First it shows a grave lack of courtesy, and second it is not the way a government company should behave." (Havas is 56% owned by the government.)

The word courtesy may appear unusual to outsiders, but in fact the reason why Publicis might have expected a more gentlemanly approach from Havas is that the two corporations have a long history of cooperation and jointly own several outdoor advertising companies. The two share, for example, all work for the government airline, Air France.

Now strong rumors in Paris have it that even President Giscard d'Estaing is furious at the Havas action. The group could eventually be forced to sell back the Publicis shares. The situation is all the more embarrassing to the government as Prime Minister Raymond Barre has recently created a monopolies commission and has announced his intention to make the French market a more favorable place for the free enterprise system.

Havas group controls directly 15% of all advertising billings in France and also has a share in nine

Theater tv fight will include ads

By JAMES P. FORKAN

NEW YORK—After a decade of trying to lure advertisers into backing closed circuit telecasts mainly of Muhammad-Ali fights, promoters Top Rank and Don King Productions have finally scored a knockout punch, with Sugar Ray Leonard *vs.* Roberto Duran.

Helping deliver that punch were Anheuser-Busch, St. Louis, and its agency, D'Arcy-MacManus & Masius. The fight, due on June 20 from Montreal, is the first joint promotion of archrivals Bob Arum of Top Rank and Mr. King; their joint company BADK Inc. bears the two men's initials.

The commercial sales were coordinated by Mike Trager, the former NBC Sports exec who now is exec vp-sports programing director at D'Arcy. Having made the biggest ("by far") buy on the Leonard-Duran closed circuit hookup for Anheuser-Busch, Mr. Trager was asked to shepherd the pursuit of other sponsors. A dozen minutes were sold at presstime, Top Rank said.

▪ "We don't want to overcommercialize or be an intrusion" with Leonard-Duran, Mr. Trager said, so the total number of commercial minutes will be "50% of what the tv networks would have."

The theaters may not be getting a cut of those ad sales. Michael Burke, president, Madison Square Garden, which has sold an estimated $3,000,000 in seats—now all sold out—was not aware that com-

NEWSPAPER

Only admakers make money

Air warfare takes toll

By JOSH LEVINE

NEW YORK—Airlines that have often named their planes after the sky's nobler birds are playing a transcontinental marketing game named after a different fowl. The chicken.

Plagued by passenger overcapacity between New York and California and a looming drop in traffic that traditionally hits those routes harder than others, the seven carriers that compete are testing each other's stamina with fares none of them can afford. Each hopes the other guy will drop first.

"The only people making money in this market are the production houses that are kept busy day and night making the ads," said William Dowse, vp-advertising, Eastern Airlines. Eastern entered the market two weeks ago with a $99 one-way night coach fare that spread quickly to the other carriers on both night and day flights.

▪ "We thought the $99 fare would tweak the night coaches a bit, and look what happened," Mr. Dowse said. "You can't file a fare, run an ad, and expect to steal a march on anybody. The speed of response is terrific."

Eastern is reported to be spending $11,000,000 via Young & Rubicam to promote its new transcontinental service, but the uniformity of industry pricing has homogenized advertising on the route. The vast sums being spent on New York-Los Angeles and New York-San Francisco flights are funding largely defensive campaigns designed to protect market share until the competition shakes out. The casualties are expected to begin dropping this fall.

Few carriers are talking about the extent of their losses, except to acknowledge that they exist and that they're exacting a heavy toll.

▪ "Even with full load factors, it's nonsensical to believe that any carrier can make money on transcontinental flights this summer," said Fred Heckel, vp-advertising at United Airlines. "Realistic appraisals [of profitability] don't seem to make a difference."

TWA shed some light on the stakes the carriers are playing for

FRANK SINATRA

Dollar-a-year deal

Sinatra aids Chrysler

HIGHLAND PARK, MICH.—Singer Frank Sinatra will appear in tv spots for Chrysler and its 1981 Imperial this fall, and in general help out a pal.

Mr. Sinatra telephoned Lee Iacocca, chairman of beleaguered Chrysler Corp., to offer his services for the same $1 a year Mr. Iacocca makes. "I was impressed with Iacocca's personal crusade to save Chrysler and protect American jobs. I called him and said, 'Let's talk'," Mr. Sinatra was quoted as saying.

They talked over dinner in New York and Mr. Sinatra and Mr. Iacocca shook hands on the deal that will also see "Ol' Blue Eyes" help Chrysler's sales programs as a "special representative" in employe and dealer relations.

John Morrissey, chairman of K&E, Detroit, said Sinatra "signed on based on Chrysler Corp. so it's bigger than the Imperial, although he could be of great help to us on Imperial."

Mr. Sinatra won't replace existing Chrysler spokesmen—currently former astronaut Neil Armstrong and actor Ricardo Montalban.

Mr. Sinatra has been an infrequent product endorser. He sang a song used as a voiceover for the Lincoln Versailles in the fall of 1978, and endorsed BASF audiotapes in a 1974 print campaign. He also cut promotional records for a New Hampshire radio station, out of friendship, in 1977.

Mr. Sinatra and Mr. Iacocca have known each other "casually" for the past few years. Leo-Arthur Kelmenson, president of Chrysler's agency, Kenyon & Eckhardt, helped smooth out the agreement. Mr. Sinatra did the work on Versailles when K&E was the Lincoln-Mercury agency.

K&E came to Chrysler after Mr. Kelmenson and Mr. Iacocca had a similar dinner meeting in New York, a year ago. That was the largest ($120,000,000 then) account shift in history. Mr. Sinatra's $1 wage will be supplemented by a "good financial award if we make it work," Mr. Iacocca said. He has the same deal if Chrysler survives its current financial difficulties.

"Frank Sinatra is a fighter for the underdog and I am delighted he is joining me and the others here at Chrysler in an effort to restore an important American company to a position of strength," Mr. Iacocca said. #

Paid drive on energy unplugged

By RICHARD L. GORDON

WASHINGTON—Members of a key House panel shredded President Carter's plan for a major paid energy conservation ad campaign, wiping out the entire $50,000,000 request from an Energy Department appropriation bill.

The project was openly ridiculed last week by some members of the House appropriations committee's interior subcommittee, which controls the department's conservation education budget.

"If I were sitting in my home next winter," said Rep. Clair Burgener (R., Cal.), "kind of cold, wearing a couple of sweaters, and an ad came on the television telling me to turn down my thermostat, I'd be pretty mad."

"There isn't any damn reason in the world to let those fellows go out and hire an ad agency," declared Rep. Joseph M. McDade (R., Pa.), the ranking Republican on the panel.

While the Energy Department can ask the full House appropriations committee or the Senate to restore the ad money, the subcommittee decision is likely to be a mortal blow to the project.

It's the latest in a series of frustrations for department ad planners, who have experimented with paid energy conservation ad campaigns but have never had a major budget.

Paid ad advocates won a break through last year after fighting it out with other department execs who favored sticking with public service advertising, the conven-

Research quality up

BY THOMAS RICHARD

CHICAGO—Until recently, the research arm of the business press—if it existed at all—was a perfect "10." For low profile, that is.

And when its efforts first started to become conspicuous, the public, sometimes with good reason, was suspicious of what research had to offer.

But that picture has changed for the better.

- A lot of research, by design, still goes on behind the scenes. But the quality now has moved up several notches.

"The attitude that publishing research is guilty until proven innocent is dying," says Jane Rogers, research director for Barrington Ill.-based Technical Publishing Corp. A 10-year veteran of the business, she notes that "attitudes are changing toward research. We have a lot of experts entering the field. And while research always has been a science, our methods are more sophisticated than ever."

For too long, a lot of publishing houses regarded research as an integral part of promotion, points out David Forsyth, vp, McGraw-Hill Publications Co.'s research division.

"What we are doing here is making research an independent group by itself and an objective approach is paramount," says Mr. Forsyth. "The information we gather reflects what is there—not necessarily what a client wants or hopes to see."

- McGraw-Hill's commitment to research is evident in the size and scope its operation encompasses. Clearly, it's no fly-by-night operation.

"We have 45 on the staff, up from 12 in 1977, and research is a full-fledged division of the company, no longer a department," adds Mr. Forsyth.

Here's how McGraw-Hill research division is subdivided and how it functions as a corporate resource center.

- **Media research group:** Fifteen employes have as their primary responsibility to develop "quality research" for McGraw-Hill and other noncompeting publications. Their work falls into three categories: Editorial—an internal quality control for editors, it makes sure they are really reaching their target audience; audience research—identifies a magazine's circulation demographically, and advertising effectiveness—assists advertisers and agencies in gauging how well their messages are read and it includes in its purview brand preference and benchmark studies.

- **Marketing research group:** As the name implies, its function is to perform—for a fee—a customized look at a particular market for manufacturers or agencies.

- **Marketing information center:** A secondary search depository that consists of three subgroups: A product/industry section whose job is to wade through some 300 technical magazines each month, culling tearsheets for 1,500 product categories; an advertising/-marketing section that performs a similar task, categorizing ads, and a sales support group, which issues an internal newsletter to the company's sales force.

Another well established part of McGraw-Hill's Marketing Information Center is its Laboratory of Advertising Performance (LAP), which produces a special research study each month. Circulated free to advertisers, recent LAP studies have included such topics as advertising in a recession and the cost of an industrial sales call.

A fourth branch of McGraw-Hill's research division, added last January, is the telephone interviewing center. It is essentially an in-house data collection unit, replacing outside subcontractors.

- At Technical Publishing, research performs a similar function as a fact-finding arm serving marketing, advertising and editorial.

Meanwhile, another factor putting research in the fast track is the computer.

John Oulton, director of Chilton Co.'s Management Information Service, says his company recognized the computer's potential early on and has pioneered that mode for handling reader inquiry responses.

- "Now that data base and computer power is so inexpensive compared to human labor," says Mr. Oulton, "it's being looked at much more seriously for storing and updating information and as a means of automating tasks that previously involved clerical help and manual files."

Mr. Oulton adds: "What's more, young people coming on board are familiar with computers and [are] eager to work with them. They view the computer as something to do a job with as opposed to a threat."

- Technical's Mr. Rogers agrees. Research's future is closely allied to the computer, despite high costs up front.

"Right now we do hand-tabulation and use outside and inside computer services. I foresee within the next couple of years much more extensive use of the computer."

The role of research is broadening, particularly as publishing houses pay careful attention to sampling, good questionnairing, testing and high response rates so the data "truly represent what you're measuring," says McGraw-Hill's Mr. Forsyth. #

Costs dim otherwise sunny outlook

BY MARC KIRKEBY

NEW YORK—It was the decade of *People* and *Rolling Stone*, of *Cosmopolitan* and *Ms.*, of magazines devoted to states, cities and even counties, of rapidly multiplying specialty magazines—including *three* publications devoted solely to vertical ice-climbing.

Vertical ice-climbing? Don't laugh. The '70s trend toward ever more finely-targeted magazines shapes up as the touchstone of the '80s as well.

Selectivity, the ability to search out small, active, affluent groups for advertisers, will make magazines an attractive alternative to broadcast, publishers say, even in the face of growing competition from increasingly segmented "new electronic media."

▪ But magazine publishers who would like to look ahead to a new age of prosperity must first wade through the economic downturn most of them are predicting for the second half of this year. Moreover, the steady pressure of rising costs in postage, paper and labor shows no sign of going away, and in recessionary times advertisers and consumers will likely be less amenable to price hikes.

Single-copy and subscription prices both doubled, on the average, from 1970 to 1979, according to the Magazine Publishers Assn. Single copies rose from an average of 63¢ to \$1.25; subscriptions from \$7.16 to \$15.18. Most of the increases have come in the last five years.

But even coupled with an increased cpm to the advertiser (64% for the decade, according to a Ted Bates & Co. study that includes a 1980 projection), MPA execs insist most publishers have not been able to keep pace with the cost spiral.

The MPA's greatest concern at the moment is postage. "Those costs have been going up 25% to 30% a year," said Kent Rhodes, MPA president. "They've gone up so fast they have caused some people to emphasize single copy sales; they've caused some publishers to take a very dim view of the future and perhaps go out of business sooner than they might have. It's a tough period for all magazines."

Second-class postal rates for magazines have more than quadrupled in the last 10 years; the latest proposed increase, which came in April, would raise the rate from 12.9¢ to 13.3¢ for an average copy, compared with a 33% (5¢) increase in first-class rates. If the MPA dislikes the rising rates, it resents their unpredictability more.

"How are you going to price your product when you have no idea what's going on out there?" Mr. Rhodes asked.

Ominous trends

Costs dim otherwise sunny outlook

(Continued from Page S-1)

Publishers' inflationary headaches go beyond postage, however. The lightweight coated paper used in most consumer, trade and farm magazines has about doubled in price during the last decade and no one expects the present price of $650 to $700 a ton to hold steady for long.

Last year's St. Regis strike forced many publishers to buy from European paper companies at rates that often approached $1,000 a ton.

According to Robert Gardner, former senior vp of the MPA, the leading American paper manufacturers have agreed to increase their production capacity by 1,000,000 tons of coated paper a year by 1983, reflecting an investment of almost $1 billion by 10 companies. But even at that, the MPA is predicting a continued shortfall. And, Mr. Gardner notes, "Any prolonged strike by a major supplier and we'd be back in the soup again."

Nor do cost pressures end there. Printing inks now top $5 a pound for most colors and are up in price by more than 40% in the last five years. The payroll for one major printing operation in the Northeast rose by nearly 70% between 1974 and 1979 and with double-digit inflation refusing to abate, no employes, be they printers, truckers or editors, are likely to accept smaller, less frequent raises.

▪ The attempt to keep costs down, particularly in postage, has had great impact on the way publishers regard circulation. The historic 70/30 ratio of advertising to circulation in contributions to magazine revenues is now closer to 60/40, chiefly because of efforts to build single-copy sales.

Subscriptions for all Audit Bureau of Circulations magazines (excluding comics) grew by only 1%, to 177,100,000 copies, from 1970 to 1979, while single-copy sales increased by 31% to 91,300,000 copies. Certain major groups, including Hearst, have put most of their energies into single-copy expansion.

"It's good evidence of the desirability of a magazine," said Gilbert Maurer, president of Hearst Magazines. "It makes me very comfortable to know that people want to buy our magazines."

But single copy sales were down 3% from the first six months of 1978 to the same period in 1979, according to ABC figures, and a "Gallagher Report" analysis of ABC results for the second half of last year shows the top 200 magazines off by two-tenths of 1% in average paid circulation, the first such decline in a decade. Hardest hit were women's magazines that rely heavily on supermarket sales; soaring food prices apparently are convincing some shoppers to leave that $1.50 magazine in the rack.

Robert Farley, an MPA vp who watches circulation, believes that when the economy improves, "these impulse items will bounce back. A lot of magazines have increased prices; that will stabilize, and we'll be selling more magazines in supermarkets than ever before."

▪ Ominous as such trends are, publishers can take heart in an advertising picture that looks sunny, if not exactly cloud-free.

Advertisers spent $2.93 billion in magazines last year, according to a McCann-Erickson study that includes art and mechanical production costs as well as a slightly broader sampling than the Publishers Information Bureau. The projected levels for this year and next are $3.24 billion and $3.58 billion, healthy 10.5% increases for each year.

The 64% rate of increase in cpm in magazines has been about half that of network tv (124% for daytime and 130% for prime time, from 1970 to 1980, according to the Bates data), and publishers have intentionally held themselves to that level, according to Mr. Gardner, to improve their position with advertisers.

When it comes to reaching broad demographic segments, however, tv still is besting magazines and, for that matter, all other media. In an average day, for example, 81% of the male population aged 18 to 49 watches tv; only 33% reads magazines, according to Television Bureau of Advertising statistics.

But with study after study suggesting that some very desirable portions of the 18 to 49-year-old audience watch little or no tv, and with the growing ability of magazines to break out smaller and smaller demographic groups, almost no one in magazines is selling head-to-head against tv any more.

The cost of a :30 prime time network spot now averages between $60,000 and $70,000. While a handful of the largest-circulation magazines match those rates for a four-color page, most cost much less. The average cost of such an ad in the top 50 consumer magazines was under $25,000 in 1978, according to a survey in *Marketing & Media Decisions*, and ad rates in many of the new specialty magazines are well below $10,000.

Magazines probably will continue to look good in cost comparisons.

"As long as you have a relatively

sold-out situation on tv, the costs aren't necessarily going to relate to market value as much as they relate to supply and demand," said Don Miller, chairman of the board of Rumrill-Hoyt, New York. "In the publication world you don't have that to the same degree because of the extensive competition."

Neither medium is likely to take ads away from the other, experts say.

"If you are really getting down to a specific target audience, the cost trend of magazines is favorable, a little better than tv," said Herbert Maneloveg, senior vp of Della Femina, Travisano & Partners, New York. "If there is still an intent to have some mass, then tv remains, in terms of a broad demographic, the best buy."

■ The economy's erratic behavior has caused most forecasters to revise their predictions for 1980 more than once. Former MPA vp David Bentley, an advertising specialist, predicts a growth in advertising pages for his association's more than 600 magazines of between 0% and 3%, with revenues from those ads climbing between 11% and 14%.

Forecasting the recession's effects on individual magazines presents a greater problem. The most obviously hard-hit of consumer products—boats, automobiles, recorded music—already are taking their toll on the magazines that serve those fields. But the slump hasn't yet followed an identifiable pattern.

"About five years ago, the photography magazines had a terrific period even though most magazines were down, because that happened to be at the beginning of the boom in 35mm cameras," said Robert Krefting, president of CBS consumer publishing division.

"We see an example the other way around," he continued, "with the four-wheel drive market, which has been down for over a year even though the recession hasn't occurred yet. On the other hand, our motorcycle magazine, *Cycle World*, is doing well."

Uneasiness over an uncertain year has led to a "very uncertain ad picture," Mr. Krefting said. "We find that an awful lot of our advertisers are not running schedules any more. They run from issue to issue, they make up their minds every 30 days or so all over again. I expect that to continue throughout the soft period."

■ Similar uncertainty prevails in the business and trade press.

"Right now we seem to be right on the cusp of something," said William Barbour, president of the Chilton Co., a subsidiary of ABC's publishing division. "I don't look for a very healthy year, frankly."

The automotive publications among Chilton's 22 magazines already are suffering; one is 50 pages behind last year. (A Chilton jewelry magazine, however, is 100 pages ahead.)

A study by Cahners Publishing Co., Boston, estimates that ad pages in business magazines will be down 4% in 1980, although ad rates will climb 10% and circulation 3%. Trade publishers' costs, like those of consumer magazines, are projected to rise at rates ranging from 8% to 14%.

The American Business Press put the total 1979 ad pages for its 2,500 member publications at 1,650,000, up 34% over 10 years; circulation for all business publications, according to Standard Rate & Data, rose from 63,600,000 to 70,000,000 copies in the same period, a 10% increase.

Changes in American agriculture have been reflected in a shift by farm publications away from magazines for the small farmer and toward those geared to the major farmer and the specialist, although the total number of magazines audited by Agricom Inc., a St. Joseph, Mo., marketing company, has held steady at around 165. Total ads in those magazines went up 9% from 78,650 to 85,803 in 1978 and 1979, while ad revenues went up 17% from $135,000,000 to $159,000,000. The biggest increases came in ads for crop chemicals, tractors and field and plant equipment.

■ Most magazines, consumer, trade and farm alike, will weather the current recession, publishing professionals believe, simply because so many of them have staked their futures on small, relatively recession-proof markets.

"Part of the problem in the demise of some of the big publishers is that they tried to compete in a numbers game with tv," said Seth Baker, president of ABC Publishing. "Those are the kind of magazines that are going to have more and more problems as time goes on."

ABC's strategy, Mr. Baker said, is to develop magazines "that are required reading for an individual as much as possible. If you're in the steel business, you have to read *Iron Age*. If you like cameras, you have to read *Modern Photography*. What we want to avoid are what we call discretionary magazines."

ABC has chosen to grow through acquisition rather than through the creation of new magazines, feeling that new magazine startup costs are simply too high. Yet even those companies still willing to give new publications a try are hedging their bets whenever possible.

"Companies are test-marketing new magazines," said Mr. Farley of the MPA. "They're doing a single copy, and if that does well they'll do four, or go bimonthly. It reduces the downside risk greatly."

A case in point is Hearst's *Colonial Homes*. The company already had several magazines in the home decorating area, but "began to detect through reader mail a strong interest in colonial decorating and architecture," according to Mr. Maurer. "We put out a limited number of copies, which were sucked off the newsstands, then we went quarterly, then to six times a year."

■ How far can the trend to specialization and regionalization go? How many people would have anticipated a successful magazine called *Houston Home & Garden*? Or *Gwinnett*, which serves a Georgia county east of Atlanta?

Publishers are confident that however demographically specialized cable tv may become, they always will be several steps ahead in targeting and better suited to reach consumers with large disposable incomes and sophisticated tastes.

Nor are publishers overly worried by the encroachment of new electronic media. ABC already has laid the groundwork for a series of "data base" publications, magazines containing information that also could be retrieved by computer and displayed on a home tv screen or terminal.

But ABC also sees a long life for the magazines themselves. David Bentley doesn't envision any negative impact on magazines from new technology for at least 20 years, and questions how strong an advertising medium the database systems will ever be. Publishers will thrive, he believes, because of the "ability magazines have to contain ideas readers want, to go back to *when* you want." #

Adding nonprofit researchers to Top 23 list

Last month I reported 1979 revenues of the Top 23 for-profit marketing/advertising research organizations (AA, May 19). In that column, I mentioned briefly that these commercial companies were just part of the total U.S. research industry picture; missing were some very large nonprofit research organizations.

Now, I'm going to slot eight of the more prominent nonprofit organizations into that Top 23 listing to show the difference it makes.

Let's start with corporations that have in-house research capabilities and do a considerable amount of their research work directly, without the services of outside suppliers (except for field service organizations). Among the more prominent are Procter & Gamble, General Foods, General Mills, Quaker Oats and Pillsbury. A spokesman for P&G, for instance, disclosed in a presentation to the Federal Trade Commission on Oct. 4 that they annually do about 1,000 survey projections in-house—totaling 1,500,000 consumer interviews. That is believed to be about two-thirds of the total P&G survey volume.

- A dozen or more U.S. universities are affiliated with nonprofit survey organizations whose main purpose is to serve the needs of academics, many of whom get study grants—but they also do work for "commercial" clients. For instance, the Institute for Social Research at the University of Michigan at Ann Arbor has a unit called the Survey Research Center, which does an annual survey research volume of more than $8,000,000 in straight, pass-through costs. SRC probably is best known for its continuing studies of consumer attitudes affecting spending, but in an average year it also does from 12 to 15 studies for "commercial" clients, such as General Motors, Ford and trade associations. A standardized employe attitude study has been executed for more than 150 commercial clients.

The largest nonprofit of all, no surprise, is the federal government. Just one unit, the Demographic Survey division of the U.S. Bureau of the Census, does between $60,000,000 and $70,000,000 worth of survey work each year, some of which is for commercial clients.

As the accompanying table shows, these nonprofits are larger than many prominent for-profit research companies—and, remember, we're basically dealing with pass-through costs that are not marked up as they would be in a for-profit company.

The large corporations, understandably, are reticent about detailing the full extent of their in-house research activities, but here are some magnitude numbers. The in-house unit at General Mills—which is called Consumer Research Services—has a staff of more than 50, including 14 project directors and 12 analysts. The annual CRS volume is close to $6,000,000, according to well-informed sources.

Fred Posner, director of marketing research at General Foods, and Dudley M. Ruch, vp-marketing research at Quaker Oats, say the volume of their in-house operations is "in excess of $5,000,000 a year." And at Pillsbury, it is estimated, the in-house volume is $1,500,000 a year.

The P&G volume of 1,000 survey projects provides a base upon which to speculate.

P&G's market research department has its own 50-station WATS center, and that presumably accounts for a large share of the interviewing. However, phone interviews can range all over the lot in length, complexity and screening requirements. An average projection a large survey house runs about $9,700, and if the same was true at P&G it would have an annual volume of about $9,700,000.

	General Foods Corp.	5.0+
	Quaker Oats	5.0+
23.	Decisions Center	5.1

Note: Research activities only for 1979; total revenues are larger in some cases. For details see AA, 5/19/80.

*Numbered companies are commercial, for-profit.

- Largest of the university nonprofits is Research Triangle Institute (RTI) outside Raleigh, N.C. RTI serves as a support facility for the universities in that area: Duke, North Carolina State, North Carolina and North Carolina Central. One division of RTI, the Statistical Sciences Group, had a total budget of $11,000,000 in the last fiscal year, of which $6,500,000 was survey research. Its survey volume in the current fiscal year is budgeted at $11,500,000.

The National Opinion Research Center (NORC), which is affiliated with the University of Chicago, had a survey volume of $9,900,000 in its most current fiscal year. The Survey Research Center at the University of Michigan has a staff of 687, including 104 professionals (some parttime) and a field force of 265. As mentioned before, SRC has an annual survey volume of more than $8,000,000.

These three are the largest and most prominent of the university-affiliated nonprofits, but sizable research organizations are to be found at a number of universities, to wit: Maryland, UCLA, California (at Berkeley), Illinois, Wisconsin, Indiana, Boston and Temple, among others.

On a final note, the Survey division of the Bureau of the Census is the third largest research organization in the U.S., as the table shows.

* * *

The survey research industry in the U.S. had a dollar volume 20% higher in the first quarter of 1980 compared to the same period a year ago, according to 38 CASRO-member companies that submit their revenue figures in confidence to the survey research company trade association. Since the inflation rate was running about 18% in the first quarter, that means the industry had a "real" growth rate of about 2% (which, incidentally, is what the Top 23 listing showed, on average, for all companies except A. C. Nielsen for 1979). First-quarter revenues for CASRO (Council of American Survey Research Organizations) companies were 4% ahead of the fourth quarter, 1979, levels. #

Advertising Age, June 16, 1980

Dry pet foods carry sales upward in '79

By JOHN C. MAXWELL JR.

Industry sales were up nearly 15% in 1979 in dollars. The unit picture was a bit different, however. Dry dog and cat foods were both up 5% to 6%, while moist cat food was about even and moist dog food was off about 5%. Canned cat food was down 4% to 5% and canned dog food was off 2% to 3%.

Judging by our market share figures, all the major companies appear to have lost some share. However, this is not completely reflective of what happened, as there was a spate of new entries in late 1979. It is not yet possible to track these in detail, so they are included under "all others" and probably will be broken out in 1980 data.

For instance, it should be noted that we have not broken out Purina's Butcher's Blend dry dog food, which was introduced in September, 1979. We therefore feel that while there may have been some erosion in the company's 1979 share, our market share table probably overstates it. We continue to believe that the dry area in particular for both cats and dogs, along with soft dry dog food, will continue to be the growth areas. #

Mr. Maxwell is with Lehman Brothers Kuhn Loeb Research, New York.

Competition, not clout, rules tv: FCC

WASHINGTON—A Federal Communications Commission task force reported last week that tv ad prices are controlled by competitive pressures, not by powerful networks or local stations wielding marketplace clout.

The favorable report on how the tv ad market is functioning is in a long-awaited advertising review presented to the commission as part of FCC's massive tv network inquiry.

Two additional reports released at the same time criticize FCC efforts to regulate network dealings with their program suppliers; suggest that the commission prime time access rule—reserving part of prime time for non-network programs—is accomplishing little or nothing, and discuss the factors determining tv station profitability.

FCC's network inquiry staff bills its advertising study as unique, since staff economists analyzed hundreds of actual tv ad purchase contracts supplied by the networks and by member agencies of the American Assn. of Advertising Agencies.

The contracts—drawn from 1977's fourth quarter—are the first time a tv ad price analysis has been based on actual prices, not estimates, the staff said.

While there are just three commercial tv nets with national reach, the FCC economists said network tv prices "reflect competitive rather than monopolistic prices. Whatever market power a network may possess, we have not found that power manifested in its transactions with advertisers."

Competition in the spot tv market got a similar clean bill of health. "Network-owned stations, affiliates and independents appear to compete for advertiser dollars as if no one broadcaster could affect market price," the report said.

Top commission staffers on the project rejected suggestions that soaring ad costs in recent years might undermine the argument that tv prices are set competitively.

"When we say prices are competitive, it's not that they are low or that stations don't make a lot of profit," said Thomas G. Krattenmaker, co-director of the network special inquiry staff, "but rather that individual stations and networks don't seem to be able to set prices as they please, independent of the marketplace."

The price run-up in recent years may "simply be an increase in demand for that time and an inability to increase the supply," Mr. Krattenmaker suggested. "We weren't trying to study what generated the increases."

Price and cost-per-thousand differences between network and spot markets "are largely explained by differences in the composition of viewer characteristics," the report stated. "Contrary to popular expectation," an FCC summary of the

Loungewear fashionable enough to be worn out instead of just in is the message of a new campaign for Geoffrey Beene for Swirl. Peter Rogers Associates handles.

Cable coup: P&G

By MAURINE CHRISTOPHER

NEW YORK—Conventional tv's biggest sponsor, Procter & Gamble, will debut next month as a major cable network advertiser with a heavy multiproduct schedule on Ted Turner's new Cable News Network.

This buy will give several P&G agencies a chance to pioneer in catv for the company that this year will spend an estimated $475,000,000 in conventional tv. But the cable agency of record or control on CNN will be Benton & Bowles.

Neither George Babick, CNN sales vp, nor Phil Guarascio, senior vp-media, B&B, would discuss the specifics of P&G's entrance into wired tv. Industry sources estimate the contract is worth $1,000,000 annually.

- P&G bought minutes scattered throughout CNN's 24-hour day for a wide range of products. Most copywriters fantasize about the opportunities for experimentation in commercial lengths and approaches in cable's pinpointable households, but at the outset at least P&G is expected to use commercials from its regular tv pool.

(P&G's earlier cable buy covers a six-times-a-year showing of "Is Anybody Listening?" a film about the company and its response to consumers, on Modern Satellite Network. This direct purchase costs $6,500.)

Also added to the CNN sponsor list—bringing the total of national clients to 22—were Holiday Inns and Shearson Loeb Rhoades. Grey advertising bought for the brokerage house, which will sponsor half of the 7:30 p.m. and 11:30 p.m. (EDT) 30-minute financial news program. Young & Rubicam is the agency for Holiday Inns' rotating schedule.

- The computer printout at CNN in Atlanta last week, showed 209 systems in 45 states and the Virgin Islands hooked into CNN for a possible circulation of 1,938,970 households. Mr. Turner's strongest backing is coming from seven Cox systems with about 315,000 subscribers.

Runners-up among the multiple systems operators with approx-

Delano seen returning to C-E hq from Europe

DETROIT—Lester Delano, president of Campbell-Ewald International/Europe is expected to return to C-E headquarters here in a top executive post. Helmut Zambo, joint managing director, Troost Campbell-Ewald GmbH, Duesseldorf, is expected to be named to succeed him in an announcement this week.

Salem Ultra Lights set, RJR may drop Real

NEW YORK—R.J. Reynolds Tobacco Co., Winston-Salem, N.C., will introduce Salem Ultra Lights nationally in late July with very heavy ad support, via DFS. At the same time, trade sources say the nation's No. 1 cigaret maker plans to withdraw Real cigarets from the market, in addition to pruning its various lines of low-volume styles. RJR could not be reached for comment. Real's agency was Ogilvy & Mather.

New $14 million Mountain Dew drive readied

PURCHASE, N.Y.—Pepsi-Cola is preparing to roll national with a new $14,000,000 Mountain Dew campaign, "Give me a sunshine. Give me a Dew." Campaign previewed June 2 in selected markets. BBDO handles.

Big dailies go electronic

By JACQUES NEHER

CHICAGO—The *New York Times* and *Washington Post* are among 11 leading newspapers around the country to be chosen this week to go "electronic" over the next 12 months by joining a national computer data network.

And while it's editorial-only for now, the newspapers may be able to sell national ads on the new computer medium by sometime in 1982.

The papers, following the lead of the *Columbus Dispatch* (AA, June 2), will supply their entire editorial product each evening to the CompuServe Information Service, Columbus, O., a subsidiary of H&R Block. The service will be accessible to anyone with a home or office computer, at a time-sharing fee of $5 an hour.

And after Tandy Corp. begins marketing its Videotex system (AA, June 16), anyone with the $400 unit, a telephone and a television will be able to receive the multipronged information service at the same charge.

The papers, according to sources, will be investing $40,000 each to feed their news into the central computer in Columbus via local "ports" or offices equipped with minicomputers in each respective city. The papers, in turn, will receive 20% of the time-sharing charge levied on the subscriber who calls up articles from that paper. CompuServe currently operates 23 offices around the country which serve 35 metropolitan areas.

CompuServe marketing coordinator Michael Ward said the company is projecting 100,000 subscribers by the end of 1981. It currently has about 3,000.

Mr. Ward said the 11 papers were chosen from "at least 40" that contacted the company following the announcement of its program with the *Columbus Dispatch*. "It was entirely our decision and based on the number of computer subscribers in the particular market," he said.

While the newspapers will begin by supplying only editorial prod-

George, Billy & Indigestion

NEW YORK—While Yankee owner George Steinbrenner and Oakland A's manager Billy Martin have had their share of wrangling on the baseball diamond, the two are batting 1.000 in their joint commercial appearances.

Coming off a successful series of tv commercials for Miller Brewing's Lite beer, the pair have signed on as spokesmen for Pepto-Bismol.

A tv spot filmed last week in New York, set to air on both network and spot tv at the end of July, shows Mr. Martin seated in a posh restaurant, complaining: "What a day! First I have rubber pancakes for breakfast. Then I lose my luggage. Then we lose the game. Then I come here and eat, and the chef's on vacation. It tastes like the busboy cooked the din[illegible]. It's enough to give a guy an upset stomach." When a waiter appears with a bottle of Pepto-Bismol, Mr. Martin says, "I think I'll take a swig of this." Mr. Steinbrenner enters the room and says, "Billy, use a spoon."

Seagram's using tv for Arielle 40 proof drinks

By JOSH LEVINE

NEW YORK—Don't call Seagram's pretender to the cordial and liqueur throne a cordial or a liqueur.

Seagram's doesn't, and it won't as long as the new Arielle line treads the hazy territory of tv advertising, while its distilled competitors remain beyond the broadcast pale.

Although Arielle isn't a wine product, the 10-flavor line, due on retail shelves in three markets this week, derives its 20% alcohol content from a fermented wine base. That makes it a bold candidate for broadcast time in a burgeoning market where armies of new contestants are battling each other in print.

While each Arielle bottle sports the formula, "Made with grape wine and natural flavors," the 10 flavors offered match their distilled counterparts in established cordial and liqueur lines. Arielle is available in Almond Royale, Apricot Royale, Blackberry Royale, Cacao Royale, Coffee Royale, Green Mint Royale, White Mint Royale, Peppermint Royale, Orange Royale and Sloe Royale. A 750 ml. bottle will retail for between $5 and $6.

The National Assn. of Broadcasters and the Distilled Spirits Council of the U.S. both guard the portals of broadcast media with codes that bar any distilled products from the air and draw the line at any beverage over 48 proof.

▪ Arielle, as a 40 proof fermented product, falls within both guidelines, but Calvert Distillers, the Seagram unit that markets the "after-dinner drink," is putting the spirit of the industry's voluntary compliance to a stringent test, liquor sources say.

The question of whether a liquor product historically produced by distillation can qualify for air time by substituting a fermented alcohol base puts Arielle in a gray area, according to Jerry Lansner, vp-general manager of the NAB's code authority.

"If it's a wine base, it would seem to be okay," said Mr. Lansner, "but the way they position themselves might have some bearing. If the product is marketed against other cordials, it might pose a problem. Positioning a product that is acceptable against products that are unacceptable raises new issues."

Experimentation with wine-based drinks is nothing new, and many leading liquor marketers have some kind of wine-based cordial or wine-based cocktail bubbling in á back room vat. In most cases, however, advertising has been done on a very limited scale, the proof content of the products has been much lighter and the drink's wine heritage has been apparent.

While a Seagram spokesman belittled any doubt whether the 30-second Arielle commercial would be cleared by the stations in three introductory markets, the company doesn't disguise the audacity of its marketing strategy.

Trade ads for Arielle in Chicago.

Violin plus

Adding another dimension to its well known Tabu violinist concept, Dana Perfumes has added op art graphics for the fall print campaign by Avrett, Free & Fischer, New York.

'Wall Street Final' in tardy debut

'N.Y. News' p.m. edition okayed

By LEAH ROZEN

NEW YORK—The *New York Daily News* decided last week to go ahead with its much talked about afternoon edition.

The *News*, a morning paper owned by the Chicago-based Tribune Co., has toyed with the idea of starting an afternoon paper on and off for several years as a way of stemming its own slipping circulation and cutting into the rising circulation of the afternoon *New York Post* (AA, June 9). *News* circulation is now 1,554,604 daily, down 35% from 2,100,000 in 1973, a figure at which it had hovered for the previous decade.

Meanwhile, a new New York afternoon daily, the *Wall Street Final* ran into problems in its first week of publication. Intended as a paper for rush-hour commuters, the *Final's* premiere June 16 and June 17 and 18 issues did not reach newsstands until the early evening, long after most commuters had boarded their buses and trains.

▪ The *News'* start of an afternoon edition, which will compete with the *Final* for readers, will mean an end to the *News'* early evening bulldog edition. The bulldog is now available on newsstands around 8 p.m. and has a circulation of close to 200,000.

There is no official word yet from the *News* on what the afternoon edition will carry, but sources indicate that it will be a sprightly package aimed at upscale commuters and Manhattanites. Sources who have been privy to discussions on the afternoon paper report that it will include a lot of sports news, business coverage and columns.

There also is no word from the *News* as to when the afternoon paper will make its debut, although it has been hiring new reporters in recent weeks. Industry sources predict a fall start-up date.

The *News'* decision to start an afternoon paper is one that flies in the face of conventional wisdom about newspapers. Afternoon papers have not fared well in this country in the past decade, due to distribution problems and changing consumer information habits (*i.e.*, watching television news).

▪ In fact, many metropolitan afternoon newspapers have gone in the reverse direction of the *News* and started morning editions. These include the *Washington Star*, the *Boston Globe* and the *Dallas Times Herald*.

According to newspaper analyst, John Morton of John Muir & Co., Washington, the start of a second edition in a different time slot generally "hurts economically while helping circulation. It can take years to translate those circulation gains into advertising revenue."

Although Mr. Morton was, as George S. Kaufman once said, "underwhelmed" by the prospect of an afternoon edition of the *News*, he did say that New York is a unique newspaper market and an afternoon paper would probably have a better chance of succeeding there, due to the concentrated number of readers in Man-

Hills Bros. bets big on High Yield

By JENNIFER PENDLETON

SAN FRANCISCO—High Yield coffee is finally taking a high place in Hills Bros. marketing priorities as it attempts to stem continuing loss of market share to Procter & Gamble's Folger's and General Foods' Maxwell House brands.

Hills Bros. is understood to have earmarked more than half of its current $6,000,000-plus ad budget for High Yield ad support from now through year's end in an attempt to turn the brand into a major contender.

High Yield has been in test in several markets in three different forms, two of which will be given minimal attention as the heavy backing shifts to High Yield All-Purpose grind as the coffee that's suitable for all kinds of coffee makers.

Research sources show that Hills Bros.' 6.9% share of the regular coffee market in 1978 further slipped to 6.2% last fall (AA, Mar. 10), and it's known the company, under the ownership of Brazil's Copersucar,

In tobacco, where there's smokeless there's fire

By SAM HARPER

NEW YORK—The smattering of spatters, most visible in baseball dugouts and rodeo grandstands, will color common ground in the '80s as tobacco marketers position themselves for a growth period in the smokeless tobacco market.

There are about 22,000,000 swollen-cheeked chewers in the U.S. today, but industry analysts feel that total could double over the next decade as a health-conscious America shuns smoking products.

As the demand for plug, twist; loose leaf and fine cut chewing tobaccos and moist and dry snuff increases, chewing tobacco marketers will increase advertising budgets and lengthen product lines. That trend already has begun in southern and western markets where demand among 18-to-30-year-olds is greatest.

■ Liggett Group's Pinkerton Tobacco Co. has, of late, been the most aggressive of the chewing tobacco marketers, this year introducing a plug extension of its Red Man brand and Big Duke and Union Station loose leaf brands. All of the new entries currently are being tested.

The Owensboro, Ky.-based marketer recently signed George Brett of the Kansas City Royals and Pittsburgh Steelers' quarterback Terry Bradshaw to endorse its new Union Station chew and its flagship Red Man brand, respectively. Big Duke spots feature an animated character modeled after the late John Wayne. Combined billings on the Union Station/Big Duke rollout is $1,000,000.

Joe Stone, president of Pinkerton agency Berger, Stone, Ratner, said Red Man, using the theme, "Pick of the pros," is aimed at the "sportsminded," while Big Duke and Union Station are positioned for athletes "as well as the macho types who enjoy a good chew."

Red Man, with about 40% of the loose leaf segment, is the nation's top-selling chewing tobacco. It accounts for about 80% of Pinkerton's loose leaf sales, a category in which it has five other brands, according to John C. Maxwell Jr., senior analyst, Lehman Bros. Kuhn Loeb Research. Pinkerton's foray into the plug tobacco segment with Red Man apparently is an effort to increase its current 4% share in that segment.

Conwood Corp. currently manufactures more products than any of its competitors. Its brands include Pigtail, Red Coon and Mammoth Cave. However, E. C. Powell, Conwood vp-marketing, said the Memphis-based marketer's Taylor's Pride plug tobacco and Levi Garrett loose leaf are largely responsible for Conwood's growth in the last five years. "Levi Garrett has really helped us along," he said of the brand that claimed only a 1% share of the loose leaf segment in 1975. Levi Garrett now holds a 23% segment share.

Conwood recently expanded distribution of its Hawken brand to include most of the South and West following its 1979 introduction. Mr. Powell expressed the hope that the Hawken brand would create a new category that will attract competitors. "I would like it to be the top brand in a new category," he added. Hawken, a rough cut, loose leaf brand currently is the only unit in this segment.

Sparky Lyle, Texas Rangers' pitcher, is the Levi Garrett spokesman. He appears in a number of spots in southern markets touting LG as "the best tasting chew." Tucker-Wayne, Atlanta, is the agency.

■ R. J. Reynolds Tobacco Co., primarily known as the nation's leading cigaret marketer, also has a major interest in the smokeless segment. The Winston-Salem, N.C.-based diversified company currently claims a 56% share of the plug tobacco segment with its Day's Work brand leading the way as the nation's top-selling plug brand.

Supplementing its dominant share in this segment is RJR's newest entry, R. J. Gold, which rolled national June 9, following three months in test. Print ads for R. J. Gold feature a picture of a group of men standing over a treasure chest filled with the tobacco product. The headline reads, "Discover Gold."

RJR has six other plug tobacco brands, all of which are handled by Tatham-Laird & Kudner, Chicago.

RJR's only loose leaf entry, Work Horse, currently has a 4% share of that segment, however, it is backed currently with regional tv spots that RJR hopes will boost its segment share. Tv spots feature coal miners at work and the theme line, "I'm a tobacco chewing Work Horse man." The brand also will sponsor a spitting contest at the Kentucky State fair. "Spitting," an RJR spokesman said, "is becoming a very popular pastime."

■ Lorillard's Beech-Nut division led the loose leaf segment in sales until 1967 when Pinkerton bumped it out of the top spot by packaging its loose Red Man brand in a foil pouch, keeping the tobacco fresh for an extended period of time. Beech-Nut now controls about 19% of the loose leaf segment, according to Mr. Maxwell. D'Arcy-MacManus & Masius/-de Garmo handles Beech-Nut.

U.S. Tobacco, Greenwich, Conn., controls the most lucrative end of the smokeless tobacco market with its Skoal, Copenhagen, Wintergreen and Happy Days moist snuff products. Between the four brands, UST claims a 99% share of the moist snuff and fine cut tobacco segments.

The moist snuff and fine cut segment has grown 43% over the last five years while dry snuff, formerly used by aristocrats to induce sneezing, is on the decline, according to industry sources.

U.S. Tobacco's current concern is to market successfully its snuff products in international markets, according to R. L. Rossi, UST's exec vp-operations. In March, the company established a separate division for the international marketing and sales of its smokeless tobaccos, citing "untapped overseas markets." At present the company is testing products in England, Denmark and Israel.

While UST is eager to take advantage of foreign markets, it does not feel domestic markets have run dry. During the Olympics the marketer spent $2,500,000 promoting its products, and continues to spend heavily on a national basis.

Sports figures such as Walt Garrison, Earl Campbell, Carlton Fisk, Shep Messing, Bobby Murcer and, most recently, singer Charlie Daniels have been involved in UST commercials. Warwick, Welsh & Miller is the agency. #

George Brett, third baseman for the Kansas City Royals, recently was named spokesman for Pinkerton's Union Station chewing tobacco. Berger, Stone & Ratner, New York, handles.

Movie dying? Change ads

Country and western themes aren't bringing in the movie patrons, so Paramount has switched to a "Saturday Night Fever"-type ad theme for John Travolta and "Urban Cowboy," while Clint Eastwood takes center stage for "Bronco Billy" from Warner Bros. Repositioning follows "soft" box office results for both. Paramount is handled by Diener/Hauser/-Bates; Warner's agency is Grey Advertising.

Reynolds vows it'll beat back PM

By JOHN J. O'CONNOR

New York—Tearing a page from the book of beer baron August Busch III, R.J. Reynolds Tobacco is pouring on the advertising bucks in a bid to stop Philip Morris U.S.A. from unseating it as the nation's No. 1 cigaret maker.

The Winston-Salem, N.C.-based cigaret giant's determination to beat back its archrival was expressed by Gerald Long, exec vp, in a telephone interview spurred by RJR's decision to discontinue Real—one of the industry's biggest failures—as well as three other low-volume brands (AA, June 23).

■ "As far as Ed Horrigan [RJR chairman and president] and myself are concerned, there is no way Philip Morris will pass Reynolds this year," Mr. Long said. "And from a management standpoint, we're dedicated that they'll never pass us."

The Horrigan/Long team, which has held the reins of the RJR Industries subsidiary less than a year, is committed to keeping RJR's share of industry media expenditures higher than its roughly 33% share of market.

"We believe in the Procter & Gamble and General Foods approach," Mr. Long continued, "You've got to spend more against the consumer than the competition. At the end of last year, the decision was made to juggle our advertising and promotion ratio which aided us in coming with higher advertising."

While he would not divulge how much RJR's budget was this year, an industry source put the advertising and promotion budget in the vicinity of $200,000,000.

Mr. Long acknowledged that a "certain parallel" existed between the RJR/PM battle and Anheuser-Busch's battle with another PM subsidiary, Miller Brewing. By vastly increasing its ad spending, the No. 1 brewer has successfully kept Miller in second place while increasing its own share in the process.

■ The 1980 six-month industry sales report by analyst John C. Maxwell Jr. of Lehman Bros. Kuhn Loeb Research should indicate whether RJR's strategy is paying off or is, perhaps, an example of too much, too late. Mr. Maxwell's 1979 data showed the RJR share at 32.6%, down 0.3%,

Sofia on shelves; Start tests ads

Coke and GF test liquid yogurts

15¢ off on your first taste of new Sofia liquid lowfat yogurt.
The only yogurt made in the U.S. with the renowned imported cultures of Bulgaria.
SOFIA

Newspaper ads note that Coke Foods' yogurt is linked to Bulgaria.

By NANCY GIGES

New York—Coca-Cola Foods and General Foods are testing new liquid yogurt drinks under the Sofia and Start names, respectively.

The Coke Foods entry has entered test in Portland, Me., and Rockford, Ill. GF has run a rough tv spot for Start in Atlanta, but the product is still in the concept stage, according to GF.

These two companies join Norton Simon's Canada Dry unit and a number of local and regional dairies in trying to expand the yogurt category, estimated at $600,000,000 annually.

■ Sofia, available in peach, strawberry, blueberry and raspberry flavors, is packaged in 8-oz. cartons and retails for about 50¢. Advertising by F. William Free & Co. claims the product is "the only yogurt made in the U.S. with the renowned imported cultures of Bulgaria." In addition to tv and newspaper ads, Coke Foods also is conducting in-store sampling.

A spokeswoman said the company does not care to divulge how it is getting the yogurt culture to the U.S. Newspaper ads do not mention whether the cultures are active.

Copy notes, "Bulgaria—where yogurt is so smooth and mellow that Bulgarians consume more per person than anywhere else in the world. That's why we imported the very same cultures to give Sofia a delicious, drinkable, liquidy-light flavor."

■ The GF commercial that aired in Atlanta positioned Start as a "perfect beverage to drink with breakfast." It said the yogurt comes in four flavors and contains a day's supply of Vitamin C. At the end of the spot a young boy asks his mother to save a container for him for an after-school snack. Agency was undetermined at press time.

According to sources close to the company, GF wanted to name its new yogurt Fresh Start, especially if the breakfast positioning tested well. But Colgate-Palmolive's selection of the Fresh Start name for a detergent nixed that idea.

In choosing Start, GF fell back

FTC: Self-regulate new media

Washington—Federal Trade Commission chairman Michael Pertschuk sees FTC as an early warning system signaling marketers about potential problems as they explore the new electronic media of the 1980s.

The challenge for both advertisers and the commission, the FTC chairman told an Advertising Age/American Enterprise Institute conference on advertising in the '80s last week, is "how can we forestall the need for more heavy-handed forms of intervention later?"

The answer, he suggested, is for those exploring the new media to take "anticipatory action now—perhaps through appropriate self-regulation."

"The FTC can play a catalytic, early warning role, sensitizing and alerting media revolutionaries to potential competitive pitfalls and to the unintended risks to the consumer that may be the by-product of all these golden opportunities," he said.

■ New media was also the springboard for a critical conference presentation by media expert Herbert D. Maneloveg, senior vp-director of media-marketing services at Della Femina, Travisano & Partners, New York.

Television's constant barrage of information, entertainment and education "is confusing the public rather than helping to lead," he said. Other media have followed tv's pattern toward short "bits of information" rather than expanding important ideas.

Conventional tv has become "almost exclusively a sales marketing tool," Mr. Maneloveg observed,

Deere shifting Europe business to Barker

Moline, Ill.—Deere & Co., the farm implement concern, will be moving some or all of its $8,000,000 account in Europe to Charles Barker ABH, London, the European partner of N W Ayer ABH, whose Chicago office handles Deere's U.S. account. Saatchi & Saatchi-Garland Compton, London, is the longstanding agency in Britain. Compton chairman Milton Gossett said the agency might be losing the British account, estimated at $800,000 but claimed that the remainder of the European business would stay with Compton.

Connecticut General picks Della Femina

Hartford, Conn.—Connecticut General Life Insurance Co. has chosen Della Femina, Travisano & Partners to succeed Cunningham & Walsh on its $5,000,000 account. The assignment is effective Sept. 1.

Net sales trail last year

Big week seen in upfront buy

By COLBY COATES

NEW YORK—Anticipating that "the dam will break" this week, network and agency execs estimated that each network had between eight to 12 firm upfront orders or deals on hold at the end of last week.

When an upfront deal goes on hold, the agency negotiator and the network have agreed to the target cpms and a schedule. The network freezes all units involved, pending what usually is routine confirmation of the deal by the client.

Sources suggested that from $80,000,000 to $120,000,000 per network was represented in the deals. Though some execs still held out hope for an upfront payout of approximately $1.6 billion, a mixed bag of indicators suggest that upfront prime time deals might total only $1.5 billion, well below last year's market.

■ Some major agencies were teeming with CBS salesmen late in the week, hiking speculation that a few of the multibrand package goods advertisers were ready to put their imprimatur on deals on hold. Those making upfront deals claim that CBS has been the slowest of the three networks to sort through the various plans, so their spurt of activity indicated that both sides were getting anxious to come to terms.

One theory for CBS' tactics implies that the network tv sales department has been under heavy corporate pressure to hold out for the big percentage increases to help ease the burden of CBS Inc., which had a down first quarter and appears headed for an unimpressive first half.

Meanwhile other sources tended to look more at the agencies than CBS as the reason for an upfront pace that is well behind last year's.

Explained one network exec, "The buyers are trying to control the marketplace. It's something they try and do in off years, but the networks have a lot of confidence. Maybe if they were more united, they might have some leverage; but the way it is now, they just can't do it, and we all know it."

Still, things are not quite like the salad days of recent memory. Before the start of the season, the networks were talking of an upfront market that would yield average

Esmark plan: Sell off units to make it more consumer oriented

By JENNIFER ALTER

CHICAGO—When Esmark Inc. divests itself of the profitable Vickers Energy Corp., closes some of Swift's problem fresh meat units and sells the remainder, the $6.8 billion holding company will emerge as a predominantly consumer-oriented marketer.

Following the Vickers sale, the company, which will retain Estech, International Playtex, International Jensen and Swift as a consumer products marketer, will then make a tender offer to stockholders to acquire approximately 50% of outstanding stock, about half of which it plans to use for acquisition.

The sale of the highly profitable Vickers (it produced 14% of Esmark revenue in fiscal 1979 and 41% of operating profits) was engineered largely to offset losses the company will incur in unloading Swift's fresh meat interests (estimated at from $200,000,000 to $300,000,000), Esmark president-chief exec Donald P. Kelly said.

Swift, in the next six months, plans to close a major beef and pork operation and several multiproduct facilities said to affect approximately 600 employes.

It then will take the remainder of its fresh meat operations—those with fewer labor problems—sweeten them with funding of pension and health care liabilities for employes and put them on the block as a new company, Swift Independent Packing Co.

It is hoped, according to Mr. Kelly, that an overseas business will acquire the new fresh meat company and that Swift will embark on a "long term association" with the new owner.

The remaining profits from the Vickers sale (scheduled to be accomplished by Nov. 1), will be used to back existing consumer products and also for purposes of acquistion, Mr. Kelly said. He said consumer products and specialty chemicals companies are of particular interest.

Mr. Kelly said Esmark elected to sacrifice Vickers partly because it is so lucrative. "We could have sold others," he said. "But where are premiums being paid today? In the energy field."

He also said Vickers will require capital expenditures in the future, and Esmark currently is looking for a balance sheet bolster, not a drain. Vickers spends approximately $3,500,000 on advertising through Ackerman/McQueen, Oklahoma City.

In explaining the tender offer, Mr. Kelly said the company believes its stockholders should have an opportunity to reassess their interests since the company has changed so much recently.

Mr. Kelly said Esmark is committed to the remaining Swift business. He said the recent switch of some Swift brands from Leo Burnett Co. to Foote, Cone & Belding (AA, June 16) was unrelated.

However, industry observers contend it was Swift's concern with the bottom line which precipitated this move. Sources say Burnett resigned the account only after Swift reduced its compensation fees.

MAY SWEEPS AFFILIATE AND INDEPENDENT TV STATION SHARES 51

Vol. 51, No. 28—Advertising Age (ISSN-001-8899) is published weekly, except semiweekly the third week in March, the first week in September and the third week in December at 740 Rush St., Chicago, IL 60611. Second class postage paid at Chicago and additional mailing offices.

FCC: Open access slot to kids' fare

WASHINGTON—Federal Communications Commission chairman Charles Ferris took his campaign for more weekday children's tv programing to a broadcaster meeting last week and zeroed in on the "unused" potential of the 7:30 p.m. to 8 p.m. [ET] time slot.

That period is off limits to network fare under FCC prime time access rule, but he noted a specific exemption permitting networks to use it for children's programing.

Network initiatives "might be welcome," he told children's programing execs meeting here at a two-day session sponsored by the National Assn. of Broadcasters and the National Assn. of Television Programming Executives. He also suggested local stations might schedule off-network syndicated children's series.

He cited the availability of the prime time access slot as an answer to broadcaster objections that afternoon tv time is committed to other audiences, and that this is followed by evening news.

FCC is investigating the adequacy of children's tv, including a suggestion that tv stations be ordered to carry 7½ hours of weekday children's shows. #

Arbitron analysis numbers tv ratings trends

By MAURINE CHRISTOPHER

NEW YORK—Suppose an advertiser is shopping for fringe tv schedules in the top 50 markets; which affiliates and independents look strongest in their market in that time period?

If access is the spot buyer's preferred location, which stations score heavily there?

Who's ahead where in the prime time race?

Say a popular independent is the goal for a run of schedule campaign; which stations are doing best at attracting homes throughout the broadcast day in terms of average quarter hour audience shares?

Answers to questions of this sort can be found in the top 50 markets analysis of the May Arbitron sweeps put together for ADVERTISING AGE by a broadcast researcher. In each market, leading stations were ranked according to how well they did in sign-on to sign-off household audience share for the period April 30 to May 27. Similar data for markets 51 through 150 will be published later.

In early fringe, the standout stations—in terms of their average audience share were: WBRC-TV, Birmingham, 51; WHIO-TV, Dayton, 47; WBTV, Charlotte, 41; WTEN, Albany, 40; WRAL-TV, Raleigh, 39; WSAZ-TV, Charleston, 38; WHAS-TV, Louisville, WTVF, Nashville, and WNEP-TV, Wilkes-Barre, all 36, and WGAL-TV, Harrisburg, 35.

WBRC-TV also led the parade in access share with a 61. Runners-up were: WBTV, Charlotte, and WISH-TV, Indianapolis, 44; KSL-TV, Salt Lake City, 43, and KMBC-TV, Kansas City, KOCO-TV, Oklahoma City, and WRAL-TV, Raleigh-Durham, all 40. Coming in at 39 were WCMH, Columbus, O.; WMC-TV, Memphis; WCCO-TV, Minneapolis, and WJAR-TV, Providence.

At the top of the list in these big population centers in terms of sign-on to sign-off household shares for indies was KPHC-TV, Phoenix, with a 19. Others in the top 110 on the basis of that criterion are: KPTV, Portland, Ore., 18 share; WTTG, Washington, 17; KMSP-TV, Minneapolis, and WNEW-TV, New York, both 16; WGN-TV, Chicago, 15; KTVU, San Francisco, 14, and WUAB-TV, Cleveland, KWGN, Denver, WKBD-TV, Detroit, WTTV, Indianapolis, KTXL, Sacramento, and KSTW-TV, Seattle, all at 13.

The WNEW-TV numbers were impressive enough to make the Metromedia bosses smile. The country's top grossing indie was a runaway in Monday through Friday access with a 22. It was only two points behind the third ranking affiliate—WCBS-TV—in total broadcast day shares. It tied the CBS-owned station in Monday-through-Friday fringe at 16. The city's other major independents, WPIX and WOR-TV, were just two points down at 14 in that category.

In Los Angeles, KTTV matched KABC-TV in access with a 16 and outscored CBS-owned KNXT at 14. KNBC-TV took this time category at 18. WGN-TV, in Chicago, came out ahead of both the ABC and CBS affiliate from 6:30 p.m. to 7 p.m., Monday-Friday as NBC's WMAQ-TV won with a 25.

In Philadelphia, indie WTAF placed second behind the ABC affiliate, WPVU-TV, in access, 31 to 24. That period in San Francisco was taken by KPIX-TV with the Group W package "Evening Magazine," which drew a 29 share. Field's indie, WKBD-TV, won access in Detroit with 33, followed by NBC affiliate, WDIV, at 28.

Judging from the dayparts covered in this analysis and as measured by Arbitron, Pittsburgh is KDKA-TV's town. It led in all four columns. The Atlanta superstation, WTBS, placed fourth in its home market behind the three affiliates. Sign-on to sign-off leader by a comfortable margin was WSB-TV, the longtime NBC affiliate that is moving to ABC. Brought into town by Satcom I, WTBS also was fourth in Charleston-Huntington, W. Va., with a 3 total day share.

Distant station coverage provided an intriguing pattern in such New England markets as Hartford-New Haven and Providence. Between them, WNBC-TV, WNEW-TV and WCBS-TV, New York, had an 11 sign-on to sign-off share in the Hartford/New Haven market. In Providence, four Boston stations muscled in for almost a 25% share. KNBC, Los Angeles, drew a 3 in San Diego as the fifth station in that market.

Among the lowest scoring affiliates were: WVIT, Hartford, NBC; WRET-TV, Charlotte, NBC; WPTF-TV, Raleigh, NBC, and WBMG-TV, Birmingham, CBS. The station with the highest shares in all four categories was WBRC-TV, ABC, in Birmingham.

The crucial local sweeps measurements included in this analysis cover the mass population areas that will be getting the lion's share of national spot budgets that are expected to total $3.255 billion this year.

The latest measurements confirm several ongoing broadcast trends. First, each major network's popularity varies widely throughout the country. Second, network fare continues to dominate prime time viewing. In varying orders, the affiliates came out one, two, three in tv's highest-priced time period in all 50 markets.

And lastly, independents are solidly entrenched as competitors to be reckoned with; for example, they placed as the No. 1 station in audience shares in access time in New York, Detroit and Phoenix. #

Spitzer shop now Bates

Toronto-based Spitzer, Mills & Bates Ltd. of Canada, a wholly owned affiliate of Ted Bates & Co., New York, for the last 20 years, has changed its name to Ted Bates Advertising. The Canadian Bates operation currently bills $31,000,000.

MGM marketing same following film, hotel split

Marketing operations of Metro-Goldwyn-Mayer's film and casino/hotel properties, now separate companies after stockholders approved a split effective June 2, are expected to remain mostly unchanged, MGM execs said.

MGM Grand Hotels, Las Vegas, will maintain its in-house advertising via Grand/Ad, said William Bray, advertising director. Metro-Goldwyn-Mayer Film Co. will maintain "control over strategy" for advertising movies that are distributed exclusively by United Artists via Diener/Hauser/Bates, under a long-term agreement that expires in November, 1983, said Richard Kahn, senior vp-worldwide marketing.

These are the May sweeps household audience share averages for the area of dominant influence for the full telecast day, prime time, access and early fringe in the top 50 markets for April 30-May 27. The figures were compiled for ADVERTISING AGE from the Arbitron books by a veteran tv researcher. Markets are listed in total tv households rank order and station, in the order of their sign-on to sign-off ranking in each market.

In EDT and PDT areas, prime time is 8 p.m. to 11 p.m., seven days a week. Access time is Monday-Friday, 7:30 p.m. to 8 p.m., and early fringe is Monday-Friday, 4:30 p.m. to 7:30 p.m. In CDT and MDT zones, each is one hour earlier. The Arbitron book notes that some stations are on the air longer than others.

Initials in parentheses indicate network affiliation (ABC, NBC and CBS); stations without initials are indies.

These lists include local network affiliates and share runners-up in each market whether local indies or distant stations, affiliated or independent. Not all stations are listed. A blank under any column indicates not reported.

Draft to advertise

Public service ads being shipped this week

U.S. Olympic hockey coach Herb Brooks is one of three celebrities urging youths to register for the draft. Agency is Media Reactions, Reston, Va.

WASHINGTON—The 4,000,000 young American men targeted for draft registration this month get "straight talk" from the Selective Service System in a series of broadcast and print ads being rushed into distribution.

Singer Lou Rawls, U.S. Olympic hockey coach Herb Brooks and actor Ken Michaelman of CBS' "White Shadow" series serve as spokesmen in Selective Service System messages to be shipped this week to newspapers and tv and radio stations for public service use.

The copy message is the same that Carter administration officials have been emphasizing here in recent briefings: That there is no active military draft, that registration now is merely a safeguard against an unforeseen national emergency.

A print ad headline sets the tone: "Selective Service registration. Lou Rawls gives it to you straight."

The theme line used in most of the campaign, which will rely on donated public service time and space, is: "Not just because it's the law. But because it's the right thing to do."

Selective Service System public relations people have been working against tight deadlines, mainly because the actual dates for the registration drive—July 22 through Aug. 2—became official only recently. The last spot in the campaign, featuring Mr. Rawls and shot on stage in Atlantic City, N.J., was filmed less than two weeks ago.

Print ads and tv storyboards were still at the printers late last week, Selective Service officials said. They hope the media will begin using them July 14.

The campaign includes five 30-second and five 10-second spots for tv, plus print and radio ads. Selective Service System officials said the $200,000 assignment went to Media Reactions in the Washington suburb of Reston, Va. The shop's was one of three "unsolicited" proposals presented to Selective Service by companies interested in the project. #

Heat stalls energy-saving drive

DALLAS—Normally, the Dallas Power & Light would be on the air now with a campaign urging its customers to conserve energy, to keep thermostats up and air conditioners down.

But after a rash of sweltering days of 105-plus degrees, nothing is normal in Dallas—and the DP&L last week was encouraging its customers to run their air conditioners and to keep their homes cool.

- The reason is the blistering Dallas heat is a serious health hazard, and elderly people on fixed incomes are often sweating it out—and suffering strokes—rather than sinking their funds into utility bills.

To ease the pain of high energy bills, DP&L has come up with an installment plan, "which it had to get out quickly," noted Steve Solomon, vp-corporate secretary of KCBN, DP&L's agency. "We are saying 'Go ahead and use your air conditioner, don't worry about paying, and we'll do installments'." The programs are being handled on an individual basis for those hard pressed to pay.

At the major Dallas ad agencies, meanwhile, people were working full days and the agencies are open regular hours, if not more. "They're trying to keep us till 8 p.m. so we don't have to fight the heat going home," one agency worker said. #

'Reader's Digest' promotion draws $1.75 million fine

By RICHARD L. GORDON

WILMINGTON, DEL.—A federal judge here last week hit the Reader's Digest Assn. with a $1,750,000 fine, believed to be the biggest cash penalty ever to flow from a Federal Trade Commission deceptive advertising case.

Chief Judge James Latchum of the U.S. district court also made public normally closely guarded information about Reader's Digest Assn. sales, profits and assets. The privately owned association, which publishes the *Reader's Digest*, does not disclose such information.

The court fine penalizes RDA for violating a 1971 FTC consent order which barred the association from using simulated checks, currency or any other "confusingly simulated item of value" in its promotional mailings for the *Digest*.

The Justice Department, acting at FTC's request, filed federal court charges in 1975 (AA, July 21, '75), accusing RD of violating the order in 1973 and 1974 mailings that featured "Travel Checks" and "Cash Convertible Bonds." In 1978, Judge Latchum ruled that RD had violated the order (AA, Dec. 18, '78), but no fine was set until last week.

Reader's Digest Assn. immediately said it will appeal the judge's ruling.

The previously undisclosed RDA financial information was included in the opinion as part of the judge's justification for the size of the penalty. The judge said information RDA supplied showed that association had "mean gross revenues" from all sources exceeding $475,000,000 for the calendar years 1976, 1977 and 1978.

After-tax mean net profits for calendar years 1976, 1977 and 1978 exceeded $37,000,000, he wrote. Total RDA assets as of Dec. 31, 1978, amounted to "more than $325,000,000," and retained earnings exceeded $70,000,000, he disclosed.

"There seems little doubt that *Reader's Digest* is able to pay a substantial civil penalty," he wrote. "After all, *Reader's Digest* was willing to put more than $1,400,000 at risk on postage alone to distribute the violative material."

Government attorneys had pressed for the $1,750,000 fine as a "minimum," noting that *RD* had mailed nearly 14,000,000 Travel Checks and 4,000,000 Cash Convertible Bonds.

Reader's Digest Assn., in a statement, strongly disagreed with the judge's decision, noting that the judge himself said the FTC order at issue is "not a model of clarity." "The mailings, both discontinued over five years ago, were sent to many millions of Americans and, as the government agreed, not one person complained to either the FTC or the *Digest* that he or she had been misled or confused. The *Digest* believes that the decision and the civil penalty are entirely inappropriate and intends to appeal," RDA said.

RDA argued that government demands for the $1,750,000 fine were excessive because the company acted in good faith and stopped the Travel Check promotion when FTC warned that it appeared to violate the order.

But the judge wrote that *RD* waited two months after hearing

Citicorp's card may be 1st step to bank network

By JOSH LEVINE

NEW YORK—Citicorp is enlisting small, independent banks in a program that will produce a national consumer transaction card and lay the groundwork for a nationwide banking network after its INCA card appears in test market this September.

But while INCA binds its member banks together through reciprocal transactions at each others' automated teller machines, observers suspect that Citicorp is waiting for the day when banking regulations allow it to step forward as chief of the INCA tribe.

That ambition, long dreamed of in the corporate wigwam, remains as remote as Peru, and the program's initial goals should occupy Citicorp's marketing energies for some time. For a start, INCA will give small banks—most of the target customers have less than $100,000,000 in assets—an automated teller capability they could not previously afford.

- When enough banks start licensing the INCA data processing Citicorp is selling, the small local bank gains not only automation, but many of the benefits of another branch its depositors can tap by inserting one bank's INCA card in another bank's INCA teller.

And when INCA spreads from one state to another across the spectrum of 13,000 independent banks (those not owned by bank holding companies) Citicorp is addressing, the outline of a nationwide banking network starts to take shape.

INCA has a second identity, however. The card, originally only a key to a network of separate auto-

Levi Strauss plans first holiday gift campaign

SAN FRANCISCO—Levi Strauss & Co. is planning its first major push into the Christmas gift market with a $6,000,000 to $8,000,000 animated prime time tv campaign featuring a futuristic Santa coming out of a space ship laden with Levi's products. Drive via FCB/Honig starts Dec. 1.

ASR to debut Shower Shaver for women in Oct.

VERONA, VA.—American Safety Razor Co. will introduce nationally a new women's twin-blade disposable razor called Shower Shaver in October. The razor, which comes three to a pack, features push-button cleaning and is designed so that part of the package becomes a wall holder for the razor. Introductory spending is put at $3,000,000. The company declined to comment on the product. Warren, Muller, Dolobowsky, New York, handles.

MNI Video Net

3M unit will rep cable tv

By MAURINE CHRISTOPHER

NEW YORK—MNI Video Networks has entered the cable representation business with the nucleus of what it hopes will soon be at least 500,000 metropolitan New York-New Jersey catv subscribers packaged from various systems to sell as a group to advertisers (AA, June 23).

To the previously signed Manhattan Cable, with its 110,000 homes, the 3M Co.-owned unit has added UA-Columbia for about 100,000 subscribers in northern New Jersey and Westchester County and Long Island, N.Y.

- Talks are said to be going on currently with Teleprompter, which services uptown Manhattan; Viacom, for Suffolk County, and Charles Dolan for his Cablevision systems.

Dancers celebrate a successful audition with an A&W root beer in new campaign from the United Brands unit.

A&W is 'smooth & easy' this time

By NANCY GIGES

NEW YORK—A&W Beverages has scrapped the "A&W and you" campaign introduced last fall and adopted another theme, "Nothing's so smooth and easy as A&W."

The United Brands' subsidiary, marketer of the country's only national root beer and the No. 1 brand in that flavor segment, is said to have issued an ultimatum to its agency, Humphrey Browning MacDougall, Boston, after last fall's effort was viewed as an abysmal failure.

Officially, A&W director of marketing services, Paul St. Germain, said that the company wanted a more competitive campaign. He noted that the market has changed dramatically since last fall, and the company wanted its advertising to be more product-oriented.

Other sources say United Brands' management was so appalled at the earlier effort that A&W brought back its outdated "frosty mug taste" advertising until the new material is ready.

- Sources also say the last campaign failed primarily due to poor production. A&W chose to shoot the commercials in Spain for economy reasons, but the poor quality turned out not to be worth the money saved.

Earlier, there were reports that Humphrey Browning's reason for opening a New York office was to save the $10,000,000 A&W account. Mr. St. Germain said he has been very happy with the agency, and that account service was still based in Boston. It is his understanding that the agency opened an office here to obtain more business outside Boston, he said.

The new advertising aims to take advantage of a prevailing psychological climate that the most satisfying accomplishments are those that require extra effort. It positions A&W root beer as part of a deserved reward for a job well done.

One commercial shows the hard time two high school students have in meeting one another. A second shows the difficulty a teen ager and his younger brother have in flying a kite. A third could be the scene from Broadway's "A Chorus Line" as young dancers are selected to appear in a musical. In addition to tv, radio commercials carry the same music and theme.

At the agency, Doug Houston was the creative director and Mary

Few Americans at Cannes fete, few awards

CANNES—The mystery of the International Ad Film Festival, officially named Screen Advertising World Assn. (SAWA), in Cannes last week was why there were 155 American entries (up from 118 last year) and only 21 Americans to cheer them on.

But as the judging turned out, perhaps it was best. Less egg on the face, as they say, because the jury, after sitting through 42 mind-bending kilometers of film in 25 hours and 20 minutes of projection time, refused to hand out the Grand Prix award owing to the "appallingly low standard of entries."

"Worst year ever," said Barry Day of McCann & Co., London, chairman of the 18-person jury. "Technical excellence is no substitute for lack of originality," snapped another judge.

But for those Americans among the throng of 2,700 delegates—482 Italians, 432 British, 129 Finnish, 87 Japanese, 16 Yugoslavs and so on—there was something to cheer about. Of only 10 Lions d'Or awards distributed, all for tv, the U.S. garnered five: Ogilvy & Mather, two for Blitz-Weinhard beer and Henry Weinhard Private Reserve; McCann-Erickson for Coca-Cola; Rick Levine Productions for BBDO client Pepsi-Cola, and The Director's Studio for Doyle Dane Bernbach's Polaroid account.

Other winners were Whitaker Advertising in New Zealand for BASF cassette tapes, Boase Massimi Pollitt Univas, London, for Hellman's mayonnaise and Collett Dickenson Pearce for Barclaycard, Colman and Partners, U.K. for Citroen cars and The Campaign Palace in Australia for Purina Cat Chow. Palme d'Or's this year went to two U.K. shops: The Garrett Group for cinema and Brooks Fulford Cramer Seresin for tv (with runner-up Rick Levine Productions of the U.S.).

Not even the weather was accommodating. While the guests were savagely beaten by the Provencal wind called *mistral*, which bowled over beach umbrellas and cut temperatures to 60 degrees, the organizers and jurors took pot shots at one another. It even became public as SAWA president Jean Mineur accused Barry Day of severity. Some jurors were more kind in attributing the poor showing to low standards forced by the economic recession, but the large number of 60-second winners with lush location sets belies this excuse.

For the first time an opinion survey outside the festival screen hall showed Japan winning hands down as everyone's choice for the most creative work in the festival. This was a new development. Otherwise, the American films were described as "disappointing," the British films as "technically great but without imagination" and the French, "entertaining but insufficiently hard sell." And as with

Section 2

This week, the newspaper ad expenditures of selected national brands have been compiled in a tabular listing for the nation's 10 largest markets. Section 2 presents this data annually to give advertisers an easy market-by-market reference to how much the competition is spending. The figures start opposite Page 40.

NEWSPAPER AD EXPENDITURES—APRIL, '80 61

Vol. 51, No. 29—Advertising Age (ISSN-001-8899) is published weekly, except semiweekly the third week in March, the first week in September and the third week in December at 740 Rush St., Chicago, IL 60611. Second class postage paid at Chicago and additional mailing offices.

Postal rate jumps hit Red Tag

WASHINGTON—There were jolts for second and third class mailers in decisions by the U.S. Postal Service and the House post office committee last week.

Daily and weekly news publications were hit by a Postal Service decision to make its Red Tag expedited delivery service a new, higher-cost second class mail category. Publications that qualify now get Red Tag service for no extra cost over regular second class charges.

At the same time, the Postal Service board of governors cut rates for publishers who don't use Red Tag service.

In the House, saving Saturday mail deliveries was the prime objective of the post office committee. To do it, the committee last week fashioned a package of subsidy cuts that should leave Saturday deliveries intact next year while slashing $100,000,000 from subsidies earmarked for third class nonprofit mailers.

- The Red Tag decision, if it goes into effect, means postage rates for users of the service will increase

NEWSPAPER AD SPENDING

Brand expenditures for 1980

ADVERTISING AGE presents here a sampling of newspaper brand expenditures in 10 top markets determined by population ranking. The categories selected to give a general view of newspaper spending by major marketers include Alcoholic Beverages; Coffee; Soft Drinks; Ranges, Stoves & Dishwashers; Insurance—Life, Health & Medical; Cigarets; Transportation—Airlines, Domestic; Wearing Apparel; Gasoline & Oil Companies and Passenger Cars—New. Reporting of brand expenditures for individual markets is a concept originated by ADVERTISING AGE, which commissioned Media Records to develop the figures that appear in this special pull-out section.

PETER DAWSON SCOTCH
A MOST AFFORDABLE LEGEND
DAWSON

Peter Dawson Scotch. Like the Loch Ness monster, it's a Scottish legend that's revered, but often misunderstood.

And so, many have gotten the impression Peter Dawson is prohibitively priced. But we never equated outstanding quality with outlandish price.

So, don't be misled by legend.

Enjoy Peter Dawson for what it really is: the finest and most affordable Scotch Whisky you can buy. Still 86 Proof.

Schenley Distillers Co.: Shaller Rubin Associates, New York.

THAT COMES TO $3.7 BILLION, MA'AM...
WILL YOU TAKE A CHECK?
Dunagin

Shopping for shoppers? Check out Orlando, Florida.

Orlando shoppers ring up over $3.7 Billion in retail sales. And while these busy customers are filling up cash registers, 15,000 new residents add their buying clout every year.

Active Orlando shoppers turn to one medium as their primary source for news and shopping information – the Sentinel Star. Every week, 9 out of 10 Orlando area adults read a Sentinel Star.

Source: Sales and Marketing Management, Survey of Buying Power, 1979
University of Florida, Bureau of Economic and Business Research
7-day cume readership/Belden Continuing Market Study
Represented Nationally by C.W.O.&O.
Member Metropolitan Sunday Newspapers, Inc.

Extraordinary coverage that makes it your best Central Florida advertising buy.

For more information on the growing Orlando market and the medium that delivers it, call the Sentinel Star at (305) 420-5266.

BERGEN DOES MORE . . . BIG APPLE

BERGEN
NEW YORK

Bergen County adults:
- ● Attend more sporting events
- ● Engage in more sports
- ● Own more leisure cars
- ● Take more trips
- ● Use more credit cards
- ● Buy more appliances
- ● Eat in more fast-food restaurants
- ● Drink more wine or soft drinks
- ● Own more stocks or bonds

. . . than their New York SMSA counterparts.

If you want to reach Bergen County, advertise in The Record. It has more circulation in Bergen — daily or Sunday — than all the New York City and Newark newspapers combined!

For more information, call (201) 646-4214.

New Jersey's Largest Evening Newspaper

YOU COULD REST ON YOUR LAURELS

© 1958 United Feature Syndicate, Inc.

BUT THAT'S NOT HOW WE GOT WHERE WE ARE

Talking about daily circulation in Denver? Let's talk about the Rocky Mountain News FIRST.

The morning News now leads the afternoon Post in daily circulation by 10,822 copies according to the Audit Bureau of Circulations Publishers' statements for the six months ended March 31, 1980.

But the trend isn't new. It's been coming. In the 12 months ended September 30, 1979, the News led the Post by:

12,285 copies in the city zone.
3,521 in the 7-county Denver-Boulder SMSA.
4,316 in the 14-county Denver primary market area, and
3.629 in the 38-county Denver ADI.
811 in the state of Colorado.

Now the latest six-months report of ABC shows the even stronger overall daily circulation lead of 10,822.

And that's only part of the story. It's not only the weekday readers we have—but the kind of readers, as shown by the Belden CMS Denver study released in 1980.

"I read The Baltimore Sun to learn where the Mayor stands on the school bond issue ... and for the lemonade coupons."

The Baltimore Sun Means Business

The Baltimore Sun is read by more coupon users than any other Maryland newspaper. That's why we run 74% of all national Food advertising linage placed in the market's major daily newspapers. (And we run 90% of the national preprint inserts.)

Our Media and Marketing package has profiles of your customers in the Baltimore market. Call our Marketing Manager at (301) 332-6240 or CWO&O for your copy.

In Philadelphia, The Bulletin delivers the "at home" reader. And the "at home" reader delivers the sales.

The 1979 Belden Study of Shoppers Who Read Philadelphia Newspapers is providing "landmark" findings for advertisers searching for a quality audience.

It compares daily "at home" readers versus "out of home" readers.

With these results:

"At home" readers spend 26% more time with their newspapers.

"At home" readers are more involved with their newspapers — take specific action like clipping an ad or coupon. (84% versus 70%).

"At home" readers make more purchases. (79% versus 65%).

"At home" readers "shop the ads" more often. (46% versus 30%).

"At home" readers make more trips to advertiser stores. (73% versus 58%).

58% of all shoppers who read a Philadelphia newspaper at home read The Bulletin.

That's in the 8-County Metropolitan Area (SMSA) — where The Bulletin's circulation lead over the Inquirer is 108,820. And 90% of Bulletin readers read The Bulletin at home.

The Bulletin delivers the "at home" reader and the "at home" reader delivers the sales.

That's "House Power." And in Philadelphia, only The Bulletin has it.

"Keep on delivering shoppers, Bulletin. That's why you're Number One."

The Bulletin

Morning. Evening. Weekend. Sunday.

Nearly everybody reads The Bulletin

L.A. Poll
Who should be the Democratic presidential nominee? — See Page A-2
Los ANGELES HERALD EXAMINER
No charges in court probe
11-month inquiry into alleged delays of rulings by justices
Chrysler tries rebates again

The Los Angeles Herald Examiner took 5 out of 9 first place honors in the Los Angeles Press Club's 22nd annual awards competition.

The other major Los Angeles newspaper received one first place award.

These honors confirm what our readers already know. That the Herald Examiner is a newspaper for the 1980s. To the point. Alive. Personal. The kind that comes in first.

Los Angeles Press Club Awards:

Reaching Buffalo's ADI takes more than news.

Sports
Gusto

Seven-day-a-week coverage isn't enough for this area. Even for our paper. So we created Gusto, Sports Magazine and Sunday Magazine. With an Effective Buying Income of 11 billion dollars annually, 1.8 million consumers in Buffalo's ADI are interested in this area's leisure activities. They read Friday's Gusto for great food, great shows, great listening and great entertainment. Saturday's Sports Magazine involves them in the athletic world. The plays. The players. The teams, standings and schedules. Our Sunday Roto Magazine lets them know about colorful people, issues and the local history that surrounds them.

They are the kind of consumer you're after. And they have an avid interest in us. Our demographics prove it.

So put your media message in front of an active consumer where it will do the most good. Put it into the Buffalo Evening News.

For more information on us, call Hugh G. Monaghan at (716) 849-3422.

We deliver. 7 days a week.

Waldenbooks recommends:

FERDINAND LUNDBERG

... has written his monumental work in *Cracks in the Constitution.*

The author of such important best sellers as *The Rich and the Super-Rich, America's 60 Families* and *Modern Woman: The Lost Sex* has turned his attention to the powerful myths that surround our Constitution.

Says TRB in *The New Republic*, "A great, brawling, muckraking scold of a book. *Cracks in the Constitution* deals with some of our political problems and tries to show how we got into our current fix."

Says Albert Garber of the First Amendment Lawyers Association: "Everyone interested in our history and our future should read this book. Particularly those who want to know how the Constitution affects them personally. For Lundberg shows clearly and convincingly why the Constitution is not all that it's cracked up to be."

CRACKS IN THE CONSTITUTION by Ferdinand Lundberg

Waldenbooks

America's largest and fastest-growing booksellers.

Walden Book Co.: Altschiller, Reitsfeld, Jackson, Solin, New York.

Banks & trust companies	1980 1979	6,398,985	3,417,890	+2,981,095	+87.2

This Flash Report of newspaper advertiser investment, compiled for ADVERTISING AGE by Media Records, is derived from tabulations that cover 35 dailies and 25 Sunday editions in 15 cities—Atlanta, Baltimore, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, Miami, New York, Philadelphia, Pittsburgh, San Francisco and Washington. The report indicates marketplace strengths and weaknesses.

Bank and trust investments in newspaper ads up 87.2%

NEW YORK—Given the enormous lengths to which economy-plagued banks and trust companies went this spring to attract customers, it was not surprising that newspaper advertising in that category increased 87.2% in dollar spending during April, 1980, compared with April, 1979, according to the April Flash Report prepared for ADVERTISING AGE by Media Records.

However, the category was the only one of the 16 areas measured to show a substantial increase. The next highest jump was 10.3% for building materials and hardware. Nine of the categories showed decreases in April ad volume in the 15 cities whose newspapers are measured *(see chart above)*.

Department stores, newspapers' leading dollar category, declined 5.2%. According to dollar spending, it was followed in the top five rankings by furniture and furnishings, general merchandise stores, food stores and amusements. #

Chocolate Cow acquired

Iroquois Brands, Greenwich, Conn., has acquired Chocolate Cow chocolate drink products from Beverage House and Star Candle, two affiliated New York-based companies, for an undisclosed amount of cash. The brand will be marketed by Yoo-Hoo Chocolate Beverage, an Iroquois subsidiary.

MPA gains member

Modern Handcraft Inc., publisher of *Workbasket*, *Workbench* and *San Francisco*, has joined the Magazine Publishers Assn., bringing total membership to 177 companies representing 648 publications.

Caples adds radio

The John Caples Creative Contest, which awards creativity in direct response advertising, has established a separate radio-award category this year. Entry forms for all parts of the contest are available at John Caples Awards, 1211 Ave. of the Americas, N.Y. 10036.

Health publisher begins

James Tate IV has resigned as management supervisor at Lewis & Gilman, Philadelphia, to start his own health care publishing company, Nurses Direct Marketer. Address is P.O. Box 1004, Paoli, Pa. 19301.

WEBCRAFT prints the games people play.

Games work because they involve the consumer. And involvement helps sell product. We're here to tell you of a cheaper means of producing great games and sweepstakes. With our unique web presses, we accomplish in-line what other printers have to take off press and ship to other departments or even outside sub-contractors. It stands to reason, the fewer steps involved the less money you'll have to pay.

So, when you want to create an involvement device utilizing die-cut, tabbed windows, wash off inks, invisible inks that react to moisture, inks that change color or on-press gumming and perforating, call or write Jack Cooper for our sample game kit.

This is an ad for the hair dryer.
The Go Dryer from GE.
We bring good things to life.
GENERAL ELECTRIC

Gee! No, GE's new hair dryers

General Electric takes a page from cosmetics and fragrance marketers in giving new ads for its Go Dryer the gauzy, unfocused look of high fashion. The campaign, to begin next fall, will run in 15 shelter and fashion magazines. BBDO is the agency. (*See story on Page 4.*)

DC-10 worldwide effort selling safety or planes?

By JOSH LEVINE

NEW YORK—The deployment of a worldwide corporate ad campaign for the McDonnell Douglas DC-10, when memories of the plane's painful history are fast receding, has left observers wondering whether the international audience is expected to fly the plane or buy it.

To go by current speculation, the latter is at least as important as the former, though a selling effort behind a DC-10 and future MD offerings would hardly require the multi-million-dollar scope McDonnell Douglas envisions.

Airlines that utilize the DC-10 report little vestige of the passenger skittishness that surfaced last summer when an American Airlines DC-10 lost an engine over Chicago and crashed, claiming 273 lives.

Sales of the plane could be healthier, but the clouded economic climate has rained on the industry, not just McDonnell Douglas.

"The only thing this campaign is going to do is recall that tragic incident in the passenger's mind," said one airline industry analyst. "It's an enigma why the campaign should emerge now, when the Chicago crash is a distant, faded memory."

According to an analyst at A.G. Edwards, a St. Louis securities firm, McDonnell Douglas' DC-10 backlog (the difference between orders and deliveries) has dwindled from 112 at the end of the second quarter of 1979 to 77 at the end of the first quarter of 1980. That indicates to the firm that deliveries on past orders are outpacing new orders for the $50,000,000 plane.

McDonnell Douglas' first-quarter report for 1980 listed sales and orders of 387 planes. The goal of 400 planes is widely circulated as a break-even figure.

In addition to new planes, how-

A-B forging Europe links for its brews

By ELSPETH DURIE and JACQUES NEHER

LONDON—Anheuser-Busch, making good on its stated objective to expand beyond U.S. borders, has gotten its foot in the door in Canada and now is making a variety of moves in Europe, which could bring Budweiser and Michelob to the Old World in the near future.

- The St. Louis-based brewer, which signed a deal with Labatt Brewing Co. last month to brew Budweiser and import Michelob in Canada (AA, June 23), recently completed a preliminary survey of the Swiss beer market, through D'Arcy-MacManus & Masius in Zurich, a branch of A-B's U.S. agency. In addition, the world's largest brewer currently is negotiating with Oetker Breweries in West Germany and Societe Europeenne des Brasseries in France, a sister to the company which brews Kronenbourg.

Ironically, A-B reached its first foreign distribution agreement in the United Kingdom last year with Allied Breweries, which was to have helped the company spearhead its European invasion. But that effort has been stymied by legal difficulties over the Budweiser trademark.

- When the Czechoslovakian Budweiser Budvar Brewery got wind of Allied's intentions to import A-B's Budweiser into the U.K., it sued to prevent usurpation of its trademark in Britain (AA, Oct. 8). A-B originally acquired rights 69 years ago from Budweiser Budvar

McNeil Labs gives new cold remedy to Y&R

FT. WASHINGTON, PA.—Johnson & Johnson's McNeil Laboratories has quietly assigned a new cold remedy to Young & Rubicam. Slated to go into test in October, the undisclosed brand is expected to compete with Bristol-Myers' successful Comtrex cold tablets and capsules, introduced last year with a budget of more than $12,000,000.

Bic Roller pen set for debut via tv blitz

MILFORD, CONN.—Bic Pen Corp. this week is expected to introduce Bic Roller pen, supported by a multi-million-dollar tv campaign via WRG, New York. The rolling ball unit, said to be similar to Gillette's Quicksilver, is touted in tv spots in Canadian markets as "the first pen that writes so smooth it lets you go with the flow."

Ex-president Marquis sues Hoefer shop

Ford world car taking multiple routes

By RALPH GRAY

DEARBORN, MICH.—Ford's best marketing vehicle for its Escort world car has to be big enough to hold a number of approaches.

The car—set for fall introduction—is basically the same from nation to nation, but the buyers aren't. Ford also has different marketing problems in North America from those in Europe. And in the U.S., Ford has two Escorts—one the Mercury Lynx—and they will be handled differently.

Both Escort and Lynx are more than bright, shiny new cars to Ford Motor Co., said Ben E. Bidwell, vp-car and truck group, North American Automotive Operations.

"You could make a case that in its own way, Escort-Lynx is almost as important to Ford as the K-car is to Chrysler Corp.," Mr. Bidwell said.

"This isn't like Mustang—breaking sales records. It's bigger than that. This is proof and evidence that Ford is in the 20th Century and is fully competitive with, and, we believe on total, ahead of its competition's technology," he said.

- A corporate campaign breaking Aug. 3 is designed "to sell Ford as opposed to a car. I think Ford needs to be sold," Mr. Bidwell added. "We've lost some market share [in the U.S.] and have been losing some money. We've gone through a lot of publicity [Pinto, transmissions]."

Ford's overseas marketing strategy for the world car is not only different but perhaps a little easier. "Escort is well-known and a fairly cherished name over there" in Europe, said John E. Peters, vice-chairman of J. Walter Thompson USA, who is coordinating things.

"Its position is completely different," Mr. Peters explained. "Escort [both new and old models] actually is a fairly big car in some European markets."

Europeans aren't especially impressed by the fact that Escort is a world car, either, he said. "It's not as important." The U.S. Escort-Lynx will lean heavily on world car engineering—also an effort to help Ford's corporate image. In Europe, its engineering expertise is to be spotlighted. "The engineering flow is likely to come from Germany as any other country in Europe," Mr. Peters said.

- "It's a different orientation," he added. "Ford has a leadership position in some markets. We had a very good small car introduction with the Fiesta."

The emphasis in Europe won't be on fuel economy—that's almost taken for granted. "We're developing our final advertising approach [ads and introduction there in September], and we have to stress that Escort is totally new," Mr. Peters said. "We have to tell the front-wheel-drive story along with ride and comfort. There will be heavy

Silverman's renewal seen as Pfeiffer axed

By COLBY COATES

New York—Sometime within the next few days, RCA Corp. is expected to renew NBC president Fred Silverman's contract for a "standard" three years. Sources describe the renegotiation as "quid pro quo" for last week's ouster of NBC chairman Jane Cahill Pfeiffer.

Talks about renewing Mr. Silverman's contract began last fall. During those negotiations, RCA chairman Edgar Griffiths, the man who had to sell Mr. Silverman on the idea of hiring Mrs. Pfeiffer, "made a run at her," sources said. At that point apparently, Mrs. Pfeiffer had so alienated herself from NBC and parent RCA management that her only supporter was Mr. Silverman.

- With Mrs. Pfeiffer's resignation secured, speculation is mounting as to her successor. NBC vice-chairman Richard Salant has been ruled out on the grounds that he is a Pfeiffer ally. NBC Television president Irwin Segelstein is by most accounts the logical successor, since his administrative background in broadcasting is as broad based as anyone around.

Yet sources see RCA as reluctant to go within NBC, though it's said that if the post is filled (and knowledgeable sources see that as a big if), the prime prerequisite will be to find someone with a broadcast background. One candidate high on a number of observers' lists is Post-Newsweek Stations president Joel Chaseman.

Another is the recently deposed president of CBS, John Backe. Sources at NBC have confirmed that Mr. Backe's name has been mentioned, though it's unclear how he would be brought on board and whether he would report to Mr. Silverman. Moreover, his contract with CBS may prevent him from working for another broadcast operation for a period of time.

A spokesman for CBS, after first indicating Mr. Backe probably could take a job with NBC, later retracted that, refusing to discuss just what the contract does allow. "The only way we'll know if he can take the job is if he takes it," CBS said.

- Those familiar with the Pfeiffer contretemps said the NBC chairman was only on the job three months before RCA execs openly labeled her "a disaster." Even though the NBC chairman "had very little to do with NBC's success or failure," her "paranoia" and inability to prove "she would ever be able to learn anything about broadcasting" set RCA management against her.

Sources described Mrs. Pfeiffer as "the outsider critic," and talked of how "she never showed an inclination to get into the organization." But while most other execs were disenchanted, Mr. Silverman was "giving her great latitude" as the two forged an "us and them" alliance.

That alliance was doomed, however, as RCA execs tallied a list of all that they found wrong with Mrs. Pfeiffer. Among her alleged faults: She mishandled the unit managers scandal; took too many trips with her husband, a high ranking IBM exec, and failed to exhibit managerial skill.

"RCA's mistake was not looking more carefully at her role at IBM," said one exec. "Yes, she had enormous power there, but it was generally in nonmanagement roles. In reality, she was a gatekeeper to the IBM executive committee. To see them you had to see Jane, but it was all on a one-on-one level."

Although RCA backed off on its attempt to dump Mrs. Pfeiffer last

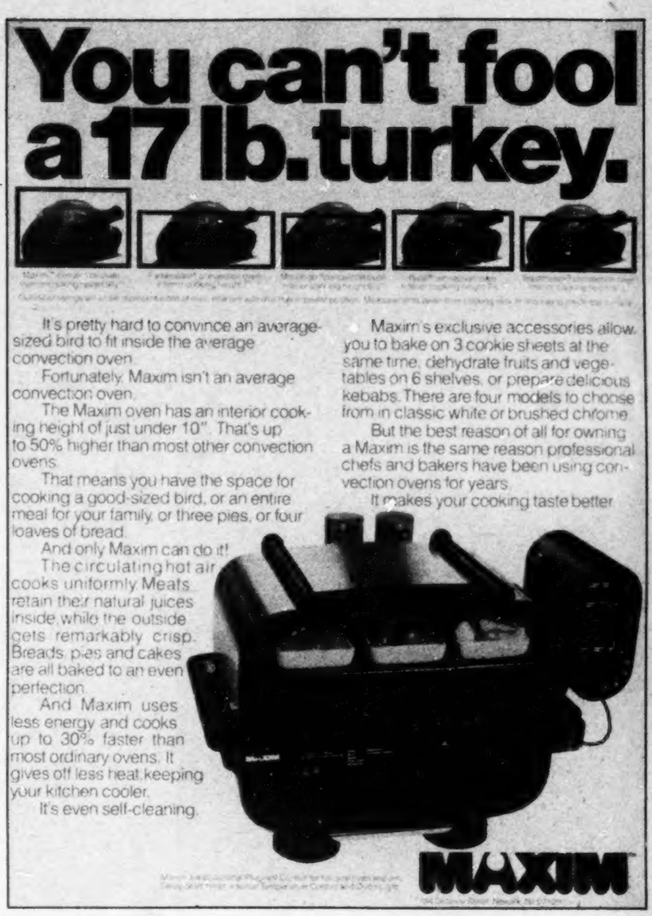
Turkey meets its Maxim

Only the Maxim convection oven can cook an average-size bird, ad by David Deutsch Associates, New York, notes. Illustration shows how a 17-lb. turkey fits into a Maxim oven (right), on Farberware, Moulin-air, Rival and Toastmaster ovens. Ad begins in August issues of *Better Homes & Gardens, Bon Appetit, Cuisine, Gourmet, Prime Time, Southern Living, Sunset, Weight Watchers.*



You can't fool a 17 lb. turkey.

It's pretty hard to convince an average-sized bird to fit inside the average convection oven.

Fortunately, Maxim isn't an average convection oven.

The Maxim oven has an interior cooking height of just under 10". That's up to 50% higher than most other convection ovens.

That means you have the space for cooking a good-sized bird, or an entire meal for your family, or three pies, or four loaves of bread.

And only Maxim can do it!

The circulating hot air cooks uniformly. Meats retain their natural juices inside, while the outside gets remarkably crisp. Breads, pies and cakes are all baked to an even perfection.

And Maxim uses less energy and cooks up to 30% faster than most ordinary ovens. It gives off less heat, keeping your kitchen cooler.

It's even self-cleaning.

Maxim's exclusive accessories allow you to bake on 3 cookie sheets at the same time, dehydrate fruits and vegetables on 6 shelves, or prepare delicious kebabs. There are four models to choose from in classic white or brushed chrome.

But the best reason of all for owning a Maxim is the same reason professional chefs and bakers have been using convection ovens for years.

It makes your cooking taste better.

MAXIM

'Parade' to offer localized versions

By LEAH ROZEN

New York—*Parade* magazine president Carlo Vittorini has seen the future and he says it is in Chicago—more specifically, a "pilot project" with the *Chicago Sun-Times* that will allow *Parade* to expand its national format to include local pages.

This happens for the first time Sept. 14, when the *Sun-Times* will drop its own Sunday rotogravure magazine, *ChicagoStyle*, and replace it with an issue of *Parade* that carries the regular *Parade* stories and ads, plus *Sun-Times*-provided editorial and ad copy.

Mr. Vittorini sees the *Sun-Times-Parade* project as one of the keys to *Parade's* growth in coming years. Parade Publications is discussing the national-local *Parade* format with several other unnamed papers and hopes to have a "handful" of them participating in the project within the next three or four months. If these papers do well, *Parade* will offer the option to its subscribing papers and new customers next spring.

"For any market with a circulation of a quarter-million or more, we can actually create an edition that is personal to that market," Mr. Vittorini said.

Not that *Parade* isn't doing well now, Mr. Vittorini and publisher Warren J. Reynolds hastened to add in an interview last week. The weekly newspaper supplement just celebrated its 39th birthday. If anyone had tried to put a candle on the cake for every newspaper distributing *Parade*, it would have taken 130. Total circulation is about 22,000,000.

Here's how the national-local *Parade* will work: The cooperating newspaper's advertising sales staff sells local retailers and other advertisers on using *Parade*, while *Parade's* own advertising staff is selling to national advertisers.

Then, 44 days prior to issue date, the newspaper tells *Parade* how many local ad pages it will provide to the magazine. Within 30 days of the issue date, local ad copy is

Judge will end Yellow Pages case

By JENNIFER PENDLETON and JACQUES NEHER

Los Angeles—U.S. district court Judge Francis Whelan has announced his intention to grant motions for dismissal of the long-smouldering lawsuit by the defunct Selten Agency, claiming phone company conspiracy to drive it out of business.

It is not yet clear, however, how far reaching the judge's upcoming action will be and whether it will amount to a major turning point in the case which is one of several that raise the question of whether the National Yellow Pages Service Assn. and its members illegally monopolize Yellow Pages ad sales.

A supporting opinion concerning Selten vs. Pacific Telephone & Telegraph and others has not yet been filed in federal district court, but the judge's intention to grant a directed verdict has been revealed to the parties in the case.

A jury earlier this year was unable to reach a verdict in Selten's antitrust case after almost 10 weeks of testimony, and Judge Whelan declared it a mistrial (AA,

(Continued on Page 84)

Estimates of '79 advertising to sales and advertising to gross profit margin by industry

A fourth annual study of advertising and promotion expenditures of U.S. corporations and industry has been completed by Schonfeld & Associates, Inc., a Chicago-based consulting company.

The study forecasts advertising and promotion expenditures of more than 2,500 individual companies in 179 industry sectors. Ratios of A&P to net sales and A&P to gross margin (sales minus cost of goods sold) are also calculated.

The accompanying table from the study contains average 1979 industry ratios which are commonly used for ad budgeting. However, Schonfeld & Associates cautions that within many of the industry sectors, individual companies may spend siginificantly more or less than the average shown.

The raw data for the study were compiled from 10-K Reports filed by publicly owned companies with the Securities & Exchange Commission. Therefore, advertising and promotion expenditures include media and nonmedia spending such as collateral literature, production, etc. For this reason, SAI figures are often substantially larger than figures from media auditing services.

While data for the study were compiled from published financial statements rather than surveys, cautious interpretation is required for several reasons. First, companies may vary in what they include under advertising and promotion expenditures. Second, many large companies are in several fields, yet are listed in only their primary industry sector. Distortion may result because a large subsidiary may not be included in the industry in which it competes. Third, a few large companies are privately held and their figures are not included.

The basic methodology of the Schonfeld study was to fit a six-year nonlinear time trend to each company's advertising expenditures for 1974 through 1979, and transformation of fiscal year data to calendar year data. Besides ratios, the study forecasts 1980 and 1981 expenditures for each company, including their growth rates, a measure of A&P spending stability, and SAI's rating of A&P effectiveness.

A copy of the 420 page study is available for $250 from Schonfeld & Associates.

Rubinstein owners map one-year turnaround

By PAT SLOAN

NEW YORK—Alvin Burack and his partner William Weiss have given themselves approximately one year to return Helena Rubinstein, the former Colgate-Palmolive subsidiary, to the break-even point from an approximate $22,000,000 pre-tax loss in 1979.

No one knows better that the clock is ticking than Mr. Burack. Faced with payments to Colgate and responsibility for domestic debt within the year *(see box on Page 88)*, Mr. Burack, in an effort to save over $3,000,000, has just done away with 100 jobs in the domestic division of Rubinstein.

Mr. Burack, president-chief operating officer at Rubinstein, and Mr. Weiss, secretary-treasurer, also have started reviewing several other domestic areas where it is thought better cost efficiencies can be achieved.

- As previously announced, a creative agency review is being conducted following the dismissal of Kenyon & Eckhardt (AA, July 14). Additionally, media may be assigned to a media buying specialist. Thus far, Mr. Burack has talked with several media companies, including David Geller & Associates.
- Leo Yarfitz, former corporate officer and vp-commercial services division, Crocker National Bank, will join Rubinstein next month as chief financial officer.
- The status of Rubinstein's East Hill, N.Y., plant also is being studied to see if the facility should remain open, be closed or partially leased out. According to industry sources, the 300,000-sq.-ft. plant has nearly twice the space required by Rubinstein. And the plant's hourly wage rates, although competitive for the area, are much higher than those paid nationwide by the industry.

Mr. Burack has stated that no further personnel cuts are planned and that Fred Purches, vp-Europe, will remain. As for Stan Kohlenberg, who recently departed as vp-U.S. operations to start his own consulting company, sources said his exit stemmed from the fact that he originally had joined Rubinstein as a consultant for William Catacosinos, who also was bidding on Rubinstein. Colgate, anxious for a deal, had strung the Catacosinos offer along to the bitter end as a backup.

Mr. Burack termed totally untrue the rumor that he intends to consolidate department and chain drugstore sales forces. At the same time, he reiterated his intent to

Dailey spells out Reagan fight plan

By JACQUES NEHER

DETROIT—Ronald Reagan's top adman is banking on victory in November with a double-barreled ad campaign that spells out the "urgency" in retiring Jimmy Carter from the presidency, while telling the "untold story" of Mr. Reagan's tenure as governor of California.

And while the politics of the post-Labor Day blitz will hold to the conservative line, Campaign '80 chairman Peter Dailey plans a liberal—if not radical—media strategy that will employ national cable tv for the first time in the history of political advertising.

While party leaders spent the week crooning about the "disasters" of the Carter administration before a national tv audience, 1,994 delegates and 8,000 frenzied reporters, Mr. Dailey was "going bananas" behind the scenes at the Oz-like Renaissance Center, putting the final touches to the makeshift agency that will attempt this fall to sell American voters on Mr. Reagan and his running mate, George Bush.

"We've got two stories to tell," said the head of Dailey & Associates, Los Angeles. One of those stories, he said, will "convey a sense of urgency in getting Carter out," a theme well established in the convention by the myriad speakers who warned of certain catastrophe for the nation if Mr. Carter is allowed another term.

Mr. Dailey would not offer any specifics as to how loud the gloom and doom alarm would sound, but one longtime Reagan watcher pre-

Golden touchup

Loews Corp.'s Lorillard division, New York, has revamped advertising for its Golden Lights brand to emphasize flavor and taste with the theme, "You really know you're smoking." The new campaign, running nationally in newspapers and beginning in consumer publications next month, replaces Lorillard's comparative ad strategy. Foote, Cone & Belding handles.

Hampel to head WRG/Chicago

By JENNIFER ALTER

CHICAGO—Ending months of personal and industry speculation, Benton & Bowles' former creative chief Al Hampel has teamed up with Mary Wells Lawrence and set his sights on Chicago, where he has been charged with establishing a major presence for Wells, Rich, Greene.

Mr. Hampel, who left B&B—as exec vp-director of creative services worldwide—over "management differences" last fall (AA, Nov. 5), will join WRG/Chicago as president Sept. 2. Mr. Hampel said he will spend a number of months operating out of New York, familiarizing himself with the agency and laying the groundwork for parlaying WRG's 23-person Midas Muffler service office into a strong Chicago institution.

Wells, Rich, Greene originally made clear its intentions to move into this market when it sent senior vp-managing director Larry Singer here last February. Mr. Singer, who has now been elevated to exec vp, has developed full media and account departments for the Midas business, though creative has remained in New York.

Mr. Hampel's decision to take the job has expedited the agency's plans for mobilization in Chicago. "It's something that would have happened eventually, but we really felt there was an opportunity with Al to make something great," WRG vice-chairman Charles Moss said.

It is expected that the Midas creative work and some business from other Midwest clients, such as Miles Laboratories and Procter & Gamble, could eventually be handled in Chicago. However, Mr. Moss said, that subject is currently only a source of speculation and would depend entirely on client approval.

Specific plans for the office have not and will not be formulated for some time. Mr. Hampel said he will not solicit new business until the office is fully functional, and that at that time he will focus on midwestern companies. Staff size, office location and a timetable of events are all yet to be determined, though six months was mentioned by Mr. Moss as a reasonable estimate.

Wells, Rich, Greene is running somewhat behind other New York agencies which have recently begun to build their Chicago operations.

Young & Rubicam, which officially opened here in June, 1979, has doubled its staff to 80, spruced up its ranks with several major ad-

Syndie update

What's hot where? Nielsen ratings showing which syndicated tv programs are doing well in each of the top 25 markets are analyzed starting on Page 3. "M*A*S*H," the "Muppet Show" and "Family Feud" looked strong in these May sweeps as did "PM Magazine" and "Donahue." An analysis of markets 26 to 50 will run next week.

last minute news

L&M drops JWT, NCK, Della Femina

DURHAM, N.C.—Liggett & Myers Tobacco Co., its market-share continuing to decline, has ended its relationship with J. Walter Thompson Co., Della Femina, Travisano & Partners and Norman, Craig & Kummel, its major agencies, a source confirmed. The marketer of Lark, Chesterfield, Eve, L&M and Decade has been cutting ad spending over the last year. Liggett continues to use Promotion Development Corp., Westport, Conn., for limited promotional efforts. Ad spending in 1979 for all brands was about $10,000,000.

Premiere cable net talking to six agencies

LOS ANGELES—Premiere, the new pay cable network from Getty Oil and four major movie studios, is in talks with D'Arcy, DDB, Evans/-Wienberg, Needham, JWT and C&W for its estimated $4,000,000 account (AA, June 23). Premiere ceo Burt Harris said he's looking at agencies of all sizes with strong creative in Los Angeles for the heavy print and possible on-air promotion assignment, expected to be made in 30 days. A trade campaign to net cable operators as affiliates will precede the consumer ad push.

'News' goal to out-New York its competition

ROBERT HUNT

HENRY WÜRZER

By LEAH ROZEN

NEW YORK—The *New York Daily News'* top 11 executives get together every Tuesday at lunchtime and dish the dirt. It was over such Tuesday lunches and many other meetings during the past nine months that the new *Daily News*, set to appear sometime this fall, was cooked up.

Four of the proud chefs, president-publisher Robert Hunt; exec vp-director of sales Henry (Buzz) Wurzer; exec vp-general manager Joe Barletta, and exec vp-editor Michael O'Neill, sat in Mr. Hunt's large office last week and discussed the paper's fresh strategy for attracting more readers and advertisers.

Mr. Hunt and his fellow executives said the paper has decided to concentrate on the New York market, out-New Yorking the other papers, if you will.

"The role of this paper in this market is to serve the city of New York," said Mr. Hunt. "We're heading in a direction we think is correct. We're going to be a very competitive force in this town," he warned.

Photos by Andrew Popper.

- Essentially, the *News'* new competitive strategy is designed to do what every newspaper wants to do: Attract more readers who will buy the paper daily and more advertisers (especially from Bloomingdales, Sak's Fifth Avenue, Lord & Taylor and the rest of that toney crowd to whom the *News* previously has never held much appeal).

When the *News* appears on the newsstands this fall, it will feature a more contemporary graphics look, five new life style sections, a daily Manhattan section and an afternoon edition. These changes involve an investment of $15,000,000 to $20,000,000 over the next 18 months, hiring 200 to 400 new employes and the reputations and careers of the executives involved in its creation.

Mr. Hunt stressed that the $15,000,000 to $20,000,000 was all coming from the *News'* earnings, not from the privately-owned parent Tribune Co. "The *News* is performing currently at a level that makes all of us very proud," he said, dismissing rumors that the paper suffers from low profitability. "The *News* is making money."

At the same time, he shot down rumors that the *News* is now or ever was for sale. "Never! The *Daily News* is not in trouble. It was never on the block," he said. At this point, Mr. Barletta interjected that prior to Mr. Hunt's arrival in New York last June from the Chicago headquarters of the Tribune Co., a major conglomerate had approached him with "feelers" about buying the *News* "that were so out of left field that nobody even wanted to respond."

With the question of the *News'* financial health out of the way, Mr. Hunt went on to acknowledge and discuss the paper's circulation woes. "That's a problem," he said. "You're damn right it bothers me."

The paper has been losing circulation steadily for most of the past decade, and is now down to 1,554,604 daily and 2,202,610 on Sundays. These numbers still make it the largest selling paper in the city (the rival *New York Times* has 914,938 daily and 1,477,499 Sundays, and the *New York Post* has 654,314 daily), but are an embarrassingly shrunken base compared with the 2,000,000-plus daily circulation of the *News* in the 1960s and early '70s.

- The *News'* executives took a hard look at these figures and had market researcher Ruth Clark of Yankelovich, Skelly & White do some studies. According to Mr. Hunt and Mr. Wurzer, the declines are deceptive. Here's why: "The

Will Renault USA wed Intermarco N.Y.?

By JOHN J. O'CONNOR
and CAROLYN PFAFF

NEW YORK—Would Intermarco Advertising, a new agency formed by ex-Marsteller Inc. president Ramon G. Gaulke and Intermarco-Farner, like to have the $7,000,000 Renault car account in the U.S.? The answer is a resounding oui, oui, oui.

But Mr. Gaulke, whose former agency now has the French car account, insists that Intermarco Advertising was not set up here with that goal chiefly in mind.

- "This is not a political game," chimed in Gerard Pedraglio, executive vice-chairman of Intermarco-Farner, the international agency network owned by the French-based Publicis group that handles Renault in 11 European countries.

Those comments were reaffirmed in an interview in Paris with Publicis' founding father, Marcel Bleustein-Blanche, who told ADVERTISING AGE, "I want to emphasize we are not out to steal away clients. In 50 years of advertising I have never had that reputation and I will not start now. We are going to New York very softly *sur les pattes de velours* [on velvet paws]."

Mr. Pedraglio made it clear that any approach to American Motors (Renault's U.S. distributor since 1978) or Renault USA would be made on the basis that Intermarco Advertising "has something to offer."

That something, Mr. Gaulke noted, is the wealth of experience Intermarco-Farner has gained in representing Renault and its demonstrated ability to develop advertising concepts that are international in scope. And now that Intermarco has arrived, Mr. Pedraglio said efforts will be made to meet execs at both American Motors and Renault USA for the first time.

- Those American execs won't be the only ones with whom Intermarco plans to discuss business. According to Mr. Bleustein-Blanche: "We have some 12 clients who may be interested in making the move with us. At the moment we have spoken to them, but you cannot sell an agency which has not yet proved itself."

The obvious clients outside Renault would be L'Oreal (a recent convert), Air France and Boursin cheese. Intermarco-Farner, which last year billed $478,817,600 from its 15-agency network, holds down N.V. Philips, Nestle and, of course, Renault.

Mr. Gaulke, a young-looking 46, indeed envisions Intermarco Advertising—in which he has a 50% interest and the title of president—tapping those overseas creative resources and adapting them to the American market. Interestingly enough, that adapting may very well be what Marsteller plans to do in Mr. Gaulke's absence. The Y&R subsidiary has named Louis A. Magnani, formerly in charge of Marsteller's European operations in Brussels, to succeed Mr. Gaulke. Mr. Magnani more recently has been vp-general manager of Marsteller in New York.

"I am giving Ramon Gaulke carte blanche," says Mr. Bleustein-Blanche. "If we fail, then we will close the door and nothing will be lost. If it costs us $1,000,000 or $3,000,000, that is of no importance. What counts is that Intermarco has an American base. Big French companies are going abroad in a way they never did before. We cannot serve them nor claim to be an international network without a New York base."

- The reason why Publicis/Intermarco-Farner opted not to buy into an existing agency was an analysis of the disastrous takeover of Kelly, Nason by the rival French group, Univas. Buying an agency doesn't mean that the clients will stay on afterwards, Mr. Bleustein-

Vol. 51, No. 31—Advertising Age (ISSN-001-8899) is published weekly, except semiweekly the third week in March, the third week in September and the third week in December at 740 N. Rush St., Chicago, IL 60611. Second class postage paid at Chicago and additional mailing addresses.

Purina sets $25 million for Hero

ST. LOUIS—Ralston Purina Co. says it will spend more than $25,000,000 in advertising and promotion for the national launch of Hero dry dog food, due to hit shelves next month, with much of that support in media.

The network and spot tv schedule begins the third week of September, with color page ads first appearing in October women's magazines. Newspaper ads (in supplements and inserts) and other couponing will be used.

- The rollout of Hero, testing since late last year, was recently reported as imminent by industry sources (AA, June 9). It follows by just weeks the introduction of Purina's Homestyle Blend, which rounded out the company's three-item Blend dry line, and by just months the launch of Mainstay dry (also budgeted at about $25,000,000).

"They [RP] told us last fall we'd get a new product every two months," a top chain merchan-

Variety spices top 25 syndie market sweeps

By MAURINE CHRISTOPHER

NEW YORK—A mixture of offnet sitcoms, magazine shows, games, music and Muppets took the homes rating honors in syndication in the largest population centers as measured in the Nielsen May sweeps.

When ranked in top tens in the 25 top markets, the local picture that emerged varied across the country, with a range of suppliers represented on the lists. However, such old favorites as "M*A*S*H," the "Muppet Show" and "Family Feud" muscled into most of the winning circles.

The lists covering May 1 to 28 tune-in were put together for ADVERTISING AGE by a broadcast researcher to dramatize the competitive patterns locally and to see how specific shows and distributors are faring in the markets where their products demand the highest rights fees and where advertisers pay the biggest prices to buy into syndie shows. Markets 26 to 50 will be covered later.

This analysis took a strictly arithmetic approach to the local battles being waged in order to reach peak audiences of the sort needed to entice sponsors. At stake for telecasters in such compilations: To get more of the $3.255 billion spot dollars that are expected to flow into tv this year.

The Nielsen and Arbitron syndication reports now are being studied in detail by reps, telecasters and agency execs. They evaluate the ratings in line with the local factors involved—competition, time periods, lead-ins and geographical differences in life styles.

AD AGE's top tens again spotlighted the strength of 20th Century-Fox' "M*A*S*H," which continues to look like one of the biggest station bargains ever in light of what telecasters reportedly paid for it and the mileage they are getting out the long-running hit.

Complete list of the top Nielsen-rated syndicated fare in the 25 largest markets appears on Pages 60 and 62.

The wartime comedy, which played repeats locally while continuing as a popular first-run show on CBS-TV placed in the first ten for designated market area household ratings averages in every market except Sacramento and Atlanta. It did not run in syndication in the latter city and was close to the leaders in the former.

"M*A*S*H" emerged as a sturdy workhorse with the stamina to take stripping twice a day without weakening in the Nielsens. It played twice Monday through Friday and placed twice in the top ten in Philadelphia, Boston, Dallas, Minneapolis and St. Louis. In Denver, KBTV ran Hot Lips and her associates twice on weekdays and carried them Saturday afternoon as well. All three made the top ten.

This record is particularly notable in view of the relatively modest per-episode prices stations are believed to have paid for this Fox title. These range from $4,500 in Washington and Detroit to $9,500 in Chicago and $13,000 in New York. By contrast, Washington is said to have handed out $18,500 for "All in the Family" and New York, $54,500 for "Laverne & Shirley."

Station prices for "M*A*S*H" are in striking contrast to the figures now being bandied about in the trade as the "Muppet Show," another standout in this 25-city analysis, goes into strip syndication reruns after several years as a series.

ITC Entertainment opened the market in New York where WCBS-

(Continued on Page 59)

The Muppets welcome Loretta Swit to their show. The ITC-distributed weekly comedy was a standout in the May sweeps home ratings, placing in the top ten Nielsens in 22 of the top 25 markets. The show is already on sale to stations for Monday-through-Friday scheduling starting in the fall of 1981.

Dollars flow for Bic Roller effort

On the ball

Bic Pen Corp. will use this 30-second spot for its new Bic Roller pen in a national campaign to begin January, 1981. Promotional efforts will begin in September.

By SAM HARPER

NEW YORK—On the strength of its upcoming advertising effort, Bic Pen Corp. not only plans to gain a dominant share of the burgeoning rolling ball pen segment but also will try to muscle consumers out of the porous pen market where archrival Gillette Co. dominates.

The Milford, Conn.-based marketer of shavers, lighters and pens will spend $11,000,000 in 1981 on its new, disposable 98-cent Bic Roller, the largest campaign ever for a writing instrument (AA, July 14). If all goes according to the game plan of Bic president Robert Adler, Bic will dominate the burgeoning rolling ball segment by September, 1981.

While Bic will be aiming at taking shares from rolling ball segment leader Pentel of America, Torrance, Cal., it also will attempt to reduce Gillette Co.'s Paper-Mate division's dominant 35% share of the $170,000,000-plus porous pen market.

Boston-based Paper-Mate also has an entry in the rolling ball segment with its Quicksilver unit, but Bic apparently does not consider it a major obstacle in its pursuit of market share.

■ "It is unfair to compare our new entry and Quicksilver," Mr. Adler said. "They are not a dominant factor in the rolling ball segment." Later, he remarked during a press conference that his company had changed the color of its entry to tan because consumers might "mistake the Bic Roller with the silver pen, which is of very poor quality."

The Bic Roller was introduced nationally in Canada in October, 1979, where it has since become the leading ball roller. Obviously, Bic is hoping the product will do as well in the U.S. where the domestic market showed successive gains of 40% and 61% in 1978 and 1979, according to the Writing Instruments Manufacturers Assn. At about 90,000,000 units, the roller ball market is the fastest growing writing instrument segment in a 2.9 billion-unit industry.

"We considered Canada our test market," Mr. Adler said, "and we think we can do just as well here." He added that the new unit had been designed with the Pentel in mind and that it had been tested for 4½ years before introduction. "We've come into markets late before," Mr. Adler said, referring to the company's foray into the lighter and shaver categories. "And we've done well." This time should be no exception.

The Bic Roller campaign, created by Wells, Rich, Greene, is virtually the same as its Canadian counterpart. The theme, "Go with the flow," is underscored by an emphasis on the pen's tip, which, according to the spots, "won't turn to mush no matter how hard you push."

(Continued on Page 90)

Grant firing perils Talbot's pan-Europe net

By CAROLYN PFAFF
and ELSPETH DURIE

PARIS—The $5,000,000-plus Talbot account went up for grabs in London last week with the firing of Young & Rubicam unit Grant Advertising, turning the spotlight on one of the more coveted pan-European automobile accounts, today worth $30,000,000 and currently coordinated by Y&R.

But more than just a local development, the lost account took on the flavor of the for-want-of-a-nail-the-kingdom-was-lost adage with talk of Talbot (formerly Chrysler-Talbot) tiring of the whole pan-European concept of coordination and Talbot disenchantment with Y&R's over-all performance.

Even though Talbot, which was bought by Peugeot-Citroen in August, 1978, has seen sales halved in the last year from 6% to 3% share of the European market, the healthy state of the new French owners' balance sheet on the Peugeot-Citroen ledger side at least makes Talbot a worthwhile risk.

The trouble this week in London stems from an unusual advertising setup, contracted by the former American owners of Chrysler and inherited by the French. In the mid-'70s when it was decided to coordinate the account, Y&R was prevailed upon by Chrysler to buy a small agency in Britain, Grant, whose only important budget at the time was the big Detroit car maker.

That gave Y&R two London shops; ironically, Y&R's main London unit now has been asked to bid on the account handled by its other shop (Grant), along with D'Arcy-MacManus & Masius, Allen, Brady & Marsh and Cogent Elliott.

The fact that the account was not automatically shifted over to the big Y&R London shop seems significant. Good manners would indicate that the Europewide coordinating agency be given first nod. But obviously George Turnbull, former head of British Leyland and now top man at Talbot in Britain, is not quite sold on the French connection and over-all ad direction *does* emanate from Paris.

■ Moreover, rumors have been circulating in Paris for some time that all is not well between Talbot and Y&R. At the time of the Talbot name change, French sales director Dominique Bachelet told ADVERTISING AGE, "We decided to go with Y&R because they are an international agency and because advertising is not of fundamental importance to us."

This disregard of advertising may explain why Talbot turned a deaf ear to the big French Univas group, which has no car account but is known to be perpetually pitching for one. Univas is continuing to try to play the chauvinist card and convince Peugeot-Citroen to change.

French president of Y&R, Jean-Claude Boulet, does not exactly deny that the account is in trouble. "Every account is shaky," he said. "And any trick is worth trying to get Talbot from us."

It is no secret that Y&R as well as Talbot have been through terrible growing pains on the account. As long as the Americans owned Chrysler-Europe, Y&R Paris functioned as an international agency staffed with a number of Americans and Europeans. But in the last year, control of the account has been taken firmly in hand by Jean-Claude Boulet and Pierre Lecosse in Paris at the expense of the international element.

First to leave the coordinating team was senior American art director Joe Poulhy. Then Mike Forster, a trilingual German head of international client services with specific emphasis on Talbot in Paris, asked to return to Y&R Frankfurt. Even the French creative director, Michel Persitz, moved on.

The low morale at Y&R may have had a lot to do with the client. Mr.

Syndie top 25 markets

(Continued from Page 3)

TV will pay $62,500 to $65,000 per episode for 14 runs, depending on who you talk to. KTTV, Los Angeles, reportedly will spend several thousands more than that to air Miss Piggy and her friends on a five-a-week basis starting in the fall of 1981. This same station is said to have gotten "M*A*S*H" for $17,000.

The May books are filled with data that should provide good ammunition for ITC exec vp Pierre Weis and his sales force. As a weekly attraction, Jim Henson's Muppets rated a spot on the top ten in 22 of the 25 markets compiled. The Muppets were at their best—1st place—in Detroit, with a 16 rating on WDIV, and in Chicago on WBBM-TV with a 14.

Still another program faring exceptionally well in this study was Viacom's "Family Feud," This show is going the local strip route for the first time this fall. As this story was written, 76 stations already had bought the Richard Dawson-hosted game for '80-'81, and the lineup was sure to expand.

As a weekly syndie telecast, it placed among the rating leaders in every top 25 market except Boston, Atlanta, Seattle, Tampa and Denver. In New York on WNBC-TV, "Family Feud" tied for second with a 10. The quiz led the dma homes rating list in Philadelphia for WPVI-TV, in Houston for KTRK-TV and in St. Louis for KMOX-TV.

Not all the shows on the top tens were cross-tabbed in this fashion, but among others put to that test and looking good were Group W's magazines, Colbert's, "Tic Tac Dough" and Viacom's "All in the Family."

Now moving toward the 100 station mark for fall, Group W's vidmags were first in Pittsburgh, Minneapolis, Balitmore, Indianapolis, Hartford and San Diego, and in a three-way tie for the lead in Dallas. The strip took second honors in Houston, San Francisco, Boston, Washington and Denver. "PM Magazine" was not playing in America's three biggest cities last May, but had been set for summertime debuts in all three.

The best city for Archie-and-the-family reruns was New York, where WNEW-TV offered the comedy twice a day, six days a week and placed first and fifth on the list. The bigger score came during the access half hour—all 11 rating.

These rankings also can be considered for what they are not intended to cover. They do not, for example, reflect the potency of Multimedia's best-seller, "Donahue." That titillating, mostly morning program requires a broader tabulation covering its 200-plus station lineup. Such an analysis also would need to touch on its strength as a morning lead-in.

Even so, Mr. Donahue, handicapped by being ranked against programs aired when there are more people available to watch, turned up on the top tens in four cities—Philadelphia, Minneapolis, Miami and Baltimore.

To top off this set of figures, our researcher put together a score card ranking the suppliers in terms of the number of positions carried on those top ten lists. The leaders, by his count: Viacom, 48; 20th Century-Fox, 41; Colbert, 25; ITC, 23; Group W, 21; Sandy Frank Productions, 11; Don Fedderson Productions, 10; Victory TV, 10; Metromedia, 9, and Tandem, 9. #

Richard Dawson puts contestants through their paces as host of Viacom's highly successful "Family Feud" syndication series. A leader in the May sweeps, it will be stripped for fall.

Ad Council officers set

New York—Barton Cummings, chairman of Compton Advertising, has been reelected chairman of the Advertising Council.

Elected new directors at large were Harry Gross, president of Gannett Outdoor Advertising; Garland K. Ingraham, vp-retail sales of Sears, Roebuck & Co.; Richard R. McLoughlin, publisher of *Reader's Digest;* Sanford Buchsbaum, senior exec vp-advertising of Revlon Inc.; Paul McPherson, president of McGraw-Hill Publications; Stuart Upson, chairman of Dancer Fitzgerald Sample, and Carlo Vittorini, president of Parade Publications.

Constituent directors are Lois Wyse, president of Wyse Advertising, and Charles Peebler, chairman-president of Bozell & Jacobs.

Honorary chairmen: John P. Kelley, vp-advertising of Goodyear Tire & Rubber Co.; Thomas Adams, chairman of Campbell-Ewald Co., and Gibson McCabe, retired president of Newsweek Inc.

James Fish, retired General Mills executive, was elected honorary director of the Ad Council.

John Elliott Jr., chairman of Ogilvy & Mather, and Patricia Carbine, vp-publisher of *Ms.*, were reelected vice-chairmen. #

Fischer changes name

Fischer & Kraker Associates, New York, management consultants, has changed its name to Fischer Kraker LeFever in recognition of its new president, Robert H. LeFever. Mr. LeFever, onetime chief operations officer of J.M. Korn & Son ad agency and most recently head of his own management consulting business in Philadelphia, succeeds Frederick S. Fischer, who becomes a consultant.

THE UNDERSTATEMENT OF THE YEAR.

To err is human. To forgive is divine. To correct is good business.

The 1979 Survey of Buying Power understated the Baltimore SMSA's Total Retail Sales by over 13%.*

Now the 1980 numbers are available – and correct. But they're only half the story. And that's no overstatement.

Write us for your copy of "Baltimore: America's Best-Kept Secret." Steven Engles, General Sales Manager, WJZ-TV, Television Hill, Baltimore, Maryland 21211.

Explanatory note

These syndicated show top tens for the top 25 markets are based on average designated market area household ratings as reported in the NSI sweeps books covering May 1 to 28. Ties are listed in order of total households reached.

The lists were compiled for ADVERTISING AGE by a broadcast research expert. If a show ran twice a day, it was considered twice for these rankings. Syndicated movies were not included. All times are local and p.m. unless marked a.m.

Symington rejoining 'Us'

NEW YORK—Garey T. Symington has rejoined *Us*, the magazine he left in 1978.

Mr. Symington, most recently ad vp at Parade Publications, has been named senior vp-ad director at *Us*, a new post. John Fitzpatrick, publisher of the Macfadden Women's Group, who had been handling ad sales for *Us* since Peter Callahan acquired the biweekly from The New York Times Co. earlier this year (AA, March 10), returns to his Macfadden duties with the arrival of Mr. Symington.

Mr. Callahan said he also has entered into an agreement whereby Warner communications can, over a 12-year period, acquire up to 50% of the magazine once Warner is called upon to advance cash to the biweekly. Warner's subsidiary, Warner Publishers Service, distributes *Us*. Mr. Callahan said that the *Us* cash flow is satisfactory at this time, and Warner has not been asked to underwrite any of its efforts. He envisioned a time when *Us*, seeking to expand and perhaps increase its frequency, would call on Warner for financing.

At the present time, the new *Us* owner says, the magazine has already moved from red to black ink. Mr. Callahan said his paid ad page count for 1980 through July 22 is 299, up from 295 a year earlier. He said a $300,000 trade campaign handled by Catania-Mackie Advertising will break soon, and *Us* will undergo a graphic design revamp supervised by David Merrill, former *Time* art director, who is now a graphic consultant.

The new *Us* owner said the magazine is again raising its circulation rate base to 1,000,000 from 900,000 without any increase in ad rates.

Mr. Symington, former director-national advertising at *Time*, left Time Inc. in 1976 to become ad director of the then-fledgling *Us* magazine. He left the biweekly in 1978. At *Parade*, his successor is James Martise (AA, May 23).

Other people moving:

Jerry Brown to western regional manager, Chicago, for Metropolitan Sunday Newspapers, from manager, Detroit office. He succeeds **Ed Howard,** who retired. Also at Metropolitan's Chicago office: **Donald W. Barrus** to sales manager from sales staff.

James L. Turner to associate publisher, Atlantic edition of *Newsweek*, a new post, from publisher of the Los Angeles edition of *Adweek*. Also, **Stephen Douglas** to research director, a new post, from media research manager.

Michael B. Klein to copy supervisor, marketing division of Knapp Communications Corp., publishers of *Architectural Digest* and *Bon Appetit*, from copywriter, Young & Rubicam, Los Angeles. He succeeds **Sue Fisher,** who left.

Joe B. McAdams, exec vp-general manager, *Chicago Sun-Times*, to new post of corporate vp-publications for parent Field Enterprises. He is succeeded by **Thomas Tallarico,** vp-finance and assistant gm.

Jack Sweeney to ad director of the *Houston Chronicle* from the same post at the *Boston Herald American*, succeeding **Vern Zastrow,** now classified ad director. **Robert E. Lange,** Herald American national ad director, will succeed Mr. Sweeney.

George F. Cominsky to publisher, *Design Engineering & Industrial Product Bulletin*, New York, from regional manager, *Contractor*, another Morgan-Grampian publication in Chicago. He succeeds **Paul Beatty,** who left.

Larry Steckler to publisher, *Radio Electronics*, New York, continuing as editor. Mr. Steckler succeeds **M. Harvey Gernsback** who continues as president of Gernsback Publications.

Jeremy Halbreich to vp-marketing, *Dallas Morning News*, from marketing-promotion director and assistant to the exec vp. Also at the *News*: **Harry M. Stanley Jr.** to vp-advertising from display advertising director; **Larry Kramer**, assistant display advertising director, to assistant to vp of advertising; **Dick Jeffrey,** pr director, to assistant to exec vp and **Duff Daniels** of pr staff to pr manager.

J. Halbreich

H. Stanley

Andrew Stanton to advertising director-North America, *International Herald Tribune*, New York office, from associate advertising manager. He succeeds **John J. Quigley**, who left. Also at the *Herald Tribune*: **Arthur B. Whitcomb** to associate advertising director-North America, from associate general manager, Dearmas Publications, and **Matthew Greene** to regional advertising manager, from sales staff, Media Networks.

Louise Cupelli to publisher, *Accent Magazine*, Radnor, Pa., from co-publisher of the Chilton monthly. **Charles M. Bond** relinquishes co-publisher status but continues as publishing vp of the Chilton merchandising group.

Bill McGorry to publisher, *Mart*, New York, from director of sales, succeeding **William J. Adams,** who continues to direct Morgan-Grampian Publications publishing operations in Pittsfield, Mass.

Brian C. Thayer to assistant general manager, a new title, Jackson Newspapers, New Haven, Conn. (*Journal-Courier* and *New Haven Register*), from publisher, *Biddeford* (Me.) *Journal-Tribune*.

Arthur Johnson to editor and vp-marketing, a new title, Inquirer Newspaper Group, Hartford, Conn. **William R. Hales,** ING editor/publisher, continues as publisher. Mr. Johnson formerly was director of human relations for the city of Hartford.

Alma C. Moore to Redbook Publishing Co., New York, as director of marketing communications, a new post, from vp-director of communications, Penthouse International Ltd.

P. Robert Farley to senior vp, Magazine Publishers Assn., New York, from vp circulation. He succeeds **Robert C. Gardner,** who left the MPA to join Decisions Publications.

Douglas W. Florenzie to circulation director, *The New Yorker*, from circulation manager. He succeeds **Frank Ogden,** who is retiring from the magazine.

Martin Goldstein to national sales manager, Hearst Corp. auto accessory publications, a new post, from national sales-marketing manager, Coronet Parts Mfg. Co.

Cigar sales sag, and no letup in sight

By JOHN C. MAXWELL JR.

For almost two decades sales of large cigars have been declining—and at present the industry sees no sign that consumption will bottom in the near future.

In the past some observers suggested that the industry could bottom out around the 4 billion unit level; but this is where volume is currently, and there has been no diminution of the downward trend. In fact, even on a dollar basis all three areas of the cigar industry show declines or no growth.

The only over-all area of some expansion continues to be premium cigars (defined as those retailing for 50 cents and above), which probably account for 3% to 4% of industry unit volume and 16% to 18% of dollar volume.

Last year witnessed the failure of Flite, Consolidated Cigar's test of a mild and low-aroma type product. Flite was launched in answer to market studies indicating that there might be some consumer acceptance of this type of cigar.

- Consolidated's Dutch Treats and to a lesser extent General Cigar's William Penn were the only two major brands to show any 1979 growth. Particularly in the case of Dutch Treats, several factors have accounted for this. Consolidated has made successful line extensions, the latest being Pipe Aroma in 1979. The brand has also enjoyed a price advantage of 2 cents to 3 cents per package over Winchester, and even larger amounts over such products as A&C and Omega. Note also that Dutch Treats are 100 mgs, while Winchester is 85mgs.

There also is a feeling that the spread between the price of cigarets and little cigars, particularly in cases where a state has high cigaret taxes and no cigar taxes, might be beneficial. #

Mr. Maxwell is with Lehman Brothers Kuhn Loeb, New York.

Banks pace newspaper ad spending rate again

NEW YORK—For the second month in a row, the banks and trust companies category posted the highest growth rate for newspaper advertising dollar spending, according to the May Flash Report prepared for ADVERTISING AGE by Media Records.

Banks and trust companies showed gains of 89% for May, 1980, compared with the same month a year ago. The increase is attributed to the flurry of advertising being undertaken by banks as they try to keep current customers and attract new ones in the midst of the nation's economic pinch.

Of the 16 categories monitored for AA by Media Records Inc., only three were down in May ad volume in the 15 cities whose newspapers are measured. The categories showing downturns were auto supply and service shops, department stores and public service utilities.

Department stores, though down 0.9%, maintained its position as the highest spending category. It was followed in the top five dollar rankings by furniture and furnishings, general merchandise stores, amusement and food stores.

In addition to the banks and trust companies category, percentage gains of 15% or better were registered by building materials and hardware, eating and drinking places and real estate. #

This Flash Report of newspaper advertiser investment, compiled for ADVERTISING AGE by Media Records, is derived from tabulations that cover 35 dailies and 25 Sunday editions in 15 cities—Atlanta, Baltimore, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, Miami, New York, Philadelphia, Pittsburgh, San Francisco and Washington. The report indicates marketplace strengths and weaknesses.

Time feels 2nd quarter softness

NEW YORK—Time Inc. reports that its magazines "began feeling some recession-related softness" late in the second quarter.

In addition, startup costs for *Discover* magazine, set for a September debut, further held down net income at Time Inc., which reported second-quarter earnings of $40,700,000 on revenues of $699,700,000. Second-quarter '79 results showed net income of $42,300,000 on revenues of $629,600,000. Thus, while revenues increased 11% in the '80 second quarter, income declined 3.8%.

For the first half, Time Inc. reported earnings almost even with year-ago results, the '80 net coming to $68,961,000 and the '79 net at $68,948,000. Revenues were $1.363 billion in January to June, 1980, up nearly 17% from $1.165 billion in '79.

▪ Chairman Andrew Heiskell and president James R. Shepley noted the recession's impact on late-second-quarter results, cited *Discover's* startup expense and added that the company's paper making operations also began seeing signs of weakness in their markets. "Moreover," Mr. Heiskell said, "in June we had to curtail production at our east Texas paper mill beyond the normal maintenance downtime in order to make scheduled capital improvements." Book publishing suffered from a "profit squeeze" throughout the first half, the two added, and building materials also continued to decline. The bright spots at Time Inc., they said, proved to be gains by the video group—led by cable tv and pay cable. #

Hecht signs 1st client

Information and Analysis Inc., New York, the new management consultancy formed by former Arbitron TV exec vp Norm Hecht, has inked its first client, Post-Newsweek Television, which includes four owned stations and Top Market Television.

Stanville heads AWRT

The 1980-81 president of American Women in Radio and Television is Martha Pell Stanville, director of advertising and promotion, WCCO-TV, Minneapolis. Installed as president-elect last month was Muriel Kennedy, president/owner of MMK Associates, Watertown, N.Y. Jeri Warrick-Crisman, director, national community affairs, National Broadcasting Co., was elected secretary/treasurer. AWRT represents more than 2,800 professionals in broadcasting and allied fields.

Honest-To-Goodness Plastic From Emeloid

Honest-to-goodness **plastic specialty products** are made to last. To look as impressive as they did on delivery day . . . ten years later.

Emeloid takes a different approach to production and research. We're the only plastics firm that runs an in-house laboratory with chemical and industrial engineers. Here, stress tests are designed to analyze our plastic's endurance.

The result is plastics that last longer. And so will your advertising message. For complete information and literature about Emeloid's products and service, call or write Frank Wirth, C.A.S., General Sales Manager. (201) 352-2323 or (201) 352-1944.

WEBCRAFT prints the games people play.

Games work because they involve the consumer. And involvement helps sell product. We're here to tell you of a cheaper means of producing great games and sweepstakes. With our unique web presses, we accomplish in-line what other printers have to take off press and ship to other departments or even outside sub-contractors. It stands to reason, the fewer steps involved the less money you'll have to pay.

So, when you want to create an involvement device utilizing die-cut, tabbed windows, wash off inks, invisible inks that react to moisture, inks that change color or on-press gumming and perforating, call or write Jack Cooper for our sample game kit.

Most expensive

National Distillers bucks the trend toward lower proof spirits with new Old Grand-Dad Special Selection 114-proof bourbon. Expected to sell in the $15-to-$16 range, the product will be promoted for its "barrel-proof" distinction via ads breaking in August in more than a dozen magazines. Young & Rubicam is the agency.

Why Old Grand Dad Special Selection is the most expensive Bourbon in the world.
OLD GRAND DAD SPECIAL SELECTION
The most expensive Bourbon in the world.

While U.S. bakes

Cold weather chills European marketing

By CAROLYN PFAFF

PARIS—"Let's hope the heat in Texas will make up for the cold here in France," said a Perrier spokesman commenting on the slump in his sales here after six continuous weeks of rain and cold on the Continent, the most frigid June/July period since 1907.

Across La Manche, Britain isn't faring much better. Equally doused under a cool shroud of mist, fair weather businesses are in the doldrums adding a fraction of woe to Britain's already unstable climate of 2,000,000 unemployed, factory closures, sagging tourist dollars, droopy retail sales, record interest rates, an overvalued pound and 20% inflation.

Thinned tourist ranks, slumping sales in thirst-quenchers, water-logged agricultural producing areas that will bring higher food prices down the road and declining retail sales—except for a run on rainwear—are all products of this stationary front.

Tourism has been struck a heavy blow in Britain, where the impulsive tourist market—weekends and Sunday trippers—certainly has been rained in, and is a contributory factor to what is expected to be a 20% shortfall in the U.K. tourist trade from last year. The strong pound, to be sure, is far more disastrous than the weather in Britain, where no one comes for a suntan anyway.

All-round tourism, typified by an expected 15% drop in visitors to London, is in bad enough shape to have shaken the British Tourist Authority into plans for a $5,000,000 London-boosting worldwide campaign through Ogilvy & Mather to combat the capital's worsening image (AA, July 14).

▪ But tourists do stream into France, where hotel occupancy is down as much as 50%, the hardest hit being Brittany.

The American Express office in Paris says tourists from America who usually spend an average of

RJR, PM sue to stop Triumph ads

By SAM HARPER

NEW YORK—R. J. Reynolds Tobacco Co. has joined the fight that archrival Philip Morris U.S.A. began two weeks ago, also filing a suit accusing Loews Corp.'s increasingly aggressive Lorillard division of false advertising.

While it is rare that the nation's top two cigaret marketers see eye to eye, RJR and PM are seeking damages and an injunction against Lorillard on the basis of a month-old advertising campaign that touts its 3mg Triumph cigaret as the winner of what RJR and PM maintain are questionable "national taste tests." The results of the tests, which the PM suit described as "not statistically significant," found Triumph "preferred" over PM's Merit and Marlboro Lights cigaret brands and RJR's Vantage and Winston Lights (AA, June 16).

Though RJR would not comment on the litigation, a company spokesman said there were "parallels" between the RJR and the Philip Morris suits.

PM's suit, filed in federal district court here July 17, claims that the smokers interviewed during Lorillard's taste tests were subject to information that "biased the expression of preference and subsequent taste comparison in favor of Triumph." Ads claim that 60% of the smokers tested preferred Triumph over the 8mg Merit and 62% preferred the 3mg brand over RJR's 11mg Vantage.

The suit also alleges that the number of respondents interviewed was not great enough to justify the ad headline, "Triumph beats Merit." In its suit, PM also noted that Merit has achieved a 3.7% share of market since its introduction in 1976, while Triumph, "despite considerable advertising and promotion, has failed to obtain a 0.5% share" of market. Triumph moved national in June, 1979.

The Lorillard campaign "will, if continued, cause smokers to switch from Merit to and from Marlboro Lights to Triumph, who otherwise would not do so," according to PM.

▪ As a result PM, and presumably RJR, are calling for a halt to the comparison campaign and are seeking "a sum equal to Lorillard's profits from Triumph" since the outset of the campaign. The PM suit adds that the funds accrued from the case would both make up for a loss of customers and be invested in a corrective advertising effort.

Prior to the June startup of its now controversial campaign, Lorillard remained a relatively passive competitor in the ultralow-tar (5mgs tar and under) segment. As RJR's Now, PM's Cambridge and American Tobacco's Carlton this spring fought for "lowest tar" classification, Triumph emphasized taste as its major attribute. This advertising focus gave it a 0.3% market share by the end of 1979, according to John C. Maxwell Jr., senior analyst, Lehman Bros. Kuhn Loeb Research.

While Triumph's year-end growth is considered respectable in an industry inundated with low-tar and ultralow-tar brands, industry analysts speculate that Lorillard felt the need to bring Triumph up to the share level of its year-old Kent III brand, which claimed a 1.4% share of market in its first year.

However, Lorillard's aggressive marketing push has extended beyond Triumph. In a campaign that appeared last week for its 5mg True, the nation's fifth largest cigaret marketer takes aim at brands marketed by RJR, PM and American. While the campaign does not compare products, its headline, "To those of you who will try a 1mg tar cigaret and find it tasteless . . .

Cable blockbusters beat net tv share: Nielsen data

By MAURINE CHRISTOPHER

NEW YORK—Schedule a film like "Deer Hunter" on the home screen in the rerun month of May, and most viewers hooked up to pay cable will watch it in preference to the repeats on ABC, CBS and NBC.

Furthermore, increasing numbers of people are willing to put out $8 to $11 a month to see movies at home that would cost $5 or more each in theaters.

▪ Once they join the 8,000,000-plus pay cable subscriber list, homes tune in an average of two and one-half movies weekly on the premium pay channels.

"Looked at in terms of today's cost of going out to the movies, viewers who watch and enjoy a couple of movies or so at home weekly would seem to be getting their money's worth from pay cable," said Dwight M. Cosner, the A. C. Nielsen Co. exec in charge of analyzing the research company's cable reports.

▪ The star catv attraction for Nielsen's new May report was Home Box Office's premiere showing of "Deer Hunter." It drew a 41 rating in pay cable homes, just three points below the record set by "Saturday Night Fever" on HBO last February.

In the 5,000,000 HBO homes, the Sunday night (May 18) showing of "Deer Hunter" decimated the commercial networks and a Showtime special.

The network scores were 12 for "One Day at a Time" on CBS, 11 for "CHiPs" on NBC and 8 for "Mysteries of the Sea" on ABC.

Showtime premiered "Deer Hunter" on a Saturday night and also did well against the networks. In Showtime's 1,200,000 homes, the war feature drew a 28 rating compared with four for NBC and eight for CBS. ABC's "Love Boat" hung in there with a 17.

▪ For the first time since Nielsen began counting heads in pay cable, there was one full week—May 15 to 21—during which HBO pulled higher prime time (8 p.m. to 11 p.m., local time) shares in pay ca-

Gillette to test Silkience skin moisturizer

BOSTON—Gillette Co. will test a new self-adjusting skin moisturizer under the Silkience name within the next six weeks, according to trade sources. A tv campaign via N W Ayer ABH, New York, will support. The new entry follows the launches of Silkience hair conditioner and shampoo, both handled by Advertising To Women, New York.

Max Factor to debut Living Proof skin system

HOLLYWOOD—Norton Simon Inc.'s Max Factor & Co. will introduce Living Proof, 13-item skincare system, in major department stores in New York, Chicago, Detroit and Los Angeles beginning in October. Co-op and national women's magazine ads, heavy sampling and a gift-with-purchase promotion are in the works. "An exciting new concept in hypoallergenic skincare begins" is the ad theme. WRG/West handles.

Ricoh expected to name DKG Advertising

WOODSIDE, N.Y.—Ricoh Corp., makers of 35mm cameras and accessories, is expected to name DKG Advertising, New York, to handle its estimated $2,000,000 to $3,000,000 account. Final approval of DKG is dependent on the agency's acceptance by Ricoh Ltd., Tokyo, the parent company. Ogilvy & Mather/2 is the previous agency.

New Dad's, Bubble Up campaigns due

CHICAGO—IC Industries will launch new campaigns for Dad's root beer and Bubble Up next month to reposition the soft drinks for a younger market. Dad's is dropping its "foams up" pitch for "Dad's—the real root beer lover's root beer." Bubble Up will stress refreshment, calling itself

Key issue is new video

Strike perils fall season

By BOB MARICH
and COLBY COATES

LOS ANGELES—Actors striking most prime time network tv and theatrical movie production went into the weekend with no talks scheduled with producers, dimming hopes for an early settlement.

A prolonged strike would mean postponement of the new prime time season and the big promotional push that goes with it. But sources say the strike would have to continue another two weeks before the new season start date would be in peril.

Producers were just starting series production when some 60,000 members of the Screen Actors Guild and the American Federation of Television & Radio Artists began the strike last week. About 10 made-for-tv movies and some theatricals made by smaller production companies have been granted waivers by the unions to continue production, but most production has stopped.

Although the job action affects prime time network tv and theatrical features, the contract impasse ironically centers largely around provisions for pay tv, cable tv and home video production—areas that up to now have generated virtually no union work for actors.

The walkout is being compared to a 1960 strike—a five-week job action when SAG's president was Ronald Reagan. Then the main issue was residuals for the emerging practice of broadcasting theatrical movies on tv. Now emerging new media are the major stumbling block in the current strike.

"The outlook [for a settlement] isn't too good at this point," a SAG source said.

Welcome
Pizza Hut Franchisees
To Our Home Town.
Foote Cone & Belding

Foote, Cone & Belding showed its "Hometown Pizza Hut" campaign, scheduled to break in early fall, to franchisees during the chain's midyear meeting held last week in Chicago *(see story, Page 82)*. Before the franchisees could decide whether they liked the commercials, the agency extended a welcome to its hometown. (Staff photo by Mary Cairns.)

Schnappy: Ex-Heublein exec Elliot tackles the giants with innovative spirits

By JOHN J. O'CONNOR

NEW YORK—Wine and spirits entrepreneur William V. Elliott is banking on Spritzen, a sparkling white wine, and Rumple Minze, a 100-proof, imported peppermint schnapps, to extend the new product success record he achieved while at Heublein Inc.

The former vp-marketing of Heublein Inc.'s spirits group has officially opened a company bearing his name following a year of planning, developing several new entries and contracting with overseas suppliers.

Mr. Elliott, 49, said that while the entrepreneurial road has been tough and demanding (he logged 15,000 miles of travel in a recent 10-day period), "it's also been very satisfying. Not having to deal with all the politics of Heublein in getting a job done makes all the difference in the world. I don't miss the corporate life at all."

▪ Operating from an office in West Hartford, Conn., no more than a mile away from the spirits group headquarters, Mr. Elliott—with 10 salesmen to start—is attempting to do battle with giant competitors via innovative products like Spritzen, Rumple Minze and nine other undisclosed products he has personally conceived.

Spritzen was recently introduced in San Francisco, supported by a radio campaign created by Flaherty & Co. here.

If Spritzen can make it in a market like San Francisco—"a well-understanding and mature wine market that's heavily into sparkling wines," Mr. Elliott believes the product can make it anywhere.

Promoted as the "waterfall wine," Spritzen is designed to ride the crest of popularity that sparkling wines currently enjoy. As a category, sparkling wines are soon expected to pass the 10,000,000 case mark. Spritzen, imported from Germany, is technically considered a sec, or like champagne. It will retail for $7 a bottle.

But rather than dwell on the

This study, based on the latest Nielsen measurements, includes top tens for each market.

Raisin growers plan $10 million push

STOCKTON, CAL.—Diamond-Sunsweet and Sun-Maid Growers of California are combining their marketing efforts in an attempt to protect their slipping market shares from competitors like Tenneco West and RJR Foods' Del Monte Corp.

Diamond-Sunsweet, based here, and Sun-Maid Growers, Kingsburg, Cal., have agreed to pool their marketing capabilities with a combined advertising budget topping $10,000,000.

The new organization is expected to be called Sun-Diamond Growers of California, headquartered here. Each of the three members, Sun-Maid, Diamond and Sunsweet, will maintain its own assets and legal identities.

Industry observers say the joint marketing agreement is a necessary step for the fruit and nut cooperatives to remain competitive—or even hold their own—in a category where consumption is rising and competiton is intensifying.

Sun-Maid president Frank Light has been named president of the new group, with Diamond-Sunsweet president William Dabney as exec vp. Donald Soetaert, formerly Sun-Maid's exec vp, has become senior vp-sales and distribution. George Funk, formerly senior vp-marketing and sales, Diamond-Sunsweet, has been named senior vp-marketing.

▪ As for agencies—Doyle Dane Bernbach (Diamond-Sunsweet) and D'Arcy-MacManus & Masius (Sun-Maid)—the new arrangement does not necessarily mean one will be dropped. Mr. Funk told ADVERTISING AGE he does not plan to initiate any major agency changes and is not opposed to the idea of Doyle Dane and D'Arcy continuing as "co-agencies." Sun-Diamond will hold meetings over the next month to work out combined marketing details.

Both Mr. Funk and Mr. Light said the new arrangement will allow Sun-Diamond the advantages of more economical joint distribution and advertising.

This fall, before the joint marketing starts, Sunsweet will begin its first national advertising in more than 10 years, repositioning prunes as "the smart snack."

In an attempt to overcome an "old folks' laxative" image, Sunsweet will spend $1,500,000 in women's magazine advertising stressing the food value of prunes. The drive starts in September.

Diamond, with a $3,500,000 1980-81 advertising budget, will run in women's magazines throughout the year, in addition to running spot tv commercials.

Mr. Funk said the year-round ad schedule is an attempt to extend the walnut-selling season, usually concentrated in the fourth quarter of the year.

▪ Sun-Maid, which has more than 50% of the raisin market, has allotted $1,800,000 of its $5,000,000 1980-81 ad budget to back raisins. Tv and print advertising positions "America's favorite raisin" as a healthy snack food for kids and a cooking ingredient. Nature Snacks' ad spending will reach $700,000 and Sun-Maid Cinnamon Swirl raisin bread will get $2,500,000 in tv and print ad support.

Sources at Tenneco West, the Bakersfield-based marketer of Sun Giant nuts and fruit, said it will increase ad spending well beyond the $3,500,000 levels it reached last year, with a tv ad campaign continuing some of the "Something good under the sun" themes introduced last fall.

▪ The new Sun-Diamond marketing agreement is not without precedent. About 10 years ago, Sun-Maid and Sunsweet tried a similar co-marketing arrangement that failed because of management differences.

Sun-Diamond execs are optimistic that the new arrangement will be different. Unlike the first marketing venture, Sun-Diamond has a single chief executive—Mr. Light. #

Agencies profit, but fall short of '78 record

NEW YORK—Last year was a good one for the advertising agency business, though average net profit fell short of 1978, according to a membership survey by the American Assn. of Advertising Agencies.

The average net profit of 4.84% of gross income reported in 1979 was down from the decade record high of 5.09% in 1978. Although the '79 net percentage was second highest for the decade, profit before U.S. income taxes slipped to the lowest since 1975—6.18% of gross income. The tax percentage declined for the fourth straight year *(see chart)*.

▪ Expenses continued to rise as a percentage of gross income in most categories, except for the biggest expense—payroll. Here the figure hit 60.93%, a drop from 61.02% in 1978. The payroll percentage has shown a steady drop through the '70s, from a high of 66.67% in 1970, according to the study.

The Four A's showed separate figures for incorporated agencies. These total more than 90% of Four A's membership, though the number of incorporated agencies among the 265 agencies participating in the survey was not given. The net profit for incorporated agencies last year was 4.59% of gross income, down from 4.74% in 1978. Both figures are below the profit averages for all agencies surveyed.

However, the incorporated agencies showed a growth in net profit as a percentage of billings—1.03% in 1979 and 0.99% in 1978. It's the first time that the figure topped 1%. #

L.A. tries to stem loss of tv ad production

By BOB MARICH

LOS ANGELES—Convinced that tv commercial business has been heading for other parts of the country, a tv commercial producers' trade group and a technicians' union here are fashioning a recovery program to lure back advertisers and their agencies.

Most notable of the defectors is Procter & Gamble, which is slowly but steadily cutting back on production here because of costs.

"I don't think that there's any question that Los Angeles production is down this year, that there's a big drop in business," said Frank Tuttle, president of the Film Tree, Orloff & Roagan, a tv production house with offices in Los Angeles and New York.

"Part of it is the economy," he said. "But in addition to the economic slowdown, there's been a runaway of some business to New York, Florida and other parts of the country."

▪ Mr. Tuttle is past president of the Assn. of Independent Commercial Producers/West, a trade group that is scheduled to present an "economic impact" study documenting the decline to Los Angeles Mayor Tom Bradley's office Aug. 8. Union representatives also will be on hand.

The hope is that the mayor will take steps to bring back the lost business. Members of a technicians' local union have already reduced their customary minimum to appease producers.

Cay Mohr, recently named AICP/West president, said that a decade-old New York City policy of giving producers free location permits and police and fire services is giving the Big Apple a big edge over Los Angeles, where producers are charged for the same services.

"Location, police and fire isn't the total reason that we're losing production here," said Ms. Mohr, exec vp-producer of Ross, McCanse & Associates, a tv commercial producer. "But these factors are something that is brought up all the time" by agencies and advertisers.

She noted that the firemen New York City provides at no charge will cost a tv producer shooting in Los Angeles brush areas $24.90 an hour plus $100 a day for a fire truck. In addition, regulations covering permits and other areas have become more stringent, she added.

The slide in Los Angeles production is traced to a 1978 memo from P&G to its agencies saying "there's a premium for doing a full production tv commercial shot in a studio in Los Angeles compared to New York," according to Bill Dobson, P&G pr section manager.

▪ The memo asserted that labor costs "all the way up and down the line" are higher in Los Angeles, Mr. Dobson said. P&G has sent its agencies several follow-up memos reminding them that "some justification other than cost" is necessary for having studio shoots in Los Angeles instead of New York, Mr. Dobson said.

Earlier this year, Barney Melsky, president of AIPC/East, compared labor costs of an average commercial shoot in a study presented to the New York City mayor's office that said Los Angeles is 26% more expensive than New York. Los Angeles had higher film processing costs, required a generator accompanied by firemen in more cases, higher union paper work expenses, more stringent child welfare rules and higher location fees for both public and private sites, according to the comparison.

▪ The National Assn. of Broadcast Employees & Technicians Local 531 in Los Angeles—which has jurisdiction over at least half of the tv commercial productions—was "stunned to have such a drop-off" in commercial productions recently, although business has picked up in the last two weeks, said Judy Wester, assistant business representative.

In an effort to attract more production, NABET members voted at a July 12 meeting to reaffirm that they would work for 8-hour daily guarantees instead of 10-hour guarantees, Ms. Wester said. The longer minimum guarantee meant producers who completed a day's work in less than eight hours were obliged to pay crews for 10 hours' work—with the last two hours at time and a half pay.

▪ "The P&G report gave some people ideas that Los Angeles costs more," which is not true, Ms. Wester said.

Meanwhile, Los Angeles city public works commissioner Maureen Kindel said that Mayor Bradley "has become aware of this problem and is committed to stem this tide as far as the city can control it." She added that "many factors," not all related to government, are part of the reported loss in tv commercial production.

She added that the city has responded to producers' needs in the past months by opening a permit office in Hollywood and adding several AICP/West representatives to a 50-person film advisory board that reports to the mayor.

Also, the city recently hired Berkheimer & Kline pr company to communicate the city's efforts on behalf of producers, "urging them not to go away."

▪ Ms. Kindel said that she doesn't feel Los Angeles would eliminate permit, police and fire fees because the city averages 20 to 25 outdoor shoots involving movie, tv and commercial productions daily, and "there's no way we could support that level of activity."

She added that fees are structured to cover costs and are reasonable, such as $125 per day to use city hall as a location. Owners of private property "are becoming greedy" by charging high fees to use their locations, she said. #

Permits tell the story

LOS ANGELES—While tv commercial production has fallen here recently, production activity remains relatively unchanged in New York City.

Comparing tv commercial location permits issued—a measure of outdoor production activity—Los Angeles in June conferred 75 location permits, down 26 from a year ago.

Meanwhile, in New York City, location permits for the first six months of 1980 stood at 441 compared to 447 for the same period in 1979.

Meredith Anthony, assistant to the director of New York's mayor's office for Motion Pictures & Television, attributed the steady production in part to free permit, police and fire services.

She added: "It's taken almost 10 years for it to sink in to the industry. The myth was so prevalent that New York was hard to deal with that it's only in the past few years that it's been erased." #

Arco to push saving at home

LOS ANGELES—Atlantic Richfield Co. here will broaden its energy conservation ad campaign from auto fuel conservation to home energy conservation in a $7,000,000 network tv and national magazine ad push from August through December.

Themed "Conservation, it's the thing to do," the campaign is a new part of Arco's $20,000,000 "energy diet" corporate advertising effort promoting conservation and offering energy-saving tips (AA, Sept. 17). Needham, Harper & Steers handles.

▪ Thirty-second network tv ads on CBS and NBC in prime time, news and other dayparts break Aug. 18. The magazine ads start in *Newsweek* and *Time* during September.

Earlier ads encouraging fuel conservation in automobiles were based on the theme, "It's time we all went on an energy diet."

Arco also has made its first Cable News Network buy via Needham, taking a two-week flight breaking in September promoting the Public Broadcasting Service's science/-astronomy "Cosmos" series premiering Sept. 28, which it is largely underwriting. #

corrections & clarifications

- Two high-ranking syndication shows in Minneapolis—"Dance Fever" and "Prisoner: Cell Block H"—are on KSTP-TV. Nielsen top tens were printed with incorrect call letters for that station (AA, July 21, P. 62).
- The name of Marcel Bleustein-Blanchet, founder of Publicis, was earlier misspelled (AA, July 21, P. 2).

Two studies

How the public views shoppers

BY GERALD C. STONE

MEMPHIS—It may be the diversity of nondaily newspapers that has prevented shoppers from receiving serious study.

Or it may be that more traditional papers believe ignoring the free-circulation papers will damage their credibility or (better yet) cause them to go away.

But the shoppers, pennysavers and throwaways are in nearly every city and town and they have proliferated in the suburbs.

Do people read them? Are they regarded as newspapers? Can ads in the shoppers sell goods and services? Are the throwaways any real threat to daily newspapers?

According to recent research, the answer to each of these questions is yes—at least a tentative yes.

Two studies were completed in Southern California and nationally by the Newspaper Advertising Bureau (NAB) in 1977 and 1978, respectively. And, though the approaches were slightly different and the results, therefore, also differed slightly, the general conclusions of these independent studies were the same: Shoppers have an impact on the newspaper reading public.

Roughly, the studies found that the majority of homes do receive a freely distributed newspaper—perhaps 65% to 75% of single family dwelling units; at least half the respondents who said they had access to a shopper also said they read it—59% to 66%; most of the shopper readers also subscribed to and read a daily newspaper; and most of those who said they read the free papers seemed to read them thoroughly or at least skim through them.

Other individual findings of the studies: That 48% of residents found free home-delivered papers either useful or very useful; 33% found the home-delivered a nuisance; 41% found the store shoppers either useful or very useful; 48% said they read the ads in home-delivered shoppers compared with 84% who said they read the ads in their daily newspaper; 20% had tried to buy from an ad in a shopper during the past year compared with 37% who had tried to buy from a daily paper.

- There are other interesting bits of information from the two studies, but it might be appropriate to say something about how the studies were conducted before going into these details.

The NAB study was a national random sample of 3,048 adults, conducted in 1977. That means all adults were equally likely to be selected for the sample and should have approximated the U.S. adult population from every geographic area and at every demographic level. The study was designed to investigate nondaily papers and attempted to distinguish between paid and nonpaid papers and those delivered to the home or secured elsewhere.

The Southern California study, on the other hand, attempted to calculate the pervasiveness of free-circulated papers and to chart peoples' perceptions of this medium and its use of them. The study was conducted by myself and a colleague, Dr. Ed Trotter, in the Long Beach and northwest portions of Orange County below Los Angeles.

Its sample was a random selection of single residences (87%), multiple-family residences (6%) and apartments (7%). This approach was used because past discussions of shopper distribution suggested it was difficult to circulate them in apartment complexes.

It is not surprising to note, therefore, that the latter study's 432 households had a higher shopper penetration than did the national random survey of adults in the former study.

- Both investigations had difficulty distinguishing among the variety of nondaily papers, noting they might be weeklies, advertising sheets or pennysavers only; sent through the mail, available in stores only or distributed to front yards; fully paid, partially paid or circulated free of charge. Knowing the diversity of shoppers might cause respondent confusion, both studies carefully distinguished between the paid-free and the home-store dyads.

The national study found 46% of the adults received one or more free papers at home; in Southern California the figure was 76%. Much of the 30% difference may be attributed to the exclusion of apartment dwellers in the California study. Yet this discrepancy was the largest for any of the comparable findings of the two studies.

Publishers sign for cable tv share

BY ED ZOTTI

CHICAGO—As the scramble for cable tv franchises heats up across the country, many suburban newspaper publishers who've been anxiously contemplating the looming struggle for the suburban ad dollar are finding it's better to join 'em now rather than try to beat 'em later, when cable will be an established competitor.

Some two dozen publishers here have signed up for minority shares (typically 2½% to 10%) in joint ventures with Metrovision, an Atlanta-based subsidiary of the Newhouse newspapers chain seeking suburban cable franchises in the area. In another deal, Paddock Publications in Arlington Heights, Ill., has joined forces with Cox Cable Communications.

In Wisconsin, Post Corp., a newspaper publisher with broadcast tv holdings in the northern part of the state, has signed a partnership agreement with Metrovision for 20% of any franchises obtained in the Milwaukee area. Publishers in or near Boston, Detroit and other cities also report they're taking a close look at cable, either with the idea of pursuing a cable tv partnership or at least leasing a channel or two.

- The advantage of newspaper partnerships for the cable tv companies is obvious enough—"if you're an outsider you always try to hook up with somebody local," one cable spokesman candidly observes.

The publishers' motives in exploring the possibilities of cable tv are often less an infatuation with the charms of video than a simple fear of the unknown, coupled with the expectation that if they don't take advantage of cable's opportunities, their competitors will.

"I was talking with the president of a cable company who said he's now being approached by shoppers," one publisher says.

Unlike broadcast tv, which hasn't had much of an impact on suburban newspapers, "cable tv can be very localized. It can cover very congruently the same area that a suburban newspaper serves," says Ben Compaine, executive director of the media and allied areas at Harvard's Program on Information Resources Policy. With its no-waste coverage, "cable could sell advertising to local people and drain off advertising revenue from newspapers."

Mr. Compaine has advised suburban publishers at national conferences to do one of several things: "First, try to buy a cable system and be the operator. The problem with that is the high cost involved and, unless you're a very large operation, you may not be able to afford it. A second approach is to lease a channel, which for many is the more practical way."

Partnership with a cable company, naturally, is a third option.

Apart from its value as a purely defensive tactic, getting into cable offers publishers a potentially profitable outlet for the news/advertising product they're already putting into their newspapers. To be sure, that means reassessing traditional notions of newspapering.

"The future is in delivering information," observes Lou Lerner, publisher of Lerner Newspapers, a chain of suburban and neighborhood papers in Chicago. "It's the Gillette razor blade principle. It's not as important to own the razor [*i.e.*, the printing presses] as it is to furnish the blade [*i.e.*, information]. We're in a peculiarly favorable position to furnish the blade."

- What form the newspapers' contribution to cable might take is pretty much up in the air at this point. In the past year or so, the media have been full of reports on projects ranging from Ted Turner's 24-hour Cable News Network to more exotic schemes like Britain's Prestel, a "universal data base" operated by the British Post Office that gives subscribers access to everything from stock reports to train timetables via their tv screens.

The simplest sorts of "electronic newspapers" are the videotext systems, such as those presently operated by United Press International and Reuters news services. Here viewers basically watch a sort of video teletype in which stories scroll slowly past on the screen. A variation of this scheme flashes a sequence of video "pages" before the viewer.

The Mason City (Ia.) *Globe-Gazette*, one of the few small newspapers that actually has a videotext system up and running, typically feeds 30 to 40 pages to several thousand cable subscribers over one of the two channels it leases. At 20 seconds per page, viewers "can get the whole sequence in 11 minutes," reports publisher Jerry Moriarity.

In operation for only a month so far, the Mason City system features ads and condensed versions of news stories supplied by *Globe-Gazette* staffers. The paper plans to use its second channel to run videotape of area news events, interspersed with conventional filmed commercials, although they may run longer than the usual :30 to :60 broadcast limit. Construction of a tv studio is under way.

(Similarly, Post Corp., which already owns a sizable tv production company, expects to contribute heavily to conventional cable programing.)

Down the road a bit are two-way interactive video systems that permit the user to call up any of several hundred to (potentially) several million screenfuls of text at will. Such technology, generically called viewdata, relies on telephone lines but readily could be adapted to cable.

Ultimately, such a setup might permit a subscriber to call up an airline schedule, place a reservation and order funds transferred from his bank account to pay for the ticket—all through his home video unit.

There's little question that the more thorough suburban newspapers, with their heavy local orientation, have an information product that might compete successfully with other outlets, notably electronic news generated by their downtown cousins.

"If I were to take a metropolitan paper and measure out the portion that could be supplied by some other information provider such as the *New York Times* or the *Wall Street Journal*, I'm sure I'd find that a good bit of it was duplicated," says Bruce Sagan, publisher of the daily Southtown Economist Newspapers, another Chicago area chain. "Suburban newspapers have a set of information that nobody else can match," he adds.

But, while two-way communication offers a real opportunity to newspapers that get in while the getting is good, it also poses a real threat to those who don't. Among other things, it could chip away at the lucrative newspaper classified advertising market.

Such "directory" ads, the kind that readers will actively seek out, also include things like movie and restaurant sections and even, to a certain extent, grocery and department store ads. Suburban Newspapers of America (SNA), a trade association representing some 900 papers, estimates that its members derive 15% of their revenues from classified ads.

Skeptics aren't hard to find—and it is hard to imagine lugging your tv around with you while you search for a job or a new apartment. But the potential is real.

Public perception

Studying the shoppers

(Continued from Page S-2)

The national study found a huge difference in penetration between families with incomes under $8,000 and those with incomes over $25,000. Only 49% of the former had access to the shoppers while 75% of the latter had access.

Again we may assume the higher income families are more likely to have their own homes while the lower income families are more likely to be in apartments. Of course it is an advantage to shoppers to concentrate delivery in the high-income areas. After all, these are the residences advertisers want to reach.

Other attributes which correlate with income also distinguish between levels of access to shoppers: The national study showed 49% of the 65-year-old and older group receive shoppers; 46% of those without a high school degree and only 33% of all nonwhites receive them.

That shoppers are more a product of the suburbs than other communities was documented in the national study as 67% of those living in their present community less than five years had access to a free paper compared with 55% of those living in the same community five years or longer.

In the national study, 72% of the local paid weekly readers and 69% of the local free paper readers also were regular daily newspaper readers (defined as those who read a daily four or more days in the past week).

The national study touches on a finding reported in the California study—that the shoppers are actually relied upon more by a generally lower demographic group, even though that group is less likely to receive them. The figures for reading thoroughness of free papers in the national study show 29% of all respondents who got the paper reported reading it thoroughly.

But 40% of middle income respondents, 37% of nonwhites and 34% of those living in their community less than five years reported thorough reading of free papers. The NAB contrasts these figures with the 74% of respondents to their 1973 national study, who picked dailies over free weeklies when asked which they read more thoroughly.

■ Our goal in California was to try to determine if the free papers were being substituted for the daily newspaper. We found that people used the shoppers as a supplement for dailies rather than as a substitute. Still, the shoppers were having an impact.

Three-quarters of the California residents said they received a free home-delivered paper and 42% said they got two or more such publications. A total of 23% who received them said they had been asked to pay for the papers at one time or other.

Other indications of the impact of these free papers in the California suburbs were that 62% of those receiving a free home-delivered paper could name it.

- Also, as Table 1 shows, the daily newspaper is the superior advertising medium, but the free home paper and even the store shopper gets a significant percentage of advertising readership and ad activity.
- 48% of those who receive free papers found them useful and 41% of those who get store shoppers found them useful. However, 33% of those receiving a home-delivered free paper said they thought it was a nuisance.
- As Table 2 shows, some 58% of those receiving the free home-delivered papers read editorial content; some 57% read advertising

Cable tv

(Continued from Page S-2)

"To use an easy example, suppose the Yellow Pages were available on cable tv and you could punch a few buttons to let your fingers do the walking," Mr. Sagan says. "The advantages there are obvious. When you start getting into retail advertising and so on, where an element of randomness is important, the situation gets more complex. But there's simply no question that cable is going to be a competitor."

The question, of course, is how much of a competitor, which leads to consideration of the impact of "electronic news" on print. There's little doubt that in its simplest form the video newspaper can provide a useful and more or less benign supplement to its paper-and-ink cousin.

"We feel it enhances the newspaper's position in the community," Mr. Moriarity asserts, since a video story may conclude with a note advising the viewer to read the newspaper for more detail. The paper also can run promotions for itself. Once, the *Globe-Gazette* was able to notify cable viewers that there'd be a three-hour delivery delay due to a press breakdown.

But what effect a full-blown interactive video newspaper drawing on comprehensive data banks might have is anybody's guess. "The consumer has not yet spoken," one source notes. Apart from tests here and there, little market research has been done.

content. We note also that about 9% of those who don't receive such papers at their homes report reading the editorial and advertising content. This is probably an indication of the amount of secondary readership for the shoppers—some people who don't get them seem to read them at the homes of relatives or friends.

- 77% of respondents who reported reading any portion of their shoppers read both advertising and editorial matter.

But the California study could not document a greater reliance on shoppers among those who did not receive a daily newspaper. There was no perceived difference in use of either the home delivered or the store shopper based on whether the respondent subscribed to a daily newspaper.

What we did find—and this seems to relate to shopper use in the suburbs and distances more removed from the central city—was that subscriptions to a metro daily drop as the residential distance from the heart of the city increases. And as the distance from the central city increases, the perceived utility of home-delivered shoppers increases. But there is no difference in perceived usefulness of the store shopper at greater distances from the central city.

The California study tried to put respondents in three income categories based on the interviewer's impression of what family income might be depending on the size of home, number of cars and other visual impressions. Hence the division of below $10,000, $10,000 to $20,000 and above $20,000 income is certainly a fallible guess. But the findings based on income seemed to gel with those of the national study.

We found that as income increased perceived value of the store shoppers decreased: these papers were used more by low-income residents. There was a similar trend for the home-delivered free papers, but not as distinct as for the store papers.

The California study also concluded that people make a distinction between home-delivered free papers and store shoppers, with the former rated more useful.

To briefly summarize the main findings of the two studies on free-distribution newspapers, both investigations found the papers available to the majority of residents, with suburban areas more likely to receive them and to use them more heavily for both advertising and editorial content.

Both studies indicate the more wealthy residents have greater access to the throwaways, but these papers are most influential among middle and lower-income residents.

But the best documented finding of the two surveys was the evidence that free home-delivered shoppers are not being taken lightly by residents. These papers are a source of information and an advertising medium, and are accepted in today's marketplace.

The findings should not be a cause for alarm among daily papers, but the evidence suggests these shoppers are competitors that must be taken seriously.

- Do daily publishers take them seriously?

To find out, we asked publishers and managers of 13 paid-circulation papers in the Southern California area some questions.

Asked to name papers they considered competitors of their own newspaper, the publishers were allowed to list four each. In this group, 14 free-circulation papers were named.

"What other papers in the area compete with you for advertising and/or classified ads?" we asked, and this group of answers yielded five more shoppers.

When we probed further about the effects of shoppers and the free newspapers found only in retail store racks, we got the replies shown in Table 3. It seems there's a high awareness of shoppers but the concern is primarily in ad sales. A substantial number of publishers were concerned about the store rack shoppers, though several mentioned these effects were slight or limited to classified advertising. (One publisher said "every ad they get is one we lost.")

Finally, we asked the publishers, "What are your projections for the future of the shoppers in this area?" Negative predictions were given by 60% of the paid-circulation managers; 20% said shopper prospects were good.

Among the two extremes was one publisher's comment, "If I owned a shopper, I'd be optimistic." Another said, "If they show signs of becoming important, we will preempt the field," by putting out a shopper too. #

"It's too early to even be able to ask intelligent questions," Mr. Sagan says.

- Despite gloomy predictions in some quarters, nobody is seriously suggesting that suburban newspapers will wither away altogether under the cable tv onslaught.

"I just don't see it happening," says Jim Elsener, SNA executive director. "I see cable tv as filling another niche."

From an advertiser's point of view, he says, "there are problems associated with all media and cable gives you a few things that newspapers don't give you and a few things that broadcast doesn't give you. But I really don't think that, unless there's a drastic change in people's habits," that it'll have a major impact on the suburban press. "The danger is more on the network side than on newspapers."

John Rothman, director of research and information technology for the *New York Times*, concurs. "People will always want to read. You can't take your tv to the bathroom or on the train or to the barber shop. It's hard to browse (with tv) and it's hard to read long articles. Tv as a medium for textual information is best suited for terse items that can fit into a screenful of say, 100 words," he adds, observing that tv might be useful for directories, catalogs or schedules.

Besides ease of use, another factor that may hinder the spread of electronic newspapers is cost. Columbus, O.-based CompuServe, a subsidiary of H&R Block, offers subscribers an electronic version

Explanatory note

These syndicated show top tens for the top 26 through 50 markets are based on average designated market area household ratings as reported in the NSI sweeps books covering May 1 to 28. Ties are listed in order of total households reached.

The lists were compiled for ADVERTISING AGE by a broadcast research expert. If a show ran twice a day, it was considered twice for these rankings. Syndicated movies were not included. All times are local and p.m. unless marked a.m.

"PM Magazine" co-hosts Danielle Folquet and Mike Cerre break out the bubbly for their recent debut in the New York market. The show is currently running on more than 90 stations.

Domestic wines gain at expense of imports

By JOHN C. MAXWELL JR. and DONNA M. MATTEI

Wine industry sales in 1979 grew some 10.2% over 1978, raising per capita U.S. consumption to 2.17 gals. The domestic segment was up 13.8%, while imports fell 2%.

In the various categories of taxable removals, still wines continued as the largest force in the industry, with sales up 13.3% over 1978. Effervescent wines also maintained their growth, rising 7%. Vermouth and natural wines dropped in 1979, with respective losses of 11.3% and 8.5%.

Total industry taxable removals posted a gain of 10.3%, mostly accounted for by still wines, which captured some 85% of the 1979 total.

Domestic sweet wines continued to decline, dropping 26.7%. The domestic dry and sparkling segments registered respective volume gains of 6.2% and 5.1% from 1978 levels.

- E. & J. Gallo remained the premier U.S. wine producer with a gain of 5.3% in sales, but dropped more than a point in market share. The Wine Spectrum, which includes Taylor, Great Western, Sterling and Monterey, moved into fourth place with a gain of 20.2% over 1978. Strong increases were also posted by Gibson and Sonoma, with gains of 26.9% and 20.9%, respectively.

Imports in 1979 declined 2% from 1978. While Italian wines account for more than half of the import market (with a 52.8 percentage), they showed only a modest gain of 6.5%. This represented a severe shrinkage from Italian gains of previous years. The increased promotion received by Italian wines as well as their moderate prices, associated with good quality, are reasons for their continuing popularity in the U.S.

- French wines dropped 7.5% in 1979, but remained in second place with a market share of 16.5%. Due to high prices, we expect to see French wines continue to lose share. German wines showed the largest 1979 decline, dropping 14.9%. This was due partially to cold and rainy weather during the vines' flowering period, which results in underdevelopment. Smaller supplies of grapes may push prices up, causing U.S. consumers to turn further from German wines to lower-price imports and domestic vintages.

Spanish and Portuguese wines posted respective 1979 volume losses of 11.6% and 6.1%.

We look for continued growth in the U.S. wine industry for several reasons. As noted, domestic wine consumption reached 2.17 gals. per capita in 1979. Americans are just beginning to enjoy wine, and there is a tremendous potential for increased consumption. Higher levels of education, more women holding good jobs and increased travel abroad by Americans can positively influence the amount of wine consumed in the U.S.

Wines are also more defensive in times of economic stress in that they are often consumed with meals. Also, in more and more states, wine is becoming available in supermarkets. This could have a tremendous impact on sales because special trips to state stores or liquor stores would no longer be necessary.

Although we expect to see more purchasers of wine in the years ahead, we also expect those who already purchase wine to continue doing so at a higher rate. #

The writers are with Lehman Brothers Kuhn Loeb, New York.

BERNARD D. KAHN

NEW YORK—Bernard D. Kahn, 58, head of the new product development consulting organization bearing his name, died of a heart attack here July 22.

A specialist in the development of product planning and new market identification, Mr. Kahn established his company in 1968 with Don Buckley, former creative director at Foote, Cone & Belding. The company was known for two years as Kahn/Buckley Associates and, in 1970, with Mr. Buckley's departure, became Bernard D. Kahn Associates.

Mr. Kahn joined Grey Advertising in 1958 as a copy group head from Ted Bates & Co. He was elected a vp in November, 1959, later became a Grey creative director and, in March, 1965, was named exec vp-creative services. He began his agency career in Philadelphia and moved to New York to serve at the old Milton Biow Co. and Lennen & Newell.

J. LUCIAN SMITH

ATLANTA—J. Lucian Smith, 61, retired president of Coca-Cola Co., died of a heart attack July 19 at Lake Lanier near his home here.

Mr. Smith joined Coca-Cola in 1940 in the company's bottling operation. He worked at a number of company-owned plants across the country and was named general manager-bottler sales in 1961. In 1965, he was appointed assistant marketing director for carbonated beverages. Two years later, he moved to Houston to organize the newly-acquired Duncan Foods business into the Coca-Cola Foods division.

Mr. Smith was named the first president of the foods division, which by then included Minute Maid. In 1971, he was named president of Coca-Cola USA, the domestic soft drink division, and president of Coca-Cola Co. in 1974. He retired from that post last August but remained as a director.

His early retirement last August was announced by chairman J. Paul Austin, and company officials noted then that Mr. Smith had a history of heart trouble. Mr. Smith did not comment on his abrupt departure, but there were reports that he left under pressure from Mr. Austin, who wanted to appoint a group of vice-chairmen from which the chairman's own successor would be selected. #

Car makers tell revival plans

By RALPH GRAY

DETROIT—Car makers will spend money on 1981 launch marketing as if they had it. Not even whopping losses will muffle the ad drums.

General Motors' F. James McDonald spoke for all when he said of GM, "I don't think we get nervous on ad budgets in economic downturns. That's probably when you need the most advertising. If you set up a good solid program, you've got to hold in there with them. We don't gyrate up and down because of economic downturns."

Downturn is a mild word for what's been happening. GM for the second quarter lost $412,000,000, Ford Motor Co. dropped $468,000,000, Chrysler Corp. lost $536,000,000 and American Motors Corp. dropped $85,000,000.

It's enough to blunt Detroit's eternal optimism. Mr. McDonald, exec vp for GM's North American automotive operations and probably the company's next president, forecast a "long, slow, gradual climb" out of the sales slump.

"We say May bottomed at 7,200,000 cars on an annualized basis. June saw a turn up to 7,800,000. I don't believe any of us think there will be a boom and sharp upturn," he said after a speech to the Management Briefing Seminar of the University of Michigan in Traverse City, Mich.

"Next year we [the auto industry] don't have to peddle floor mats and hood ornaments for the trunk. We have some real juice," Bennett Bidwell, vp car and truck group of Ford North American operations, earlier told the *Automotive News* World Congress in Dearborn, Mich.

"We have Chrysler's K-bodies [new compacts], GM's new J- cars [subcompacts due next spring] to go with their great X-bodies [1980 compacts] and Ford's new world cars, Escort and Lynx. Maybe we will never roll the imports back to the ocean, but we will roll somebody back somewhere for a change.

"We will light a candle and hopefully a fire and possibly a conflagration in the marketplace. Methinks we will recover by and by," Mr. Bidwell said.

Car sales so far this year are down 38%, and the import share has skyrocketed with concerns over fuel economy.

Fuel economy is central to everyone's marketing strategy, it appeared at both the World Congress and U. of M. seminar.

Chrysler's new corporate ad campaign this fall—with chairman Lee Iacocca still as spokesman—is "The American way to beat the pump." Jack Givens, director of

Reagan's ad agency adds old teammate

By LEAH ROZEN and RICHARD L. GORDON

NEW YORK—The top command shift at Ronald Reagan's Campaign '80 ad agency here has allowed senior Reagan adviser Peter Dailey to replace a newcomer to his circle with an old ally from the 1972 Nixon campaign.

Former Norman, Craig & Kummel president Jack Savage resigned unexpectedly last week as exec vp-general manager of Campaign '80. The exec had been plucked from a job as advertising and marketing consultant to the Federal Trade Commission only a month ago to work on the campaign.

▪ His immediate replacement was another seasoned agency exec turned consultant, Richard T. O'Reilly, part of Mr. Dailey's November Group team that put together President Richard Nixon's 1972 campaign. Mr. O'Reilly will be president-general manager of the Reagan campaign.

Mr. Savage told ADVERTISING AGE that his job as general manager "was not what I expected it would be." But his departure was "amicable," he insisted, and there had been "no political differences, no differences in advertising thinking or strategy to date.

"We just had a difficult time trying to get it together among us all," he said when reached in Washington last week.

▪ In an earlier interview Mr. Savage had expressed surprise that he had been tapped for the Reagan campaign job (AA, June 30). While his ad business credentials are

Bache says it beats the sun for its clients

Even before the sun comes up, Bache Halsey Stuart Shields, New York, is working to benefit its clients, says this new spot, which breaks today on the NBC-TV "Today Show" Money Matters segment. Actor Raymond Burr, in his first tv voiceover commercial role, describes Bache's "winning attitude." McCann-Erickson, New York, is the agency for the stock brokerage house.

McCann sued by car rental client

By RICHARD KREISMAN

CHICAGO—Lawyers for a group of Florida licensees of Budget Rent A Car have begun taking depositions in a suit charging that McCann-Erickson here failed to provide them with advertising services, resulting in a loss of profits.

The suit, filed in federal district court in Orlando by Budget Rent A Car Co. of Florida, master licensee for the state, accuses the agency of breach of contract and negligence in its handling of regional co-op ad dollars from September, 1978, to January, 1979. Although damages are not specified, a source close to the case called them "substantial."

McCann-Erickson and licensees had no comment on the case. Lawyers for both sides were not available. McCann also is agency for the national Budget account. Execs there also declined to comment, calling it a matter between McCann and the franchise group.

The suit charges that McCann-Erickson "failed to analyze and study ... marketing and promotional requirements and prepare advertising recommendations ... failed to plan, create, write and supervise the production of all advertising ... failed to order and contract for necessary space, time, talent and materials."

According to the complaint, the licensee and Budget Rent A Car Corp., Chicago, agreed to contribute a total of $65,000 to a regional ad fund administered by McCann-Erickson. The agreement specified that the licensee would not receive the money if it dropped McCann-Erickson as its agency.

The suit charges that as a result of McCann's actions, the licensees "lost income and profits that they would otherwise have derived directly" from the ad campaigns "had the appropriate advertising programs ... been placed ..."

"This is a highly unusual case," said Stephen Durchslag, a partner at Sidley & Austin, Chicago, and a specialist in marketing law. "I've never heard of a dispute over not providing services." Mr. Durchslag added the question of profits loss is purely speculative and difficult to prove.

However, another lawyer said breach of contract lawsuits on the part of a franchisor are not uncommon. Thomas A. Mass, a partner at Mass, Miller & Josephson, Chicago, who has represented both franchisors and agencies, also noted that loss of profit claims are hard to prove.

Since it fired McCann in early 1979, Budget Rent A Car of Florida, which controls franchises in Orlando, Tampa and Fort Lauderdale, has formed an in-house agency. The Florida franchisee spends more than $1,000,000 annually on advertising in local and national media, said one source.

The case moved to Chicago and St. Louis last week as lawyers took depositions from Morris Belzberg, president and chief executive officer of Budget Rent A Car, Meg Jacobson, vp-advertising and consumer marketing and Steve Maxwell, a former account exec at McCann, who now works at D'Arcy-MacManus & Masius, St. Louis. #

last minute news

Gleason named president of Treacher's

PHILADELPHIA—Jack Gleason has been named president of Arthur Treacher's Fish & Chips, a subsidiary of Mrs. Paul's Kitchens, succeeding Kenneth L. Horstmyer. Mr. Horstmyer, a former exec vp at Burger King, joined Treacher's in March. Mr. Gleason, founder and owner of a suburban Philadelphia restaurant called Fagleysville Inn, recently has been acting as a restaurant consultant to Mrs. Paul's. C&W, Chicago, is the Treacher's agency.

A-B, Miller brews continue to barrel ahead

NEW YORK—The startling market share growth of Anheuser-Busch and Philip Morris' Miller Brewing between 1970 and 1979 spells future bad news for smaller breweries, a just-released beer study indicates.

The giant rivals last year accounted for a combined 55% share of the 171,800,000 barrel market, a gain of 34% over their 21% combined share in 1970, according to *Impact* newsletter's "American Beer Market Review & Forecast" edition.

In contrast, the next three largest brewers, Schlitz, Coors and Pabst, "only increased their combined share of the market since 1970 a bare 0.9% to 25%," the study notes.

- With the industry's growth pegged at a moderate 3.4%, compared with 5.4% in 1977 and 4.3% in 1978, the study concludes that "growth of major brewers will have to be at the expense of other lesser brewers and will lead to an environment of product segmentation and proliferation. While the total number of brands will decrease as more smaller brewers close their doors, the number of brands controlled by major breweries will increase. In the 1980s, the name of the brewing game will be segmentation, advertising and marketing."

The study points out that while Miller Brewing still is enjoying better barrelage growth, "It appears that Anheuser-Busch has the greater strength because of its broad line of well-positioned brands. A-B, the nation's No. 1 brewer, markets Budweiser, Michelob, Michelob Light, Busch Premium, Busch Bavarian, Natural Light and is test marketing Wurzburger, an import. Miller Brewing, the nation's second largest brewer, has Miller High Life, Lite and Lowenbrau, and is experimenting with a German import, Munich Oktoberfest.

A-B's market share last year rose to 30.4% from 28.3% in 1978. Miller's rose sharply to 24.5%, compared with 19.4% the previous year. The Miller growth is even more dramatic when one considers that the brewery only had held a 3.4% market share when it was acquired by Philip Morris in 1970.

Miller's 1979 advertising outlay totaled $75,000,000, compared with $87,300,000 for A-B. The total invested by the industry for advertising last year was $370,000,000.

- The study notes that imported beers, led by Heineken (Van Munching & Co.), surpassed malt liquors as the fifth largest of six beer categories in 1979. Imports shipped 4,400,000 barrels of beer to the U.S. last year, up 25.7% over the previous year.

Copies of the 60-page study, which contains more than 40 tables, are available at $75 each from Tasco Publishing Corp., 305 E. 53rd St., New York 10022. #

Nets dominate in markets 51 through 100

By MAURINE CHRISTOPHER

NEW YORK—Television is pretty much ABC, CBS and NBC's world out there in Arbitron markets 51 through 100. That conclusion jumped off the page when audience share rankings for those cities were put together by a broadcast researcher for ADVERTISING AGE.

This is part two of the May sweeps share analysis. An earlier story covered markets 1-50 and presented a somewhat different picture with more independents fighting for viewers (AA, June 30). Part three will wind up this series with markets 101-150.

From San Antonio to Waco-Temple the stations in each Arbitron area of dominant influence are ranked in terms of sign-on to sign-off household shares. Home shares for prime, access and early periods also are included in this report.

The May sweeps are among the material most buyers will consult when making their purchases for fall. They cover diary reports for viewing for April 30 to May 27.

▪ The overriding conclusion to be drawn from these tables: The potency of the Big 3 commercial over-the-air networks remains awesome across the country. The dominance of the three giants stands out even more in these markets with their dearth of local indies or reported distant indies than it did in the case of the first 50 markets covered in the earlier article.

The home town ABC, CBS or NBC affiliates took the No. 1, 2 and 3 positions in varying order in all markets up to 100 for full-day shares. But network popularity fluctuates widely across the land.

Fragmentation in these markets came more from overlapping network affiliates turning up in the same a.d.i. than from independents. In the May Arbitron report there were no indies registering a three sign-on to sign-off share in 17 of markets 51 through 100; this was the cutoff point for inclusion in the market-by-market tables.

Stations chalking up the most enviable numbers sign-on to sign-off were KYTV (NBC), Springfield, Mo., 47; WIS-TV (NBC), Columbia, S.C., 46; KELO-TV (CBS), Sioux Falls, 44; WJXT (CBS), Jacksonville, 43; WCYB-TV (NBC), Bristol-Kingsport, 40, and KOLN-TV (CBS), Lincoln-Hastings-Kearney, both with 40.

Among the outstanding prime time averages for the month: 41, KELO-TV (CBS), Sioux Falls; 39, KYTV-TV (NBC), Springfield, Mo.; 38, WCYB-TV, Bristol; 37, WBIR-TV (CBS), Knoxville and WAFB-TV (CBS), Baton-Rouge; 36, WKRG-TV (CBS), Mobile-Pensacola, KOLN-TV (CBS), Lincoln, Neb., and WKYT-TV (CBS), Lexington, Ky.

WIS-TV outranked its competition in all four columns, with a 40 in prime, 65 in access and 47 in early fringe. Access in many markets dramatically demonstrated the importance of program choice. WIS-TV won the network lead-in access period with ITC's Muppets on Monday, playing with four days of "Happy Days Again" from Paramount.

In San Antonio, KSAT-TV chalked up a 40 access share with "PM Magazine" from Group W. WNEM-TV, Bay City, scored 42 with "M*A*S*H" five days a week. KCCI-TV, Des Moines, pulled a 44 audience access share with "M*A*S*H" Monday through Thursday and a Friday press conference. "M*A*S*H" Monday through Thursday and "Hee Haw" from Yongestreet drew a 44 for WKRG-TV in Mobile-Pensacola.

The only satellite-imported superstation showing up far from home in these lists was WTBS, Atlanta. Now being fed by Satcom I to more than 8,000,000 cable homes throughout America, WTBS rated well enough in the Arbitron diaries to make the lineup in four cities in this analysis.

A three was reported for WTBS in Pensacola, Chattanooga and West Palm Beach. The Turner Broadcasting station pulled a four full telecast day share in Huntsville-Decatur-Florence. The best part of the Huntsville-Decatur tv audience pie was split by five major net affiliates—two each for NBC and ABC, but CBS' WHNT-TV was way ahead in access and, with a 42 share, comfortably in front of all the other categories.

Six affiliates had reportable audiences in the West Palm Beach market—two for each major net. In this case, the comfortable leader was WPTV, West Palm Beach, an NBC station, which drew a 51 share in access time by stripping 20th Century-Fox' "M*A*S*H."

WUHE-TV, a uhf station started only last year, had established itself well enough to be a noticeable No. 4 in the Rochester, N.Y., market with a 13 full telecast day share. That's high enough to place among the country's leading indies in that category. #

These are the May sweeps household audience share average for the area of dominant influence for the full telecast day, prime time, access and early fringe in markets 51 through 100. The figures were compiled for ADVERTISING AGE from the Arbitron books by a veteran tv researcher. Markets are listed in total tv households rank order and stations in the order of their sign-on to sign-off ranking in each market.

In EDT and PDT areas, prime time is 8 p.m. to 11 p.m., seven days a week. Access time is Monday-Friday, 7:30 p.m. to 8 p.m., and early fringe is Monday-Friday, 4:30 p.m. to 7:30 p.m. In CDT and MDT zones, each is one hour earlier. The Arbitron book notes that some stations are on the air longer than others.

Initials in parentheses indicate network affiliation with ABC, CBS or NBC; stations without initials are indies.

These lists include local network affiliates and share runners-up in each market whether local or indies or distant station, affiliates or independent. Not all stations are listed. A blank under any column means not reported.

New ads, new cities

The superpremium beer from Adolph Coors Co., Herman Joseph's 1868, is getting a new campaign as three new test sites (Albuquerque, Tucson and Odessa/Midland, Tex.) open up. It replaces an earlier "big night" effort (AA, May 19) in other Texas and California tests, too, beginning Aug. 18, via Ted Bates & Co.

NEW HERMAN JOSEPH'S. A BEER TO REMEMBER.

K-C picks Anyday to fight J&J lead

By JENNIFER ALTER

CHICAGO—Kimberly-Clark Corp. will launch Anyday Pantiliners, under its New Freedom brand, nationally next month with a network tv, consumer magazine and sampling drive breaking in mid-October.

Anyday Pantiliners, to be shipped Sept. 1, are similar to K-C's Kotex Lightdays Pantiliners, but they are said to be more absorbent and slightly heavier than that product, launched in 1975 with $3,000,000 in ad support.

Observers believe Anyday is K-C's attempt to gain the share it never attained with Lightdays. Soon after the Lightdays introduction, Johnson & Johnson countered with Carefree Pantishields, which met with a more enthusiastic reception, sources report.

Anyday, as its name suggests, will be recommended as a liner for use any day. It will be marketed in boxes of 16, 30 and 48. The target audience is similar to that pegged by Carefree—upscale career women, highly educated and on the go, with an unstated characteristic of sexual activity (the development project was code-named "Operation Score").

▪ To reach this group, the introductory media plan includes ads in November issues of *Cosmopolitan*, *Glamour* and *Vogue*. Ads also will run in shelter books, such as *Better Homes & Gardens* and *Good Housekeeping*, and in general in-

Media Corp. sold; creditors in dark

By LOUIS A. FANELLI

NEW YORK—Nearly one year to the day after Media Corp. of America announced that it owed media more than $13,000,000, but expected to stay in business, the media buying service filed for reorganization under Chapter 11 of the Bankruptcy Act.

Although those following the troubled company expressed little surprise over this development, more than a few eyebrows and questions were raised when court papers, filed here Aug. 1, revealed the company is being purchased.

The new owner, Delbert W. Coleman, a Chicago investor and president of Enness Realty Corp., Chicago, has agreed to put up $200,000 in what appears to be the purchase price. According to his lawyers, $100,000 will be used to help repay creditors, and the additional $100,000 will be used as a capital investment in the company.

▪ The $100,000 that will be distributed among creditors is little more than a token, however, since Main Lefrentz & Co., accountants for Media Corp.'s creditors' committee, said that current outstanding debts to creditors amount to approximately $7,500,000.

A number of sources, who asked not to be identified, speculated that Mr. Coleman's purchase of MCA was specifically engineered as a tax write-off. The tax advantage on a $7,500,000 loss—the money owed creditors—could be approximately $3,750,000.

While little is known here about Mr. Coleman, he is said to have dealings in Chicago and Las Vegas real estate and to have been involved in an unsuccessful attempt to purchase the Aladdin Hotel in Las Vegas. Repeated attempts to contact Mr. Coleman were unsuccessful.

The list of creditors still owed money by Media Corp. reads like a "Who's Who in Media" list. Among the 20 largest creditors are Metromedia Inc., owed $105,851; Pacific Outdoor Advertising, owed $153,000; *People* magazine, about $114,000; *TV Guide*, approximately $117,000; *Penthouse* International, $31,304, and Metro Sunday Newspapers, $39,084. Jointly, the 20 creditors are owed approximately $850,000. In all, there are some 2,600 creditors.

Under a payment plan first worked out by Albert B. Shepard, president of Media Corp., and its creditors committee last August, Mr. Shepard agreed to personally guarantee 8% of the outstanding debt, payable over a three-year period. Now, with the first payment due this winter, the bankruptcy filing may make it even more difficult for creditors to collect.

Reached by telephone, Mr. Shepard refused comment on the Chapter 11 petition or the part Mr. Coleman is playing in the company. He is apparently conducting business at the Media Corp. ad-

Convention-al tv

Affiliates competing, but nets don't mind

By COLBY COATES

NEW YORK—For many practitioners of television news, the 1980 presidential conventions are watershed events, marking the passing of the film and land-line news era while firmly establishing a new age of electronic journalism and satellite distribution.

Nowhere is this changing face of tv news more apparent than at the local station level where news directors, fully aided and abetted by their respective networks, are going after major national and international stories, but reporting them from a hometown perspective. The conventions are prime examples.

"Local coverage like this only adds to the network coverage so we certainly don't view it as a competitive situation," said David Burke, vp-assistant to the president, ABC News. "Strong coverage helps the local product, which certainly is to the network's benefit."

▪ Because of the obvious national importance of the presidential conventions and the availability of the electronic gear, the 1980 conventions are setting new standards in intensive locally oriented coverage—and in attracting more journalists than delegates. At the opening of the Democratic convention here this week, the radio and tv gallery of the 1980 Democratic Committee expected more than 3,000 broadcast reporters representing 400-plus organizations. Over-all, more than 11,000 news-connected personnel will be on hand.

At the 1976 Democratic gathering, also in New York, 2,000 broadcast reporters showed up. Four years ago the Republicans attracted approximately 1,500 broadcast reporters, compared to the 2,300-plus on hand in Detroit for Ronald Reagan's moment of glory.

▪ All this comes as no surprise to Philip McHugh, chairman, McHugh & Hoffman, the network and local news consultancy. "Now that the technology and satellites are available, local stations are able to personalize a convention," he said. "The idea is to let the local viewers know what their delegates

P&G tests Ivory shampoo as lower-price entry

CINCINNATI—Procter & Gamble Co. will move Ivory shampoo into test in St. Louis next month in 7-oz. and 16-oz. white bottles, in normal-to-dry and oily formulas. Supported by tv breaking Sept. 29 and couponing, Ivory will be positioned as a lower-price brand. Agency not determined. P&G's Head & Shoulders conditioning formula shampoo, after a year-long St. Louis test, will go national late this month with tv and couponing beginning Oct. 12. TLK, Chicago, handles.

MacDougall departs own shop for SSC&B posts

NEW YORK—Malcolm MacDougall, exec vp-director of creative services and co-founder of the Boston-based Humphrey Browning MacDougall agency, is joining SSC&B here Sept. 2 as exec vp-creative director, director and executive committee member. He'll report to his former BBDO associate, John Bergin, SSC&B vice-chairman and director of creative services.

Case & McGrath, Jordan talking merger

NEW YORK—James Jordan Inc. and Case & McGrath, billing $40,000,000 and $42,000,000, respectively, are engaged in merger talks. The proposed marriage would set up an account conflict involving National Distillers' brands at Case and Kobrand Corp.'s Beefeater gin at Jordan. Sources close to the negotiations said Beefeater would be retained should the merger go through.

Access period hot territory in smaller markets

By MAURINE CHRISTOPHER

NEW YORK—Which syndicated series do well with viewers in the smaller markets in the much-sought-after access half hour?

Quizzes, "M*A*S*H," "PM Magazine" and the Muppets all drew some whopping audience shares in markets 101 through 150 as measured in the Arbitron May sweeps.

These shows rose like cream on the morning milk down on the farm when a top ten access list was compiled for territory ranging from Colorado Springs to Albany, Ga. This is part three of a 150-market analysis of the audience share competition between affiliates and independent stations across the country.

- The highest access score in markets 101 to 150 went to KVVU-TV, a Las Vegas indie, which got a 58 household share by stripping 20th Century-Fox' hit sitcom as "M*A*S*H 2." The lead-in was "M*A*S*H 1."

Runner-up with a 57 share was KNOE-TV, Monroe, La.-El Dorado, Tex. This CBS affiliate was one of three access top tenners that triumphed by going counter to the stripping trend. KNOE-TV filled the valuable half hour which leads into network prime time with one day of "Hollywood Squares," from Filmways, mixed with two days of "Family Feud," from Viacom and two days of "$100,000 Name That Tune," from Sandy Frank.

Other stations on the small-town top ten access list were WCTV, Tallahassee, 56 with "M*A*S*H," KFDM-TV, Beaumont-Port Arthur, Tex., 53 with "PM Magazine" from Group W, and WMAZ-TV, Macon, Ga., 52, thanks to "Tic Tac Dough" from Colbert TV Sales. The same game drew a 51 for WCSC-TV, Charleston, S.C., and WABI-TV, Bangor, Me.

A three-way eighth-place tie rounded out the winning circle. KLBK-TV, Lubbock, scored a 48 access share with a "Joker's Wild" strip. KFYR-TV, Minot-Bismarck-Dickinson, matched this by scheduling two days of "Family Feud" and one each for "Price Is Right," "$100,000 Name That Tune" and Muppets.

WSFA-TV, Montgomery, struck a blow against stripping by offering a different attraction during its choice half hour each day of the week, and in the process drew an average monthly share of 48. Booked in its access half hour from Monday through Friday were the Muppets, "Wild Kingdom," local news, "$100,000 Name That Tune" and "Family Feud." Largest share was registered by the news—a 54—followed by Miss Piggy & Co. at 53.

- Several of these same stations were standouts in the sign-on to sign-off column as well. Leading the list in that respect was KNOE-TV, Monroe, a CBS affiliate, with 58.

Tables in this analysis, like those published earlier for markets No. 1 to 101, include shares for early fringe and prime time as well as sign-on to sign-off and access. Any station from within or without the market was included if Arbitron credited it with at least a three sign-on to sign-off share. #

These are the May sweeps household audience share averages for the area of dominant influence for the full telecast day, prime time, access and early fringe in markets 101 through 150. The figures were compiled for ADVERTISING AGE from the Arbitron books by a veteran tv researcher. Markets are listed in total tv households rank order, and stations, in the order of their sign-on to sign-off ranking in each market.

In EDT and PDT areas, prime time is 8 p.m. to 11 p.m., seven days a week. Access time is Monday-Friday, 7:30 p.m. to 8 p.m. and early fringe is Monday-Friday, 4:30 p.m. to 7:30 p.m. In CDT and MDT zones, each is one hour earlier. The Arbitron book notes that some stations are on the air longer than others.

Initials in parentheses indicate network affiliation with ABC, CBS or NBC; stations without initials are indies.

These lists include local network affiliates and share runners-up in each market, whether local indies or distant stations, affiliated or independent. Not all stations are listed. A blank under any column indicates not reported.

Coty's new scents of 'discovery'

To know a woman is to never stop discovering her, says actress Sophia Loren, who feels the same about perfume, especially her own. Sophia by Coty will debut this fall in a commercial created by Martin Landey, Geers Gross. Voiceover concludes, "Like the woman who inspired it. . . . always magnificent."

Vitt loses 'pirate' case

By LOUIS A. FANELLI

NEW YORK—A state supreme court jury here has acquitted four former executives of Vitt Media International on charges of conspiring to pirate away accounts from the time buying service.

Vitt's suit charged that the four defendants, Harvey (Mike) LaTerre, ex-Vitt senior vp, and three other execs—Caroline Fraser, Sheri Millman and Leonore Yoss—conspired to leave Vitt with a number of the accounts they planned to service through a new media buying service.

While minutes of the trial were unavailable, the jury voted unanimously to acquit the defendants after a 12-day trial. Vitt had asked the jury to award it $518,000 in damages.

▪ The suit was filed in late December, 1977, a few weeks after Mr. LaTerre resigned from the company. Vitt alleged that he had "stolen VMI employes to staff a competing business, pirated and/or solicited VMI clients to shift their business from VMI" to his new company, Advertising Media Services, and "misused and misappropriated VMI's confidential, proprietary information, know-how and trade secrets."

VMI president Sam Vitt was unavailable for comment, but a company exec said the verdict would be appealed. When asked what he thought of Vitt's chances of winning an appeal, Jessel Rothman, attorney for Mr. LaTerre, said, "they have a zillion to one chance."

Another Vitt contention in the case revolved around Mr.

Wary revival of product ads

Gas wars tilt to high grade

By JOSH LEVINE

NEW YORK—Gasoline product advertising, considered as dead as the dinosaurs decomposed into fossil fuel, is returning in guilty spasms as gas marketers flood the country with higher-octane unleaded product.

Gulf Oil Co., rolling out a new brand, will be joined by Exxon Co. USA in September, Atlantic Richfield Co. later this year, and possibly Texaco, as most major oil marketers jostle to establish a position in the growing market for higher grade unleaded gas.

The impending activity in a segment that now occupies less than 1% of the total market has already provoked a bristling response from Amoco (Standard Oil Co., Indiana), the leader in unleaded premium, while Mobil Corp. and Shell Oil Co. which also have high-octane entries, are looking on warily.

The product itself comes at a good moment. Refiners are saddled with so much excess capacity that "you could walk from Houston to Arabia on the decks of full tankers," as one oil exec described it. A 7% decline in gas consumption left stocks of 262,200,000 gals. the first week of August, compared with 233,000,000 in the same week last year. Consequently, refineries are idling along at 70% of capacity.

That leaves both the room and the impetus to furnish the extra crude needed in the production of higher grade unleaded gas. At the same time, the nation's stock of octane-starved, "unleaded only" cars is growing, and the noise of knocks and pings from engines needing an octane fix is growing louder.

But the promotion of the product is making oil company advertising execs wince. Despite the sizable gas glut, product advertising that could be construed as a spur to consumption runs the risk of public and governmental finger-wagging.

"There's going to be increased gas advertising, but of a very temporary duration," said Jim Gordon, advertising manager, Gulf Oil Co. "The system is so backed up right now, something has to be done to stimulate it, but we're certainly not going to try to destroy the conservation ethic—that's here to stay. As long as we don't suggest leisurely Sunday drives through

Bergin's job: Coke consistency

By NANCY GIGES

NEW YORK—John Bergin, the new worldwide boss of the Coca-Cola account at McCann-Erickson, will be aiming for a "consistency of purpose" in directing the soft drink business at the agency, Interpublic's chairman maintains.

As Philip Geier sees it, Mr. Bergin will give Coca-Cola the "one-sight, one-sound" image around the world that the brand needs.

Mr. Bergin's over-all mandate is to bring leadership to the worldwide operations, but he also indicated that his first priority is to make sure that Coca-Cola advertising in this country is in good order. The new Coca-Cola management in Atlanta also has cited the U.S. business as getting immediate attention to improve soft drink profitability in this country.

"I hope that part of my job is to get around and see how the different Coke campaigns are going in different countries, which ones are working and which ones aren't. But I'm more at home in the U.S. I consider this new job the chance of a lifetime, to devote myself with all my heart to unseat Pepsi as the Nielsen leader. Right now I don't know if Coke is making that a No. 1 priority for me."

▪ The long-rumored move of Mr. Bergin to McCann to become the first worldwide head of the Coca-Cola business took place last week just after the Atlanta-based soft drink marketer made a number of organizational changes itself (AA, Aug. 11).

Mr. Bergin had been vice-chairman and director of creative services at SSC&B. Succeeding him as top creative exec there is

JOHN BERGIN: "Comforting to encounter a message that is consistent."

Execs call for risk-taking

CHICAGO—Marketing success in the '80s will hinge on trying some unconventional approaches, relying on intuition and having the guts to take some risks, a gathering of marketing executives was told Sunday.

At the opening sessions of the fifth annual ADVERTISING AGE Week conference here, attendees from around the world heard a message of accelerating change from two top advertising execs.

Both William Morris, president of Life Savers Inc., and Doyle Dane Bernbach group senior vp Robert Rees sounded the call for new and more creative ways of meeting the looming challenges.

Conventional wisdom, which advocates close study of demographics, a search for the "average" consumer and "retabbing the latest research report to gain another insight into what happened" is not for the astute marketer in the '80s, according to Mr. Morris.

Addressing the opening session of AD AGE Week, Mr. Morris asserted that the dizzying rate of change that lies ahead demands some "unconventional wisdom." In developing marketing plans, it's not enough to understand what happened. "Go beyond to understand why," he urged the audience assembled for the Marketing Management Workshop portion of AD AGE Week.

Fierce battle for local news viewers

By MAURINE CHRISTOPHER

NEW YORK—Nothing in tv is more hotly contested than the local news turf in major markets.

On-air personnel changes are frequent; for the luckier ones a job move can be reflected almost immediately in the ratings. Just a one point rating shift in the right direction can mean an additional $1,000,000 in annual billings for an affiliate in New York, Los Angeles and Chicago.

In the No. 1 tv market the reporters, sportscasters and backup anchors turn over often enough to make if difficult to remember who's where, though some of the star anchors have enjoyed long runs here.

- For an update on how the network affiliates and independents were faring in the intensified competition for news viewers, ADVERTISING AGE has prepared a three-city analysis of the Nielsen data for June and May. The data for New York, Chicago and Los Angeles were compiled by a broadcast researcher from the weekly reports from the metered sample. These were the only reports available at the time the analysis got under way. (July data later was checked for an update but not included in the tables.)

Once the figures for all the local newscasts were pulled out, tables were prepared to pinpoint the top five ratings and share leaders for June vs. May.

The most striking change came in New York at 11 p.m. where there was a five point rating swing and a nine point share swing from WABC-TV to WCBS-TV. Or put another way, Channel 2's late news, anchored by Roland Smith and Michele Marsh, gained enough ground over their late night WABC-TV counterparts, Ernie Anastos and Rose Ann Scamardella, to move into first place in ratings and share. But it was Warner Wolf, a sportscaster who jumped ship at WABC-TV to join WCBS-TV for more money and better treatment from the brass to whom much of the credit apparently was due.

Said to be making $300,000 to $400,000 at WCBS-TV, Mr. Wolf, whose appearances on the 6 p.m. and 11 p.m. news are peppered with "Let's go to the videotape" frequently second-guesses sports performers and coaches. He joined the Big Eye after going to court and making headlines to get free of WABC-TV entanglements. His last WABC-TV outing was on May 23, but he was not free to appear on WCBS-TV until June 10.

- Vince Manze, director of communications, WCBS-TV, gave Mr. Wolf a large share of the credit for WCBS-TV's improved June numbers—even before he got there. Mr. Manze pointed out that the publicity about the legal battles certainly called attention to the Channel 2 news. Full-page newspaper ads welcoming him to his new home must have helped too.

Despite Mr. Wolf's slot on the 6 p.m. to 7 p.m. news, the June Nielsens showed no ratings gains there over the time period winner, WABC-TV's "Eyewitness News" with Bill Beutel and Roger Grimsby at the controls.

Speaking for WABC-TV, Mike Hodak, research director, said the May, June and July measurements show that viewers left WABC-TV to sample the competition after Mr. Wolf switched stations, but they then made a choice and came back. He noted that his analysis of the second quarter hour in the late news, where sports is scheduled, indicates that Mr. Wolf has not evidenced the "holding power" to keep the viewers who tuned in the first quarter hour.

The July report as analyzed by AA's researcher shows WCBS-TV and WABC-TV neck and neck with an eight rating at 6 p.m. WNBC-TV scored a six. At 11 p.m. WABC-TV led with an 11 rating, followed by WCBS-TV with 10 and WNBC-TV with nine. (These averages excluded the abnormal Republican convention week.)

The best news ratings for indies in this June study were a seven for WNEW-TV's "10 O'Clock News" and a six for WPIX' "7:30 Action News." Both were up over their May sweeps levels.

- In Los Angeles for the months under scrutiny, nothing as dramatic as a court battle over talent contract took place, but in September KABC-TV will move up its first newscast of the day from 5 p.m. to 4 p.m. At 3:30 p.m., "World of People," one of the news magazines set to debut in this market, will be scheduled as its lead-in.

Already Los Angeles viewers get a heavy dose of local news. They can watch it starting at 4:30 p.m. on KNXT, the CBS station, which took that time period in June with a nine rating and a 28 share with Connie Chung at the helm. She gave up a network correspondent slot some years ago to move West for anchoring.

Her lead-in did not hold. From 5 p.m. to 6 p.m. KNBC pulled even with KNXT, both of them holding to May levels with an eight rating. "Eyewitness News," which had the lead in May was off the pace and placed third at a seven rating.

From 6 p.m. to 7 p.m. KNBC and KABC-TV's newscasts tied with a nine. That KNXT news hour, presided over by a variety of anchors, including Ms. Chung and Brent Musburger, off a point from May, placed third.

"Eyewitness News" on KABC-TV held the late news leadership in June, even though it was down slightly from May. The other two network owned stations were right behind, a point back and tied with an eight rating.

The biggest indie numbers in this program category in Los Angeles in June were registered by KTTV's "Metro News," which drew a four rating and an eight share at 10:30 p.m. and KHJ-TV's "10 O'Clock News," in with a four rating and a seven share.

The June leader in this city—KNXT's 4:30 p.m. program—fell off enough in July to drop it into fifth place in the rankings at a seven rating. KABC-TV's various editions of "Eyewitness News" captured the first three positions, leading off the list with a 10 for the 11 p.m. report.

Late news would seem to be a particularly choice slotting for advertisers in Chicago. June ratings and shares for this category in Chicago for the three network stations combined were 53% ahead of New York and 96% ahead of Los Angeles, AA's broadcast researcher pointed out.

The three network stations in total in Chicago scored a 49 rating to 32 in New York and 25 in Los Angeles.

The June-May tables for Chicago did not turn up much of an audience flow, but they did spotlight WBBM-TV's "10 O'Clock News" as the outstanding newscast performer in shares and ratings in these three cities. In June it scored a 20 rating and a 32 share, well beyond the levels of the news leaders in New York and Los Angeles.

In second place in news ratings in Chicago, without much change from May to June, was WLS-TV's "Eyewitness News Update," at 16 for June. Gains were scored by the 6 p.m. to 7 p.m. "Eyewitness News" and by independent WGN-TV's 9 p.m. news. WGN-TV climbed from a five rating and seven share to a six rating and a nine share.

No major anchors were being shifted. Well known faces like Bill Kurtis at WBBM-TV, Fahey Flynn at WLS-TV and Jim Ruddle at WMAQ-TV continue in their usual slots.

A tug of war erupted in July over who would sign up the PBS-popularized newspaper critics, Gene Siskel and Roger Ebert of the *Tribune* and *Sun-Times*, respectively Mr. Siskel had been doing reviews for WBBM-TV, but almost was lured away by WLS-TV, WBBM-TV paid him enough to keep him. WMAQ-TV hired Mr. Ebert to do its reviews several times a week.

In late July, WLS-TV shook up its whole weather staff. This seems to have been triggered by an expansion of the afternoon news.

In the July report, the No. 1 and No. 2 positions were unchanged, with the CBS affiliate holding onto first with its 10 p.m. newscast and ABC coming in second with "Eyewitness News." "Newscenter 5," from WMAQ-TV, dropped off a few points to tie for third place with WBBM-TV's "Channel 2 News" at 6 p.m. Both these shows were Nielsen rated at 10. #

This ADVERTISING AGE analysis is based on Nielsen metered measurements for weekday, Monday through Friday, newscasts for four weeks ending June 27 and four weeks ending May 28. May averages came from the monthly sweeps report. June figures came from the four-week averages printed in the Nielsen report for June 21-27. These tables were prepared by a free lance researcher with many years experience in television. In each city the leading programs were ranked by share and rating for May and June.

—'M*A*S*H,' '60 Minutes,' 'Dallas'—

CBS series top price list

By COLBY COATES

NEW YORK—Three CBS programs—"60 Minutes," "M*A*S*H" and "Dallas"—share the title of costliest commercial vehicles for the 1980-81 prime time season, currently on hold pending settlement of the actors' strike.

For its second annual prime time unit price survey, ADVERTISING AGE estimates that the three programs, ranked Nos. 1, 3 and 5, respectively, at the conclusion of last season, have brought the network approximately $150,000 per 30-second unit. "Dallas" carries a $145,000 price tag, but that figure is said to be the minimum at which an adjacency to J. R. Ewing can be had.

Besides joining "60 Minutes" and "M*A*S*H" at such stratospheric price levels, "Dallas" also has the distinction of being one of the few shows in recent memory to enjoy a 100% price hike in unit costs from one season to the next. Said CBS-TV vp-sales Paul Isacsson, "Everybody wanted it."

Although one of tv's more expensive efforts—production costs are as high as $700,000 per episode—a sold-out "Dallas" generates more than $1,700,000 per program in network sales.

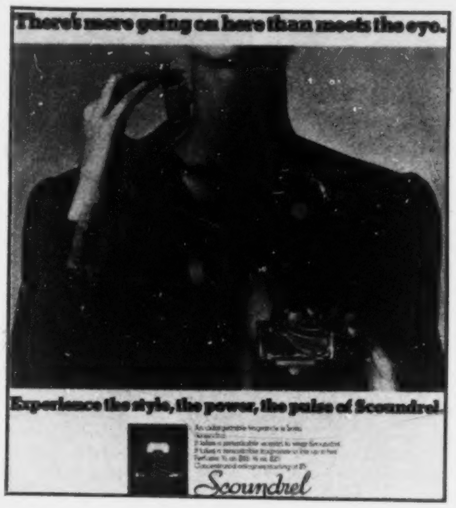
While CBS can boast about tv's three most expensive programs, ABC, according to estimates, can still lay claim to having more programs priced at $100,000 or higher—14, compared to CBS' 11 and NBC's four. Moreover, ABC's average prime time cpm, in the neighborhood of $4.95, is still higher than CBS' $4.60 to $4.70 and NBC's $4.25 to $4.35.

Complete table of show prices appears on Page 56.

Nevertheless, while the unit price for most returning CBS and NBC programs has increased, costs for some of ABC's longstanding heavyweights have dipped. "Happy Days," "Laverne & Shirley," "Mork & Mindy" and "Benson" are all thought to be priced somewhat lower than a year ago. But "Charlie's Angels" gets the prize for the biggest skid, from $110,000 per 30 last year to about $85,000 for the upcoming season. ABC's "Three's Company," last season's No. 2-rated program emerged as the next biggest winner behind CBS' triumvirate of programs, earning more than $135,000 per 30.

Among the newcomers, CBS' "Magnum P.I." and ABC's "Too Close for Comfort" and "But I'm a Big Girl Now" have attracted the most buyer interest. ABC-TV Network sales vp Jake Keever rated "Big Girl," which stars Danny Thomas and Diana Canova, as having "the most upside potential." As for "Magnum," CBS' Mr. Isacsson said that after running all the upfront plans through their computers, the network found that demand for the Hawaii-based private eye program was so strong that CBS was able to hike the unit price three times.

Though NBC has fewer $100,000-plus priced shows and more programs at less than $70,000 than its competitors, some buyers now are suggesting that if they're to become heroes in the eyes of their clients, it will be because of deals made with the No. 3-ranked network. At $60,000 a 30, "Games People Play" is winning favor as the best buy around. Meanwhile, "Little House on the Prairie" has emerged as NBC's highest priced program, fetching $125,000 a 30. #



There's more going on here than meets the eye.
Experience the style, the power, the pulse of Scoundrel.
Scoundrel

Revlon's '80s lady

Revlon calls its new fragrance, and the lady who represents it, a Scoundrel, but out of a "sense of affection and understanding." This art is from a co-op ad that also will offer a Scoundrel pendant by Aldo Cipullo for $15 with purchase.

Scoundrel is Revlon's latest

By PAT SLOAN

NEW YORK—Every few years or so, the fragrance industry sets about to define the woman of the hour. And if Revlon's Charlie and Jontue fragrances are considered representative of the 1970s woman in all her manifestations, its latest scent, Scoundrel, for which ads break late this month, could well mirror the woman of the new decade.

A scoundrel? Well, not quite. Revlon calls her Scoundrel out of a sense of "affection and understanding," not so much villainous as replete with backbone and dazzle in the sense that Auntie Mame or Lily Langtry were.

- She is not the aspiration-filled young woman as portrayed by Charlie nor her less strident version depicted by Jontue, according to Bonnie Clark, a Revlon vp who is heading the Scoundrel marketing effort. Charlie and Jontue are the No. 1 and No. 2 selling fragrances in the U.S., respectively.

"Scoundrel is a woman who is past the aspiration stage. She has reached one level of success and expects to be at another in the near future," Ms. Clark explained.

Nestle tests broad food line

WHITE PLAINS, N.Y.—In a major attempt to strengthen its position in the U.S. with value-added products, Nestle Co. will begin a one-year test of New Cookery, a 30-item food line low in fat, starch and sugar. The test starts Sept. 5 in Fresno, Cal.

Nestle is targeting the broad new food line not to dieters, but to those who seek a sensible way of eating without cheating the palate. With New Cookery addressed to what Nestle sees as a new consciousness in eating, the company will serve up everything from chili to beef stew, catsup to mayonnaise, canned fruit to pasta.

But while sugar, fats and oils will be cut back, the company says, they will never be reduced so much as to affect taste, a major problem with dietetic foods which, because of their limited appeal, also are regarded as added dollars to the grocery bill, not as replacement items. Dietetic foods also have generally faced a third negative as well: Chemical additives.

Because fat, sugar and starch content are reduced by about half as much as in low-cal substitutes, New Cookery will claim to offer the same taste as conventional food products plus wide family appeal and no chemical content.

For Swiss-based Nestle Alimentana S.A., the broad appeal of the line could eventually mean a larger U.S. contribution to over-all profit, a percentage that has in the past been considered too small by chairman Pierre Litoard-Vogt (AA, June 30). In the U.S., Nestle Co. is known primarily for its Taster's Choice, Nescafe and Decaf coffee brands; chocolate morsels, candy bars and powdered drink mixes; Nestea tea products, and Souptime instant soups. Additionally, it owns Libby, McNeill & Libby and Stouffer Foods.

Taking pains to keep New Cookery positioned away from diet foods, Nestle has decided to integrate the line fully throughout the store, according to one Fresno supermarket exec. While utilizing a separate display unit might have been preferable in terms of easy access for the consumer, the grocer said, it would almost certainly have meant New Cookery's being

Royal Crown consolidates lines at O&M

ROLLING MEADOWS, ILL.—Royal Crown Cola Co., seeking an "economic advantage," has consolidated its soft drink business with Ogilvy & Mather, Chicago, by handing it the Nehi line and RC 100, from Don Tennant Co., Chicago. O&M, which already has RC Cola and Diet Rite Cola, will continue to place Tennant's "Taste that taste" creative for RC 100, the no-caffeine, no-sugar cola in nine test markets (AA, July 7).

Mobil argues Arco Graphite superiority claims

NEW YORK—Mobil Corp. has submitted data to the three tv networks and the NAD rebutting Arco Graphite motor oil ads claiming fuel economy and engine protection superior to Mobil 1. Mobil said the ads will be taken off CBS and NBC. But Arco said it has modified certain commer-

NEWSPAPER

Colgate shifts $41 million

NEW YORK—Colgate-Palmolive Co. shifted nearly $41,000,000 worth of billings last Friday, leaving Kenyon & Eckhardt, Ted Bates & Co., and William Esty Co. as its major U.S. agencies. Colgate group vp Reuben Mark told ADVERTISING AGE last month that a consolidation of agencies was under consideration (AA, Aug. 4).

Norman, Craig & Kummel and D'Arcy-MacManus & Masius, which give up $11,500,000 and $18,200,000 in U.S. billings, respectively, continue on Colgate international assignments.

- The big U.S. winners in the consolidation are K&E, netting about $13,700,000 in new billings, and Bates, adding $14,750,000. Esty, Colgate's agency for Fab, Irish Spring, Ultra Brite and Hair Defense, picks up about $9,000,000 in new brands from D'Arcy and NCK, but yields the $10,000,000 Dermassage dishwashing liquid to K&E.

K&E, the Colgate agency for Fresh Start and Curad before Friday, picks up, in addition to Dermassage, the $1,000,000-and-growing Fluorigard dental rinse from Bates, along with the $3,000,000 Mersene denture cleanser from NCK. Axion presoak, $300,000, goes from K&E to North Castle Partners, Greenwich, Conn., which also was assigned the $2,000,000 Cold Power powder, formerly at NCK. North Castle continues on "certain special brand assignments" as well.

Esty comes out with the House of Ajax line, from NCK, billing about $6,500,000; Baggies plastic bags, $1,500,000, and Handi-Wipes, $1,000,000, both from D'Arcy.

Bates—agency for Colgate toothpaste—now gets the $7,000,000 Dynamo liquid detergent; Palmolive dishwashing liquid, $8,000,000, and Palmolive soap, $750,000, all from D'Arcy, as it sends Fluorigard on to K&E.

Colgate said the move is "designed to concentrate emphasis on strong creative support for key franchise brands both in the U.S. and abroad." It added that D'Arcy and NCK will continue to benefit as the company increases its media spending overseas.

"The consolidation . . . will provide the company with a more simplified and rational structure," said Colgate. The action meshes with C-P's earlier restructuring of its brand management system, to provide a single strategic plan for each category.

For NCK, the move marks the end of its connection with the Ajax line, which NCK's "white knight" commercials in the early '60s turned into national folklore. NCK landed its first Colgate business in

July tv sweeps boost indies

By MAURINE CHRISTOPHER

New York—Would you believe that "Bugs Bunny" and "Tom & Jerry" both drew bigger audiences than David Hartman on "Good Morning America" and Tom Brokaw on "Today" in at least one major market in the four-week July sweeps?

That's the word, according to Arbitron's New York report. Leading the 7 a.m. to 9 a.m. wakeup period was WNEW-TV's "Bugs Bunny" and others in its children's show lineup. They pulled 239,000 homes during the average quarter hour. Another indie, WPIX, placed second with "Tom & Jerry" and the "Magilla Gorilla" and other children's shows, which reached 196,000 households.

Opposite the cartoons, "Today" on WNBC-TV drew 150,000 homes and "GMA" on WABC-TV pulled 140,000. Both morning news-and-talk shows originated from Detroit during the mid-July Republican convention there. WNEW-TV also took this time period in the May report, but in that instance, WNBC-TV was second.

▪ This was one of the more fascinating examples of audience behavior during July when many independents across the country, as usual, benefited from viewer aversion to a lackluster, news-poor national political convention. Sampling was rampant as people roamed the dial looking for alternate choices to the Ronald Reagan-George Bush drama being played out in the Joe Louis Arena in Detroit. Buildup and follow coverage to the Republican meeting probably also cut into viewing levels at the networks.

This is the overriding impression that emerges from a study of major market Arbitron reports for July. The flow seems to have been mainly from affiliate to indie, but there also was some shifting from

At Last, No-Wax Floors Are Going From Dull To Brite!
Brite
New Brite for No-Wax Floors Cleans and Shines Without Wax.

Three marketers in no-wax floor fight

The battle for share in the floor care category (AA, June 23) heats up as no less than three companies introduce new products with these color page ads in September issues of shelter books. Airwick Industries says its Shine Guard cleans and protects; Lehn & Fink says its Perk cleans and shines, and S. C. Johnson & Son says its Brite gently cleans and freshens the look of no-wax floors. SSC&B handles Perk; Drossman Yustein Clowes has Shine Guard, and Foote, Cone & Belding is the agency for Brite.

FTC, critics meet on kids' tv ads

By RICHARD L. GORDON

Washington—Federal Trade Commission staffers are probing advertisers and consumer groups for possible new approaches to break the bitter deadlock over children's tv advertising.

Participants in the low key, private meetings with the commission staff were reluctant to discuss details, but some indicated that FTC lawyers are intent on drawing out alternatives to the industry-wide ad rule the commission has been considering since 1978.

An earlier FTC effort to write rules covering tv ads to children, begun more than a decade ago, was scrapped by the commission after the industry's self-regulatory programs, particularly the National Assn. of Broadcasters tv code, were tightened to outlaw the use of program hosts as commercial pitchmen and other controversial practices.

Another outcome of the earlier FTC probe was the creation of a special children's ad unit at the Council of Better Business Bureau's National Advertising Division.

▪ It's known that FTC national advertising chief Wallace Snyder and children's tv specialist Susan Elliott have suggested that advertisers might consider on-air educational messages to kids, spots that might explain advertising techniques and urge sound eating habits.

Mr. Snyder declined to discuss that idea specifically last week, saying the talks are still too exploratory. "I don't think it's anything more than one of many approaches. We're just trying to find out what's possible."

The FTC commissioners have given the staff until Oct. 15 to report their recommendations on what should be done with the children's ad rule. Congress forced the reassessment on the commission this year when it suspended the FTC's authority to write industrywide regulations to control "unfair" advertising.

FTC staffers relied heavily on the argument that tv ads to kids were inherently "unfair"—because youngsters couldn't understand their selling intent—even if they weren't deceptive. To continue the rule making, the staff must now justify any action it takes against tv ads to children on the grounds that they are deceptive.

The FTC staffers have met with Washington reps for the three major advertising trade associations: American Advertising Federation, American Assn. of Advertising Agencies and the Assn. of National Advertisers.

▪ The staffers are scheduled to meet this week with General Mills and the Toy Manufacturers of America; Kellogg Co. said it too has been invited for a session some time this month. Top execs at the National Assn. of Broadcasters also are involved.

Mr. Snyder said the staff plans to sit down with major consumer

Tampax sets new item for U.K.

London—Tampax is preparing to launch its first nonapplicator tampon in the U.K.

The launch is an attempt to cut into the share of Tampax' archrival here, Lilia White, whose Lillets nonapplicator tampons have seesawed with Tampax for leadership of the $76,000,000 tampon segment of the U.K. sanitary products market.

The tampon segment is said to be split 55-40-5 between Tampax, Lilia White and Playtex. Playtex entered the market in March of this year with the first deodorant tampon using a plastic applicator.

Shrouded in secrecy (Tampax sources here and in the U.S. declined to comment on the matter), the new product is part of a dual struggle that places tampons against press-on napkins in the sanitary protection market and pits Tampax against Lilia White in the tampon segment. The tampon category here is generally static, with more recent activity in the napkin segment. The tampon market in the U.S., however, has been enjoying significant growth.

There is a dispute over the new Tampax product's packaging, according to sources. Tampax' U.K. brand managers want the legend on the box to read "Tampax shaped tampon," while the U.S. parent company wants it to read "Tampon shaped by Tampax."

Asked to respond to news of Tampax' new entry, Jack Lam-

NEWSPAPER ADVERTISING INVESTMENT FOR JUNE 41

Vol. 51, No. 37—ADVERTISING AGE (ISSN 0001-8899) is published weekly, except semiweekly the third week in March, the second week in September at 740 Rush Street, Chicago, IL 60611. Second-class postage paid at Chicago and additional mailing addresses.

Bell system reaches out with gifts

By JOSH LEVINE

New York—AT&T will bridge the drifting continents of its regulated and unregulated businesses with a gift certificate applicable to any of its residential products and services.

Gift certificates available through American Telephone & Telegraph Co.'s 23 operating subsidiaries in October will test the concept of a universal Bell Telephone retail scrip. If certificate usage proves an active stimulant to sales, rather than an alternate form of payment for the same purchases made with cash, certificates will be integrated into AT&T's $15,500,000 residential ad budget for 1981.

"As the Bell system becomes more concerned with retail marketing, it's clear that some sort of gift certificate ought to be part of the retail line," said Edward J. Swartz, manager-residence pr and employment service advertising. "It's fair to say that we wouldn't have done this sort of thing several years ago."

Banks & trust companies	4,000,435	2,802,419	+ 1,198,016	+ 42.7

This Flash Report of newspaper advertiser investment, compiled for ADVERTISING AGE by Media Records, is derived from tabulations that cover 35 dailies and 25 Sunday editions in 15 cities—Atlanta, Baltimore, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, Miami, New York, Philadelphia, Pittsburgh, San Francisco and Washington. The report indicates marketplace strengths and weaknesses.

June volume in dailies jumps

NEW YORK—Advertising in daily newspapers went up 11.4% in June, 1980, compared with the same month a year earlier, according to the Newspaper Advertising Bureau. For the month, retail was up 16.1%, national was up 13.2%, and classified was up 3.4%.

The bureau said ad spending for the first six months of the year reached $7.2 billion, up 9.5% over the same period in 1979. For the half, retail increased 10.8% to $3.8 billion, national was up 15.8% to $1.1 billion, and classified gained 4.9% to $2.3 billion.

The bureau's estimates are based on measurements by Media Records taken in 64 index cities, plus other data.

According to the June Flash Report prepared for ADVERTISING AGE by Media Records, banks and trust companies had the greatest monthly category gain in ad dollar spending. The category went up 42.7% for June, 1980, compared with June, 1979.

Of the 16 categories monitored for AD AGE by Media Records, only one—shoe stores—showed a loss in June ad volume in the 15 cities whose newspapers are measured (*see chart*). Shoe stores were down 0.5%.

Department stores, newspapers' leading dollar category, gained 4.2%. It was following the top five spending spots by furniture and furnishings (up 6.6%), general merchandise stores (up 14.7%), amusements (up 11.7%) and food stores (up 19.4%).

Percentage gains of 15% or better were registered by sporting and leisure time equipment (33.5%), building materials and hardware (32.4%), real estate (30.2%) and building contractors (17.7%). #

Closi elected president of publication designers

Victor Closi, art director, *Field & Stream*, New York, has been elected president of the Society of Publications Designers for 1980-81.

Other officers: 1st vp, Murray Belsky, art director, American Heritage Publishing Co.; 2nd vp, Tom Lennon, art director, *Emergency Medicine* and *Cardiovascular Medicine*; secretary, Melissa Tardiff, art director, *Town & Country*, and treasurer, Jack Golden, principal, Designers 3.

Book producers unite

A group of "book packaging" companies have banded together to form the American Book Producers Assn., New York, an organization devoted to familiarizing book publishers with its members' operations. Founding directors include: Carter Smith, Media Projects; Sarah Lazin, Rolling Stone Press; Bruce Michael, Tree Communications; Stephanie Bennett, Delilah Communications; Richard Gallen, Richard Gallen & Co., and Jeffrey Weiss, Jeffrey Weiss Group. Offices are at 515 Madison Ave., 10022.

NHMA exposition set

The 74th annual National Housewares Manufacturers Assn.'s National Housewares Exposition will be held Jan. 12 to 15 at McCormick Place and McCormick Place West Chicago.

Japanese brace for auto race

By JENNIFER PENDLETON

LOS ANGELES—The major Japanese auto makers are not about to say "Sayonara" to the U.S. car market, as they face the most competitive fall yet.

For the first time, the largest Japanese car companies—Nissan Motor Corp. (Datsun), Mazda Motors of America, Toyota Motor Sales and American Honda Motor Co.—are facing formidable marketing hurdles as they introduce new 1981 models. Detroit is entering the small car business in earnest, and public resentment concerning the Japanese auto companies continues to grow as unemployment lines and major layoffs in the domestic auto industry make headlines.

To meet the challenges, Datsun is for the first time shifting its emphasis from fuel economy to quality and value in tv, magazine and radio advertising for the 1981 models. Datsun execs say that in 1981 the company will at least match last year's spending. According to the Leading National Advertisers' 1979 figures, Datsun's over-all ad spending reached $66,082,900. The new advertising will start Oct. 6.

▪ Datsun will continue the "We are driven" over-all ad theme (its fourth year), but will introduce a new subtheme for the 210, 310 and 510 models—"Drive a Datsun for all it's worth." Fuel economy will play a secondary role in the new campaign, but there will be some commercials emphasizing the higher miles-per-gallon figures that Datsun's cars can achieve. The "It's a long way to empty" ad theme will not return in 1981. It is expected that the totally restyled Datsun 810 four-door sedan and station wagons will receive heavy introductory ad backing. William Esty Co., New York, is the agency.

Joe Opre, Datsun's director of advertising, told ADVERTISING AGE that extensive research and testing convinced the No. 2 Japanese auto importer to retain the "We are driven" theme. " 'We are driven' showed up as the No. 1 auto slogan in recall and unaided awareness, so we felt it was nice to have something familiar to give consumers," Mr. Opre said.

▪ Datsun's media mix will remain the same as in 1979—with 60% of its budget going into network and spot tv, and

The pleasure is back.
BARCLAY
Barclay
99% tar free.

New way to say it

Brown & Williamson's new ultralow-tar entry, Barclay, will be heavily advertised in 18 national magazines. Instead of listing tar content, ads say "99% tar free." McCann-Erickson handles.

$150,000,000 budget seen

Barclay launch largest ever

By JOHN J. O'CONNOR

NEW YORK—The most expensive launch ever accorded a new cigaret is about to unfold as Brown & Williamson Tobacco attempts to muscle its way into the ultralow-tar category with Barclay.

If industry estimates prove correct, Barclay's first-year advertising and promotion budget will border on the stratospheric—possibly hitting $150,000,000. The B&W strategy involves a $50,000,000 media outlay playing second fiddle to an astounding $100,000,000 promotion punch, according to one competitor's estimate.

Brown & Williamson's announcement of the new smoke gave no hint of the massive nature of the Barclay introduction. But a brochure sent to the trade lends credence to competitors' anticipation of a blockbuster send-off for Barclay.

▪ For the first time in the history of the industry, consumers will be offered free cartons—not packs—via newspaper spreads headlined, "Barclay. The pleasure is back. And it's free." The ads will contain a toll-free telephone number that consumers must dial in order to receive the carton coupon by mail.

In addition, B&W will undertake a massive sampling program during which 21,000,000 free packs and store coupons will be distributed, many by street corner sampling.

Starting Oct. 6, a full range of media will trumpet B&W's message that Barclay—available in 1mg tar kings and 3mg tar 100s—is "99% tar free." By steering clear of actually mentioning the tar content of the product, the B&W smoke escapes being embroiled in the confusing "lowest in tar" claim battle being fought by American Brand's Carlton, R. J. Reynolds Tobacco's Now and Philip Morris' new Cambridge.

▪ B&W, the largest U.S. subsidiary of B.A.T. Industries, a London-based holding company, is banking on the ability of Barclay's filtration system to provide "the

(Continued on Page 77)

Will anyone sponsor CBS movie?

By COLBY COATES

NEW YORK—Will "Playing for Time" join "Sticks and Bones" and "Maude's" abortion in the ranks of sponsorless broadcasts on CBS?

Aside from the concern about the actors' strike and "David Letterman's" daytime future on NBC, CBS' effort to sell the movie about the Auschwitz concentration camp was the major attention-getter among network and agency execs last week.

Since it was announced that Vanessa Redgrave—an avowed sympathizer with the Palestinian cause—would play Fania Fenelon, an Auschwitz survivor and author of the story, CBS has been under fire from a variety of Jewish groups. With the three-hour movie now scheduled on the network's strike-induced prime time schedule of Sept. 30, protests are mounting and CBS is scurrying to find sponsors.

The man on the spot in this affair is CBS-TV vp-sales Paul Isacsson, who bravely "anticipates a full sponsorship" for the movie. But judging by the reaction of agency execs who have seen the movie, Mr. Isacsson's task looks hopeless.

"It's important that the program go on the air even if we have to run it without sponsors," said the CBS exec. But CBS obviously thinks there is a better alternative, specifically finding a major corporate advertiser to sponsor the full three-hour broadcast.

Interestingly, agency resistance in recommending the broadcast to clients appears to be based more on the utterly depressing nature of the film rather than the earlier furor over casting Miss Redgrave in the role of a Jew.

"At first I was taken aback when I heard she had the role," said Paul Schulman, president, Paul Schulman Co., a subsidiary of Gardner Advertising's Advanswers. But after viewing the movie, Mr. Schulman thinks "Redgrave will earn an Emmy by the first commercial break." However, he also admitted the movie is "so unbelievably down" an advertiser has to be very brave to risk association with it.

Drawing on NBC's experience with its "Holocaust" miniseries, CBS is open to clustering commercials, removing existing breaks or any other reasonable move that will make it a more palatable environment.

Some execs admit they would like to get their clients involved since the movie "is as good as anything ever done on tv," according to one. Said another buyer, "We encourage the networks to do quality programs, but when they take risks, we bail out."

Elsewhere, another risky network venture—NBC's effort to establish "David Letterman" as a daytime staple—has entered what

Stress the 'positive'

Pols break ads —rather gently

By LEAH ROZEN and RICHARD L. GORDON

WASHINGTON—You would never guess there's a presidential shooting match going on by the genteel advertising the candidates are running.

While President Carter and GOP candidate Ronald Reagan are blasting each other on the stump, their tv ad campaigns that broke over the weekend stress only the positive aspects of each candidate.

Though all three competitors—independent John Anderson rounds out the field—apparently are leaving open the possibility of harder-hitting spots in the future, for now they're keeping to the basic "Why our man is best for the job" strategy.

Mr. Carter and Mr. Reagan are expected to spend between $15,000,000 and $20,000,000 on tv spots out of the $29,440,000 available to each of them under the Federal Elections Commission's rules. Mr. Anderson is hoping to raise $13,000,000 and spend $10,000,000 on tv.

The commercials do offer some contrasts: The first Reagan spots are straightforward, consisting simply of footage from the former California governor's acceptance speech at the July Republican convention and brief discussions on issues in a library-like studio setting. The Carter spots have the President talking about issues with various Americans (homemakers, the elderly, blue collar workers, blacks, etc.) and portray Mr. Carter as a caring leader. The Anderson spots, actually carryovers from last summer, are primarily autobiographical. A new set of stronger Anderson spots focusing on issues is expected in about two weeks.

The first group of Reagan spots, viewed at a screening last Wednesday in New York, set forth the candidate's views on the economy and world peace, contrasting what he would do about each issue with

Wheatsworth
Wheatsworth STONE GROUND CRACKERS

Nabisco touts its new success

Nabisco Inc., East Hanover, N.J., claims Wheatsworth crackers, introduced nationally in June, will have the biggest first-year sales of any cracker since Ritz crackers debuted over 40 years ago. And its success has prompted the company to add the statement, "the most popular new cracker in 40 years," to all tv spots promoting the stone-ground wheat cracker. Commercials by William Esty Co. feature character actor Hazen Gifford, who plays the role of a professional baker.

Bailey's Irish Cream faces new crop

By JOSH LEVINE

NEW YORK—Not prepared to let Bailey's Original Irish Cream skim the category it created, new competitors are whipping up the market for cream liqueur with the industry's heaviest advertising per case ratio.

It's only been a year since Austin Nichols & Co. introduced Bailey's, a heavy seller overseas, but already several competitors have bypassed time-consuming rollouts to cash in on the immediate appeal of the cream and Irish spirits mixture.

The Christmas season will see at least three cream contenders in addition to Bailey's. The latest entrant, Carolans, boasting a "hint of honey," is coming out with typical fanfare. Ads by SSC&B for Renfield Importers herald the "richest, freshest, creamiest, Irishest taste in all the world," a string of superlatives worthy of the budget behind it.

Renfield says it is spending roughly $1,700,000 on Carolans in the fourth quarter, leaving $3,300,000 in the till if the brand's reception is as warm as Renfield expects. Three to five insertions will appear in *Apartment Life*, *Bon Appetit*, *The New Yorker* and *Playboy*, supplemented by regional ads in *Boston*, *New York*, the *New York Times Magazine*, *New West* and *Washingtonian*.

"The imported premium cream segment is among the few emerging categories in the distilled spirits industry generating as much excitement in the trade as among consumers," said Marvin Shanken, editor of *Impact*, an industry newsletter. "It's got the margins and growth rate for the trade, and it's got the taste for the consumer."

The "extremely profitable" margins on cream liqueurs, according to Mr. Shanken, are the source of the category's formidable spending levels. Actual volume, however, still lags behind the dollars invested. *Impact* estimates sales of 75,000 cases in 1979 growing to the 250,000 to 300,000 case level this year.

Despite the influx of Carolans, Bacardi Imports' O'Darby's and Glenmore Distilleries Dowland's Greensleeves, Bailey's still intends to hang on to the bulk of cream liqueur sales.

Shifted from Austin Nichols & Co. after Pernod Ricard S.A. snatched the Liggett Group subsidiary, Bailey's and its new distributor, Paddington Corp., hope to discourage additional market entries by raising the advertising ante even higher.

- A campaign from Backer & Spielvogel, which landed the account when Bailey's moved to Paddington, will top $2,000,000 in the fourth quarter, according to a source familiar with the brand's market plan.

In gaining a new distributor, however, Bailey's lost an advertising theme. Nadler & Larimer, the brand's agency at Austin Nichols, claimed proprietary rights to the theme, "The impossible cream."

FTC:

Near settling 'L.A. Times' discount case

By RICHARD L. GORDON

WASHINGTON—Federal Trade Commission antitrusters and Times Mirror Co., after a year of secret bargaining, are close to an agreement that could end FTC's attack on rate discounts that the *Los Angeles Times* gives to high volume retail advertisers.

The three-year-old antitrust case (AA, Aug. 22, '77) has had the newspaper industry on edge since its outcome could affect volume discount practices throughout the industry.

Any settlement with the *Times* could be a blueprint that other newspapers would have to follow to justify discounts they provide.

FTC administrative law Judge James B. Timony, who is handling the Times Mirror case, said attorneys for the company and the commission bureau of competition reported "substantial progress" toward a settlement last week.

More than half a billion

Health specialists rack up billings

CHICAGO—For the nation's advertising industry, health care continues to command big money.

Forty-one agencies participating in ADVERTISING AGE's annual report of health care billings reported gross income of $82,271,773 in 1979, compared with $70,526,191 the year before, an increase of 16.6%. Those figures were derived from billings that reached $593,775,654 in 1979, up from $482,749,625 in 1978.

Perhaps one indication of the interest agencies have in the field is that in this roster of health care specialists are no fewer than three agencies that were founded since the beginning of 1979.

Yet the agencies, when surveyed, readily admit that the marketplace does present problems, not the least of which is the inflation-recession conundrum that afflicts virtually every segment of American industry.

"A unique aspect of 1980's economy is the combination of a recession coupled with runaway inflation," said Lawrence J. Lesser, president of Medicus Advertising, New York. "For the health care industry advertising agency there exists a two-edged sword of reduced income from reduced promotional budgets, as well as increased costs of doing business."

What this suggests, Mr. Lesser added, is that agency management in 1980 "must demonstrate a sharpened focus on finance."

Another problem—and another familiar refrain—is the spinoffs of government regulations.

- The "continued trend" toward more government regulations of health care promotions makes "the creative process a more laborious and less efficient one," said Albert Molinaro Jr., president of Klemtner Advertising, New York.

Retzie Gleeson, senior vp-administration of Sieber & McIntyre, Chicago, did not equivocate. Asked what the major problems were, she said simply, "The continuing overstepping by federal agencies of regulatory boundaries already approved by the Congress in their dealing with the industry."

Ms. Gleeson sees another problem, this one specific to health care—the proliferation of "Branded generic" products instead of new products brought to

Abelson-Frankel

	1979	1978
U.S. Gross Income	$ 747,661	$ 528,410
Capitalized Billings	$5,332,503	$3,379,792

Abelson-Frankel, Chicago, had U.S. gross income of $747,661 on billings of $5,332,503 in 1979. Gross income in 1978 was $528,410 on billings of $3,379,792.

Volume in 1979 included $381,696 in media, $789,774 in materials and services and $4,161,033 in capitalized fees. In 1978, volume included $253,989 in media, $481,475 in materials and services and $2,644,328 in capitalized fees.

The privately held agency has 15.2% of billings in health care.

Major accounts: Bio-Dynamics, Telemed, Mallinckrodt Diagnostics, Mallinckrodt science products, National Catheter, Marion Scientific, Precept, Vitek, Labex, Nordisk, V. Mueller. Added: Mallinckrodt, Nordish. Lost: DePuy, Affiliated Hospital Supply.

Billings breakdown: Professional journals 11%, trade journals 9%, detailing/sales material 40%, direct mail 20%, special projects 10%, audio/visual programs 4%, conventions 4%, company-sponsored publications 2%.

The agency has 130 employes, including one health care professional.

Arnold, Hoff & Associates

	1979	1978
U.S. Gross Income	$ 310,000	$ 320,000
Capitalized Billings	$2,067,700	$2,133,000

Arnold, Hoff & Associates, Arlington Heights, Ill., had U.S. gross income of $310,000 on billings of $2,067,700 in 1979. Gross income in 1978 was $320,000 on billings of $2,133,000.

Volume in 1979 included $400,700 in media, $1,000,000 in materials and services and $667,000 in capitalized fees.

The agency has 84% of its billings in health care.

Major accounts: SRL Medical, Viobin division of A.H. Robins, Radio Chemical Centre Amersham division. Added in 1979: Miles Laboratories Lab-Tek division.

Billings breakdown: Professional journals 15%, trade journals 5%, detailing/sales material 20%, direct mail 30%, special projects 10%, audio/visual programs 10%, conventions 10%.

The agency has 12 employes.

Barbetta Miller

	1979	1978
U.S. Gross Income	$ 251,063	$ 226,033
Capitalized Billings	$1,648,068	$1,482,870

Barbetta Miller, Fairfield, N.J., had U.S. gross income of $251,063 on billings of $1,648,068 in 1979. Gross income in 1978 was $226,033 on billings of $1,482,870.

Volume in 1979 included $296,000 in media, $148,800 in material and services and $1,203,268 in capitalized fees. In 1978, volume included $270,000 in media, $139,000 in materials and services and $1,073,870 in capitalized fees.

The privately held agency has 33% of its billings in health care.

Major accounts: BBL division of Becton Dickinson & Co., Terumo Medical Corp., Baker Diagnostics. Added: Black & Decker Medical Products, Gelman Sciences. Lost: North American Biologicals, Roche Medical Electronics.

No billings breakdown was provided.

The agency has 20 employes.

Baxter, Gurian & Mazzei

	1979	1978
U.S. Gross Income	$ 1,800,000	$ 1,500,000
Capitalized Billings	$12,000,000	$10,000,000

Baxter, Gurian & Mazzei, Beverly Hills, Cal., had U.S. gross income of $1,800,000 on billings of $12,000,000 in 1979. Gross income in 1978 was $1,500,000 on billings of $10,000,000.

Volume in 1979 included $2,225,750 in media, $1,500,000 in materials and services and $8,274,250 in capitalized fees. In 1978, volume included $1,556,800 in media, $902,200 in materials and services and $7,541,000 in capitalized fees.

The privately owned agency, which has 80% of its billings in health care, operates a subsidiary, Focus III Productions.

Major accounts: Riker Laboratories, Syntec Laboratories, Abbott Diagnostic Products, Alpha Therapeutic Corp., Bio-Science Laboratories, 3M Orthopedics. Added in 1979: Advanced Technology Laboratories, Spacelabs Inc.

Billings breakdown: Trade journals 15%, detailing/sales material 25%, direct mail 20%, special projects 12%, audio-visual programs 5%, conventions 6%, packaging 7%, consumer magazines 10%.

The agency has 37 employes.

Robert A. Becker Inc.

	1979	1978
U.S. Gross Income	$ 4,679,000	$ 3,820,000
Capitalized Billings	$32,328,749	$26,891,054

Robert A. Becker, New York, had a U.S. gross income of $4,679,000 on billings of $32,328,749 in 1979. Gross income in 1978 was $3,820,000 on billings of $26,891,054.

Volume in 1979 included $20,676,633 in media, $3,638,142 in materials and services and $8,013,974 in capitalized fees. In 1978, volume included $15,591,273 in media, $3,613,400 in materials and services and $7,686,381 in capitalized fees.

The agency, which has 100% of its billings in health care, is privately held.

Major accounts: Mead Johnson Pharmaceuticals, Ives Laboratories. Added in 1979: Merck Sharp & Dohme, Roerig division of Pfizer Pharmaceuticals, Sandoz Pharmaceuticals. Lost: Monticello Drug Co.

Billings breakdown: Professional journals 78.6%, detailing/-sales material 9%, direct mail 8.1%, company-sponsored publications 2%, other (Physicians' Radio Network) 2.3%.

The agency has 89 employes, including four health care professionals.

Carrafiello-Diehl & Associates

	1979	1978
U.S. Gross Income	$ 1,815,000	$1,380,000
Capitalized Billings	$12,100,000	$9,200,000

Carrafiello-Diehl & Associates, Irvington-on-Hudson, N.Y., had U.S. gross income of $1,815,000 on billings of $12,100,000 in 1979. Gross income was $1,380,000 on billings of $9,200,000 in 1978.

Volume in 1979 included $7,700,000 in media, $2,900,000 in materials and services and $1,500,000 in capitalized fees. In 1978, volume included $5,800,000 in media, $2,233,000 in materials and services and $1,167,000 in capitalized fees.

The agency's health care accounts totaled about 45% of billings in 1979. The privately owned agency has a subsidiary, CDA Research Laboratories, a medical and consumer market research company.

Major accounts: Lederle Laboratories, Knoll Pharmaceutical Co., Pfizer Laboratories, Vick toiletry products division of Richardson-the market. "This is creating a tremendous wave of conflicts," she said, "and is affecting both the advertisers and their agencies."

Certainly, dealing with this kind of situation demands a technical expertise usually not found elsewhere in the industry. Which leads to the question of personnel and the problem of finding a knowledgeable staff.

At Hall Decker McKibbin & Singer, chief operating officer Elise McKibbin said one difficulty the industry has is the need to find "scientifically trained, creative problem solvers to do the expert job required."

▪ Despite the problems—and sometimes because of them—agency execs do see a host of opportunities and challenges among current trends.

One mentioned by several is a focus toward nonpharmaceutical marketing. "The major growth over the next five years for many health care communications will be in the area of diagnostic equipment and monitoring devices," said Robert W. Buechert, president of Vicom Associates, San Francisco.

Added John F. Swift, president of Frank J. Corbett, Chicago: "The expansion of many nonpharmaceutical companies into the basic health care system will bring substantial amounts of business into the pure health care communication agencies."

Other agencies noted that the growing concern and awareness of individual responsibilities for health could open more doors to traditional marketers.

"The major growth will be in diagnostic equipment and monitoring devices."

"Increased growth and demand for health care products and services will create the need for better and more responsible communications to all segments of the health care community, including the consumer," said Matthew J. Hennessey, chairman and president of Sudler & Hennessey, New York.

▪ Stephen Haber, vp of William Douglas McAdams Inc., New York, sees great possibilities in this trend. "Today," he said, "there is an increased opportunity for the drug industry to address the public directly on health care issues. In the next few years, more packaged inserts and other patient aid material will be prepared and distributed.

"Medical advertising agencies can contribute to patient information by combining their skills and experience in communications with their knowledge of medicine to educate the public on a broad range of issues involved in health care delivery."

Another opportunity that some agencies expect to benefit from is the growth of the international health care market.

"The time constraints placed by the Food & Drug Administration on new drugs and devices and the ensuing erosion of patent protection have necessitated that U.S. manufacturers market overseas prior to introduction in the U.S.," said Mr. Lesser of Medicus. "Since the U.S. is the world's largest health care marketplace, the experience and knowledge of U.S. health care advertising agencies and their personnel is much in demand."

The Intercon International network can probably attest to that. Though its U.S. member, Intercon Barmak, does not rank among the top billing agencies nationally, in the international arena it is one of the largest.

Just where Intercon Barmak and the other agencies stand are noted in the following listing. Topping the roster are those billing more than $20,000,000: Sudler & Hennessey; William Douglas McAdams Inc.; Sieber & McIntyre; Kallir, Philips, Ross; Robert A. Becker Inc.; Medicus Communications; Shaller Rubin Associates; Klemtner Advertising; Lavey/Wolff/Smith; Healthmark Communications, and Wesson & Warhaftig.

Merrell, Formica International, Cyanamid International, Lederle International. Added in 1979: Roerig division of Pfizer Inc., Leeming/Pacquin division of Pfizer Inc., Norcliff Thayer.

Billings breakdown: Professional journals 28%, trade journals 2%, detailing/sales material 4%, direct mail 3%, special projects 2%, audio-visual programs 5%, conventions 1%, other 55%.

The agency has 41 employes, including two health care professionals.

Frank J. Corbett Communications

	1979	1978
U.S. Gross Income	$ 2,056,580	$ 2,054,244
Capitalized Billings	$13,717,388	$13,701,807

Frank J. Corbett Communications, Chicago, a division of BBDO Health & Medical Communications, had U.S. gross income of $2,056,580 in 1979 on billings of $13,717,388. In 1978, gross income was $2,054,244 on billings of $13,701,807.

The agency, which has 100% of its billings in health care, owns VIS-U-COM, a graphics communications company.

Major accounts: American Convertors, American Scientific Products, Beecham Laboratories, Breon Laboratories, Upjohn Co., Vestal Laboratories, Westwood Pharmaceuticals, Winthrop Laboratories. Added in 1979: Abbott International, Bendix Corp. instruments and health care division, Stryker Corp., Flint Laboratories. Lost: Cooke-Waite Laboratories.

Billings breakdown: Professional journals 42%, detailing/sales material 30%, direct mail 20%, special projects 3%, audio-visual programs 4%, conventions 1%.

The agency has 45 employes, including two health care professionals.

Maxon Davis Inc.

	1979	1978
U.S. Gross Income	$ 2,100,000	$ 2,320,000
Capitalized Billings	$12,004,000	$12,977,600

Maxon Davis Inc., New York, had U.S. gross income of $2,100,000 on billings of $12,004,000 in 1979. Gross income in 1978 was $2,320,000 on billings of $12,977,600.

Volume in 1979 included $3,600,000 in media, $400,000 in materials and services and $8,004,000 in capitalized fees. In 1978, volume included $3,516,800

SURGIKOS' FABRIC 450 MAKES LINEN OBSOLETE.
The first soft cloth-like fabric developed specifically for surgical packs and apparel
It's softer, stronger, cooler and more comfortable than other widely used disposables. It's quiet, rustle-free and conformable like linen. If you haven't tried it, you're missing the optimum combination of procedural performance and cost containment.
FABRIC 450 is proven superior in all of these fine BARRIER products. Contact your SURGIKOS representative for a product demonstration.

Major accounts: CPC International Best Foods division, Merrell-National Laboratories, Norwich-Eaton Pharmaceuticals, Morton Salt Co.; Procter & Gamble, Roerig, Schering Corp., Siemens Corp., Richardson-Merrell Vicks toiletry products divisions. Added in 1979: Anderson-Clayton Foods, Eaton-Merz Laboratories, H. J. Heinz Co. Heinz U.S.A. division.

Billings breakdown: Professional journals 25%; trade journals 1%, detailing/sales 30%, direct mail 10%, special projects 20%, audio-visual programs 3%; conventions 1%, company-sponsored publications 10%.

The agency has 110 employes, including seven health care professionals.

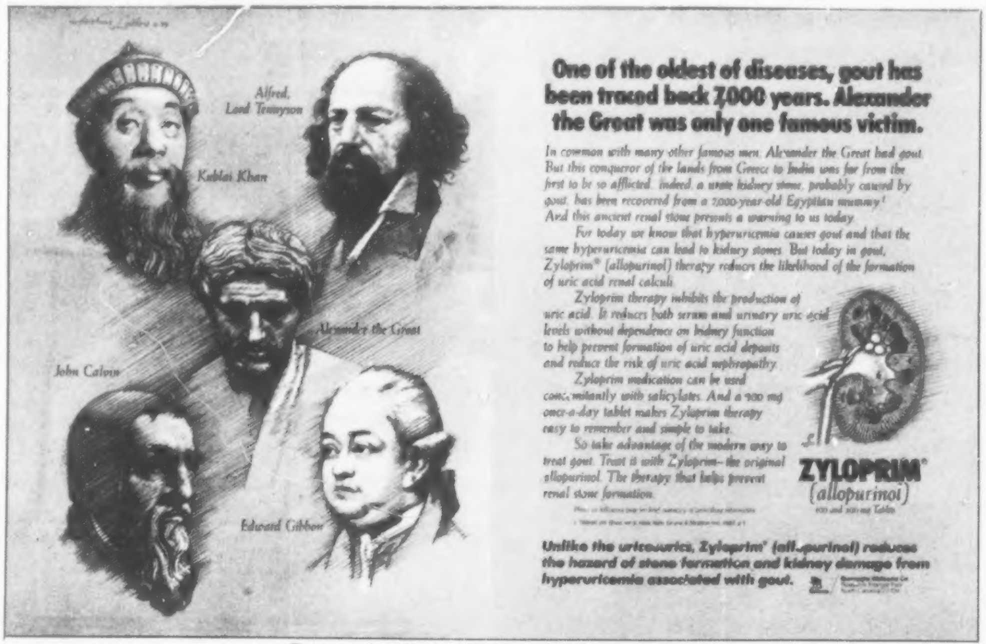
Rolf Werner Rosenthal Inc.

	1979	1978
U.S. Gross Income	$ 2,892,025	$ 2,149,965
Capitalized Billings	$19,654,875	$16,569,211

Rolf Werner Rosenthal, New York, had U.S. gross income of $2,892,025 on billings of $19,654,875 in 1979. Gross income in 1978 was $2,149,965 on billings of $16,569,211.

Volume in 1979 included $6,992,656 in media, $1,034,802 in materials and services and $11,627,417 in capitalized fees. In 1978, volume included $9,854,423 in media, $1,174,353 in materials and services and $5,540,435 in capitalized fees.

The privately held agency, which has 100% of its billings in health care, has one subsidiary, World Health Information Services, which provides expertise in medical symposia and continuing medical education.



One of the oldest of diseases, gout has been traced back 7,000 years. Alexander the Great was only one famous victim.

In common with many other famous men, Alexander the Great had gout. But this conqueror of the lands from Greece to India was far from the first to be so afflicted. Indeed, a urate kidney stone, probably caused by gout, has been recovered from a 7,000-year-old Egyptian mummy.¹ And this ancient renal stone presents a warning to us today.

For today we know that hyperuricemia causes gout and that the same hyperuricemia can lead to kidney stones. But today in gout, Zyloprim® (allopurinol) therapy reduces the likelihood of the formation of uric acid renal calculi.

Zyloprim therapy inhibits the production of uric acid. It reduces both serum and urinary uric acid levels without dependence on kidney function to help prevent formation of uric acid deposits and reduce the risk of uric acid nephropathy.

Zyloprim medication can be used concomitantly with salicylates. And a 300 mg once-a-day tablet makes Zyloprim therapy easy to remember and simple to take.

So take advantage of the modern way to treat gout. Treat it with Zyloprim—the original allopurinol. The therapy that helps prevent renal stone formation.

ZYLOPRIM®
(allopurinol)

Unlike the uricosurics, Zyloprim® (allopurinol) reduces the hazard of stone formation and kidney damage from hyperuricemia associated with gout.

Burroughs Wellcome Co.: Sieber & McIntyre.

Major accounts: Burroughs Wellcome Co. (U.S. and Canada), Calmic Ltd., Connaught Laboratories Ltd. (U.S. and Canada), Connaught Animal Health, Cooke-Waite Laboratories, Fisons Corp., Oral-B Co., Sandoz Pharmaceuticals, Wampole Laboratories division of Carter-Wallace. McNeil gears up Duonex entry for cold remedy fight

By NANCY GIGES

NEW YORK—Cold remedy marketers are gearing up for a very competitive season, as long-standing leaders try to regain share lost to Bristol-Myers' Comtrex and another new brand gets ready to rush in.

Johnson & Johnson's McNeil Consumer Products Co., whose one major brand—Tylenol—upset the standings in the analgesic market, has moved a step closer to market with a new cold remedy called Duonex. The company, which already markets Co-Tylenol cold remedy, recall-tested a Duonex tv spot in Sacramento last month.

■ Duonex is described as the first cold medicine made especially for day or night relief. A yellow capsule for day is promoted to relieve "coughing and congestion without drowsiness so you can stay active." The blue version for nighttime helps cold sufferers to "breathe easier and quiet your cough so you can rest."

The product has been assigned to Young & Rubicam and sources say McNeil is prepared to invest close to $10,000,000 in ad support for the product's launch (AA, July 14).

McNeil also has made some gains with Co-Tylenol, which last year received $7,000,000 in measured media expenditures. That brand holds a 4% share of the $500,000,000 cold remedy category. The total does not include cough remedies, which comprise another $500,000,000 segment.

■ The leading brands hit hardest by Comtrex, introduced nationally in late 1978, were American Home Products' Dristan, SmithKline's Contac and Richardson-Merrell's Vicks NyQuil. For the May/June period, share figures show Dristan at 14.5%, but that is somewhat higher than normal because of heavy hay fever usage. NyQuil held a 14.1% share and Contac 13.8%. Comtrex held a 8.2% share during that period.

Vicks has countered this season with new DayCare capsules, being launched with a $7,000,000 ad budget and heavy sampling (AA, July 14). DayCare liquid also has been revamped.

SmithKline has moved out a reformulated Contac that contains much higher dosage levels of de-

last minute news

Abbott reviewing for Selsun Blue, Murine

CHICAGO—Abbott Laboratories' consumer products division is reviewing agencies for its Selsun Blue shampoo and Murine eye care products, currently at McCann and JWT, respectively. Decision on the $15,000,000 worth of business (combined) due in a month; incumbents are included.

Michelob set to go after everyday beer drinker

ST. LOUIS—Anheuser-Busch's superpremium Michelob, having cornered the "weekend" beer drinker, is set to make the brand an everyday beverage. "Put a little weekend in your week" is the theme of a new Michelob campaign scheduled to break Oct. 11. Four fast-paced spots under consideration feature entertainment and sports celebrities. Meanwhile, Michelob Light will continue its "compare the taste" theme with two new sports spots (soccer and tennis), and Natural Light adds some new personalities to its "taste is why you'll switch" assault on Miller Lite. D'Arcy handles.

FDA approves P&G ads for Rely users

WASHINGTON—Procter & Gamble got FDA approval of ads breaking this week that urge Rely tampon users to stop using the product and seek refunds (AA, Sept. 29). Copy says, "more than other brands" Rely appears to be linked to toxic shock syndrome, describes the ailment as potentially "very serious" and believed responsible for "a number of deaths" and says P&G is working with the government to find why tampons appear to be involved. Health Research Group, a Ralph Nader unit,

New officers take ANA helm

Posing for pictures during last Tuesday's black tie dinner/dance at the Homestead are (from left) newly elected vice-chairman Thomas Ryan, outgoing chairman Donald Goldstrom, incoming chairman Richard Creedon and reelected association president Peter Allport.

ANA eyes viewer 'cells'. . .

HOT SPRINGS, VA.—Fragmentation, fractionalization, regionalization, decentralization. These were buzzwords at the Assn. of National Advertisers annual meeting here last week, during which the new video media again took center stage.

In a "sold-out" concurrent clinic on "New Video—New Measures," Thomas T. Ryan, vp-advertising services, Gillette North America, and chairman of the ANA committee studying the subject, said that without question a major problem facing the industry is the measurement of audiences in the future.

"There doesn't seem to be any question," he stated, "that the arrival of these new means of receiving information and entertainment in the home is going to cause a fractionating of viewing audiences. If we are to deal with and take advantage of these smaller audience segments, we will have to have adequate means of measuring accurately and consistently the size and composition of the segments."

Mr. Ryan said that in earlier consultations with A. C. Nielsen Co. and Arbitron, the two major measuring services, he was told it will probably be 1985 before the machinery to do so will be in place. And, he stressed, "advertisers are going to have to participate in the cost of measurement research" on the new media.

■ "This is not a popular point of view," he continued, but measuring "these small cells" of viewers will be a huge task and "we can't expect the networks

(Continued on Page 116)

. . . creative to reach them

HOT SPRINGS, VA.—A demassification of the media and an increasingly segmented audience will require more creative and more personalized advertising in the next decade.

Penny Hawkey, senior vp-creative group head, McCann-Erickson, together with Ed McCabe, president, Scali, McCabe, Sloves, and Janet Wolff, exec vp-director of creative services, William Esty Co., are ready, however. The three shared their suggestions on how to reach the new audience with Assn. of National Advertisers members last week at a panel on creative advertising.

To Ms. Hawkey, the demise of broadcasting and the birth of "narrow casting" means jumping "feet first" into the new video . . . "right now, while costs are low and the medium is somewhat unregulated and adapted to our needs."

More ANA news on Pages 3, 10 and 112.

Although not suggesting that advertisers walk away from the networks, Ms. Hawkey said that with the new electronic technology, "the audience—the mass mind, as we've unfortunately come to think of it—is breaking up. It has options. It doesn't have to watch the programing that the networks put in front of it. And it doesn't have to watch our commercials."

But, she suspects, "we will do a

Charter crash

'Sport' on the block; Eller looks around

By CHRISTY MARSHALL

NEW YORK—As Karl Eller, freewheeling president of Charter Media Group, and Charter were packing it in last week, Charter Corp. began packing up its *Sport* magazine and putting it on the block.

Sport, a perennial money-loser, formally was put into a serious financial package and presented to prospective buyers, according to sources. The magazine had been for sale for some time, but the asking price was considered exorbitant. Now, as a "highly leveraged and cash poor" company, Charter is offering *Sport* at a more realistic figure. So far, Charter has had discussions with CBS Publications, Ziff-Davis, *Playboy* and *Newsweek*, according to sources.

■ The proposed sale of *Sport* comes on the heels of the Sept. 30 announcement that Charter Media Group had been dissolved and that its entrepreneurial president, Karl Eller, left with the CMG acquisitions of the *Philadelphia Bulletin*, KIOI (fm) in San Francisco and the New York Subways Advertising Co., and returned to his home base in Phoenix.

Charter Corp. is left with its communications division, Chartcom, which consists of Charter Publishing Co. (*Ladies' Home Journal*, *Redbook*, *Sport* and *Discount Merchandiser*), Charter Data services and six radio stations. Charter Media Group was created by Charter Corp. president Ray Mason and put under Mr. Eller six months ago (AA, March 31).

"Two people got into a joint venture agreement—we had all kinds

(Continued on Page 115)

Reader data still don't jibe

By LEAH ROZEN

NEW YORK—The release of the 1980 magazine readership figures by rivals Mediamark Research Inc. and Simmons Market Research Bureau has done little to settle either the controversy over their differing methodologies or the stomachs of the agency media researchers who must use the figures.

Some are siding with Mediamark. Some are siding with Simmons. Some are straddling the fence and buying both.

Everybody is unhappy. "It shouldn't be this way," said one agency media research head. "You would think they could settle on one accurate way of getting numbers."

What's the problem? The same that it has been for the past two years: The industry's two major magazine readership measurement companies use different methods and no one can agree on which is the better one.

Simmons Market Research Bureau, the product of the 1978 merger of W. R. Simmons & Associates and Axiom Market Research Bureau, measured 44 magazines in 1980 with the through-the-book method and another 81 with the recent reading method. The catch is that Simmons then took its recent reading scores and calibrated them (using a formula provided by, but not enthusiastically endorsed by, the Advertising Research Foundation) to make them comparable with its through-the-book figures.

- Mediamark, founded in early 1979, used its own version of the recent reading method to measure all 140 magazines and magazine groups it reported on.

As they did a year ago, the Simmons and Mediamark figures differed greatly, with Mediamark tending to show much larger total audience figures than Simmons.

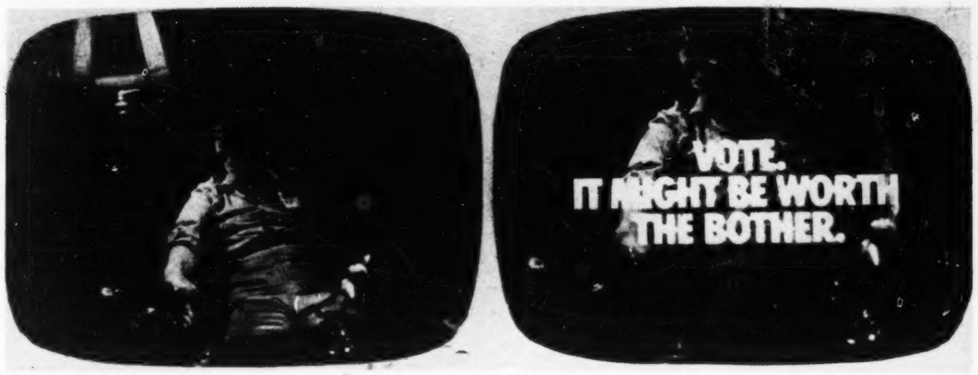
For example, Mediamark rates *Reader's Digest* as the magazine with the highest readership figure, 58,707,000. Simmons puts *RD's* readership at only 39,972,000. The story is the same for *TV Guide:* Mediamark reports 52,401,000, while Simmons has 42,547,000.

With *RD* and *TV Guide*, Mediamark has used the recent reading method and Simmons has used through-the-book. Mediamark's larger figures are attributed to the large out-of-home readership—at the doctor's office, supermarket, hair salon, etc.—its measuring system picks up.

"There's an awful lot of evidence, much of it's recent, that paging through a magazine is all you need for advertising exposure," said Mediamark Timothy Joyce in a recent interview. "Our system is designed to be as inclusive as possible. We're picking up the maximum possible readers."

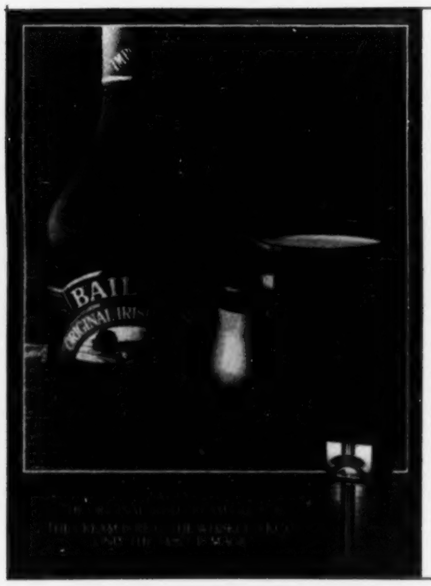
Simmons' use of through-the-book, a system that has respon-

(Continued on Page 118)



Ad Council goes after nonvoters

Getting out the vote on Nov. 4 is the aim of this latest public service Ad Council campaign. Tv ads showing nonvoter whose candidate lost will try to persuade the 70,000,000 eligible Americans who did not vote in 1976 that "it might be worth the bother." Joint sponsor with Ad Council is the National Assn. of Secretaries of State. Needham, Harper & Steers, New York, volunteered the creative.



Baileys' new theme

Baileys Original Irish Cream would have liked to kick off its new campaign with Baileys' original advertising theme, but it ultimately settled for "Only the taste is magic," which took second place in a copy test. Baileys' producer, International Distillers & Vintners, shifted the brand to Paddington Corp. and its agency, Backer & Spielvogel. Former agency Nadler & Larimer claims proprietary rights to the theme, "The impossible cream."

K-C, Playtex halt plans

By JENNIFER ALTER

CHICAGO—Kimberly-Clark Corp. has suspended all advertising for its Kotex brand tampons "until the tss [toxic shock syndrome] situation is clarified," the company said. And International Playtex, which recently moved a "new, improved" Playtex tampon onto retail shelves and was planning a "relaunch" campaign for October, is having second thoughts.

"We are reevaluating all of our plans at this point, and waiting until we meet with the Food & Drug Administration to make any decisions," said company president Walter Bergman.

Tampax Inc. told the FDA it will run an educational campaign in newspapers and magazines beginning this week alerting consumers to the symptoms and dangers of tss, and suggesting more frequent changing of tampons and alternating use with napkins. Ads will run in 42 newspapers and in *People* and *TV Guide*. Similar warnings will be inserted in Tampax packages.

Johnson & Johnson said it would hold steady on its ad plans until it meets with FDA this week.

The FDA, which has scheduled these meetings to run through Wednesday, suggested the labels should inform women that they might "want to consider not using tampons, or alternating tampons with napkins."

How long it would take for tampon packages with warning notices to turn up in the marketplace will depend on how fast existing product moves, sources say. However, E. Russell Sprague, president of Tampax, estimates his company could get new packages out of the factories within two weeks.

Any provisions for warnings in product advertising are under jurisdiction of the Federal Trade Commission and have not yet been addressed, except for Tampax' action.

Up until this point the FDA has been focusing all of its attention on Procter & Gamble's Rely tampon. Now that Rely has been withdrawn from the market, retailers have filled the shelf space with other tampon products. Although they say it is too early to report figures, several chains indicated they have seen no significant drop in tampon sales.

- While some industry observers have predicted the tss scare will be a boon to the sanitary napkin business, there are those who believe this is an underestimation of women's dependence on the tam-

FIGURES TO FILE

JULY ARBITRONS—TOP 50 MARKETS 90

Vol. 51, No. 43—ADVERTISING AGE (ISSN 0001-8899) is published weekly, except semiweekly the third week in March, the second week in September at 740 Rush Street, Chicago, IL 60611. Second-class postage paid at Chicago and additional mailing addresses.

Carnation moving in wine field

LOS ANGELES—Carnation Co. could become the next major consumer products company to enter the U.S. wine business if its United Kingdom subsidiary is successful with a new wine brand now being launched in London.

Ads break in London next month for Golden State red, white and sparkling wines. Guild Vintners, San Francisco, which also markets its own Guild line, is acting as supplier, as it does for other wine marketers. Carnation here developed the brand name and positioning and Carnation Foods in the U.K. is marketing the Golden State line.

Execs at Carnation are carefully tracking the U.K. introduction for results that could be applicable in the U.S. market. One source said Carnation may be leaning toward serious consideration of a U.S. tryout because of favorable response to the Golden State line in U.K. testing.

The London launch is being

(Continued on Page 116)

Reader studies

(Continued from Page 2)

dents page through a stripped-down version of the magazine, is the system preferrred by most of the media researchers interviewed. They feel it yields more honest numbers on authentic readers.

Simmons head Frank Stanton says the length and detail of through-the-book interviews make the gathering of information this way on 125 magazines a physical impossibility. Hence the use of recent reading for 81 less-than-major magazines.

The 1980 Simmons report is the first to make use of the calibration method, to bring recent reading figures in line with through-the-book figures.

But a lot of agency media researchers aren't buying the notion that there are magic numbers and a formula you can plug in to correctly adjust the data.

▪ Assistant media director Paul Conway, in explaining why his agency, DKG Inc., had elected to go with Mediamark exclusively, said, "It's important that the same methodology be used across all magazines."

On the other hand, Scali, McCabe, Sloves exec vp-media Michael Ephron took a look at the arguments and came to a different conclusion. His agency has contracted to receive both studies, but will be using Simmons as its primary source and Mediamark as a back-up ("A confirmation, if you will," Mr. Ephron said).

▪ Mr. Ephron said his decision to go primarily with Simmons was based on "not letting the tail wag the dog." He said that since 90% of his clients' dollars go into the magazines measured by Simmons' through-the-book method, the recent reading scores (and their calibration) don't bother him too much. He said his agency plans to use Simmons' raw recent reading data (minus the calibrations) and to adjust it using the agency's own data.

Jack Hallahan, Chicago-based Leo Burnett Co.'s media research man, said Burnett is going with Simmons exclusively because its "market information on product usage is of higher quality than MRI's." #

New cold remedies

(Continued from Page 1)

congestant and antihistamine. The company recently conducted an agency review for the cold remedy, but in the end decided to stay with agency Ogilvy & Mather (AA, Aug. 25). The review involved recall-testing of the campaigns presented by the agencies.

Industry sources speculate SmithKline may authorize ad spending of $30,000,000 to revitalize the brand. That figure is double what the market leaders normally invest in measured media for this essentially seasonal business.

Meanwhile, in analgesics, B-M is investing $17,000,000 in the debut of reformulated Excedrin (AA, May 5), an effort viewed as a last-ditch attempt to reverse that brand's sliding share.

In addition to introducing the product in capsule form, B-M also converted from a two-thirds aspirin/one-third acetaminophen 424mg tablet to a 50-50 aspirin/-acetaminophen ratio in a 500mg tablet.

Advertising by Kenyon & Eckhardt focuses on the capsule form, using a space scene. The B-M approach differs from that of American Home Products, which last year introduced a Maximum Strength Anacin tablet (500mgs) as a line extension to its regular adult strength Anacin product (400mgs). This summer AHP also added a capsule in the Maximum Strength formula.

The higher dosage tablet has added only two percentage points to the total Anacin share that now stands at 12.6%, less than half that of market leader Tylenol, which holds a 28.6% share. The Tylenol share is made up of 2.9% pediatric, 19% extra-strength (500mgs) tablets and capsules and 6.7% regular (350mgs) tablets and capsules.

Sterling Drugs' Bayer and B-M's Bufferin shares continue to hover around 8% each. #

Imitation cheeses

(Continued from Page 3)

can-flavor individually wrapped slices. It is made with sunflower oil to replace the animal fat.

The Country Meadow advertising campaign, handled by Grey Advertising, is expected to break within a few weeks.

Anderson, Clayton's New Age line includes 8-oz. packages of American, Swiss, smokey and hot pepper cheeses and an 18-oz. package of American. The company claims to have a leading market share in cheese substitutes in test markets and a 4% to 6% share in the individually wrapped sliced cheese category in those areas.

Ads for the New Age line boast its contents—90% less cholesterol and 75% less saturated fat than process American cheese slices—and are targeted at women age 35 and up. Color page ads, some with coupons, are scheduled for regional editions of such magazines as *Family Circle*, *Good Housekeeping* and *Reader's Digest*. A tv blitz, beginning in mid-October, will involve more than 10 commercials per week for six months. Further support will come from newspaper coupons, including a "buy-one, get-one-free" offer. Benton & Bowles, New York, is the agency.

Kraft, currently in the Southeast, Southwest and Baltimore/-Washington areas, will move into all East Coast regions except Vermont, which outlaws cheese substitutes.

Kraft markets 12-oz. American-flavor individually wrapped cheese slices; a 10-oz. half-moon colby-flavor product and a 12-oz. cheddar chunk.

Kraft's East Coast entry early this month will be marked with tv spots breaking the week of Nov. 9 and newspaper and coupon ads beginning a week later. All major newspapers in Maine, metropolitan New York, Baltimore/Washington, Boston, Albany, Buffalo, Hartford and Philadelphia/Harrisburg regions will be included. The campaign, handled by J. Walter Thompson Co., Chicago, touts Golden Image's corn oil substitute and Kraft's reputation.

A low-level "maintenance program" is set for existing Golden Image markets, despite the Country Meadow entry and the New Age rollout. #

Latinos elect Da Costa

Latinos in Communications, New York, has elected Jackie Da Costa, senior vp-media director, Ted Bates & Co. as 1980-81 president.

'Playing for Time' cpm $1.96

By COLBY COATES

NEW YORK—Besides giving new meaning to the phrase "quality tv," CBS' broadcast of the controversial "Playing for Time" rewrote the book on "opportunistic" buys.

The three-hour made-for-tv movie scored a 26.2 rating and 41 share nationally and, contrary to some expectations, audience built with each successive half hour. Because of the movie's grim nature, some observers thought the audience would slip away, unable to handle the horror of Auschwitz.

Instead the numbers just got bigger, starting with a 39 share in the first half hour and concluding with a 44 share in the last 30 minutes.

▪ But perhaps the most telling number associated with the movie is the $1.96 cost-per-thousand homes advertisers paid to reach an audience estimated at 41,000,000. And it may even be that the $1.96 cpm, which is based on an average cost of $40,000 per 30-second unit, is as much as 5 cents over what some advertisers actually paid. In some cases a 30 might have sold for as low as $30,000.

In addition to American Motors Corp. and Richardson-Merrell (AA, Sept. 29), the big multi-unit buyers were Pfizer Inc., Jeffrey Martin Inc. and Clorox. Other network sponsors included Ex-Lax Inc., Avco Embassy and Columbia Pictures, S. C. Johnson & Son, Thompson Medical Co., Fiat, Beecham Products, Canon and the Lewis Howe Co. for Tums.

Several network buyers, in hearing of the $1.96 cpm estimate, called it "a dirt cheap buy," later adding such descriptions as "giveaway," "bargain basement," or "daytime cpms in prime time." Though an advertiser's average prime time cpm over the course of a season depends on the mix of programs, anything on the downside of a $5 cpm is considered good value.

There always is a gamble that any network purchase might fail to deliver the projected numbers on which the buy is made. But with "Playing for Time," there was an added element of uncertainty: Would there be a viewer backlash and an advertiser boycott?

▪ "We haven't received a single negative call," said Martin Himmel, president of Jeffrey Martin, which had multiple buys for Topol toothpaste and Porcelana cream. Mr. Himmel thought the protests against the casting of Vanessa Redgrave were "blown way out of proportion" and said that his company signed on over a month ago. The heavy exposure for Jeffrey Martin products comes at a fortuitous time as the company is several weeks away from following it up with a "gigantic" national transit advertising campaign for Topol and Porcelana.

Shortly before the movie aired, CBS was bombarded with over 900 calls protesting Ms. Redgrave's role. But after showing, the network received about 400 calls, running six to one in favor of the movie. Some CBS affiliates were picketed while KOOL-TV, Phoenix, sustained minor damage due to a fire bomb.

A spokesman for AMC said, "The decision to purchase time was based upon the anticipated size and diversity of this critically acclaimed production. We cannot and should not attempt to dictate the casting of any television production, which we regard as an artistic decision." AMC also noted that it had not received any protesting calls or telegrams. The same was true at Compton Advertising, the agency that placed AMC and Thompson Medical.

John McAvity, vp-broadcast, Adforce, Pfizer's in-house agency, said "Playing for Time" was "an extremely good media buy," and doubted there would be a residual backlash. "It won't hurt us at all," he said. "Besides people will forget all about it in two weeks."

Mr. McAvity lashed out at pressure groups in general, noting that one group's recent list of sponsors to be avoided included companies responsible for "40% of the products on any supermarket's shelf." #

Philips' Sylvania buy will boost tv position

NEW YORK—North American Philips Corp.'s agreement to purchase GTE's consumer electronics business ostensibly will boost the company to a strong third-place standing in the U.S. tv set industry.

But in the meantime, two agencies now are wondering how their assignments will be affected.

With an 8% share held by its Magnavox subsidiary, Philips stands to gain an estimated 10% from the Sylvania, Philco and private label operations that are part of the projected transaction. That would place Philips squarely ahead of General Electric, with 12%, and behind market leaders Zenith Radio Corp. and RCA, who jockey for first with shares that vary seasonally between 20% and 22% of the projected 9,600,000 to 9,800,000 set volume in '80.

A Philips spokesman maintained that inevitable "dealer fallout" would reduce the combined market share to about 11%.

The action also could give Philips another potential ally for its videodiscs, should Sylvania decide to enter the field.

While several obstacles—most notably Justice Department scrutiny of antitrust implications—cloud the outcome of the agreement, Doyle Dane Bernbach and Campbell-Ewald stand to lose, gain or retain large chunks of ad business.

Doyle Dane's 20-year relationship with GTE prompted its reluctant resignation of the Sony Corp. account a year ago. A Philips spokesman said no determination had been made whether Sylvania's advertising and marketing would be consolidated at Magnavox. Its agency is Campbell-Ewald, Detroit, which won the $8,000,000 account from William Esty Co. last February. *(See related story, Page 78.)*

Meanwhile, Sony Consumer Products Co. president Joseph Lagore issued a strong denial to a reporter's question as to whether a Sylvania account shift would lead Sony to rejoin its former agency. Sony spent $5,000,000 on color tv set advertising last year via McCann-Erickson.

Philips has announced that it will preserve the Sylvania and Philco brands should it successfully acquire GTE's business. #

NBC hangs tough

(Continued from Page 3)

son tv is in now vs. last year, but levels were up 0.5% in week No. 1 of 1980 and at the same 59.1% level for week No. 2.

One exec sees something even more significant happening, perhaps at CBS' expense. "Last year CBS' success was built on its strength on three nights, Sunday, Monday and Friday," he noted. "But so far NBC's scheduling has knocked CBS out on Sunday and Monday. CBS will have to get that audience back." But the feeling is that with the strike and the fact that CBS won't be able to make inroads probably until after the November sweeps, that Sunday and Monday base may erode somewhat. Carrying that theory one step further raises questions about CBS' made-for-tv movies, the other key ingredient in its ratings triumph last year.

Many of those movies did exceptionally well because CBS promoted them like crazy on Sunday and Monday. This year, however, the network hasn't been able to muster that promotional clout for its Tuesday and Wednesday movies because the audience has been with NBC. By the same token, CBS could probably dispute that theory, pointing to the continued ratings success of "The Dukes of Hazzard" and "Dallas" on Friday, both with 40-plus shares in reruns.

Meanwhile, NBC is probably plotting replacement strategy for anywhere from 30 minutes to two hours of prime time as new series falter. #

July sweeps show tv demographic leaders

By MAURINE CHRISTOPHER

NEW YORK—If an advertiser wants to target women 18 to 49 in a top-50-markets campaign, which stations look best for his product?

Or suppose the promotion is for a male-skewed spot schedule. What are the most likely choices?

Which stations dominate in sign-on to sign-off strength?

These are a few of the questions that are answered in ADVERTISING AGE's latest rating analysis covering the Arbitron July sweeps returns for the country's largest population centers. These numbers reflect viewing from July 9 through Aug. 5.

Tables showing affiliate and independent stations' competitive standings in demographic and household audience shares were put together by a veteran broadcast researcher. In each market, stations were ranked according to the percentage of the young adult women reached during the telecast day in the total station area.

Looked at from the network rivalry standpoint, more often than not ABC affiliates appear to be on the right wavelength to attract the young women who are the key targets of many advertisers. ABC affiliates placed first in shares with women 18 to 49 in 36 markets, two of them in a tie.

The ABC outlet was the leader with this favored set in the 16 largest markets. CBS stations captured first in 11 markets, while NBC was first in four.

In New York, the edge was sizable, with WABC-TV averaging a 26 share with young women, eight points ahead of runner-up WCBS-TV. In men 18 to 49, the lead was less—21 for WABC-TV to 17 for WCBS-TV and WNBC-TV.

In Los Angeles, ABC-owned KABC-TV was even further ahead in its appeal to women, scoring 27 to 16 for second-place KNBC. With young men, KABC-TV had a seven-point edge over KNBC. Indie KTLA tied KNXT (CBS) at 13 for women and edged past at 15 for men.

Independent WGN-TV in Chicago bested the NBC affiliate—WMAQ-TV—to place third behind WLS-TV (ABC) and WBBM-TV (CBS) with females 18-49. With men 18-49, the indie was four points in front of WMAQ-TV with a 20 share.

In Philadelphia, WPVI (ABC) swept all the columns except late fringe. (Late fringe and sign-on to sign-off shares were based on Arbitron's area of dominant influence, while the men and women figures were based on total station area.) At 42, WPVI was exactly double the 21 points scored by second place WCAU-TV (CBS) in young women shares.

Vitality in three of four columns was evidenced by ABC's KGO-TV, San Francisco, which was 11 points ahead of KPIX (CBS) in the young female category and three points ahead of runner-up KTVU with their male counterparts. KTVU placed third with women at a 19 share, putting the NBC affiliate, KRON-TV, fourth in two columns in the table. NBC led with "Tonight" in late fringe.

- Market No. 8, Washington, truly is a hotly contested territory, with Metromedia's WTTG mounting an aggressive challenge to the Big 3 affiliates. WJLA-TV (ABC) led with young women and with sign-on to sign-off home shares, while WDVM-TV (CBS) and WTTG scored 24 to tie for first with their male contemporaries.

At 27, WTTG was three points ahead of "Tonight" in household shares. The syndie programing that turned the trick for Metromedia: "Odd Couple" from Paramount and "Perry Mason" from Viacom. "Cell Block H" from Firestone served as a solid lead-in against the news.

Arbitron regular rating reports note that the estimates included do not cover extended satellite reach for superstations, such as WTBS. In the case of WTBS, the researcher published a special total coverage area report.

If those men and women figures were used as a basis, WTBS emerged as the big winner in the young women and men column in Atlanta with a 46 and 55 share, respectively.

- Over-all, the big city competition in late night numbers produced some impressive returns. The No. 1 top 50 markets station in weekday late fringe was KBTV (ABC), Denver, which pulled a 53 homes share. The station did it with a mixture of syndicated and network fare.

ABC was preempted at 10:30 p.m. (for delayed showing). Into the next hour and a half went syndicated repeats of Paramount's "M*A*S*H," followed by Colbert's "Joker's Wild." The taped network material resumed about midnight.

Preempting a network, in this instance CBS, similarly paid off in the Arbitrons for KSL-TV, Salt Lake City. It was second in the top

These tables show the tv stations in each of the top 50 markets ranked in terms of shares for women aged 18 through 49 as reported in the Arbitron July sweeps covering the full telecast day, July 9 through Aug. 5. The last three columns cover men aged 18 to 49 and household shares for the full telecast day and late fringe.

The people shares are based on the total survey area (TSA); the last two columns on homes in Arbitron's area of dominant influence (ADI). These figures were compiled for ADVERTISING AGE from the Arbitron books by a veteran tv researcher.

Initials in parentheses indicate network affiliation (ABC, CBS, NBC); stations without initials are independents. Late fringe is 11:30 p.m. to 1 a.m. Monday-Friday in eastern and Pacific time zones. In central and mountain zones, each is one hour earlier.

These lists include local network affiliates and share runners-up in each market whether local indies or distant stations, affiliated or independent. Not all stations are listed. A blank under any column indicates not reported. Stations appear if they drew a minimum 3 sign-on to sign-off household share.

*The total survey area as defined by Arbitron does not include distant satellite or microwave coverage. In July, Arbitron estimated its tsa excludes 98% of WTBS' net weekly circulation.

Atlanta figures in parentheses in this table are based on the special WTBS total coverage area report prepared by Arbitron for the superstation which can be seen via satellite in 50 states. The other Atlanta figures are from the regular Atlanta report, using the same bases as the rest of these data.

July sweeps demographics

(Continued from Page 90)

50 markets in late fringe with a 51 household share. KSL-TV played "M*A*S*H" at 10:30 p.m. (the same sitcom also was stripped in early fringe) followed by "Streets of San Francisco" from Rohrs/-Victory.

Behind KBTV and KSL-TV in three, four, five order in delivering the stay-up-late crowd were KOÇO-TV, Oklahoma City, 45 homes share; WBRC-TV, Birmingham, 44, and WRGB, Albany/-Schenectady/Troy, 41. WBRC, a 24-hour station in a blue-collar town, also stood out in the May sweeps.

While the network affiliates held the win, place and show positions with young women in most of these large cities, this analysis (as did an earlier one in May) also dramatizes the growing strength of independents in many markets. Other markets besides those already mentioned in which an indie placed third with this consumer group include Sacramento/Stockton, KTXV; Portland, Ore., KPTV, and Charlotte, WCCB.

A striking standout among the indies was Meredith's KPHO-TV in Phoenix. It is the first indie ever to beat all three major network outlets in sign-on to sign-off share for a sweeps month, rating experts believe. KPHO-TV took their measure in men 18-49, and tied KTVK-TV (ABC) for first place with young women. The networks' concentration on election-year politics, including the GOP convention, obviously was a major factor in the indies' gains in the July Arbitrons and Nielsens.

By Nielsen's count the big national winner in weekly cumulative audiences, counting all homes watching at least once over seven days of telecasting, was WPIX, a New York indie with considerable microwave extended coverage. The estimate: 6,170,000 homes. Nielsen said its books now cover distant as well as home-market reach.

Two other New York indies—WNEW-TV, 6,112,000, and WOR-TV, 5,738,000—were next, and WTBS, Atlanta, now available to 10,200,000 homes off-air and by Satcom I, ranked seventh with 4,297,000.

In between were the key network-owned New York stations WCBS-TV, 5,621,000; WNBC-TV, 5,605,000, and WABC-TV, 5,599,000.

Using another yardstick—households reached during the average quarter-hour of a month when the networks lost audiences to indies due to their extensive coverage of the Republican convention and its buildup and letdown—the top spots went to affiliates, according to Nielsen.

The quarter-hour Nielsen homes winners: WABC-TV, 433,000; WCBS-TV, 358,000, and WNBC-TV, 314,000. WNEW-TV followed with 307,000 and the most widely watched superstation, WTBS, was 14th at 195,000. #

Leading tv stations Sign-on to sign-off Average quarter-hour homes reached

Rank	Station	July Nielsens
1.	WABC-TV, New York	433,000
2.	WCBS-TV, New York	358,000
3.	WNBC-TV, New York	314,000
4.	WNEW-TV, New York	307,000
5.	KABC-TV, Los Angeles	292,000
6.	WPIX, New York	284,000
7.	WLS-TV, Chicago	251,000
8.	WPVI-TV, Philadelphia	238,000
9.	WGN-TV, Chicago	227,000
10.	KNBC, Los Angeles	215,000
11.	KNXT, Los Angeles	215,000
12.	WBBM-TV, Chicago	207,000
13.	WOR-TV, New York	200,000
14.	WTBS, Atlanta	195,000
15.	KTLA, Los Angeles	176,000

This is the average for July 10-Aug. 6 and covers extended reach for superstations WGN-TV, Chicago, WOR-TV, New York and WTBS, Atlanta, via Satcom I. Microwave extensions also are covered in the Nielsen report.

9.	WXIX-TV, Cincinnati	18

These figures are based on total station audience reported in July sweeps for women aged 18 to 49. Shares are an average for sign-on to sign-off.

advertiser people

Smith to Von Furstenberg job

NEW YORK—Michael Smith has been named director of advertising of Diane Von Furstenberg Inc., a new post. He formerly was art director of Murray Salit & Associates, agency for the company. No successor yet at Salit.

Other people moving:

James Weren to director of marketing, a new position, Paterno Imports, Chicago, from product manager for the creative products division of Multi-National Investment Corp.

Gale Jenkins to vp-creative development, Coleco Industries, Hartford, Conn., a newly created post, from senior vp-research and development, Leisure Concepts, New York. Mr. Jenkins will develop visual design for both product and packaging.

James R. Norton to marketing communications manager, a new title, Lender's Bagel Bakery, West Haven, Conn., from his own marketing company.

Tom Collins to marketing director, a new post, McKesson & Wine & Spirits Co., New York, from McKesson's Dallas/Fort Worth operation. The division, one of six operating units of Foremost-McKesson Wine & Spirits, controls 32 wholesale distributor houses across the country.

Robert D. Glover to president, J. B. Williams Co., East Hanover, N.J., from exec vp, where no successor has yet been named. Mr. Glover succeeds the late Matthew Rosenhaus (AA, Sept. 1). Mr. Glover continues as president-chief operating officer, international division.

William J. Lyon to director of marketing services, Eltra Corp.'s Converse division, Wilmington, Mass., a new post, from ad manager, General Electric's engineering plastics division, Pittsfield, Mass. No successor.

Kathryn Cass to the new position of director of international marketing, Time-Life Films' motion picture division, New York, from director of nonaffiliated sales, Time Inc.'s Home Box Office.

Nico Spannenburg to director-advertising and sales promotion, Grolsch Importers, Atlanta, a new position. Mr. Spannenburg was director-advertising and sales promotion, Grolsch Breweries, Holland, makers of Grolsch beer.

Usman Mirza to vp-marketing, Coca-Cola Bottling Co., San Antonio, from home market planner, Coca-Cola U.S.A., Atlanta. He succeeds **Clarke Boddy,** who will take charge of the company's advertising and pr.

Maureen F. Hartigan to manager-advertising, TRW Inc., Cleveland, reporting to director of advertising Stephen N. Bowen. Ms. Hartigan comes from General Electric's plastics business division, Pittsfield, Mass., where she was marketing communications specialist.

Peter J. Mihajlov to vp-marketing for refrigerated foods, Pillsbury Co., Minneapolis, from director of marketing. Also, **Richard Nickel** to vp-business manager for frozen pizza from vp-marketing.

Richard T. Maurer to exec vp-marketing, Bankers Life & Casualty, Northbrook, Ill., from vp-marketing, State Mutual Life Assurance, Worcester, Mass. Mr. Maurer succeeds **Webster B. Hurley,** now chairman of Union Bankers Insurance, a Bankers Life subsidiary.

Jeramy Lanigan to president, book division, Times Mirror Magazines, New York, from senior vp-director of marketing, corporate planning and budgets, Funk & Wagnalls. She succeeds **Adele Bowers,** who retired after 33 years with the company.

David L. Morris to marketing manager, Busch beer, Anheuser-Busch, St. Louis, from staff of the vp-beer marketing, succeeding **W. B. Roberts III,** who left to open his own marketing consultancy. Also, **Mark Danner** to senior executive assistant to vp-marketing operations, from Los Angeles region marketing coordinator, succeeding **Robert Signorelli,** who becomes division sales manager for northern California and Hawaii.

Don Lepone to group product director-diet, a new post, Thompson Medical Co., New York, from brand manager on Oxy 5 at Norcliff-Thayer division of Revlon, which would not comment on a successor. Also at Thompson, **Jerry Freeman** to director-market research, a new post, from assistant manager-market research, Chesebrough-Pond's, Greenwich, Conn.

O. D. Dearman to vp over the Starbooks children's book line at L'eggs Products, a division of Hanes, Winston-Salem, from director of marketing, Starbooks. No successor.

Sharon Lavender to director of advertising-sales promotion, a new post, Fashion Fair Cosmetics, a division of Johnson Publishing, Chicago, from advertising manager, Florsheim Thayer McNeil, a division of the Florsheim Shoe Co.

Timothy Huber to director of corporate marketing, Bose Corp., Framingham, Mass. Mr. Huber comes to the new post at the high fidelity component marketer from Nixdorf Computer, where he was director of sales and marketing. His successor has not yet been named.

Peter Blum to president, industrial chemicals division, American Hoechst Corp., Somerville, N.J., from director, Hoechst AG's corporate marketing department in West Germany. He succeeds **Dieter Poetzsch,** who has been named president, Hoechst Canada, replacing **Kurt Aach,** who retired. Mr. Blum will be succeeded by **Juergen Dormann,** who was assistant director in the marketing department. No successor.

Bill Matthies to director of marketing, Pioneer Electronics of America, Long Beach, Cal., from national sales manager-special markets. He succeeds **Bob Bunting,** who left. #

A-B readies big regional thrust

By JACQUES NEHER

MIAMI BEACH—Convinced that "Miller time" has begun to wind down, beer industry king Anheuser-Busch is now turning its guns on a host of regional and smaller competitors it believes will threaten its domination of the suds market in the decade ahead.

But while A-B's three-year campaign to suppress No. 2 Miller Brewing Co. was fought primarily by headquarters on the national media battlefield, the St. Louis brewer warned its 960 independent wholesalers here last week that they will have to take a greater stake in upcoming marketing wars—wars that will require grassroots marketing sophistication, which includes each hiring brand managers and developing written strategic plans.

Other significant developments gleaned from A-B's three-day wholesaler extravaganza and an interview with brewing company president Dennis P. Long:

- The company plans to test market a seventh brand early next year—possibly Budweiser Light.
- The Eagle snack line, introduced into test last year, will be rolled out into East Coast taverns later this month.
- Root 66, the company's first real soft drink entry, will move into more markets in the coming months, as will Wurzburger Hofbrau, its first imported beer.
- The 1981 media budget will only keep pace with inflation, but will yield a greater slice for the new media, primarily cable tv and movie theater advertising.
- Michelob will get a new "seven-day weekend" advertising campaign (AA, Oct. 6), while current campaigns for Michelob Light, Natural Light, Budweiser and a "mid-premium priced" Busch will be extended with new commercials set to break this month.
- Congratulating itself for "one of the greatest marketing decisions in our history," the company is promising a "promotional bonanza" from its 200-spot, $30,000,000 investment in the 1984 Summer Olympics in Los Angeles.

The convention, themed "Bandwagon '81," dazzled 3,200 attendees with 10 solid hours of speeches, marching bands, song-and-dance acts, and varied performances—or at least appearances—

(Continued on Page 96)

Car dealers say traffic up for '81s

DETROIT—Reviving whiffs of optimism wafted across the auto marketing scene last week as the debut of the U.S. makers' 1981 models generated some initial excitement.

A spot survey of dealers indicated good showroom traffic. The new, smaller entries were reported selling well, despite the heftier prices. Chrysler's new K-cars and Ford Motor Co.'s Escort and Lynx world cars were meeting little price resistance, dealers said.

One dealer said the fact that the used car market is good means higher prices for trade-ins, thereby cushioning some of the effect of the higher prices for new car buyers.

But the auto marketers have taken steps to counteract the potential sales-dampening effect of higher prices. Ford froze Escort-Lynx prices at introductory levels while boosting prices on the rest of its line.

Chrysler has announced plans for a "base" K-car priced several hundred dollars below the current models. General Motors is advertising holdover 1980 Chevrolet Monzas at $4,552, and Ford has

Royals
Chocolates with a whisper of mint

Minty M&M Royals get gleeful reception

M&M/Mars, Hackettstown, N.J., is running this commercial in upstate New York test markets for its new candy-coated mint chocolates called Royals. Similar in size and shape to M&M chocolate candies, the brand is expected to roll out soon. The commercial, created by Ted Bates & Co., New York, features a glee club passing the word about "Chocolates with a whisper of mint."

Candidates start final ad blitz

By LEAH ROZEN

NEW YORK—It boils down to this: Will Republican Ronald Reagan be able to convince the voting public that he is bright enough and capable enough to be President, or will Democrat Jimmy Carter instill enough doubt in their minds so that voters reelect him despite obvious misgivings about his first term in office.

That is what the final weeks' ad strategies for the two major candidates are all about. Those strategies will be evident in 30-second spots that will show up on the tv screens with growing frequency until, the week before Nov. 4, they will appear to be crowding out nearly all other commercials.

The Carter campaign may even try roadblocking again, a term used when spots run on all three networks at the same time so that no matter how you spin your dial, you get the same message. A Carter roadblock ran Oct. 2 at 10:55 p.m. with a five-minute spot. The Reagan people said they have no plans to roadblock, a time-buying strategy the networks objected to in previous presidential campaigns but about which they no longer complain.

- Whether they're roadblocked or not, many of the spots crowding onto the airwaves in the next three weeks will be what the mediawise public has come to recognize as negative advertising. These are the spots that say little about the records or stands of the candidate paying for them, but a lot of bad stuff about his opponents.

Mr. Carter's promise late last week to stop saying in his campaign appearances nasty things about Mr. Reagan is not expected to apply to his advertising.

"Negative advertising has become a very accepted political practice," said Peter Broer, who works at David Sawyer & Associ-

Lipton lures Campbell users

ENGLEWOOD CLIFFS, N.J.—Thomas J. Lipton Inc. has taken a direct comparative taste test approach to switch canned soup users to its packaged products this winter.

The company takes on Campbell Soup Co.'s chicken noodle soup in a new campaign that has just broken nationally. A woman is asked to taste two different chicken noodle soups. After she decides which she prefers, the test administrator says, "Let's see what you didn't choose." When he uncovers Campbell, she notes, "That's the one I use."

An announcer then notes that in a home-use test, people choose Lipton 2 to 1.

This campaign replaces last year's effort featuring a little girl dressed up as a chicken to appear in a school play about chicken noodle soup. That story line was picked up by actress Suzanne Somers, who parodied it in a nightclub act until she was barred from using the music.

According to Dolph von Arx, Lipton senior vp-marketing, the approach is aimed at encouraging canned soup users to cross over to the dry segment. He said research has shown there is very little crossover from one segment to the other among consumers of either type.

Lipton leads the dry soup segment with more than an 80% market share, while Campbell dominates the canned segment with a similar franchise. Mr. von Arx noted that the segments are not viewed together because of the small incidence of crossover.

In addition to the comparative effort for chicken noodle soup, Lipton is running another recipe-oriented campaign supporting its onion varieties. Both are handled by Young & Rubicam; media is placed in-house. #

Chairman wins board battle

Another exit at Greyhound

By JOHN REVETT

LOS ANGELES—The departure of Robert K. Swanson as president of Greyhound Corp. has the business community in Phoenix abuzz about why the man tagged as the next Greyhound chief abruptly quit after only eight months in the post.

What can safely be called informed speculation has it that Mr. Swanson, a highly regarded former agency man (Needham, Harper & Steers' Benson Advertising boss in London) and a top marketing and management exec at General Mills before joining Greyhound, found himself in what one source called "an untenable position" after unsuccessfully seeking support from Greyhound board members.

Why was Mr. Swanson seeking support?

Key business sources here expressed no doubt Mr. Swanson had clashed with Greyhound chairman-chief exec Gerald H. Trautman, one of the city's favorite corporate subjects of discussion.

"He has the board in the palm of his hand because he's made the company stronger and because he was their lawyer for years," said a veteran Greyhound observer who has known Mr. Trautman since he took the reins at Greyhound and started diversifying with the acquisition of Armour & Co. in 1970.

■ There have been numerous departures connected in one way or another with disfavor from the Greyhound chief in the years since then. Most recent, before the resignation of Mr. Swanson, was Jerry Ringlein, who had been head of the Armour processed meats division before it was absorbed into Armour Foods under Wallace Tunnell (AA, July 28). Mr. Ringlein had been slated for a new corporate post that didn't materialize; he left within the past 10 days.

Earlier in July, Donald J. Shaughnessy resigned as president of Armour & Co. (AA, July 20). Mr. Trautman has since taken over those duties much as he took charge of operating responsibilities for Greyhound bus lines in 1978. That move involved the resignation of James L. Korrigan, now head of Trailways Inc., Greyhound's chief competitor.

Defenders of Mr. Trautman note that he revitalized the ailing bus line, and there is general feeling among business sources here that

Here's a great idea. This holiday season forget about the digital can openers, and the toys that devour batteries like peanuts.

This year, spend your hard-earned dollars on gifts that are sure to last and be loved all through the year.

Gifts from Levi's!

Like a handsome pair of Levi's Action Slacks. With a new Levi's belt. A Levi's shirt, blouse, or warm-up suit. Or Levi's jeans, boots, socks, or boy's overalls.

They're gifts that are as practical to *give* as they are an absolute delight to *receive*. Because every stitch is sewn with traditional Levi's quality.

And quality *never* goes out of style.

First Christmas gift campaign from Levi's

Levi's are as much fun to give as they are to receive, according to this gatefold ad which will run in *TV Guide* and *People* magazines the first week in December. Levi Strauss & Co.'s first Christmas campaign, from Foote, Cone & Belding/Honig, San Francisco, breaks on tv on Dec. 1.

Too hot for the Windy City

Chicagoans said *non*, not *ooh, la la*, when Bon Jour bus boards started appearing last week. The transit authority received so many calls objecting to the unzipped model that the posters were removed after only one day. An official from the fashion jeans company said, "Chicagoans have dirty minds." *(Staff photo by Mary Cairns.)*

Adieu, Bon Jour

Protests whisk unzipped jeans off buses

CHICAGO—Bon Jour Fashions joined the ranks of jeans marketers under fire for advertising tactics and questionable taste when its new transit posters disappeared within 24 hours of their debut on city buses here.

Callers deluged the Chicago Transit Authority last Wednesday just hours after the first 200 ads of a 400-poster series for the New York company's Bon Jour Action Jeans went up. The ad featured a pair of partially unzipped jeans on the hips of a faceless model.

■ Miffed at the response, Bon Jour execs nevertheless instructed the TDI/Winston Network, the nation's leading transit advertising representative, to replace the posters. An earlier ad, showing a yellow sports car halted by a Bon Jour-clad man's leg, took the place of the unzipped ad last Thursday morning.

"We are in the business of dressing people, not undressing them," said a frustrated Charles Dayan, Bon Jour vp. "I think she is zipping the jeans up." He said Chicagoans "have dirty minds."

■ The Bon Jour ads, created by the company's in-house agency, have just started to appear in New York subways and on buses, and so far there has been no adverse public reaction. "In New York, we're in the process of putting [the posters] up," said Mort Heineman, senior vp at TDI. "If we hear any complaints, we'll soon be in the process of taking them down."

Mr. Heineman noted that TDI has turned down ads submitted by other jeans marketers because "they were not in good taste." In comparison with the rejected ads and campaigns currently appearing, Mr. Heineman feels the Bon Jour effort is "really not that bad." Mr. Heineman does not expect an outcry against the campaign there because "the New York audience is generally more tolerant than other audiences," he said.

While the jeans marketers have become increasingly sensitive to consumer complaints and bad publicity over advertising, Bon Jour and others are irked by the furor. Wrangler, for example, cried foul when CBS refused to run a

Section 2-Canada

Most of the news coming from Canada seems to center on the country's political troubles (whence comes the inspiration for the symbol used in this year's section). But the economic outlook is hardly bleak, especially for tabloid newspapermen, experienced account execs, headhunters, direct response specialists and MacLaren president-ceo Tony Miller. The section begins opposite Page 50.

TI selects McCann over Y&R

By TOM BAYER

DALLAS—Texas Instruments chose McCann-Erickson to handle its worldwide consolidated advertising now handled by 20 agencies.

To service the account, which McCann-Erickson estimates at $20,000,000, the agency will open a Dallas office to be directed by Jim Hetherly, exec vp.

Culminating a five-month search that began with 12 agencies competing for the account, the decision is said to have been based on the agency's international and strategic planning capabilities and the agency's management team.

■ Opening the Dallas office was part of McCann's proposal and was not specified by TI, a TI spokesman said. Mr. Hetherly now manages the Houston M-E office and will continue to do so while adding the Dallas office responsibilities, which are expected to include the addition of 20 to 25 people.

When the final decision was made Thursday, only McCann and

TALENT SHORTAGE PERSISTS

By KEVIN McMANUS

TORONTO—The Canadian ad industry points to itself as the villain mainly responsible for one of its biggest problems: too few trained people for too many vacant positions.

"We haven't done a very good job in training our own," says the head of a large agency. "The curse of the industry," another exec labels the shrunken talent pool. A third says the problem is "real, serious and seemingly here to stay."

Everyone who talks about the talent shortage claims to know its causes, its effects on business and its probable solution. Most agency heads say they are moving toward that solution, and a handful have proof that they are doing so.

"The problem of too many vacant positions has resulted in constant job-switching as agencies desperately try to maintain their lot," says Julian Clopet, president of Ogilvy & Mather Canada. Other results, he says, include sharply escalating salary costs and client discontent at the high staff turnover.

Mr. Clopet, who speaks often and authoritatively about the problem, outlined its causes in an article he penned early this year. Canadian agencies, he wrote, have relied for too long on package goods companies to do the majority of the training. Also, candidates for account work are often judged by their resumes rather than on individual merit.

"You don't believe me?" he wrote. "Talk to the numerous people who have not had the opportunity of working for one of the leading package goods companies or their agencies, and have aspirations to do so. It's an enlightening experience of frustration, anger and perceived discrimination."

"Also remember," he added in a recent interview, "that there are only just over 5,000 people employed in all of advertising in Canada, including secretarial staff. It's a very small field."

The talent shortage has been aggravated by new, tighter immigration laws in Canada. Until a few years ago, two important sources of talent were Britain and the U.S. But as unemployment rose in Canada, the government lowered the number of immigrants it allowed to enter the country.

Ad agency execs discussing the problem concede that most of the blame for the shortage lies with the industry's poor record for training people. "We haven't had enough specific educational programs, like they have in the U.S.," says Bill Bremner, chairman of Vickers & Benson, Toronto. "Too often, it's an ad-lib situation. In other words, it's on-site training, rather than a planned program."

The upshot has been a near epidemic of raiding. "It's no secret that ad agencies add to their staffs by hiring experienced people from other agencies," says Jim Anderson, chairman of McKim Advertising, Toronto. "Everyone does that."

- Raiding, in turn, has given rise to a flourishing trade for executive search companies. As Art Collins, chairman of Foster Advertising, puts it, "There's a very active headhunting industry in Toronto; I guess also in Montreal."

A specialist in matching people with jobs in the ad industry explains why qualified candidates, especially senior account execs and account supervisors, are in high demand. "The advertising industry is more respected in the United States and Britain than in Canada," says Fred Litman, a partner of Management One Consultants, Toronto. "U.S. agencies recruit heavily on campus and sell advertising as a profession to young people."

The shortage of talent in Canada gradually is becoming less acute, Mr. Litman thinks, because Canadian agencies are starting to recruit more heavily from business schools and junior colleges, and are investing in training programs.

Not so, says another ad specialist in the recruitment business. Derek Wrangham, an independent consultant based in Toronto, says that Canadian ad agencies "can't afford to carry trainees." Moreover, he believes, the talent shortage is no worse in Canada than in the U.S., and no more serious now than in the past. "There may always be a shortage of talented people," he says. "There aren't many of them around *anywhere*."

To be sure, there are plenty of potential account execs, artists and writers to be found both on and off campus in Canada. And ad agencies, at least the biggest ones, seem to be making new efforts to track down and train these candidates. In the forefront is Ogilvy & Mather, which, under the guidance of Julian Clopet, has established an ambitious program.

Ogilvy started its program five years ago with a 16-week course for junior account execs. The course, which involved campus recruitment, classroom sessions and agency job assignments, worked on the fundamentals of the business. "If someone came in from a business school"—Mr. Clopet uses an example—"he'd learn how to write a copy strategy, how to read a Nielsen, what you should know about print production and tv production, how to write well."

- Regarding the size of the Canadian talent pool in the future, Mr. Clopet says, "It's absolutely vital for us [the ad industry] to stay committed. There's an enormous temptation to cut back training during downturns. You've seen it on Madison Avenue, you've seen it in England and you'll see it here, where agencies in tough economic times will not go out and train young people. And the net result is that four or five years hence there is an enormous shortage of talent, escalating salaries and what have you . . . ."

The commitment Mr. Clopet urges is more easily advocated than carried out. Even during good economic times, medium and large agencies often would rather fight potential defections with individual salary boosts than with expensive, time-consuming training programs. One head of a large agency says that he usually will try to talk a departing employe into staying.

"If it's a bad move, I'll fight like hell," he says. "We had an experience with it just recently. A very bright young man all ready to make a move came to me and I said, 'Are you sure you know what you're doing?' And he said yes. And I said, 'I think you're gonna lose yourself in the traffic; I don't think you're gonna be negotiable two years from now.'

"He said fine; he was still going. I went on a business trip and I came back a week later and found him still with us. He'd changed his mind. Best move he ever made." #

MORE CANADIANS SPEND THEIR SUNDAYS WITH US.

Sunday SUN
HELP

We're Toronto's Sunday Sun. We have a circulation of 390,864*, which makes us the largest Sunday paper in Canada.

And because we're located in Canada's largest city, Toronto, we're in a position to show your ad to the country's top market in terms of retail sales volume.

We're also in a position to show your ad to your prime customers.

For example, nearly 50 percent of our readers are between the ages of 18 and 34†. And a whopping 63 percent of our entire readership have annual household incomes exceeding $15,000.

On top of all that. The Sunday Sun is a tabloid. Our size makes us easier to read. Our size makes your ad easier to read.

And the Sunday Sun is packed with informative, entertaining and widely-read feature sections.

Like Travel, Business, Real Estate, Entertainment and TV.

Want to know more? Call us collect at 416-868-2303 and ask for our Director of Advertising, Bruce Tuttle.

Ask Bruce to send you a copy of the Sunday Sun.

From that, you'll learn why more Canadians spend their Sundays with us.

Top 50 Advertisers

Government, both provincial and federal, remained the major force in Canadian advertising during 1979. While the federal government still topped the list, the province of Quebec edged itself into fourth place, from seventh in 1978, while Ontario moved to the No. 12 slot.

The most dramatic increase, however, was recorded by General Foods, which spent C$20,459,515, compared to C$14,780,654 a year earlier.

These figures, compiled by Elliott Research, Toronto, represent all broadcast spending, but are selective in print media. They should be regarded only as a rough yardstick, and do not represent total spending. One can more closely approximate total spending by multiplying by 2.5 for national and by 5 for retail.

Retail ad spend booms

(Continued from Page S-1)
Toronto, the four biggest supermarket chains (Dominion, Steinberg/Miracle Mart, Loblaws/Kelly Douglas and Safeway) spent close to C$10,000,000 on measured media. And the figure doesn't include thick Wednesday flyers or newspaper ads.

During the same period, the three major non-food department store chains (Eaton's, Sears and The Bay/Simpsons), according to Elliott, picked up a C$10,500,000 tab. Industry insiders say that this represents less than 20% of total advertising expenditure by these chains.

▪ There are plenty of indications that retailers are spending more on broadcast media. The Retail Council of Canada reports that in 1976 stores spent 75% of their ad budget in newspapers. By last year this had dropped to 59%. During the same period, expenditure on tv rose from 2% to 14% of total media budget.

These figures are confirmed by the Television Bureau of Canada, which in 1976 recorded retailers as spending C$76,400,000 on tv or 18.5% of TvB members' total revenue. By last year, according to TvB, that figure had doubled to C$152,800,000, giving retailers 26% of total tv advertising.

While inflation explains some of the rise in spending, the share percentage does show the stores to be ahead.

The same picture emerges in figures supplied by the Radio Bureau of Canada. These show retailers have over the past five years increased spending on radio by 90% in total dollars, compared to a 50% rise by national advertisers.

According to George Murray, media director at Ogilvy & Mather, Toronto, rates in broadcast have moved ahead faster than inflation in Canada. He estimates that during the past five years tv rates are up by 67% and radio by 48%.

Those shops that have a slice of this lucrative pie are feeling pretty smug. All of those interviewed by ADVERTISING AGE felt it would be tough for the multinational agencies to break into the market in Canada.

"The retailers' philosophy is quite different from that of a national brand manager. The big package goods agencies just can't cope," said one exec in a typical response.

Vickers & Benson, Toronto, wanted in, but did not want to fall into that trap. The agency went headhunting and came back with a handsome prize: John Torella, who had been ad manager of Canada's third largest chain, Eaton's department stores.

▪ When Mr. Torella joined V&B earlier this year to set up a separate division, retail accounted for 18% of the agency's total billings. He forecasts that within two years it will be more like 25%, and grow from there.

As an insider, Mr. Torella says he was in on the beginning of the re-

Canada's Top 10 Agencies

Agency	1979 Billings (Canadian dollars)	Office Locations (headquarters in boldface)	Major Clients	Comments*
MacLaren	$85,000,000	**Toronto**, Montreal	General Motors, Molson, GE, Imperial Oil (Esso), Lever Bros., Canadian National Railways	Big and prosperous; "almost an institution"; active in Liberal politics; recently has undergone management changes.
Foster	$83,000,000	**Toronto**, Montreal, Winnipeg, Regina	General Motors, Canada Dry, Air Canada, Royal Bank of Canada, J.M. Schneider, Distillers Co., Government of Ontario	Low-profile; solid; not particularly aggressive; strong Montreal operation; nice people.
J. Walter Thompson	$81,000,000	**Toronto**, Montreal, Vancouver	Alberto-Culver, Labatt Breweries, Pepsi, Kraft, J&J, Ralston-Purina	Good all-around agency; fierce competitors; "same agency all over the world."
Cockfield Brown	$77,000,000	**Montreal**, Toronto, Winnipeg, Calgary, Vancouver	Dairy Bureau, Imperial Oil, Benson & Hedges, Bell Canada, Molson, Singer	Canada's only publicly held agency; erratic financial performance, partly due to efforts to buy back its stock.
McKim	$75,000,000	**Toronto**, Montreal, Winnipeg, Calgary, Edmonton, Vancouver	General Foods, AMC, Bell Canada, Gillette, S.C. Johnson, C P Air	Growing fast; low-profile; competitive; profitable; good management; strong Montreal operation.
Vickers & Benson	$73,000,000	**Toronto**, Montreal, Vancouver	Dairy Bureau of Canada; H.J. Heinz, Canadian Government Office of Tourism	Aggressive; well-run; "lotsa razzmatazz"; "hell-bent on growth"; highly visible; active in Liberal politics.
F.H. Hayhurst	$60,000,000	**Toronto**, Montreal, Vancouver	Nabisco, Borden, Sunbeam, Holiday Inn, SAS, Michelin, Dominion Stores, Jaguar Rover Triumph	Family-owned; conservative; Ontario-oriented; well-managed; low-profile.
Ogilvy & Mather	$57,000,000	**Toronto**, Montreal	American Express, Avon, Beecham, Campbell Soup, Canadian Egg Marketing Agency, General Foods, Lever Bros., Mattel	Excellent creative; arrogant; undergone enormous revival in last few years; weak on service; good training program.
Baker-Lovick	$55,000,000	**Toronto**, Montreal, Vancouver, Calgary, Edmonton	Kodak, Continental Bank, Wm. Neilson & Co., B.C. Fisheries, GWG Ltd., Alberta Government Telephone	Strong western presence; not particularly aggressive; agency head a strong spokesman for industry.
McCann-Erickson	$53,000,000	**Toronto**, Montreal, Vancouver	Budget Rent-A-Car, Tampax, Chesebrough-Pond's, Coca-Cola, Amex Gold Card, Ikea, Levi Strauss, Quaker, Minute Maid	Strong; aggressive; well-managed; good creative.

*An industry consensus, gleaned from interviews with top agency executives.

some joint ventures. It is a very convenient and efficient way of combining the buying, selling, delivery, invoicing and accounting functions of retailing.

Ad Age: But who is going to be responsible for inputting information into the teleshop? Will it be the manufacturer, the retailer or a third party who will be dispassionate and provide simply the physical attributes of competing modes, together with comparative pricing and delivery and so forth?

Friesen: It is early for that yet. It would appear that this is an area in which there might be a need for some form of regulation.

Ad Age: Informed guesses put pay-tv in Canada sometime next year. Will this stall Canadian involvement in the U.S.?

Friesen: No. We look upon the two countries as completely separate market opportunities for our industry. We have the expertise and want to use it to its fullest extent. #

"...Excellent publica
professional sales

CMF&Z
CRESWELL, MUNSELL, FULTZ & ZIRBEL INC.

June 10, 1980

Mr. Charles B. Quindlen
Sr. Vice President - Director of Advertising
The Harvest Publishing Co.
9800 Detroit Avenue
Cleveland, OH 44102

Dear Charlie,

I am writing this note to tell you what a fan I am of your sales organization and especially Leon Kincaid, who is my primary contact.

I figure that I hear nearly 5 sales pitches a day. Of all those calls, I can count on one hand the really outstanding sales people. The Harvest Publishing folks are at the top of that list. I find that your people are some of the most helpful in that they provide needed data quickly and accurately. Also, I've had many occasions where Leon has developed a new ad approach to help solve mutual client problems. It's that type of out-of-the-box thinking that I appreciate.

Leon also continually services his accounts here. One good example is that he scans each of the Harvest books for articles that mention our various clients. He then clips and sends those stories to keep us updated on pertinent editorial comments.

I believe you deserve a tip of the hat for developing such an effective staff and sales organization to complement your fine publications. I know that this combination of excellent publications and a highly professional sales staff are tough competition for the other farm publications. A combination I wish more would emulate.

Sincerely,

Joseph P. Pratt
Vice President
Director of Media Services

tions and a highly staff." ...Joe Pratt **Director of Media Services Creswell, Munsell, Fultz & Zirbel, Inc.**

One of the prime reasons Harvest receives testimonials like this one from Joe Pratt is the experience of our sales force.

Harvest believes that, before you can be of real value to your customers, it is essential that you become an expert on the markets your publications serve... a process that takes time and dedication. Harvest salesmen take the time and are highly dedicated. In fact, our staff of 21 sales personnel represent a total of 304 years of service to our advertisers (an average of nearly 15 years each with Harvest).

When you couple this depth of experience with an equally professional staff of editors, the result is a group of state farm magazines which have become the preferred farm publications in each of their respective states... preferred both by our subscribers and by agri-marketers.

The next time you want to reach the total farm market in Ohio, Michigan, Pennsylvania, Kansas, Missouri and Florida, contact your nearest Harvest sales representative. You'll find that Harvest is a great place to do business.

Some Teleprompter systems on block

By MAURINE CHRISTOPHER

NEW YORK—To pave the way for the expected government okay of the $646,000,000 acquisition by Westinghouse Electric Corp. of Teleprompter Corp., Westinghouse has promised to sell off at least 12 Teleprompter cable systems within the coverage area of four of Group W's conventional tv stations.

Legal counsel for the Westinghouse Broadcasting (Group W) subsidiary, into which Teleprompter is to be merged, has informed the Federal Communications Commission that this step will be taken to comply with FCC's rather complicated cross-ownership policy. This rule is designed to prevent a company from owning over-the-air tv and cable in the same market. Group W's 12 radio stations present no such cross-ownership worries.

Industry observers on Wall Street and Madison Ave. expect great things from this corporate union between America's largest non-network station group and the nation's No. 1 cable systems operator. Teleprompter, an mso (multiple systems operator), now boasts 1,300,000 homes on 113 systems.

If the FCC, Securities & Exchange Commission, Federal Trade Commission and Teleprompter stockholders (at their next meeting in December or January) approve this $625-per-subscriber purchase, systems that would go up for sale include, in KPIX' San Francisco area, Oakland, Santa Cruz, Santa Clara, Newark, Milpitas and Los Gatos, and, in WBZ-TV's Boston territory, the Worcester system.

Also set to go on the block are systems in Ocean City, Ventnor and Vineland, N.J., all because of conflicts with KYW-TV, Philadelphia, and systems in Johnstown, Pa., and Morgantown, W. Va., due to overlap with KDKA-TV, Pittsburgh. Westinghouse's other owned tv station cities are Baltimore and Charlotte.

Teleprompter is among those competing for central city franchises in Philadelphia and had been planning to try for the Boston market. Under the Westinghouse banner, it doubtless would move to the sideline in both cases. Teleprompter was a loser in the bidding for central city Pittsburgh wired tv.

Westinghouse, which owns eight small catv systems in Georgia, won out over a wide field of would-be Teleprompter buyers with an offer of $38 per share for 17,000,000 shares of Teleprompter stock. When the imminence of the deal halted trading, the stock was up slightly to nearly $29 on the New York Stock Exchange.

Execs at both companies pointed out that their programing interests dovetail nicely. Teleprompter brings to the family part ownership (50%) in the No. 2 pay cable network, Showtime, while Westinghouse owns an aggressive conventional tv syndication house. Group W's most successful syndie series are "PM Magazine" and the "John Davidson Show."

▪ While some Wall Street analysts theorized that the sale price was "low" by today's inflated cable standards, Drexel Burnham Lambert's John Reidy disagreed. He noted that many of Teleprompter's 113 systems (about 40% by its count) are 12-channel operations that must be upgraded—at an estimated $175 per customer. That, he said, would bring the per-subscriber cost of this acquisition up to $800.

There also are Teleprompter debts to be assumed and costs running $100,000,000 or more for each new major city franchise "if they chose to play the big-city game," Mr. Reidy pointed out.

Dan Ritchie, head of Westinghouse Broadcasting, said Teleprompter chairman Jack Kent Cooke and other officers and employes would be retained. #

In-home banking getting major test

By JANET NEIMAN
and JOSH LEVINE

CHICAGO—A new generation of convenience banking will begin in December—when United American Service Corp., Knoxville, offers the first full-blown bank-at-home program.

In the first application of bank-at-home on a full scale, UASC, in a joint venture with Radio Shack division of Tandy Corp. and CompuServe, a subsidiary of H&R Block, is offering the new technology of the system, known as Express Information, to customers of all 40 banks under the UASC umbrella. Included are banks in Tennessee, Kentucky and Virginia.

Customers presently using the corporation's Express Banking services (ATM, tel-a-pay, visual display terminals) can take the home computer service. They pay only for the computer link equipment, which is rented from the bank for between $15 and $25 per month.

United American Bank in Knoxville will be the first UASC bank to use the service, beginning around Nov. 1.

After exhibiting at the American Bankers Assn. convention here last week, UASC president Tom Sudman said five of the top 50 banks in the U.S. are pursuing sign-up for the service.

"We've had as many out-of-state calls as we have had in-state from people wanting to apply for accounts," Mr. Sudman added.

Same great-tasting Camel Filters cigarette now in a new pack.

Camel does striptease

R. J. Reynolds Tobacco uses a "striptease" technique in test market ads and p.o.p. materials showing the package change for Camel Filters. The new package is expected to be introduced nationally in early 1981.

last minute news

Test mailing of 'WSJ Magazine' eyed in '81

NEW YORK—Dow Jones & Co. is shooting for an early 1981 mailing of its prototype consumer magazine, the *Wall Street Journal Magazine*, to advertisers and test subscription audiences. Decision on actual publication will follow. The monthly will concentrate on three themes: Personal finance, time and issues. *WSJ* executive editor Fred Taylor is in charge of the project; former *Geo* publisher and DJ consultant Charles (Jim) Randolph is prototype publisher, and former *Harper's* managing editor David Stanford is editor

Pearl debuts J.R. Ewing's Private Stock

SAN ANTONIO—J.R. Ewing's Private Stock, a superpremium beer made by Pearl Brewing Co., will reach shelves around the world this week as promotional efforts for the beer, licensed by Lorimar Productions (producer of "Dallas"), get under way. No ad plans have been set. Introduction will be handled with pr and promotional press parties. GSD&M, Austin, handles.

Reynolds execs spell out plans to sack competition

By SAM HARPER
and JOHN J. O'CONNOR

WINSTON-SALEM, N.C.—It had been several days since President Carter had stumped for votes here, but the guest-hungry Holiday Inn still hadn't gotten around to taking down a "Welcome, Mr. President" message.

In contrast to the hostelry's lackadaisical attitude, the mood at the R. J. Reynolds Tobacco building about a half-mile away is upbeat and aggressive.

In scarcely more than one year, the nation's No. 1 cigaret marketer has shed its "sleeping giant" image by mounting a massive attack on its industry brethren.

▪ To a large degree, two men are responsible for ridding the company of a mood that prior to their arrival "was something you might expect of a Frank Campbell funeral home," as an RJR supplier described it.

E. Horrigan Jr.

G. Long

The architects of RJR's get-tough-with-the competition strategy are Edward A. Horrigan Jr., chairman and president, and Gerald H. Long, exec vp. The pair took over the reins of the R. J. Reynolds Industries' subsidiary in the fall of 1979.

By now, the five other tobacco companies—including archrival Philip Morris U.S.A.—should be well aware that RJR is on the offensive and isn't taking prisoners. But just in case that message hasn't sunken in, Messrs. Horrigan and Long last week invited some two dozen reporters here for a show-and-tell session concerning the company's sales resurgence.

Nor did they hesitate to discuss their competition. In sizing up RJR's most formidable and fast-gaining foe, Philip Morris, the stocky, greying Mr. Long said with an unmistakably New York accent, "They've had a pretty good show for ten years, but not anymore." He stressed that PM will not overtake RJR in 1980, as some analysts had predicted.

As for Lorillard, whose Triumph comparative ad campaign is being contested in court by RJR, the hard-nosed exec observed, "The

(Continued on Page 114)

Cookies get fresh marketing

By NANCY GIGES

NEW YORK—Stepped up new product activity in the cookie segment of the $2.8 billion packaged biscuit market may indicate a return to growth for the sweets, which have declined in unit sales for the past 18 months.

Nabisco has just put three new cookies in test markets and Pepperidge Farm is rolling into two new areas with two new varieties. The new Nabisco items are Nana Banana creme sandwich cookies, I Screams n' You Screams creme sandwich cookies and Oatmeal & Fruit Soft Snacks.

The sandwich cookies are getting newspaper support in the areas where they're marketed, Nana Banana in the Southwest and I Screams in the Northeast. The oatmeal snack item, packaged in pairs in six foil packs to a box, also is getting newspaper support in the Northeast. William Esty Co. handles.

The latter product is a direct competitor to the Grandma's line that Frito-Lay bought earlier this year and is preparing to expand nationally next spring (AA, Aug. 18).

Pepperidge Farm is introducing its new specialty cookies, Geneva and Cappucino, into the Southwest at the end of this month and into New England next month. Geneva is described as an oval biscuit layered with chocolate and topped with bits of pecans; Cappucino is a rich coffee-flavored cookie with chocolate filling. Ogilvy & Mather handles the Pepperidge Farm line.

Prior to 1979, the cookie segment of the total market had been growing slightly, while the cracker segment was down. But that trend reversed itself and cookies have been down about 2% for the past 18 months.

According to the Biscuit &

SOUP STARTER
COOK SMARTER.
Swift

Swift asks: When do you use Soup Starter?

"Cook smarter with Soup Starter" is the theme of a new repositioning effort for the Swift & Co. product. Tv commercials, along with radio, magazine, newspapers and couponing support, will tout it as a dinnertime entree for busy homemakers. The campaign, to break in November, is the first creative work for Swift by its new agency, Foote, Cone & Belding, Chicago. Total coupon drop put at 130,000,000.

Global, one-on-one ads seen

By JENNIFER PENDLETON

MONTEREY, CAL.—"World" commercials may be coming in tv advertising as satellites open up new markets, while elsewhere the new technologies and computers could combine to produce ad messages that would address consumers individually—in the tone and manner they prefer.

What else is likely to happen? Newspapers will become "Zip-coded" and tailored to the point where subscribers would receive only those parts they want.

These were a few of the projections and predictions set forth at the American Assn. of Advertising Agencies annual western conference here.

Commercials geared to audiences around the world will have language problems to deal with, but that could be resolved by a return to strong visual, something advertising needs anyway, the conference was told by Foote, Cone & Belding president John E. O'Toole.

The newspaper of coming years was seen as "the microcosm of our new informational society" by John Naisbitt, senior vp, Yankelovich, Skelly & White. Now often "too heavy to lift," they'll "de-evolve into Zip-code newspapers, tailored to income and life style, sectionalized in some respects, decentralized in others."

Mr. Naisbitt said this could also mean a change in the "sovereignty" of editorial, with readers becoming more involved in deciding what is supplied.

The computer's place is likely that of "confidant and advisor" to its masters in the home, said Andrew Lipinski, senior research fellow, the Institute of the Future, Menlo Park, Cal. "Man and woman will be enlarged to man and woman and computer, the computer becoming an accepted part of the home environment," said Mr. Lipinski.

"Without too much work," he said, "it is possible to make computers nicer than most people"—

Pols shift efforts to key states

By LEAH ROZEN

NEW YORK—With only two weeks left in the presidential campaign, Democratic incumbent Jimmy Carter and Republican challenger Ronald Reagan are concentrating their advertising efforts on key states.

Although neither candidate's advertising strategists are talking much, it is clear that the final weeks will see much heavier tv and radio spot buys in such states as Pennsylvania, New York, Florida, Ohio, Illinois and California. These are the states with the most electoral votes and are crucial to the election of either man.

In an effort to win these voters, both Mr. Carter and Mr. Reagan are running endorsement ads by local and national political figures. Mr. Carter is running spots with Sen. Bill Bradley in New Jersey; Gov. Ella Grasso and Sen. Abraham Ribicoff in Connecticut; Los Angeles Mayor Tom Bradley, San Francisco Mayor Diane Feinstein and Gov. Jerry Brown in California; Gov. Robert Grahm in Florida; Gov. Richard Riley in South Carolina, and Gov. William Winter in Mississippi.

Additionally, he is running spots with Massachusetts Sen. Edward Kennedy in selected markets (AA, Oct. 13) and spots featuring local black officials in major cities. Rafshoon Communications handles.

▪ Former California Gov. Ronald Reagan is wheeling out his big gun endorsers as well. In addition to spots featuring running mate George Bush and former President Gerald Ford, Mr. Reagan's tv backers include Gov. Richard Thornburgh in Pennsylvania, Gov. Jim Thompson in Illinois and Gov. Lee Dreyfus in Wisconsin.

In Ohio, a key industrial state, Mr. Reagan has endorsement spots featuring Gov. James Rhodes. In the same state, Mr. Carter is running an ad featuring footage from his campaign appearance there, along with clips of Ohio Sen. John Glenn.

A spokesman for Campaign '80, the agency formed especially to handle the former movie star's presidential campaign, said last week that the Republican candidate has not shot any commercials in over a week and that, as of late last week, no new spots were

Panax sells 4 papers to Liverpool

CHICAGO—A British publishing company last week increased its U.S. holdings with the purchase of four Illinois newspapers. The Liverpool Daily Post and Echo Ltd., which publishes two daily newspapers in that city, also agreed to buy two printing companies in Illinois and Indiana.

The Illinois papers, all formerly owned by Detroit-based Panax Publishing Co., are the *Daily Calumet*, an 8,680-circulation paper serving Chicago's south suburbs; the *Sun-Journal*, a 9,800-circulation tri-weekly serving communities along the Illinois-Indiana border near Chicago; *Calumet Day*, a 13,100 circulation bi-weekly serving the Indiana towns of East Chicago, North Hammond and Whiting, and the *Rantoul Press*, a 10,300 circulation weekly serving that central Illinois town.

The printing companies, Lithotype-Midwest of Lansing, Ind., and Rantoul Printing in Rantoul, print all of the newspapers that changed hands in the deal.

For Panax, the sale is the latest

Wrigley looks beyond gum

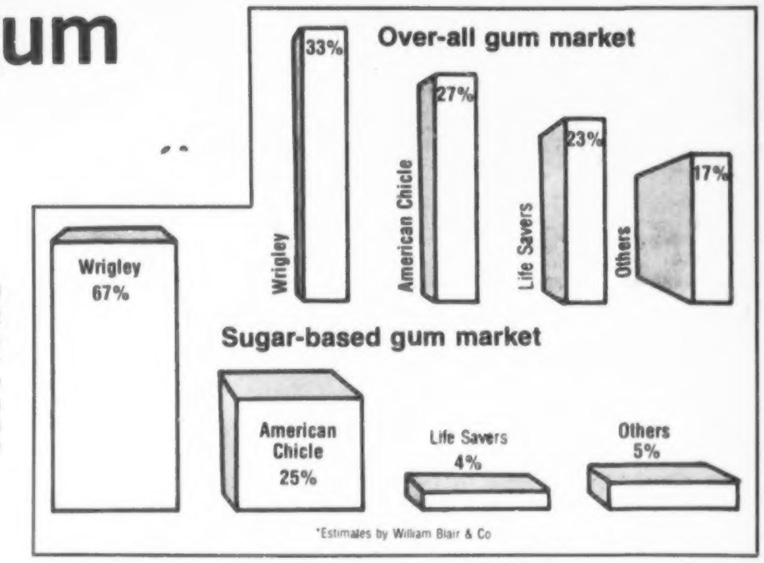
Crain News Service

CHICAGO—Wm. Wrigley Jr. Co. is launching a two-pronged strategy for the next decade.

With its five-year effort to revive its gum business having successfully reestablished the company as No. 1 in the industry, Wrigley has created a new division to manufacture a cheaper metalized paper that could produce $200,000,000 in annual sales in the next decade.

At the same time, the company's corporate development department, created last year (AA, April 2, '79), is gearing up to take Wrigley beyond its chewing gum base in consumer products.

The changes at Wrigley, which earned $35,000,000 on sales of $504,000,000 last year, could be far-reaching. The 53-year-old company saw its market share shrink in the mid-1970s as Warner-Lambert Co.'s American Chicle and Squibb Corp.'s Life Savers division brought out new gums appealing to children and teen agers. But in 1975, Wrigley revamped its sales force and began a new product effort that brought five new gums to market and bolstered its share to 33% of the market, compared with 30% only last year.



*Estimates by William Blair & Co

Wrigley's leadership of the over-all gum market (with 33%) is based on its 67% share of sugar-based gum sales. Life Savers holds the sales lead in bubble gum (29%) and in sugar-free gum (43%).

- The product added to the existing franchise of Spearmint; Juicy Fruit and Doublement (all introduced prior to 1915) were Freedent, Big Red, Orbit sugar-free gum, Orbit bubble gum and Hubba Bubba chunk bubble gum.

But the main gun in the arsenal (aside from the highly successful Hubba Bubba) aimed against the competition was new advertising—campaigns for Doublemint, Spearmint and Big Red, all supported with increased spending. This effort significantly shored up those three brands.

That battle is not over, however. Life Savers is in the process of introducing its new Replay brand, a chunk gum in spearmint, peppermint and cinnamon flavors, and directly positioned against those three Wrigley brands (plus American Chicle's Dentyne), touting longer-lasting flavor. The move was labeled as "a bold frontal assault" by Wrigley's vp-marketing Ronald Cox, and the company is preparing to meet that challenge.

- But with the new development of the metalized paper, "We have a brand new field opening up," said Bozdar Bulovic, exec vp at Wrigley. Adds a source close to the new venture: "Wrigley could become a completely different company."

As yet Wrigley's Wrico Packaging division has no direct competition for the reflective paper that gives the appearance of aluminum foil but resists creasing. Wrigley substituted the new foil for its own gum wrappers six months ago, but its greatest potential lies in converting the labels now used on beer bottles and cigaret packages and a host of other applications.

The Wrico paper is much shinier than conventional products, but it uses less than 1/200th the amount of aluminum contained in foil wrappers. The manufacturing process, licensed two years ago from a small Spanish printing company in Barcelona, represents a technological breakthrough in the transfer method of metalization, creating significant cost savings and better quality.

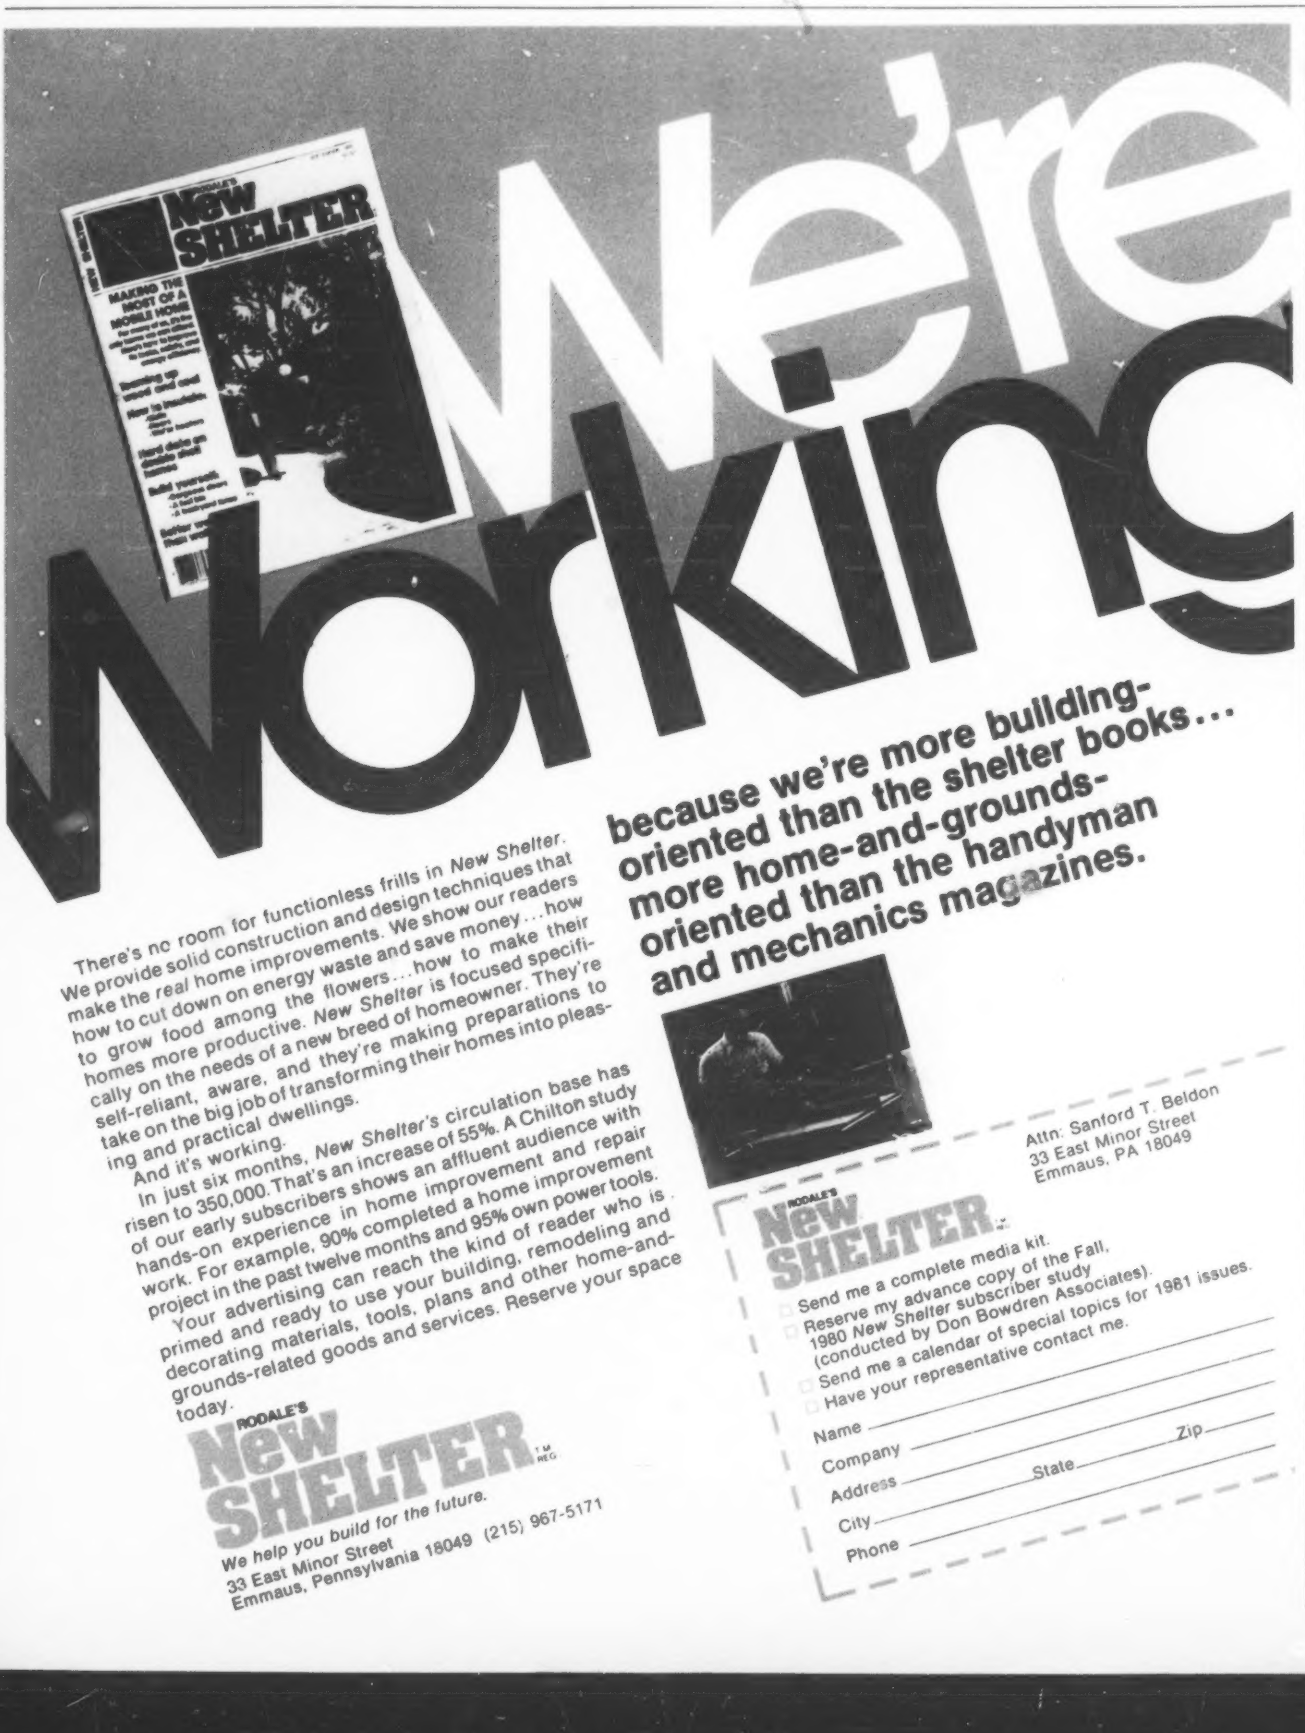
- Wrigley's expansion into new impulse-purchase products, such as candy or mints, will use the same distribution and merchandising channels that Wrigley's gum uses. Wrigley will either purchase these new products by acquiring other companies, or develop the products internally.

Meanwhile, Wrigley must decide what to do with Overtime, its latest product. In test market for seven months, the gum with a liquid center has failed to meet company goals.

"If Overtime doesn't achieve the level of consumer acceptance I think it should, we will not roll it out nationally," says Mr. Cox. #

Kane joins Ansel

Ansel Productions, New York, has added Art Kane, print ad photographer and tv commercials director. Mr. Kane, whose best known work includes tv spots for Yves St. Laurent jeans and Miller Brewing Co.'s "Miller time," will be available "for select commercial assignments," said Jerry Ansel.



We're Working
RODALE'S New SHELTER

because we're more building-oriented than the shelter books… more home-and-grounds-oriented than the handyman and mechanics magazines.

There's no room for functionless frills in *New Shelter*. We provide solid construction and design techniques that make the *real* home improvements. We show our readers how to cut down on energy waste and save money…how to grow food among the flowers…how to make their homes more productive. *New Shelter* is focused specifically on the needs of a new breed of homeowner. They're self-reliant, aware, and they're making preparations to take on the big job of transforming their homes into pleasing and practical dwellings.

And it's working.

In just six months, *New Shelter's* circulation base has risen to 350,000. That's an increase of 55%. A Chilton study of our early subscribers shows an affluent audience with hands-on experience in home improvement and repair work. For example, 90% completed a home improvement project in the past twelve months and 95% own power tools.

Your advertising can reach the kind of reader who is primed and ready to use your building, remodeling and decorating materials, tools, plans and other home-and-grounds-related goods and services. Reserve your space today.

Top 100 advertisers spend $11.7 billion

Economic woes place drag on retailer, auto spending

BY MARION ELMQUIST

The 100 largest national advertisers boosted their advertising spending to $11.7 billion in 1979, a 13.6% increase over the $10.3 billion invested in advertising and promotion by 1978's 100 leaders.

Increasingly tough economic times hit retailers and domestic car makers, causing them to report grimmer sales and earnings results and to trim ad expenditures or reduce the rate of increase.

Three of the four domestic auto makers dropped in position in the top 100 rankings—Chrysler plummeted from No. 10 to No. 40—while one, General Motors, held its No. 4 spot. Each of the four major retailers in the leaders list dropped in ranking.

Procter & Gamble continued to hold onto its No. 1 position by breaking the $600,000,000 mark with measured and unmeasured ad and promotion spending of $614,000,000.

General Foods moved into second place with an investment of $393,000,000, pushing retailer Sears, Roebuck & Co. into third place. Sears cut its ad spending 9% to $379,312,500. (If local advertising were included in the tabulation, Sears would be the leading advertiser with total spending of $709,312,000; P&G is closing that gap, however, with its national spending alone.)

▪ Although retailers continue to hold a dominant position among the top 100 spenders, economic woes affected how they ranked. K mart Corp. dropped from fifth to sixth place even though it increased its ad spending 15% to $287,095,100; J.C. Penney Co. fell from its No. 27 spot to No. 38 by reducing its investment 2%, and Mobil Oil Corp., whose Montgomery Ward & Co. eats up a large portion of its ad budget, dropped to No. 20 from No. 15 with spending pegged at $165,840,600, a 1.7% increase over 1978 expenditures.

▪ While U.S. car makers faced difficulties, the foreign auto makers fared better. Only two, Volkswagen of America and Nissan Motor Corp. which reported only modestly increased ad expenditures, dropped in rank, while Toyota and American Honda moved up, and a fifth foreign car maker, Mazda, rejoined the 100 for the first time since 1974.

A weaker economy was also reflected in the leaders' sales and earnings results. Ninety-four reported increased sales for 1979, compared with 98 the year before, while higher earnings were posted by only 73 companies, in contrast to 86 companies

Advertising and marketing reports on 100 leading national advertisers

Presented here is ADVERTISING AGE'S unique annual collection of facts about the marketing operations of the nation's advertising giants—what they spend on advertising, how they're doing in sales and profits, how their leading product lines and brands rank nationally, what share of the market they hold—and many other vital details. The profiles include listings of each company's marketing executives, the agency lineup and a rundown of account personnel serving the various product lines. Much of the material has never been published before, including estimates of total advertising and promotion expenditures for the 100 advertisers covered, and sales figures for privately owned companies.

ABC Inc.

	1979	1978
Sales	$2,053,570,000	$1,783,985,000
Earnings*	159,310,000	135,575,000
Advertising	42,049,500	35,854,400

*AA estimate

ABC Inc., New York, the 87th leading national advertiser, boosted its advertising budget 17%, or $6,195,100, to an estimated $42,049,500 in 1979. In its 10-K report, ABC said it spent $58,008,000 on advertising, but this figure includes expenditures for a range of items not considered advertising or promotion by AA.

AA's ad estimate includes $33,329,400 in measured media and another $8,720,100 in unmeasured media.

As befits ABC's bread and butter unit, the ABC-TV Network was the top corporate spender, spending $12,511,000 in measured media; it also accounted for the lion's share of spending in unmeasured media. Of the tv network's total outlays, $11,801,800 went into magazines, with *TV Guide* the big winner. In addition, ABC spent $3,330,800 to promote its various movie of the week entries.

▪ ABC Radio, which includes the four ABC Radio Networks and ABC-owned am and fm radio stations, spent over $5,000,000 in measured media. Spending in measured media for ABC's two Florida resorts, Silver Springs and Weeki-Wachee, total $300,000. Other enterprises with ad outlays over $100,000 include: Family Record and Tape Club, the Word Book Club and the Christian Quality Paperback Book Club.

In its 27th year of business, ABC posted a revenue gain of 15% and an earnings increase of 18%. The company's broadcasting operations accounted for approximately 87% of corporate revenues in 1979, about the same percentage as in 1978.

The ABC-TV Network was the primary source of these gains. With ad sales based on the 1978-79 season ratings, ABC-TV was the premium buy for advertisers in both prime time and highly profitable daytime programing. Adding to the strength of ABC's broadcasting base, the company's owned tv stations in markets such as New York, Chicago and Los Angeles set new records for revenues and earnings in 1979. ABC Radio had higher revenues in 1979 but profits were off slightly from the previous year's record levels.

▪ ABC Publishing was another corporate bright spot in 1979, posting higher revenues and earnings while continuing its aggressive acquisition and expansion policies. Early in 1979, ABC acquired the Chilton Co., a Philadelphia-based book publishing, magazine and printing company.

In January, 1980, National Price Service, a data base operation producing loose-leaf pricing information for electrical, plumbing and heating equipment, was spun off from Chilton to become a separate unit of ABC Publishing. Another major acquisition was McCall's Needlework and Crafts publications.

But perhaps most noteworthy was the publishing unit's decision to pull back from a proposed acquisition of Macmillan Inc., a takeover that would have cost $340,000,000 in stock and debentures. The deal's undoing was apparently the result of ABC-TV's prime time problems, which, for the first time in four years, cost ABC the No. 1 ranking in the annual network ratings race.

The ratings' fall forced the company to scrap some of its programs while embarking on an extensive and expensive new series development program. Company cash now is flowing full tilt into tv development and the purchase of blockbuster theatricals.

▪ The turn of fortunes at ABC-TV has been quite ironic. In recent years, ABC has been the clear-cut prime time kingpin while struggling to overtake CBS in daytime ratings, NBC in early morning and both networks in network news. Having mostly achieved those aims in the other dayparts, ABC lost the prime time race to CBS, albeit by the narrowest of margins—one tenth of a ratings point.

In its five years on air, "Good Morning America" has steadily won the early morning viewers' hearts, culminating in May, 1979, with its first ever weekly ratings victory over NBC's long-standing morning leader, "Today." That trend of weekly wins carried through the fall of 1979 and into the first quarter of 1980, when "GMA" scored its first ever quarterly ratings win.

What's notable about ABC's "GMA" triumph is that while it has siphoned viewers away from "Today," its rating strength has also been built on a corps of viewers that heretofore never watched much early morning tv fare.

Besides attracting new viewers, "GMA" has also succeeded in luring dozens of new advertisers to early morning schedules. Much of the credit for the program's appeal goes to former actor David Hartman. Mr. Hartman's co-host Sandy Hill left the show early in 1980 but continues to provide "GMA" with reports from the field. Though there have been several temporary replacements, ABC still hasn't settled on a permanent sidekick for Mr. Hartman.

In highly profitable daytime programing, ABC has led in the ratings since the first quarter of 1978. Though it generally ran neck and neck with CBS, ABC's daytime fare recently has started to open a bit of a ratings gap over the competition. In the all important 18-to-49-year-old women category, ABC has been a clear-cut leader since the second quarter of 1977.

One reason ABC can still brag that it's the "No. 1 network from sign on to sign off" is the emergence of ABC News in the ratings—both the early evening "World News Tonight" and the first regularly scheduled late night network news, "ABC News Nightline."

▪ For years the order in network news had been CBS, NBC, ABC. But in 1979, ABC, aided by some powerful local news lead-ins from new affiliates, began gaining ground on NBC. Though viewership levels for all three network newscasts have been higher, ABC has siphoned viewers principally from NBC with its razzle-dazzle production, multiple anchors and some hard and tough reporting by a staff that's no longer dismissed as the bumpkins of the business.

With Walter Cronkite leaving the CBS anchor chair and NBC looking more and more like a mini-CBS, some critics suspect that ABC will be to news leadership in the 1980s what CBS was in the 1970s.

Although unsuccessful in its pursuit of CBS anchorman Dan Rather, the ABC news department successfully continued to recruit behind-the-scenes talent. Among these was Carl Bernstein, former *Washington Post* reporter, who with colleague Bob Woodward uncovered many of the Watergate events that led to Richard Nixon's resignation from the presidency. Mr. Bernstein is now ABC's Washington bureau chief.

The choreographer of ABC News' turnaround is Roone Arledge, who added the news presidency to his sports domain in 1977. The results: Through the first half of 1980, ABC's early evening network news has been a solid second to CBS and consistently ahead of NBC.

Also in 1980, ABC added "Nightline," the first regularly scheduled late evening network newscast. Hosted by urbane Ted Koppel, "Nightline" has been running nearly neck and neck with late evening entertainment programing. And it has also opened up new sales opportunities for the ABC News sales team.

Thirty-second units on the early evening news cost in excess of $25,000, and spots on "Nightline" fetch prices in excess of $15,000.

Meanwhile, sports, Mr. Arledge's other bailiwick, contin-

ued to provide imitative grist for its competitors. The growth of boxing on tv is a result of ABC's leadership. The network also gambled that soccer would catch the weekend sports viewers' fancy but ratings to this point suggest not.

The 11-year-old "Monday Night Football" franchise, however, rolls merrily along; cost of a :30 this September is expected to exceed $100,000. And NCAA college football, entering its 15th year on the network this fall, is another highly profitable weekend franchise.

▪ ABC Sports notched another triumph early in 1980 when it telecast the Winter Olympics from Lake Placid. Aided by the exploits of the underdog American hockey team, ABC swept to a victory in the all-important February national prime time ratings sweeps.

The truth about that victory, however, was that ABC had to rely on special Olympic fare to get its only sweeps win of the year; in the equally important November and May national ratings periods, CBS emerged the winner.

When the prime time season started last September, ABC looked invincible. Going into the season, ABC had more returning hits than its competitors; had scheduled its few new entries behind established hits, and had given its programs a chance for heavy viewer sampling by starting the season a week earlier than CBS and NBC. It also took a few key performers—"Mork & Mindy," for example—out of their original winning time periods and installed them elsewhere.

▪ Later, after the program shifts proved disastrous, ABC was accused of arrogant programing practices and of making key tactical mistakes. But the moves foreshadowed the closest race for prime time supremacy in the 32-year history of network tv. At its conclusion, CBS emerged the victor by one tenth of a ratings point.

The loss was a severe blow to ABC's prestige. Besides the errant program shifts, ABC suffered from waning popularity of such stellar performers as "Laverne & Shirley," "Happy Days" and "Mork & Mindy." Moreover, the network's theatrical movie package was subpar, as were its made-for-tv flicks. CBS, meanwhile, hit paydirt with blockbuster Sunday and Friday schedules while NBC succeeded in siphoning enough young viewers to impair ABC's season.

▪ That downward trend is expected to continue in the upcoming season too, but the network won't give up without a fight. ABC has ordered four hours of new programs and plans to hype the new season through a greatly expanded station co-op advertising campaign budgeted at $3,000,000.

Though ABC eased back somewhat from its dizzying pace of attaining new local station affiliates, the network recently scored a major coup by snaring WSB-TV, Atlanta, from NBC. Through June, 1980, ABC listed 207 network affiliates.

Elsewhere in the corporation, ABC Video Enterprises launched several projects, including videocassettes of Pope John Paul's visit to the U.S. and the Winter Olympics. The pay video unit also will supply educational programing to schools through the National Education Assn.

Video Enterprises has signed a deal with director Robert Altman and the Schubert Organization to package offerings from the legitimate stage. Some projects will simply be cassettes of Broadway shows; others may be plays directed or selected by Mr. Altman. Regional theater could also be involved. At this point the unit does not have an agency.

ABC NEWS
ABC News takes the floor at the Democratic Convention.

American Broadcasting Co. ad supporting its news team coverage of the Democratic convention.

The other recent addition to the ABC corporate family is ABC Motion Pictures. It is headed by Brandon Stoddard, the ABC exec who pioneered the network's long-form programing, which produced "Roots" and "Roots 2," among other things.

ABC Motion Pictures, which also does not yet have an ad agency, plans to produce three or four films per year at an average budget of $8,000,000 each. Though no titles have been set, ABC recently picked 20th Century-Fox to distribute the feature films. The deal may ultimately lead to some sort of co-venture in production and distribution of videodiscs and cassettes.

ABC Radio continued to bolster the largest domestic radio operation, with annual revenues over $100,000,000 and profits in the $30,000,000 range. The division encompasses the ABC Radio Network with its 1730 affiliates on four separate networks and a string of highly rated am and fm outlets.

Notable developments in the division included the formation of two new units, ABC Radio Marketing Services and the National Market Development Group, both designed to attract more radio ad dollars. ABC Radio also landed broadcast rights to the Kentucky Derby and in its first year attracted a record 14,000,000 listeners for the occasion.

▪ The ABC Radio Network, meanwhile, agreed to purchase a wide variety of exclusive programing from D.I.R. Broadcasting.

Elsewhere, ABC's entry into the travel agency field ended after a year as ABC sold Travel Network, a franchise organization of 140 travel agencies, to VAC Vacation America. A year earlier, ABC paid $5,000,000 for the San Diego-based company. The sale, according to ABC, resulted in no material gain or loss for the company.

American Airlines

	1979	1978
Sales	**$3,252,512,000**	**$2,735,508,000**
Earnings	**87,445,000**	**134,396,000**
Advertising	**35,035,256**	**29,000,000**

American Airlines, Dallas/Fort Worth Airport, the nation's 96th largest advertiser, increased its advertising budget by 21% to $35,039,800.

American Airlines is made up of four units—American Airlines, the nation's second largest domestic trunk carrier; Sky Chefs, an in-flight catering, airport restaurant and gift subsidiary; AA Training Corp., marketers of American's flight simulator and training capabilities, equipment and service to other airlines, military, commercial and government sources, and AA Development Corp. and AA Energy Corp., oil and gas exploration companies.

Like other carriers, American's 1979 performance fell short of record '78 revenues and earnings. Total operating revenues increased 18.9% to $3,252,532,000, but net earnings dropped 34.9% to $87,445,000 in 1979.

While the carrier benefited from United Airlines' strike in April and May of 1979, more negatives than positives emerged, led by a 56% increase in jet fuel costs. American spent $801.5 million for fuel in 1979. Unusually severe weather conditions plagued flight operations in major American markets during the early part of the year. Finally, the tragic DC-10 crash in Chicago in May, 1979, and subsequent groundings hit American particularly hard, impairing flight schedules for more than six weeks.

▪ Despite its problems, American saw a 15.1% increase in scheduled revenue passenger miles (the number of passengers carried per mile) due to the United strike. The carrier's passenger load factor (percentage of seats occupied by paying passengers) was 67.4%—3.7 points higher than that in 1978. But because of price discounting and promotion, yields dropped.

Many of the carrier's woes continued in the first half of 1980. Jet fuel prices soared 88.4% in the first quarter compared with '78, even though consumption dropped 6.1%. Competition brought more price cutting and promotion on transcontinental routes. The long-awaited recession hit American and others as business and leisure travel decreased during the first half.

▪ During the year, American Airlines completed its relocation from New York to a new headquarters near the Dallas/Fort Worth airport. More than 800 employes made the move, including the marketing and advertising departments.

While passenger advertising remained at Doyle Dane Bernbach, New York, the carrier dropped Creamer Inc., New York, as its agency for freight advertising and consolidated its freight advertising and passenger and freight di-

WHERE AA GOT ITS DATA

The data on "measured media expenditures" in this report on the 100 leading national advertisers come from various statistical services and associations.

These include Leading National Advertisers, the Publishers Information Bureau, Radio Advertising Bureau, Radio Expenditure Reports, Agricultural Marketing Information Service (Agricom), LNA-Broadcast Advertisers Reports, Media Records, Institute of Outdoor Advertising and the Outdoor Advertising Assn. of America.

All of the estimated expenditures are estimated by ADVERTISING AGE.

▪ With deregulation acting as a catalyst, American played a marketing "match" game in 1979 and early 1980. First, United introduced its half-fare coupon program that American decried as unprofitable but matched for competitive reasons. American also followed TWA's February and March, 1979, winter sales offering deep discounts and a "kids fly free" fare. A $108 transcontinental fare started by the competition was matched in the summer of 1979.

In March, 1980, United caught American by surprise once again when it introduced its Take-Off game. American execs criticized the game idea, but quickly topped it with the Great American Game—a scratch card sweepstakes tied into the opening of the baseball season. Winners received one-month unlimited travel passes, 10,000 free roundtrip tickets, ticket upgrades and free inflight cocktails or movie headset rentals. Newspaper and tv supported the promotion in April and early May, 1980.

The brief $108 fare in 1979 proved to be a prelude to transcontinental price slashing triggered by Eastern Airlines' June, 1980, entry from New York to Los Angeles (American's largest route based on revenue passenger miles) and San Francisco (its fourth largest route). With market share at stake, American converted to an all-Boeing 747 fleet on its New York-Los Angeles route, providing heavy media support for the new service.

American's advertising continued to emphasize service, fares and destinations in 1979 and the first half of 1980. Sticking with the overall theme, "We're American Airlines doing what we do best," the carrier advertised Super Saver discount fares and Family Fare packages. In November, 1979, it started the broadest magazine campaign in its history in such publications as *Time* and *Newsweek*. The ads, featuring American employes, will run through 1980.

▪ New destinations also figured prominently in American's advertising as deregulation opened markets. In 1979, American added 14 new cities to its route system including Albuquerque, Las Vegas, Miami, Minneapolis/St. Paul, Nassau, New Orleans, Reno, St. Maarten, Tampa and five Mexican resorts.

Through mid-1980, it started service from Chicago and Dallas-Fort Worth to Seattle and Dallas-Fort Worth to Sacramento. American also announced plans for service from Los Angeles and San Francisco and Hawaii. It discontinued service to Providence, R.I., Charleston, W. Va., Oakland, Cal., and Islip, N.Y.

Deregulation threw American into the middle of the industrywide debate over travel agent compensation. After United Airlines introduced its flat fee compensation idea in February, 1980, American countered, in April, with a flat fee plus percentage plan. Soon after, TWA came out with its plan that retained standard percentage commissions. American reverted back to percentage rates along with special payments and override plans.

In March, 1980, American completed the sale of its Americana Hotels division when it sold 13 properties to Pick Hotel Corp., Chicago. During 1979, American sold three New York hotels to Sheraton Corp. and its South Korean properties to Western International Hotels. American still owns the Inn Of The Six Flags, Arlington, Tex.

"The way people feel about American Airlines depends on the way they feel about me."
Victoria Getz, Flight Attendant
We're American Airlines
Doing what we do best

In 1955, when Vickie Getz was 10 months old, American founded the industry's first training school for professional flight attendants.

It's a school where more than two hundred thousand people apply each year. (Less than one-half of one percent are finally accepted.)

It's a school where students are taught to make your flights safe and enjoyable. (They already know how to be nice.)

And it's a school whose graduates never stop learning. (They regularly study new procedures and review old ones.)

It takes a special kind of training to be an American Airlines Flight Attendant. And a very special kind of person.

It takes the best people to make the best airline. Vickie Getz is one of them, and we thought you'd like to meet her.

American Airlines ad campaign featuring company employes is the broadest magazine campaign in company history.

Scheduled freight revenue rose 13.2% to $251,509,000 due to rate increases and attempts to develop high-yield freight traffic. Priority Parcel Service, a guaranteed parcel delivery service, and increased use of intermodal containers contributed to freight revenues. Despite these measures, the airline's freight traffic declined 3.1% to 606,327,000 ton miles of freight because of softness in the automobile industry.

▪ In 1979, Sky Chefs set records as pretax income hit $11,100,000, a 29.5% increase, and revenues reached $189,700,000, up 13.5%. A new flight kitchen was opened at Nashville International Airport, and facilities at San Diego International Airport were expanded. Additions and changes slated for 1980 include a new kitchen and start of operations at St. Louis, new kitchen at Tucson and remodeling at Cleveland and New York's La Guardia Airport.

American Airlines Training Corp. completed its first full year in operation as the marketer of American's flight simulator and other training equipment. The company formed a subsidiary to provide DC-10 simulator training in England for foreign operators beginning in 1981. In addition, it established the first Boeing 737 training school in the Dallas/Fort Worth area.

AA Development Corp. and AA Energy Corp. had combined pretax earnings of $1,700,000 in 1979. The two companies were actively exploring or developing 55 wells in the U.S. during the year. AA Energy Corp. has interests in wells in Texas and Louisiana and in production and exploratory acreage in those states plus North Dakota and Utah.

During the year, American opened new or improved terminals at Phoenix Sky Harbor Airport, Baltimore International Airport and San Diego International Airport. It also expanded facilities at Greater Pittsburgh International Airport and New York's Kennedy International Airport.

American Brands

	1979	1978
Sales	$5,845,985,000	$5,176,706,000
Earnings	347,331,000	211,539,000
Advertising	83,549,200	77,270,500

American Brands, New York, the 56th largest national advertiser, increased its ad spending in 1979 to $83,549,200, an 8% increase over its 1978 expenditure of $77,270,500 and nearly equal to its 1977 ad spending.

Sales of the highly diversified company increased about 13% to $5.8 billion, while earnings soared 64% to a record $347,331,000. Of that, almost $28,000,000 comprised a noncash tax credit in the accounts of Gallaher Ltd., a United Kingdom subsidiary. The credit represented forgiveness of deferred taxes charged against 1973 and 1974 income.

Tobacco products account for almost 62% of sales and about 59% of operating income for the company. They are handled by three distinct entities: Gallaher Ltd., the international arm; American Tobacco, the domestic cigaret company; and American Cigar, producer of cigars and smoking tobacco.

International tobacco sales accounted for 42.1% of American Brands sales, up slightly from 42%. Domestic sales contributed 19.7%, down slightly from 20.8%.

▪ American Tobacco continues as the fourth largest cigaret company, trailing R.J. Reynolds, Philip Morris and Brown & Williamson. It is ahead of Loews' Lorillard division and Liggett Group. Domestic cigaret production dropped slightly from 72.47 billion units in 1978 to 72.23 billion in 1979. Market share remained virtually the same at 11.6%, down from 11.7% in 1978.

Industry analyst John C. Maxwell Jr. estimates that unit volume for the industry rose 1.2% in 1979, although the bulk of the increase can be attributed to new brand introductions and an extra working day in the fourth quarter. Adjusted for these factors, the rise is only 0.3% to 0.4%, about the same as last year and consistent with a six-year trend of declining growth rates.

American Tobacco has four major product lines: Carlton, Pall Mall, Tareyton and Silva Thins. Unit volume of Pall Mall, the company's largest-selling brand, fell from 37.3 billion to 34.36 billion, but was still enough to retain fifth place among all brands.

Carlton, on the other hand, continued as the fastest growing brand among all brands by registering an almost 50% jump from 10.09 billion units to 15.06 billion. Carlton, the industry's pioneer low-tar brand, also nosed out Philip Morris' Merit for greatest unit sales gain and leaped from 16th place to 11th place among all brands. The increase was paced again by Carlton Filter 100s, up from 0.5% of the total market to 0.9%, with sales moving from 2.90 billion to 5.29 billion.

Tareyton sales declined from 13.10 billion units to 12.24 billion, although Tareyton Low Tar 100s, new in 1978, moved up 25.4% to 1.48 billion units. Sales of Silva Thins continued to slide, down from 1.82 billion to 1.58 billion. Interestingly, the company appears to have spent no money advertising its Lucky Strike brand, and the brand is only briefly mentioned in the company's annual report. Yet sales topped 6.7 billion units in 1979 (down slightly from 1978), making it the 23rd largest brand.

American Tobacco reports that low-tar brands accounted for 79% of the company's filter cigaret volume, up from 75% in 1978. However, filter cigarets still make up only 54.1% of total volume, compared with 78% at Liggett and 92% to 99% at the other three companies. Indeed, some industry observers attribute the company's fall from preeminence to a slowness to recognize the trend toward filter cigarets in the mid-1950s.

The company backed its cigarets with more than $44,000,000 in measured advertising last year. Carlton was again the big spender with $7,800,000 in newspapers in the top 10 markets and almost $10,000,000 in magazines. About $6,000,000 in outdoor brought the total to $23,700,000, a boost of more than $10,000,000 over 1978.

▪ Tareyton allocated $7,300,000 to magazines, $605,000 to newspapers in the 10 top markets and about $3,000,000 to outdoor for a total of $11,100,000. All the magazine money was spent on Tareyton Lights and Long Lights, while the bulk of the outdoor went to Tareyton Lights.

Pall Mall spent $7,900,000, most of it on Pall Mall Light 100s, and most of that on magazines ($6,220,000). Light 100s was the only Pall Mall style that did not decline in unit sales in 1979; after introduction in August, 1978, and sales of .55 billion units in 1978, Light 100s reached .98 billion units for all of 1979. Silva Thins' support totaled about $1,300,000.

American Tobacco uses a fee system to compensate its agencies, instead of the standard commission approach. The fee system guarantees an agency profits up to a certain percentage of billings and provides for client/agency sharing profits in excess of a certain percentage of billings, the company says. In its annual report, American Brands said the fee system saved the company $3,173,000 in 1979 for a total of over $28,000,000 for the 15 years the system has been in operation.

▪ American Brands' British subsidiary, Gallaher Ltd., accounted for a record $152,000,000 in operating income. Sales were $3.4 billion, of which about 28% came from Gallaher's nontobacco operations—optical, engineering, retailing and wholesaling.

Benson and Hedges Special Filter (not to be confused with Philip Morris' domestic brand) continues as the largest-selling U.K. brand. Silk Cut is claimed to be the largest-selling low-tar brand. Park Drive and Kensitas are the other major Gallaher brands.

Among cigars, Gallaher's Hamlet, the leading brand, increased sales more than 10% for the second year in a row.

American Cigar, the company's third tobacco unit, suffered a loss of $829,000 in 1979, compared with a profit of $1,480,000 the year before. Sales were down to $39,000,000 from $45,100,000. Unit sales in the domestic cigar industry continue to fall, but a 1978 move to consolidate American Cigar's production operations was expected to increase profit margins. Felipe Silva was named president of the company in early 1979 in a shakeup.

▪ Antonio y Cleopatra continued to account for more than half the cigar volume but experienced a unit sales decline for only the second time in 18 years. Most of the volume loss came from the lower end of the market with brands like Roi-Tan. Two premium products, under the La Corona name did post increases.

Antonio y Cleopatra received $500,000 in magazine backing, while two imported Dutch smoking tobaccos, Flying Dutchman and Sail, received about $117,000 and $67,000 respectively.

▪ James B. Beam Distilling Co. subsidiary reported record sales of $188,400,000, up slightly from $186,000,000. Operating income jumped 12% from $22,940,000 to $25,770,000. Jim Beam bourbon sales were up $5,900,000 to $145,300,000, accounting for 77% of the division's sales and 83% of operating income.

The bourbon received $1,780,000 in magazine support, $339,000 in outdoor and $198,000 in newspapers in the top 10 markets. Beam's Sour Mash bourbon received $580,000 of support, mostly in magazines. The company's lone entry in the scotch market, Spey Royal, was supported by $2,400 in outdoor. Mr. and Mrs. "T" Bloody Mary mix was backed by $24,500 in magazines.

Sunshine Biscuits reaped sales gains of $25,000,000 to $238,700,000 with operating income increase of $1,000,000 to $11,700,000. Krispy crackers, Cheez-It crackers, Vienna Fingers, Hi Ho crackers and Hydrox cookies, which account for more than half the division's poundage, showed a combined sales increase. Media spending: Sunshine cookies and crack-

MARKETING PROFILES

ers, $420,000; Bell Brand snack foods, $99,000. In early 1979, Sunshine shifted its advertising east of the Rockies to Marsteller Inc., New York. The account formerly was at SSC&B. Ogilvy & Mather, Los Angeles, continues as Sunshine's agency in western states.

Duffy-Mott sales were up almost 10% to $93,400,000, while operating income leaped 58% from $3,700,000 to $5,800,000. Apple products led with a 34% increase, including the introduction of frozen concentrated apple juice and apple sauce with ground cranberries. The apple line increased its market share and accounted for 80% of Duffy-Mott's profits. Most of the remaining profits came from Clamato and Grandma's molasses. Clamato reached sales highs in the U.S. and was particularly strong in Canada. Grandma's increased market share and was the division's second most profitable product. Grandma's Green Label molasses was distributed in key markets and will be expanded. Prune juice sales were off because of a short crop and resulting higher prices.

Clamato was supported by $154,000 in magazines and $122,000 on spot tv. Apple products received about $230,000 in magazines and spot tv.

Andrew Jergens Co.'s operating income rose 9% to $7,300,000; sales were up only slightly to $84,000,000. New products included a national rollout of Gentle Touch soap and hand and body lotion, along with Spring Feeling shampoo and Jergens deodorant soap. Jergens' share of the domestic soap market increased, although lotion and shampoo sales were hurt by new competitors. About 45% of sales came from products introduced in the last five years.

■ Gentle Touch products received over $2,000,000 in support in magazines and tv. Of that, about $1,600,000 went to network tv for Gentle Touch soap. Jergens lotion had almost $1,000,000 in backing, about half of which went to magazines and half went to tv. Gee Your Hair Smells Terrific! shampoo spent about $600,000, with about half in magazines and half in network tv and network radio. Spring Feeling shampoo spent about $42,000 on network tv and $28,000 on network radio, with $15,000 in other media.

Swingline Inc., marketer of cutlery, staplers and fasteners, increased operating income 36% to $21,795,000 with sales jumping 6% to $168,047,000.

Wilson Jones Co., manufacturer of business forms, files and diaries, increased sales 11% to $87,599,000, while operating income increased 16% to $20,391,000.

American Cyanamid Co.

	1979	1978
Sales	$3,186,998,000	$2,780,170,000
Earnings	168,495,000	155,943,000
Advertising*	127,000,000	115,000,000

* AA estimate

American Cyanamid Co., Wayne, N.J., the 34th largest U.S. advertiser, increased its advertising for 1979 by 10% with estimated total expenditures of $127,000,000.

Worldwide, Cyanamid invested $198,000,000 in advertising, up 11% from $178,900,000 in 1978.

Worldwide sales increased 15% from $2.8 billion to $3.2 billion. Net earnings worldwide were $168,495,000, up 8%. Operating earnings were $329,000,000, up 6% for the year.

For the first half of 1980, sales were $1.67 billion, up 7.7% from $1.55 billion in 1979 and earnings were down 16%, to $70,600,000, from $83,900,000 a year earlier. The recession, Cyanamid noted, adversely affected its sales growth and cost increases could not be passed along.

- The company noted that it is continuing its cost reduction program to improve efficiency and eliminate waste, reviewing each product line to ensure acceptable profit levels and directing the

MARKETING PROFILES

company's efforts to the most promising product areas.

Consumer products reported $444,000,000 in worldwide sales, up 14%, while operating earnings were 5% below 1978, at $29,000,000. Consumer products contributed 9% of Cyanamid's total operating earnings last year, a 1% decrease. It has eight major brands in the fragrance, haircare and liquid household cleaner fields. Breck shampoos and conditioners continued to lose market share in the U.S., but sales of all the other major brands increased last year.

Cyanamid's market leader in men's toiletries is Old Spice, while Nina Ricci's L'Air du Temps is the top-selling French fragrance in the U.S.

While each of Cyanamid's divisions—Formica, agriculture, medical, specialty chemicals and consumer products—posted higher sales than last year, only agriculture and medicine recorded higher earnings. Cyanamid cited escalating costs of material and energy and, in the case of the Formica division, the nation's depressed economy, as causes for the reduced profit margins.

▪ The Formica division posted sales of $431,000,000, an increase of 9% over 1978. Operating earnings, however, were $26,000,000, off 19%.

Agriculture division sales rose 19% to $725,000,000. Operating earnings, spurred by increased demand for animal feed and health products, jumped 58%. Sales in agriculture accounted for 23% of the company's total sales and 39% of the total operational earnings.

Feed supplements containing antibiotics or dewormers showed strong sales. Sales of pesticides, including Malathion, and herbicides, including Prowl and Avenge, also posted strong sales in 1979.

Sales in the medical division rose by 12% over '78 to $627,000,000, while operation earnings advanced 3%. Increased promotion for over-the-counter products, especially vitamins, and research costs cut into the medical division's operating earnings, Cyanamid reported.

Cyanamid's Dexon synthetic absorbable suture led the gains in sales, with Minocin, an antibiotic, and Lederle's Orimune vaccine, the most widely used polio vaccine in the U.S., recording strong sales as well. Dexon S, a new, reportedly smoother suture is bolstering sales, also.

▪ Sales of specialty chemicals increased 17% to $960,000,000, but operating earnings dropped 30%. Throughout the year energy and raw material costs increased significantly while selling prices rose slowly. Plastics additives, mining, paper and water treating chemicals, and, most significantly, structural adhesives used in airplane construction were responsible for the increase in sales.

Measured media spending at Cyanamid last year totaled $45,116,200, a 20% increase over 1978's expenditure of $37,559,800. The Breck haircare products line was the most heavily backed group.

Cyanamid did not come up with a new strategy for Breck shampoos and conditioners, a line troubled by strong competition.

Measured media backing for the Breck Gold formula shampoo was cut by more than half to $2,000,000, but the entire Breck line received a total of $10,200,000, an increase of 37% over 1978.

▪ Miss Breck hair spray, the leader in its market, received the most measured media backing of any Breck product, $4,000,000, a 4% increase. Breck shampoo received $3,500,000 in backing, with $2,350,000 going to network tv.

The Old Spice line received $8,175,000, 1% less than in the previous year. Old Spice cologne for men got $4,325,000 in measured media support, all of which went to network and spot tv. Old Spice stick deodorant received $3,500,000 in backing and increased its market share.

Pierre Cardin, Cyanamid's men's prestige fragrance, is second in its market and is vying for leadership. Almost all its ad support went into network and spot tv.

Cyanamid added two lines—both toiletries—to the consumer products division in 1980. Both products, Grey Flannel and Red, are marketed under the name of Geoffrey Beene, the American designer.

▪ L'Air du Temps, by Nina Ricci, is the best selling French perfume sold in U.S. department stores. It had $2,175,000 in measured media support, $500,000 going to magazines and the remainder to network tv

Cie perfume, which has $3,500,000 in measured backing, sustained the success it achieved when launched in 1978.

The single most heavily advertised product in the consumer product division was Pine-Sol cleaner with almost $6,000,000, a 19% increase over the previous year. Although Pine-Sol still holds the largest share in its market, the market is becoming more competitive, with the national rollout of MortonNorwich's Pine Power.

Nearly 86% of Cyanamid's measured media spending was in support of consumer goods.

The most heavily supported product outside the consumer product division was Stresstabs 600 vitamins, with backing of $4,700,000, 71% more than it had in '78. Lederle Labs also got strong support for Centrum vitamin and mineral tablets. Centrum, a year-old product, received nearly $3,500,000 in ad support. Both products will receive expanded sales promotions and advertising campaigns in the future, according to Cyanamid.

▪ A new campaign was developed by Fahlgren & Ferriss, Cincinnati, in support of Formica in 1979. While Formica sales have been steady for three years, profits have been slipping. To revitalize this division, Cyanamid disposed of its melamine component panels to focus Formica's resources on the decorative laminate field. The Fahlgren & Ferriss campaign focused on Formica surfaces and presented them in different contexts. The ads, "What's new, what's next," run in remodeling, architectural and interior design magazines.

Cyanamid's Formica trademark seems safe since the FTC's move to strip the trademark on the grounds that it has become a generic term has been stalled in the House.

A 52-day strike last December and January ended when Cyanamid agreed to the improved safety and health standards sought by workers in the Bound Brook, N.J., plant.

In February, 1979, Cyanamid's pesticide department switched agencies, from Jim Rose & Associates to Tucker Wayne. It moved Lemon Sol, then in test, from Bozell & Jacobs to Ted Bates & Co. in May, 1979. Earlier this year, the Old Spice line moved from MCA Advertising to Dancer Fitzgerald Sample and, in part, from Norman, Craig & Kummel to Bates.

American Express Co.

	1979	1978
Sales	$4,666,500,000	$4,073,600,000*
Earnings	345,300,000	314,000,000*
Advertising*	55,431,800	62,000,000

*Estimated by AA

American Express Co., New York, the 73rd largest national advertiser, reduced advertising expenditures in the U.S. last year by 11%, down to $55,431,800.

The company reported a world ad total of $139,500,000, up 10% over 1978 spending.

Revenues increased 14% to $4.6 billion; earnings rose 10% to $345,300,000. Revenue breakdown: Travel-related services, $1.24 billion, up 24.7%; international banking services, $706,100,000, up 37%; insurance services, $2.72 billion, up 6.4%, and other services, $3,000,000, down 71.8%.

Charge volume rose 29% in 1979 and worldwide card membership was 10,500,000 at year-end, a 10% increase over 1978. About 68,000 service establishments honoring the card were added worldwide in 1979.

American Express continues its attempts at diversification, having successfully negotiated a 50% share of Warner Cable Co., now called Warner Amex Cable Communications, at a cost of $175,000,000. (Within the last several years, the company has failed in attempts to acquire Book-of-the-Month, Walt Disney Productions, Philadelphia Life Insurance and McGraw-Hill.)

Warner Amex currently is the fourth largest cable tv operation in the nation, with 675,000 subscribers in 29 states. It boasts the only major interactive cable system, Qube, which is in the process of expanding into the Houston, Pittsburgh and Cincinnati markets. It has been operating in the Columbus, O., area for two years.

In the course of acquiring that 50% interest in the pay tv operation, AmEx lost two directors, former Pennsylvania Gov. William Scranton and Henry Henley, who owned stock in tv stations serving 10 of the 120 communities covered by Warner Cable.

Among the five major credit cards, American Express ranks third, behind the two bank cards (Visa and Master-Card) and ahead of Diners Club and Carte Blanche. Of the three travel and entertainment cards, American Express is the longtime leader, with about 8,300,000 cardholders representing about half the U.S. families with $25,000-plus annual income. Last year, worldwide card membership has topped 10,500,000, a 10% increase over 1978. About 68,000 service establishments were added in 1979, raising the total to 389,000. With one of every five cardholders residing outside the U.S., there now are 22 currency cards.

The Gold Card, which offers a credit line with a financial institution and a higher check-cashing limit than the better known Green Card, crossed the 1,000,000 mark in cardholders last year and posted a 40% increase in charge volume. In July, 1979, McCann-Erickson, New York, was chosen to assume initial responsibility for the Gold Card advertising. This year, the division plans to introduce the first extensive advertising campaign designed specifically for the Gold Card, which now is offered by 1,559 financial institutions worldwide.

Of the $35,159,300 spent on measured media last year, American Express put $21,176,800 into advertising its credit card service. Ad expenditures for card service were split between network tv ($8,930,400), spot tv ($7,016,800) and magazines ($5,202,600), with an additional $27,000 spent on outdoor.

American Express reportedly retains about 60% of the world market in travelers checks. With a "healthy gain" for its "travelers chequees" during the year, average outstandings reportedly reached a record high of more than $2.3 billion, an 11% increase over 1978. The company's travel service, which operated at a loss in 1979, maintains a retail network of company-owned and representative offices in 126 nations. The company credits the loss to an increased proportion of low margin, discount air ticket sales and increased operating costs of processing the relatively higher number of transactions. Although wholesale activities were inhibited by the lower than expected number of Americans taking European tours, this decline was partially offset by increases in the volume of travelers visiting the U.S. The "Visit U.S.A." program nearly doubled the 1978 record volume of tourists.

- Travelers cheques ranked second in ad expenditures with $9,242,600 spent on measured media. Most of the money was used to buy tv time, with $6,229,900 spent on network tv and $2,849,400 spent on spot tv.

American Express also has concluded negotiations with three leading French banks to issue French franc travelers cheques through *Societe Francaise du Cheque de Voyage*, which is jointly owned with four major French banks.

In January, the company created a communications division composed of its publishing company direct response and merchandise sales, which previously was part of the card division. In 1979, advertising revenue for the company's *Travel & Leisure* magazine increased 34%. The direct response division reflects the April, 1979, purchase of Vernitron Corp.'s OEI division, a supplier of direct mail marketing services to businesses in the U.S., Canada and U.K. Internally, the division's sales and servicing programs are used by the travel-related services to communicate with existing and potential customers.

AmEx' Fireman's Fund Insurance Cos., the eighth largest property-liability group in the nation, reported net income of $185,600,000 in 1979, a 14% increase over the previous year. Fireman's Fund has been appointed the exclusive affiliate for the U.S. and Canada of the International Network of Insurance, an alliance of European insurers that provides insurance service for its international industrial and commercial customers.

The company spent $2,411,500 on network tv for Fireman's Fund American Business Insurance and another $1,109,200 advertising Fireman's Fund American Insurance, mainly on network tv ($1,103,300).

American Home Products Corp.

	1979	1978
Sales	$3,649,476,000	$3,276,605,000
Earnings*	369,039,000	348,422,000
Advertising**	206,000,000	183,000,000

*Worldwide
**U.S. only; AA estimate

American Home Products, the nation's 13th largest advertiser, increased its U.S. advertising by 12% in 1979 to an estimated $206,000,000. The gain was well above the 7% pace of 1978, and allowed the company to top the $200,000,000 advertising mark for the first time.

Last year was also AHP's 27th consecutive year for record sales and earnings. Net income of $396,039,000 was realized on total worldwide sales of $3,649 billion.

Foreign sales were $1,246 billion, a 16% increase over 1978, and 33% of the total volume. Foreign net income before taxes was $220,000,000, compared with $196,000,000 in 1978. Domestic sales totaled $2,403 billion; earnings before taxes, $492,900,000.

Prescription drugs contributed $1,448 billion (40%) of total sales and $426,200,000 (56%) of pretax income, which totaled $755,200,000. Household products and housewares provided $986,900,000 (27%) of total sales and $107,100,000 (14%) of pretax income.

Food products contributed $728,600,000 (20%) of total sales and $77,500,000 (10%) of pretax income. Package medicines provided $485,700,000 (13%) of total sales, and $102,300,000 (14%) of pretax income

- In foreign sales, prescription and package medicines accounted for approximately 66% of the volume; the remaining 34% consisted of foods, housewares and household products.

Domestic measured media expenditures for 1979 were $187,358,300, a 12% gain over 1978's $166,758,900. Packaged medicines received 60% of this support, $111,895,100.

Home products and housewares received $45,426,100 or 24% of the total, while food products were backed by $23,462,300 and prescription drugs by $6,975,400. Ad expenditures were up in all categories except for home products and housewares, where there was a less than 1% decline.

- Domestic ad spending continued to favor network and spot tv, as AHP made a record-breaking, two-season $100,000,000 buy on NBC-TV. At the time it was made, the buy was aimed, in part, at ensuring a good commercial position during the 1980 Olympics and elections.

Network television received $122,565,500, a 10% increase over 1978. Spot tv also jumped 10% to $42,465,800, while network radio was up a whopping 60% to $5,056,800. Spot radio was allotted $4,132,400, 7% over 1978.

Magazines were sharply up to $10,266,000, a 33% increase; newspapers gained 21% to $2,507,100. Farm publications grew nearly three times to $364,700.

In the package medicines group, spending was dominated by Whitehall Laboratories, with measured spending of $111,849,100, up $14,152,300 or 14% over last year. The division posted record sales as established products maintained leading positions in many categories.

- Anacin analgesic tablets received the greatest chunk of Whitehall's measured ad support of $39,237,800, a gain of $5,331,300 or 16% over 1978. This was primarily allotted to network tv, as well as to some spot tv, network radio and magazine support.

Anacin fought to hold a 12% share of the $750,000,000 analgesic market. Topped by Johnson & Johnson's McNeil Laboratories' Tylenol, whose share was 26%, Anacin led Sterling Drug's Bayer (10%) and Bristol Myers' Bufferin and Excedrin (9% and 7%).

In 1979, Anacin and AHP were involved in regulatory and legal actions that affected advertising. A court appeal was made on the Federal Trade Commission's 1978 order calling for AHP to run $24,000,000 worth of Anacin ads with the disclosure that "Anacin is not a tension reliever."

In addition, responding to a court order prohibiting AHP from making claims about Anacin's superiority over Tylenol, the com-

All you need to get $75,000 travel accident insurance automatically.

Pass the lines at the insurance counter, skip filling out forms, just go to the gate. You're already protected. Every time you put your tickets (plane, train or ship tickets) on the Card you are automatically covered with $75,000 in Travel Accident Insurance. One ticket or a family's worth, they're all covered. The cost is included in your Cardmembership fee.* Charge your tickets in advance and you're covered on your way to and from the airport in a taxi, bus or airport limo. One more reason to carry the American Express® Card. Don't leave home without it.

American Express advertises an insurance benefit.

pany introduced "the Anacin difference" ad campaign. The new effort claims Anacin is an 800mg product compared with 650mg for other leading analgesic items.

Whitehall's second most advertised line, Dristan decongestant products, received $24,246,000. Of this figure, $14,435,000 went to Dristan tablets, $10,440,000 to network tv and $3,186,000 to spot tv.

Network tv also provided major support for other Dristan products including Dristan long lasting nasal mist, with $5,005,000 in network tv out of total measured support of $6,125,000.

Network and spot tv dominated the campaigns of other Whitehall products. Preparation H hemorrhoidal remedies: Ad spending $11,360,000, with network tv getting $6,750,000 of the total and spot tv $2,467,000.

- Primatene Mist and tablets spent $8,000,000; network tv received $6,350,000 of this. Arthritis Pain Forumla had support of $4,820,000 of which $3,630,000 was allotted to network tv.

Anbesol received $3,340,000 and $2,610,000 went to Dry & Clear acne ointment. Of this figure, $1,660,000 was budgetd to spot tv and $672,000 to network tv.

Denorex received $1,830,000, with $1,740,000 going to network tv. Of Compound W's $1,735,000, $1,110,000 went to network tv. This medium also received $1,530,000 of Sleep-Eze's $1,695,000, while spot tv was allotted $610,000 of Heet's $1,100,000 campaign.

In its first full year in the $500,000,000 U.S. contraceptive market, Whitehall's Semicid contraceptive suppository received $914,000 in ad support, almost all in magazines. Predictor, a pregnancy test kit also in its first full year, was supported with $1,410,000, of which $912,000 went to network tv.

AHP's second largest advertiser, with a budget of $45,425,000, was the household products and housewares group, including Boyle-Midway household items, Ekco Housewares, Ekco Products, Dupli-Color Products and the Prestige Group.

Boyle-Midway was supported by $43,100,000 in measured advertising expenditures, $363,000, or less than 1%, below 1978. Woolite, the division sales leader, was again the No. 1 in ad support with $12,470,000. Of this figure, Woolite liquid and powder cold water wash received $8,400,300, primarily in network and spot tv.

- Easy-Off oven and window cleaners were budgeted at $6,450,000, mostly in network tv. The Pam line of dry fry cooking sprays increased its ad expenditure 17% to $7,120,000 while Black Flag received support of $5,065,000, 26% over 1978.

Wizard air fresheners and fire starters went up to $4,280,000, a gain of 22% over 1978 expenditures. Sani-Flush toilet cleaner products were backed by $2,750,000, primarily in network tv. Old English furniture polish received support of $1,920,000.

Ekco, which posted record sales in 1979, had ad support of $2,324,600. Network tv received almost the entire amount for promotion of kitchen tools, cutlery and cookware. Ekco Slaymaker lock line's allotment of $200,000 was all in network tv.

The AHP food products group had a record budget of $23,465,000, up $6,640,000 or 28% over last year.

American Home Foods' Chef-Boy-ar-dee ad spending was up to $16,345,000, a 40% gain over 1978. Most of the outlay went to network tv. New products introduced included Chef-Boy-ar-dee Cannelloni and Chili-Mac. The latter was also marketed under the Dennison's brand name.

BRECK
just tried Breck again. And wow!

American Cyanamid stuck with its "stop 'n stare" hair ad strategy for Breck shampoo in 1979.

The Brach candy division had record sales in its 75th anniversary year, boosted by special holiday and bulk candy promotions. Its budget was $3,740,000. Brach tested a high-protein candy and expanded its Candydent sugarless candy line.

As in 1978, the prescription group led the company in sales and earnings, but received the smallest measured ad budget, due to the technical nature of its market outlets and legislative restrictions.

Wyeth Laboratories worldwide pharmaceutical sales reached an all-time high, and its Ovral retained the leadership as the most frequently prescribed oral contraceptive. The year's major new product introduction was the antibiotic Cyclapen.

Account changes last year saw the Boyle-Midway division move Wizard air fresheners to Arthur Meyerhoff Associates from C.T. Clyne Co.; the food division moved Chef Boy-ar-dee frozen pizza and pizza sauce to the Clyne agency from Young & Rubicam and the sauce in jars to Cunningham & Walsh.

From Whitehall Labs, Dristan cold capsules, Sleep-Eze, Preparation H cleansing pads moved to Hicks & Greist from Kelly, Nason Inc., which also yielded InfraRub, Freezone and Semicid to Rosenfeld, Sirowitz & Lawson.

Wyeth Labs assigned Phenergran oral contraceptive and Tubex to William Douglas McAdams Inc. for Lewis & Gilman. Kornhauser & Calene, successor to the Clyne agency, retained a number of AHP's Whitehall, Boyle-Midway and Foods accounts.

ADVERTISING EXPENDITURES

	1979	1978

American Honda Motor Co.

	1979	1978
Sales	$3,619,000,000	$1,639,000,000
Earnings	76,400,000	26,374,000
Advertising	44,000,000	35,000,000

American Honda Motor Co., Gardena, Cal., the 85th largest national advertiser, and the third largest auto importer in the U.S., is a wholly owned subsidiary of the Japanese-based company, Honda Motor Co. Ltd.

The U.S. unit increased its total ad spending to $44,000,000, up 26% from the $35,000,000 level it reached in 1978.

The company, which markets Honda automobiles, motorcycles and a line of consumer power products, showed a 121% sales gain in 1979, a year in which consumer demand for Civics, Accords and Preludes far exceeded available supplies. At a time of short gasoline supplies and long gasoline waiting lines, Honda was plagued with insufficient supplies of all its fuel-efficient models. Many would-be Honda buyers were forced to wait several months for delivery of Honda autos. Total unit sales in 1979 reached 353,291.

American Honda put some 50% of its $19,000,000 auto ad budget, coordinated by Needham, Harper & Steers, Los Angeles, into network tv, with some 33% in consumer and auto enthusiast magazines.

- Honda continued to use the "We make it simple" ad theme, which positions Honda cars as more dependable and simple than its small car competitors without saying so. For the newly designed Civic, Honda explained "Why it took Honda to improve the Civic" in print and tv advertising.

With the energy crisis in full force and the strong likelihood of its continuing, Honda increased the motorcycle division marketing budget with prime time network, newspaper and outdoor advertising. Honda used the advertising theme, "Follow the leader" as it tried to establish a broader customer base for its motorcycles, which still maintain a 40% U.S. market share. In June, 1979, the motorcycle division switched its $10,000,000-plus account to Dailey & Associates, Los Angeles, from Grey Advertising.

- Honda spent less than $1,000,000 in spot tv and magazine advertising to launch the high-price ($344 to $444) HR-21 lawn mower line in 1979, distributed through its lawn and garden network. In addition, Honda recently introduced a lightweight, lower-price HR-17 lawn mower. Dailey & Associates also handles the power products division.

The new lawn mower stops the blade seconds after the operator releases the mower's handle. The innovation gives Honda the jump on the rest of the industry, which must have similar blade brakes by 1982.

- Although demand for Honda automobiles continued to exceed expectations, Honda, like other Japanese importers, has cause for concern. For the first time, U.S. manufacturers are beginning to market competitive small cars, and with the weakness of the dollar over the yen, Honda autos are generally more expensive than most buyers expect. The smallest

MARKETING PROFILES

Civic models range from $4,299 to $5,199, while the more luxurious Accord and Prelude models range from $6,000 to $7,400. There have also been many instances of Honda dealer price gouging, some adding as much as $2,000 over the recommended list price.

Facing growing resentment in Congress over Japanese importers because of Japanese restrictions on U.S. goods, Honda is trying to establish itself as a "good guest" in the U.S. In early 1980, Honda announced it will become the first Japanese auto maker to open a production plant in the U.S. The company is making a $200,000,000 commitment to build an assembly plant in Marysville, O., where it already has a motorcycle assembly line. It is thought eventually the U.S. Honda plant will produce 10,000 cars a month and employ about 2,000 workers.

North America continues to be the biggest overseas market for Honda, making up 67% of its annual output.

American Honda's parent company is marketing a five-door hatchback (called Quint in Japan and Quintet in Europe) through a newly established dealer network. Indications are Quint/Quintet will not be imported to the U.S., but based on the success of Mazda's five-door GLC and Volkswagen's five-door Rabbit, Honda is said to be considering importing a five-door Civic into the U.S. The car is currently marketed in Canada.

Honda is said to be considering introducing a four-door "notchback" sedan based on the Civic in the U.S. by late fall 1980.

Class, economy and just plain fun are some of American Honda's reasons behind its snazzy, moon-roofed Prelude.

American Motors Corp.

	1979	1978
Sales	$3,117,949,000	$2,585,428,000
Earnings	83,944,000	36,690,000
Advertising*	44,611,600	43,444,500

*** Estimated by AA**

American Motors Corp., Southfield, Mich., the 83rd largest national advertiser, set dollar sales and earnings records on a modest advertising increase in 1979.

Ad outlays of $44,611,600 were up about 2.7% over the $43,444,500 of 1978 as vehicle unit sales fell 9% in a market plagued by fuel problems. Because of its emphasis on small cars, AMC weathered the abrupt shift of buyers to small, fuel-efficient cars for a while. But the slumping economy and inroads of imports eventually cut its car sales.

Jeep, the star of AMC sales until the gas crunch of the spring, reversed its upward trend to fall substantially short of 1978 sales. Fiscal (model year) sales of Jeeps did set a record.

AMC spent the year digesting its deal with Renault to sell its small cars here in exchange for Renault technology (and AMC production of a Renault-based car in 1982) and Renault sale of Jeeps outside the U.S.

Earnings rose to $83,944,000 from $36,690,000 but, restated for an extraordinary tax credit, earnings still came to a record $68,100,000. That topped the 1978 after-tax credit figure of $24,100,000 by 183% and the prior record year, 1959, by 38%. Sales of $3.1 billion for fiscal 1979—October to October and coinciding with the vehicle model year—also were a record. They were up 21% from 1978.

- AMC said automotive operations were "solidly profitable" and "properly positioned to meet strong demand for smaller, economical passenger cars resulting in increased penetration of the small car segments of the market." The 1979 results were also helped by Jeep which totaled sales of 151,667 units up from 145,716 in the fiscal year. For the calendar year, the last three months of 1979 were bad enough for sales on that basis to show a decline. Jeep sales slipped to 140,431 from 161,912. The situation was similar between fiscal and calendar years for cars. In the fiscal year sales declined to 184,456 from 193,803 and for the calendar period, sales dipped to 162,057 from 170,739.

Sales dollars rose for all vehicles to $2.5 billion from $2.2 billion and the special government vehicles of AM General, a subsidiary, rose to $503,930,000 from $348,353,000. More important, a loss of $5,230,000 in 1978 was charged to a profit of $3,457,000. Other operations, including international, showed a sales gain to $84,247,000 from $71,904,000 while net was up a bit to $3,406,000.

Market penetration was something else. That slipped to 1.7% of the entire market for the fiscal year, from 1.9% in the passenger car segment. Jeep's penetration of the utility and recreation portion rose to 15.7% from 14.4%.

The best-selling AMC car was the compact Concord at 85,431 units down from 114,764. A reskinned Gremlin subcompact, the Spirit, came on to capture sales of 54,356, up from 24,412 in 1978, and the 1980 Eagle, a four-wheel drive passenger car with a Concord body, gained 14,101 sales before 1979 was over.

- Pacer, the bulbous subcompact, that had been looking for a market position all its brief life, finally found one. AMC dropped the line and only 8,169 were sold in 1979. Pacer apparently did find a market niche of a sort, AMC said. Its main group of buyers were affluent suburban women.

AMC started off model year 1979 by focusing on the new Spirit and appealing to emotions. That quickly turned to price cuts in the new year but Spirit revived with comparison ads against the Chevrolet Chevette that ran the balance of the model year.

The first fruits of the "association" with Renault came in the spring of 1979 when AMC started marketing the subcompact LeCar in the U.S. and began franchising the first of 500 AMC dealers for the French import. That also gave AMC a third agency, Marsteller, New York, which held onto the Renault account.

AMC said it benefits from Renault's advanced technology—it couldn't develop the fwd car it will make in Kenosha, Wis. in 1982 without the Renault components or the Renault $150,000,000.

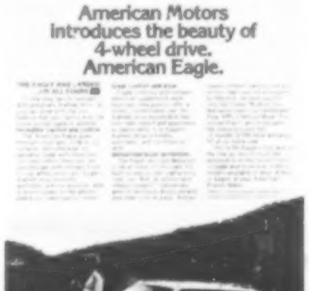
Renault also has diesel and turbocharging expertise that will come in handy. LeCar gives AMC its only small fwd vehicle. Renault gets the Jeep to sell overseas and eventually 1,600 dealers to sell its imported products. That dealer network will be one of the largest for an import in the nation.

- One of AMC's first moves was to start using the Renault name in LeCar ads in the belief that the old Renault Dauphine was forgiven if not forgotten.

Meanwhile AMC was moving to shore up lagging sales of the Spirit. Spring also brought Thomas A. Staudt to AMC as vp of the marketing group from Chevrolet where he had been director of marketing. David J. Van Peursem came over from GM's Oldsmobile division as general manager of marketing. He had been marketing director at Olds.

The word as gasoline shortages hit was fuel economy and AMC touted its small cars hard. Concord and Spirit, despite average fuel economy, still had one benefit of their aging designs—big gas tanks and the extended "range" of the vehicles got a lot of attention—as AMC readied the Eagle for fall introduction as a 1980 model.

The Eagle, said AMC convert Staudt, will be "blazing a new path into the marketplace" by wedding four-wheel-drive to a passenger car. Traction and smoothness was the goal to fill a "latent but burgeoning desire" for a vehicle with safety and security for bad roads and weather, said Larry Hyde, group vp international.



"The Eagle has landed on all fours" was the campaign theme of AMC's new 4-wheel-drive offering.

The Eagle campaign was kicked off nearly a month before the rest of the domestics started advertising their 1980 models. Unlike the competition, AMC didn't have a big inventory of unsold 1979 models and wanted to get in the first punch of the new year.

The strategy was a 2½-week campaign just before other intros with heavy emphasis on the Eagle—"The Eagle has landed on all fours" was the theme. That opening shot was 80% tv, an unusual concentration for AMC. More traditionally, AMC used magazines for Eagle in a 1-1/3 page combination. The fractional page was used to list product attributes including a "revitalized" (again) Buyer Protection Plan.

- AMC had a new twist in factory Ziebart rustproofing and a rust perforation warranty. Concord continued as a luxury compact and Spirit pursued its comparisons with Chevette. Both cars were under the theme, "Nobody builds a car to last the way American Motors builds them . . . Built for today. Built to last for tomorrow."

Jeep also started out naming the competition for its pickup truck, Cherokee Chief wagon type and the Wagoneer became the "ultimate wagon" as AMC sought a bigger share of the regular as well as the four-wheel-drive station wagon market.

The strategy worked, aided by the sharpening swing to smaller cars. While full-line manufacturers were showing concern early in the new model year, AMC sales were soaring, leading one AMC marketing official to say, "We think we have the right strategy and approach and we plan no changes. That's the first time I've been able to tell you that in a while."

Things kept getting worse for the Big Three automakers who started dealer incentives—indirect rebates—to rid themselves of carry-over 1979 models. Only the Pacer wasn't selling and it was due to be dropped shortly anyway.

By the end of November, only AMC was showing a sales increase among the four domestic makers. Chrysler Corp. was test marketing cash for test-driving programs and had rebates already in place and the others were revamping fall ads months earlie. than usual.

Imports started to be of increasing concern at AMC as president W. Paul Tippett Jr. took the stump to brand the Japanese for "exploiting" the U.S. market.

By March, AMC had been through indirect rebates that produced sales gains of 34% despite chairman Gerald Meyers basic dislike of the method. ("Rebates are addictive," he said.) Direct rebates followed on big Jeeps but AMC still clung to its basic marketing plan. "We've been following the plan. We haven't made any major changes—a little unusual for AMC," said Gene Richmond, director of advertising.

That changed in May as AMC swung into rebates for its cars, including Renault and Jeep in the "Great American Freedom Sale." The biggest headlines touted the giveaway of an American flag. For the first time, all three vehicle lines were combined in a single campaign with 90% of the effort on tv.

AMC, like the other auto makers, started looking hopefully to the fall and the 1981 models. The company planned to prune 10% of its models to concentrate its efforts and was optimistic about a 4wd version of the Spirit, sort of a son of the Eagle.

- Its second-quarter fiscal year (January to March) saw earnings plummet to $1,300,000 from $32,000,000 in the 1979 quarter and chairman Meyers came to this gloomy conclusion: "The U.S. automobile industry is under severe pressure as a result of record interest rates, credit restrictions, reduced business activity and a decline in the consumer's real income combined with dramatically higher fuel prices."

That must have left Mr. Meyers sighing for fiscal 1979, when he could contemplate such things as record sales and earnings from international operations. Unit volume was up 12% keyed by Jeep and AMC started assembling vehicles in Eygpt.

AM General sales topped $500,000,000 for the first time, an increase of 45%. Its big business was in military trucks and Postal Service vehicles. Other subsidiaries were profitable. Wheel Horse products, Mercury Plastics and Windsor Plastics had record years. Sales of the three totaled $84,200,000, up from $71,900,000, and earnings rose to $3,400,000 from $3,100,000.

AMC actually spent $56,950,000 on advertising but some $12,500,000 of that was funneled through dealer ad associations in a cooperative program. The $44,611,600 it spent directly broke down to $37,500,000 on tv—$21,600,000 on spot tv as AMC continued a 1978 shift to that medium and $15,900,000 in network tv. That was up from the $29,186,400 spent in 1978 in tv. Magazine expenditures held about even at $5,300,000. Radio slumped to $100,000 from $758,100. Factory spending in newspapers declined to $1,550,000 from $7,666,900 but much of the slack was taken up by dealer groups. Outdoor was up to $161,600 from $18,500.

MARKETING PROFILES

American Telephone & Telegraph increased its advertising about 27% to $219,756,300 in 1979 to become the ninth largest advertiser in the U.S.

This increase in ad spending comes in a year that saw the Bell System's revenues grow 10.8% to nearly $45.5 billion. Earnings passed the $5.5 billion mark.

Return on average total capital was up slightly to 9.8%, but considerably below the 13% return that the Bell System believes it must earn in order to assure sound financing of service growth and improvement.

Some 5,000,000 new phones were added to the system in 1979 for a total of 138,000,000 in service and $15.8 billion were spent largely to expand and enhance the capabilities of the telecommunications network. Growth in demand was strong for the year though it was slower in the second half. Long distance calling rose 10.8%, international calls 20%, andWATS revenues grew a significant 16%.

Of the company's nearly $45.5 billion in revenues, 37% came from basic monthly rates and equipment charges to business and residential customers, 6.5% from local message charges. Long distance calls, both state and interstate, accounted for 40%; most of the balance came from WATS, private line services for business and government, and from directory advertising.

■ The Bell System spent $15.8 billion for construction in 1979, an increase of $2.2 billion; 53% of the construction budget went to meet current and anticipated growth, 23% to replace older equipment and facilities with new technology, and the balance largely for the rearrangement of facilities and provision for customer movement.

Some $2.4 billion or 16% was for new electronic switching equipment; 350 local electronic central offices were installed to serve 8,100,000 lines, 23% more lines than 1978. By year's end, 1,950 local electronic switching offices were serving 37% of the system's customers.

Fifteen long distance electronic switching systems were installed in 1979. These large digital switches handle more than 500,000 calls per hour—more than four times the capacity of earlier systems. The new systems, which take up less space and require less maintenance, brought the total in service to 35.

The addition of long distance high speed signal systems continued. These 100 signal systems enable switching centers to communicate rapidly with each other to establish availability of circuits, set up calling paths, and collect information for billing.

The computerized operator consoles, called traffic service position systems (TSPS), which save operator time on collect, credit card and other special calls, grew to the point that about 87% of Bell customers are now served by TSPS. These systems calculate charges, announce them to the customers and (in the case of pay phones) count the coins deposited.

Technology marches on in the Bell System from the installation of digital echo canceler chips (which eliminate echoes on very long distance calls, in particular on satellite circuits) developed at Bell Laboratories, to lightwave communications—the transmission of information on a light beam sent along hair-thin glass fibers.

■ Lightwave systems were installed in 1979 in Connecticut, California and New York—the New York installation to provide voice and video service for the 1980 Winter Olympics at Lake Placid.

International direct dialing came to 940 additional cities in the U.S. in 1979. Some 36,000,000 customers in 2,600 cities across the country can now dial direct to 64 foreign countries.

A seventh transAtlantic cable was approved by the Federal Communications Commission in 1979. The cable will stretch 3,400 miles from Tuckerton, N.J., to Land's End, England. It will carry 4,200 conversations at once compared with 36 in the first transatlantic cable laid in 1956 (now retired) and cost $13.60 per circuit mile compared with $300 in the first.

The Bell System's Dimension 2000 PBX was adapted to the specific energy needs of the hotel and motel industry. The initial installation in a major hotel in Atlanta is expected to reduce energy costs by 10% by instructing the communications system to shut down energy-consuming equipment in various parts of the hotel when it is not in use—such as lights in conference rooms and restaurants.

Picturephone Meeting Service—a two-way voice and video service—had increasing use as an energy-saving way to hold meetings by both business and government. It is currently offered on a trial basis at service centers in 12 cities.

■ The Advanced Mobile Phone Service (AMPS) was offered in a trial with 1,400 customers in the Chicago area. AMPS is a mobile phone with performance quality comparable to home or office phones. It can be offered to virtually an unlimited number of customers in metropolitan areas. Bell awaits regulatory approval to offer this system.

The Touch-a-matic 12 electronic dialer and the Touch-a-matic S series were both introduced as new home use products in 1979. The Touch-a-matic 12, used in conjunction with a regular telephone, enables the customer to store as many as 12 telephone numbers and dial them automatically at the touch of a single button. The Touch-a-matic S is an electronic telephone with built-in automatic dialing.

Some 200 Bell System Phone-Center stores were added in 1979. There are now almost 2,000 of these retail outlets where customers can shop for telephones, carry them home and plug them in. Many Phone-Centers also offer replacement of broken or defective phones on a "walk-in" basis. More than half of the new phones installed in 1979 were provided through Phone-Center stores.

Other home services that grew significantly during the year were Touch-Tone service, which increased by 19% and Custom Calling services, which offer features such as automatic forwarding of calls to another telephone number and abbreviated dialing of frequently called numbers, grew by 50%.

■ The largest share of ad spending by the Bell System went to long distance lines which received $44,365,800 in 1979, up significantly from the $18,500,000 spent in 1978. More than half—$26,000,000—went to network television. Yellow Pages also had a significant budget, just over $13,000,000 and spent it mainly in network and spot television. Each regional Bell System company had its own ad budget, and spent from a high of $7,427,400 for Southern Bell Telephone System to a low of $518,000 for Pacific Northwest Bell Telephone Co.

Pacific Telephone & Telegraph Co. was budgeted for nearly $4,000,000. Western Electric, AT&T's manufacturing subsidiary,' showed up with a measured media outlay of more than $6,000,000, which went, respectively, to tv, magazines and outdoor.

In February, 1980, AT&T settled an antitrust suit by agreeing to buy up to $2 billion worth of products and services from International Telephone & Telegraph Co. ITT competes with Western Electric in selling phone equipment.

What the Washington regulators, Congress and the federal courts do regarding the world's largest company—related to what areas in which AT&T will be allowed to operate in addition to those already staked out—will continue to be of vital concern to AT&T.

A mid-1980 Chicago federal court decision awarding MCI Communications $1.8 billion in Sherman Antitrust Act damages has been appealed. MCI charged AT&T with trying to force MCI out of the long-distance phone field by refusing to make intracity interconnections for MCI's customers.

Also at issue is AT&T's future role in the new communications technologies, including the rapidly expanding field of satellite transmission.

Mickey Mantle.
Famous ex-Miller Lite drinker.
Look who switched to Natural Light.
Mickey Mantle switched to Natural Light because he prefers the taste.
He had no idea that Natural Light's great taste comes from using only the finest natural ingredients.
Or that there are no artificial ingredients in Natural Light, unlike some other light beers he had tried.
We don't think he even noticed the ingredients listed right on the label. Water. Barley malt. Rice. Hops. Yeast.
What counts for Mickey is taste. And on that score, we've both made a hit.
Natural Light.
Taste is why you'll switch.
Natural Light

Anheuser-Busch's leading light beer, Natural Light, is closing in on the current No. 1, Miller's Lite. Mickey Mantle (ex-Lite drinker) is among those who claim taste is why he switched.

Anheuser-Busch

	1979	1978
Sales	$3,263,744,000	$2,701,[illegible]000
Earnings	124,094,000	111,[illegible]000
Advertising	160,524,000	116,599,000

Anheuser-Busch, St. Louis, the nation's 22nd largest advertiser, boosted its ad spending by 37% in 1979 to a total of $160,524,000. That nike may seem hefty but as A-B Inc. president Dennis P. Long points out, the company is slowing down the rate of increase in marketing spending. In 1978, the brewery hoisted its ad spending by 47% over 1977 levels. For 1980, Anheuser-Busch is expected to increase its ad budget by an estimated 25%.

MARKETING PROFILES

Anheuser-Busch continued its reign as king of the beer industry for the 23rd consecutive year and further outdistanced its archrival, the Miller Brewing Co. The king reorganized its court last year and came up with a Delaware holding company dubbed Anheuser-Busch Cos. Then it transformed all of its divisions into subsidiaries. Dennis Long, formerly vp-general manager of the beer division (now known as Anheuser-Busch Inc.), ascended to the presidency; W. Randolph Baker became president of the Busch Entertainment Corp. (formerly Busch Gardens division).

In '79, the company's sales increased 20.8% to $3.3 billion. Net income climbed to $124,000,000, up 11.8% from 1978.

Once again, the company's beer sales smashed records in 1979. Barrelage climbed to 46,200,000 bbls. last year—or, as the company boasts, "One out of every four beers sold in the U.S. is an A-B product." Miller Brewing pulled up behind the king with 35,794,000 bbls; A-B took a 26.4% share of the market; Miller garnered 21.3%.

■ Anheuser-Busch is (still) pulling out all stops to leave Miller in its dust. In 1979, A-B operated at 98% capacity; now the company is working hard on expanding its output. The Williamsburg, Va., brewery's capacity has been doubled (to 8,000,000 bbls.), while the Los Angeles' output is being tripled (to 10,000,000 bbls.—the largest expansion in the company's 108-year history). Last year A-B bought the Jos. Schlitz Brewing Co.'s New York plant (herewith known as the Baldwinsville plant) for $100,000,000 with another $100,000,000-plus earmarked for renovation. By 1985, A-B's network of 11 breweries will have a capacity of 65,000,000 bbls.

Budweiser, A-B's flagship brand and best seller, stuck with its pitch to hardworking Americans and its "This Bud's for you." A-B spent $29,209,000 on Bud in the six measured media, up from the $24,636,700 spent in 1978. As usual, the bulk of those moneys ($22,530,800) went into network tv buys. In keeping with the company's concept of total marketing programs, A-B spent an additional $258,600 on sweepstakes and sports promotions.

Budweiser's advertising may be saluting hardworking people outside the U.S. as the brand expands its horizons. A-B recently signed an agreement with the Labatt Brewery whereby the Canadian brewer will brew and market Budweiser in Canada and will market (imported) Michelob.

Busch, the company's "successful regional branch ready for additional rollout when capacity permits," according to Mr. Long, has added a western slant to its "Head for the Mountains" campaign. The spots have come down from the mountains to hardworking cowboys repairing fences and then repairing further for their just reward—an ice-cold Busch.

The company is playing with Busch, pricing it differently for various regions. A-B sunk most of its $8,039,100 (measured media) into spot tv.

■ Michelob, still mighty in the superpremium category, kept John Forsythe, Vic Damone, and "Weekends are made for Michelob" for yet another year. In total measured media support, Mich got $15,400,000, with $11,657,400 slotted for network tv.

The lighter, lower-calorie, less-filling version of Michelob, Michelob Light, muscled its way to the No. 3 slot in the light beer category last year, behind A-B brethen, Natural Light. Breaking out of Michelob's shadow, Michelob Light came out with a new campaign theme "Compare the taste of Michelob Light to any beer you like." The company shelled out $16,648,578 in the six measured media for the brand—with $13,765,800 in network tv. In 1978, A-B allocated $6,475,800 for Mich Light.

A-B's leading light beer, Natural Light, is considered by many to be the biggest gun in the company's arsenal. The brand is now the No. 2 light behind Miller's Lite. A-B raided the ranks of Miller Lite advocates last spring for its new Natural Light campaign theme "Taste is why you'll switch." Those claiming taste is why they switched are former athletes Nick Buoniconti, Joe Frazier and Mickey Mantle. Swilling along are other former *Sports Illustrated* cover boys Walt Frazier and Catfish Hunter, along with Natural Light regulars, Norm Crosby and Ray J. Johnson.

Anheuser-Busch's import, Wurzburger-Hofbrau, added Baltimore, Cincinnati, Louisville, Washington and New York (draught only in New York) to bring its territory up to 10 test markets. With TBWA still on the creative, the ads still stress the import method (barrels) and product freshness. According to Mr. Long, A-B's president, the fate of the brew will be decided in late '80.

Beer is certainly not Anheuser-Busch's only business. For instance, it has broken into the soft drink market—first with the much maligned Chelsea (r.i.p. in test market graveyards), then with Root 66 and now Sugar Free Root 66. Both Roots are now in test.

A-B is getting into the $4.4 billion snack food business with a line called Eagle, delivered to the bars and pubs with the other A-B products and now in test in Boston, Atlanta and San Francisco.

Then there is the direct mail business, dubbed the Clydesdale Collection. Tapping "labelmania," the company is marketing a line of goods ranging from bar accessories to clothing to automobiles to telephones—all with the company insignia, the Eagle and the A.

Of course, there are the Cardinals. The 1979 season was a biggie for the Redbirds as the team wound up in October securely in third place; the attendance climbed 27% to 1,600,000. Regrettably, the Cards once again resulted in a loss on the corporation's bottom line. Even with last year's co-MVP Keith Hernandez having another good year, as are other players, the '80 season looks dismal for the gate—the team is mired in the second division.

Business was bustling at A-B's theme parks in Tampa and Williamsburg in 1979. Combined attendance was up to 4,800,000. Nearly 3,000,000 visited The Dark Continent in Tampa last year and found you don't have to trek too far to find Timbuktu—A-B has built it in Florida for $20,000,000. The company has embarked on another Tampa addition—a $7,000,000 Adventure Island water park.

■ The Old Country in Williamsburg hosted 1,900,000 guests last year and started construction on a new Italy section for the park.

Last year also marked the beginning of construction on Sesame Place, a joint venture by the Children's Television Workshop (progenitor of tv's "Sesame Street") and Busch Entertainment Corp. The small-scale educational park is being built on a 15-acre tract outside of Philadelphia and is scheduled to open late in July, 1980.

In defiance of recessionary times, Busch Properties had its best earnings since 1973. By year's end, a total of 441 homesites (in the six single-family residential developments at Kingsmill on the James) and 195 units (in the four multifamily developments) had been sold at the 2,900-acre residential community near Williamsburg. Busch Corporate Center, adjacent to Kingsmill, is now 50% complete, while the Busch Corporate Center in Columbus, O., is 80% complete and a third Busch Corporate Center is now planned adjacent to the Fairfield, Cal., brewery.

B.A.T. Industries Ltd.

	1979	1978
Sales*	$1,440,000,000	$1,361,700,000
Advertising†	116,396,600	82,397,500

*Domestic (cigaret sales only), estimated by AA
†Domestic spending only

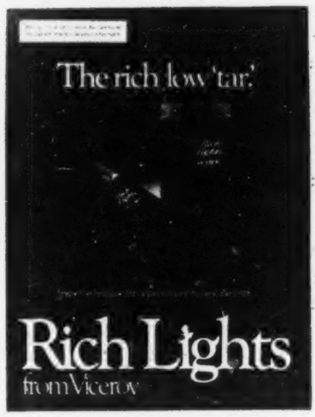
B.A.T. Industries Ltd., a British holding company and the 41st largest national advertiser, is estimated to have spent $116,396,600 on advertising in 1979, about 41% more than the year before.

Worldwide sales in 1979 totaled $15,426,700,000, with earnings of $522,903,500. In 1978, B.A.T.'s sales amounted to $13,482,700,000, with earnings of $445,220,000.

During the year, B.A.T. consolidated its U.S. operations, which include tobacco, retail and paper interests, into a subsidiary called Batus Inc., based in Louisville, Ky.

Brown & Williamson Tobacco Corp., also based in Louisville, is the largest enterprise in the Batus family. B&W's cigaret sales totaled an estimated $1,440,000,000 in 1979, compared with $1,361,700,000 in 1978.

Although revenues were up slightly, the number of units sold dropped from 92.3 billion in 1978 to 87.9 billion in 1979, as did B&W's market share, which declined from 15.3% to 14.4%. Still, the company managed to hold on to the No. 3 position among the nation's largest tobacco marketers, ranking behind R.J. Reynolds Tobacco and Philip Morris Inc. and ahead of American Tobacco Co., Lorillard Corp. and Liggett & Myers.



B.A.T.'s Viceroy devoted most of its ad spending to its Rich Lights, a product in its 1st full year of distribution.

■ Kool, the country's top selling menthol cigaret, continues to be the company's No. 1 brand, though sales have been declining. In 1979, the brand, which ranks behind Philip Morris' Marlboro and R.J. Reynolds' Winston, sold 56.5 billion units, 2.9 billion fewer than the year before. That amounted to a market share of about 9.2%, compared with 9.7% in 1979.

The brand received $22,489,500 in measured media support, with $9,554,500 going to magazines, $2,637,700 to newspaper supplements, $177,700 to spot television (nontobacco ads) and $10,069,600 to outdoor.

As other tobacco companies have found, sales of low-tar extensions of existing lines have contributed to sales gains. In the case of Kool, the number of units sold were up 6.7% for Kool Milds, 5.5% for Kool Super Lights and 8.5% for Super Lights Longs.

Recognizing this, B&W backed the Kool Super Lights line with $13,803,400 in measured media support in 1979, most of it in magazines.

The company also introduced Kool Internationals, a 95mm, 9mg tar menthol into test market. Previously available only in foreign markets, Internationals are aimed at "urban smokers who are interested in the international style," according to a company source.

To bring even more attention to the Kool brand, B&W became the sponsor of the famed Newport Jazz Festival for 1980, taking over from the Jos. Schlitz Brewing Co. Interestingly, the event, which was dubbed Kool Newport Jazz Festival New York, brought together two of the top selling menthols. Newport, of course, refers to the festival's original home, Newport, R.I., as well as Lorillard's Newport brand cigarets. But B&W execs believed that removing the Newport tag would make the festival "unidentifiable."

Viceroy, No. 2 at B&W and No. 14 nationally, sold 11.8 billion units in 1979, down 510,000,000 from the year before. Measured media spending for the brand totaled $16,493,300 in 1979, with $10,299,700 going to magazines, $92,800 to newspaper supplements and $6,100,800 to outdoor.

■ Virtually all of the support—$15,138,000—went to Viceroy Rich Lights, which was in its first full year of national distribution. The line extension attained a 0.41% share of the market during the year, while the brand as a whole stood at 1.9%.

B&W attempted to spur sales of Rich Lights through sweepstakes offering luxury prizes. One contest, which involved a scratch and match card, offered an Excalibur 1980 Series 4 Phaeton car, a Pablo Picasso linocut and a 225-gem necklace made by Harry Winston Inc. A second sweepstakes offered an island and a house as the grand prize.

Raleigh, the No. 16 brand nationally, had sales of 11.4 billion units in 1979, a total of 740,000,000 fewer than in 1978. Filtered Raleighs, including Raleigh Lights, accounted for 10.4 billion of those units, down from 11.6 billion in 1978.

Measured media spending for the brand totaled $4,803,200 in 1979, with $2,262,400 going to magazines, $920,600 to newspaper supplements and $1,620,200 to outdoor.

Belair, the 20th largest-selling cigaret and another menthol in B&W's stable, also saw sales drop, from 8.3 billion units in 1978 to 7.5 billion in 1979, giving the brand an estimated share of 2%.

Measured media spending rose to $9,027,900 in 1979 from $8,246,400 in 1978. Magazines received $5,085,000, newspaper supplements $1,130,200 and outdoor $2,812,700.

■ Much of B&W's attention during the year focused on one of the hottest segments in the industry—the low-tar menthol. The company is a big factor in the menthol market as a whole, accounting for about 36.9% of sales (or about 10.5% of the entire cigaret market).

Arctic Lights, the 9mg menthol introduced in 1978, added to B&W's forces in the low-tar end of this segment, but it has found the competition rough. The brand accounted for 1.29 billion units sold in 1979, or about 0.21% of the market, and measured media spending has been heavy, to the tune of $18,807,300 in 1979. A total of $7,383,700 went to magazines, $1,971,800 to newspaper supplements and $9,451,700 to outdoor.

Despite such support—estimates say the total ad investment during the introductory year ran from $35,000,000 to $40,000,000—B&W appears disappointed with the brand. Rosser Reeves Inc. resigned the account recently because, the agency said, it no longer had a budget. "They [B&W] were making enormous demands on us," said agency chairman Scott Reeves. "We decided we weren't going to continue on a basis that was not profitable to the family."

The account subsequently was turned over to McCann-Erickson, which also handles Viceroy.

Reports, meanwhile, indicated that B&W was considering an attempt to enter the ultra low-tar segment, possibly with a brand called Golden Ones, Choice or Barclay. Choice was package tested in Florida late last year.

An entry here would have to tackle American Tobacco's successful Carlton, as well as R.J. Reynolds' Now and Philip Morris' Cambridge.

■ Other B&W tobacco products include Laredo, a roll-your-own cigaret kit; Sir Walter Raleigh regular, aromatic and special mixture pipe tobaccos; Tube Rose snuff; Bugler, Target and Kite tobaccos for the roll-your-own market, and Bloodhound, B&W Sun Cured and Red Juice plug chewing tobacco.

Batus, meanwhile, continued to shore up its retail division. Saks Fifth Avenue, Kohl Supermarkets and Kohl Department Stores reportedly were doing well, but Gimbel Department Stores still faced difficult times.

Though company execs claimed that Gimbel operations in Pittsburgh, Philadelphia and Milwaukee were showing signs of improvement, the New York stores continued to put a drag on progress.

Measured media spending for Gimbel in 1979 totaled $3,760,000, with $117,500 going to magazines, $74,500 to newspaper supplements and $3,568,000 to spot tv. For Saks, spending totaled $2,357,600, with $545,300 going to magazines, $500,200 to newspaper supplements and $1,312,100 to spot tv. And for Kohl, the total was $470,700, all of it in spot tv.

One Batus holding in the U.S. in the news recently became en-

tangled in legal difficulties. Appleton Papers, which manufactures carbonless copying paper, became the object of a Federal Trade Commission complaint of antitrust violations.

The FTC asked that B.A.T. divest itself of the operation, which was purchased in 1978 for $280,000,000 from NCR Corp. Appleton and B.A.T. were the world's two largest producers of the paper at the time of acquisition, the FTC said.

Measured media spending in 1979 for Appleton business papers totaled $135,200, all of it in magazines.

Beatrice Foods Co.

	1979	1978
Sales	$8,290,509,000	$7,479,025,000
Earnings	290,140,000	262,167,000
Advertising	150,000,000	150,370,000

Beatrice Foods Co., Chicago, the nation's 27th largest national advertiser, invested $150,000,000 in advertising in 1979, virtually the same amount it spent in 1978.

As in the past, Beatrice put the bulk of its investment—nearly $119,000,000—into such nonmeasured media as coupons, premiums, packaging and point of sale.

Out of the total of $31,179,100 spent in measured media advertising (down from $33,400,000 in 1978), Beatrice's largest investment continued to be in spot television with $14,900,000, though it was cut sharply from the $16,800,000 spent in 1978. This included a $1,500,000 drop in spot television support of Danny Frozen yogurt and a $400,000 drop in Eckrich frankfurter spot television advertising. Spot radio also suffered, dropping to $2,000,000 from $3,200,000.

- Network television and newspaper advertising changed little in 1979 as compared with 1978, the former staying at approximately $5,600,000 while the latter rose to $2,800,000 from $2,700,000.

The cuts in spending in other media were partially offset by a sharp increase in the use of magazines by Beatrice, with expenditures increasing to $4,800,000 in 1979 from $4,000,000 in 1978, up 20%. This reflected $300,000 in advertising support for its spring, 1979, Airstream recreational vehicle sweepstakes, and $200,000 increases in advertising support for each of Samsonite luggage and Eckrich sausage.

Other Beatrice measured advertising included farm publications and outdoor media.

Dannon yogurt continued to be Beatrice's most heavily advertised product as measured by Leading National Advertisers, with measured advertising rising to $3,700,000 from $2,800,000 in 1978. Virtually all expenditures were on television advertising, split in a ratio of one-to-three between network and spot placements.

- Other lines receiving heavy advertising support included Samsonite luggage, with $3,700,000 spent on magazine and television; Eckrich meat products, $4,300,000 total spent mostly on television, with sausages getting $2,200,000, frankfurters getting $1,300,000 and lunch meats $700,000; La Choy Chinese food products got $1,300,000 in television support; Swiss Miss instant cocoa mix and Swiss Miss ready-to-eat pudding got $1,100,000 and $1,200,000 respectively, mainly in network television; and Culligan's home water purification products got $1,400,000 of spot television support.

Relying on a combination of acquisitions and internal growth, Beatrice has accumulated more than 400 distinct operating units under its corporate umbrella. Of the ten business lines Beatrice uses in its reporting procedures, six pertain to food and related services, while four involved manufactured and chemical products.

With food-related businesses accounting for 73% of total sales in 1979 and 64% of pretax earnings, Beatrice considers itself the "country's largest food company."

The company's underlying growth strategy is to take products and product lines with strong brand names and expand their geographic distribution.

- The company is widely recognized for its management acumen, and its successful corporate strategy has called for the conglomerate to maintain a low corporate profile while allowing its operating units a great deal of autonomy.

Though the corporate headquarters makes decisions on top personnel, performs financial and accounting functions, reviews all marketing decisions, and provides counseling and assistance when necessary, most operating decisions—such as advertising expenditures (within guidelines), themes, campaigns, and agency selections—are left to the individual operating units.

Considering its generally low corporate profile, some company observers were surprised when the company launched its first venture into corporate advertising in the spring of 1980. The print campaign was budgeted at just under $1,000,000 and has been running in the *Wall Street Journal*, *Institutional Investor* and *Barron's*.

While the ads are certainly aimed at drawing additional investment community interest in the company and increasing awareness of the company's enviable growth record, some observers point out that the advertising may also be intended to help clear any doubts that may have arisen following last year's highly visible and widely publicized dispute among the corporation's board of directors.

The conflict revolved around the question of who would succeed the outgoing ceo and the role of outside directors. Though the airing of directorial dissension proved to be an embarrassment to the company, analysts do not believe that the shake-up has had any significant effect on the operations of the corporation.

Despite continued flatness in per capita consumption of dairy products, Beatrice's dairy and soft drink operations managed to post a volume gain of 5% to $2 billion in 1979 and an earnings increase of 3% to $110,000,000. This enabled the dairy line to continue to be Beatrice's volume leader, though the dairy and soft drink operations for the first time slipped behind Beatrice's grocery operations to second place in earnings.

The dairy division's most prominent brand, Dannon yogurt, became the first yogurt to achieve national distribution when it began selling on the West Coast last summer. Dannon had previously announced that it would be going national in 1981, and the speeded-up timetable is seen as an effort to cash in on the advantage of being on the shelf first.

The newly entered California market may represent nearly one-fifth the nation's yogurt sales, but many analysts predict that Dannon will not find it easy to penetrate the market. Not only will distribution costs increase as the yogurt maker shifts from its strong base east of the Mississippi, but Dannon will also be facing tough competition from such firmly entrenched California companies as Knudsen Corp. and Beatrice's own Johnston unit, as well as such other newcomers to the western yogurt markets as General Mills and Foremost-McKesson.

Much of Dannon's marketing efforts during the coming year are expected to be concentrated on the California market.

The dairy and soft drink division has also been expanding its Viva low-fat products, its County Line cheeses and its Meinerz Italian cheese operations. Viva now accounts for 25% of Beatrice's U.S. dairy volume, up from 12% five years ago; Meinerz has opened a new production facility in California which is expected to provide more efficient service to West Coast markets; and County Line will be introducing several additions to its line of natural cheddar cheeses in the coming year.

Beatrice's grocery line enjoyed an exceptional year, with sales rising 27% to $1.2 billion and operating earnings jumping 38% to $114,000,000.

The natural, lowfat, no starch yogurt.

Dannon yogurt pushes its unflavored variety.

Even though tight citrus supplies have kept Tropicana from doing any media advertising since the freeze of 1977, the citrus marketer accounted for 31% of the grocery division's sales and 50% of its earnings last year. The 1979-80 record citrus crop bodes well for Tropicana, which began advertising again in March, 1980, with an estimated $2,000,000 to $3,000,000 campaign. The three-month effort included television, magazine and newspaper advertising, as well as spots on Spanish radio in New York City and Miami.

Tropicana has doubled its production capacity and plans to add items for the institutional market this year as well as new flavors to its line of noncarbonated drink products.

- The grocery division's La Choy and Rosarita ethnic food operations have also been expanding their offerings. La Choy, continuing to pursue its goal of becoming a full-line producer of Oriental foods, introduced a line on "boil in the bag" Oriental vegetables, and is developing other distribution channels to support its retail business. This includes an arrangement with an Ohio based Oriental fast-food chain for which La Choy is producing six specialty items.

Rosarita, Beatrice's largest Mexican food company, continued to expand from its southwestern base by adding distribution in five new Midwest markets. Rosarita also introduced eight new food products in late 1979, including canned whole and diced green chiles, three salsas, picanto sauce, taco shells and tostada shells.

Despite a strike at the Eckrich main distribution center last year, sales of Beatrice's specialty meats lines rose 5% to $689,000,000 last year, with earnings increasing 11% to $50,000,000. The strike kept Eckrich—which supplies two-thirds of Beatrice's specialty meats profits—from growing as much as it had hoped last year. During the last six years Eckrich has grown at an 8.5% compounded rate, far ahead of the industry's 1.5% growth rate.

Eckrich plans to resume its pattern of geographic expansion in the coming year, continuing to move out from its Illinois, Wisconsin, Ohio and Michigan base and toward growing southwest and southeast markets. Sales outside the four-state base area have tripled since 1972 and now account for 30% of Eckrich sales.

- Eckrich currently markets its products in 27 states and holds a 5% market share nationwide, up from 3.3% in 1973. In its 27-state marketing area, Eckrich has a 10% share, double its share in 1973.

The planned Eckrich expansion will be supported by four new district facilities as well as by product line expansions and new packaging and flavor variations scheduled for the coming year. Eckrich conducts ongoing surveys with 2,500 homemakers every six months to test the taste, appearance, functional packaging and graphics of its products.

Beatrice's emphasis on adult-oriented items helped its confectionery and snack operations grow 12% in sales to $522,000,000 last year and increase its earnings 11% to $66,000,000 at a time when the rest of the candy industry had enjoyed little growth. The company also benefited from the fact that its products contain little or no chocolate and were not hurt much by the soaring cocoa prices.

The Fisher nut operations in the snack division expanded its television coverage from nine to 23 markets and introduced several new products. These included unsalted peanuts aimed at the diet-conscious audience, dry-roasted tavern nuts, and a sesame and peanut mix.

The Jolly Rancher hard candies unit introduced a new natural butterscotch peanut crunch into selected markets, stepped up its media campaign, and continued to expand its penetration into supermarkets.

The Clark candy operation withdrew its unsuccessful yogurt bar but introduced nationally a new Nutcracker candy bar.

With Samsonite continuing to benefit from the air travel boom, Beatrice's travel and recreation lines managed to overcome the disastrous performance of the Airstream recreational vehicle operations by posting a 3% sales increase to $513,000,000 and a 4% earnings increase to $48,000,000.

- Samsonite introduced the Silhouette II last year, an updated version of its traditional hardside luggage that features a revamped interior, new frame and fashion-oriented colors. Samsonite also expanded its U.S. softside product line with a new high-fashion fabric called cocoa twill. Softside luggage now accounts for 36% of the company's domestic luggage business, and Samsonite introduced softside business cases last year to the Omega line of attache cases that it began in 1977.

Airstream continues to suffer as a result of rising gasoline prices and gasoline supply uncertainties and has been forced to close down two of its three production facilities.

Buxton men's and women's personal accessories also had some difficulties last year as its Bill Blass high-fashion line met with consumer price resistance. Buxton plans to deal with this setback by introducing lower-priced, fashion-oriented items under the John Weitz label to be marketed via catalog showrooms and discount channels.

In Beatrice's other lines of business:

- Housing and Home Environment operations dropped 7% to $530,000,000 with earnings sliding 48% to $22,000,000. Beatrice sold its Harmon-Kardon unit in October, 1979, and reached an agreement in principle to sell James B. Lansing Sound Inc. The company's Stiffel lamp unit, which manufactures high-quality lamps, reported volume increases for the first time in five years and is planning to introduce a number of contemporary lamps, a departure from its line of traditionally styled products.
- Food distribution and warehousing operations saw sales rise by 16% to $1.1 billion while earnings experienced an increase of 20% to $60,000,000.
- Agriproduct sales increased 18% to $461,000,000 and earnings rose 17% to $39,000,000.
- Institutional and Industrial sales grew 16% to $873,000,000 with earnings of $127,000,000, up 14%.
- Chemical and Allied Products operations had a record year, with sales rising 18% to $322,000,000 and earnings increasing 24% to $47,000,000.

Beecham Group Ltd.

	1979	1978
Sales*	**$2,300,000,000**	**$1,910,817,000**
Earnings*	**340,000,000**	**303,048,000**
Advertising	**46,704,500**	**27,656,500**

***Worldwide figures, converted to U.S. dollars.**

Beecham Group Ltd., Clifton, N.J., the 82nd largest national advertiser, spent an estimated $46,704,500 in advertising in 1979, a 69% increase from an estimated $27,656,500 in 1978.

This hefty increase reflects the support put behind Aqua-fresh toothpaste, Beecham's first new-product success in the U.S. in years. Moreover, Beecham's purchase last September of Jovan Inc., a Chicago-based fragrance marketer, added significantly to the total advertising spent.

The British-based company's estimated worldwide sales were $2,300,000,000 for the year ended March 31, 1980, a 20% increase over the $1,910,817,000 recorded the previous year. Earnings increased 12% to $340,000,000 from $303,048,000 over the same period. Although the company does not break out U.S. figures, sources said the U.S. divisions of Beecham had sales of about $290,000,000 in the year ended March, 1980.

Jovan, for which Beecham paid $85,000,000 in cash, had been showing signs of fatigue following a period of annual growth consistently above 20%. Industry observers speculated Beecham was gambling on Jovan's ability to recapture its growth momentum with a full line of toiletries and cosmetics.

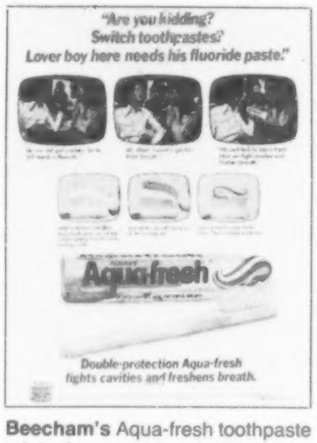
▪ Beecham reportedly was not the first suitor for Jovan. Industry sources say Jovan had been flirting with other acquisition-minded consumer products companies for three years and had talked with Beecham for a year before reaching the agreement. Under the terms of the sale, Jovan's sales and marketing staff has been kept on and J. Walter Thompson Co. has remained the company's U.S. agency. While Beecham acquired 100% of Jovan's stock, Jovan and its Yardley of London division will continue to be run as an independent, wholly owned subsidiary.

During the past year Jovan became involved in litigation based on its alleged imitative practices. Revlon Inc., which announced in September that it was testing a line of purse-size fragrances called Perfumatics 2000 in four scents including night blooming jasmine, filed a suit against Jovan for its use of the name Night Blooming Jasmine on a cologne and perfume whose introduction was announced later in the fall.

Mem Co., which markets English Leather, has filed for preliminary injunction against Yardley's use of the trade name Yardley Leather on a product introduced in January. And Life Laboratories, which makes a body lotion called Oil of Life, filed (and lost) a motion for preliminary injunction against Jovan's use of the name Oil of Life for a body lotion it is introducing nationally. Life Labs, according to its attorney, plans to continue its legal battle with Jovan.

Among the fragrance company's top sellers are Jovan Musk, which does an estimated $35,000,000 volume (or 40% of sales) and received $241,000 in measured media backing in 1979, and the Jovan Nail Care kit, which received $70,200 in measured media backing. Another 25% of the company's sales is said to come from new-product introductions, an area in which Jovan is notably strong.

Jovan's Oleg Cassini fragrances for men and women, launched last fall, received media backing to the tune of $1,000,000 before year's end, and during the first six months of 1980 has been backed with at least that amount and possibly more, industry sources say.



"Are you kidding?
Switch toothpastes?
Lover boy here needs his fluoride paste."
Aqua-fresh
Double-protection Aqua-fresh
fights cavities and freshens breath.

Beecham's Aqua-fresh toothpaste print ad supports its television campaign.

As in 1978, the big product news for Beecham last year (besides Jovan) was Aqua-fresh, which received more than $20,000,000 in ad support, mainly in network tv. The agency for the quickly growing brand is Grey Advertising, New York.

▪ Among Beecham's other consumer products, meanwhile, those reportedly showing the best performance in the U.S. included Sucrets throat lozenges (also Grey), Cling Free fabric conditioner (Cunningham & Walsh, New York), Massengill disposable douche (Grey), Calgon water conditioner (C&W), Lancaster cosmetics (Shaller Rubin Associates, New York) and Vitabath bath gelee (Grey).

Cling Free, a former Merck & Co. product, received $5,602,000 in measured media support, with $5,499,800 spent in network tv.

The family of products that received the most combined support turned out to be the Calgon brand, which also came over in the Merck acquisition. Calgon bath oil beads received $1,382,000, of which $1,379,000 went to network tv and $2,200 to spot tv.

Calgon water softener was close behind with $1,339,300, most of which went to network tv. Calgonite dishwasher detergent accounted for $715,700, with $709,700 going to network tv and $6,000 to spot tv.

Other products that came over in the Merck deal also received a sizable chunk of ad support. Sucrets throat lozenges received $1,778,800, virtually all of it going to network tv. This was considerably less than the $3,000,000-plus that backed Sucrets the previous year. Hold, a brand that includes a cough drop and a liquid cough suppressant, got just about $1,000,000 in support, nearly all of it in network tv.

Massengill disposable douche received more than $2,000,000 in measured media support, almost all of it in network tv. Brylcreem, one of Beecham's anchor products, received $1,572,600 in support, including a $43,300 cash refund promotion that ran in magazines.

Other consumer products that received support, albeit at a lower level, included Fruit-Fresh food preservative, $448,300; 2nd Debut creams and lotions, $211,200; Vitabath bath gelee, $300,800, and Lancaster creams and lotions, $125,300.

Borden Inc.

	1979	1978
Sales	**$4,312,533,000**	**$3,802,559,000**
Earnings	**134,015,000**	**135,827,000**
Advertising*	**38,958,600**	**50,000,000**

***Estimated by AA**

Borden Inc., Columbus, O., the 91st largest U.S. advertiser, reduced advertising expenditures this year from $50,000,000 in 1978 to $38,958,600 in 1979, a 22% decrease in spending.

Although sales increased by 13% to $4.3 billion in 1979, earnings dropped slightly—1%—to $134,015,000.

In the previous year, sales had increased by 9.2% over 1977 and earnings similarly had increased 7% over 1977's high of $126,870,000.

Total expenditures in measured media were $26,258,600, a $10,000,000 reduction compared with 1978. Although no single product received more than $2,500,000 in advertising support, major expenditures included $2,430,400 for Lite-Line cheese (mainly in network tv), $2,348,100 for Borden's milk (mainly in spot tv), $2,070,200 for Wonder Bond glue (exclusively in network tv).

Over $1,000,000 was spent on advertising Skim American cheese ($1,784,200), Krylon spray paints ($1,744,400), Borden's ice cream ($1,402,200), Wyler's lemonade crystals ($1,364,700), Eagle Brand condensed milk ($1,359,500), Cracker Jack ($1,344,400) and Kava instant coffee ($1,331,200).

Percentage of total sales from the four divisions was exactly the same as the year before: 28% from both the foods and dairy services divisions; 24% from the chemical division; and 20% from the international division. Each of the four divisions is around the $1 billion mark in annual sales.

▪ According to a statement by chairman Eugene J. Sullivan, Borden will position itself "more firmly" as a consumer goods and specialty chemicals company in the '80s. He anticipates changes in product mix and possible changes in geographic areas of operation as well as more aggressive new product development and marketing.

At $1.2 billion, dollar sales for Borden Foods were up 13.2% in 1979. Grocery and cheese product groups, which jointly account for about half the divisions total dollar volume, were converted from direct to all broker sales forces last year.

Creamettes pasta line, in its first year under Borden, gained in sales and income as the company executed market extensions and intensified penetration into existing markets.

Last year, Borden spent $113,600 supporting Creamettes macaroni products in measured media ($84,700 in spot tv and $28,900 in magazines). An additional $107,500 was spent in magazines on Creamettes macaroni and Veg-All canned vegetables tie-in.

Eagle Brand sweetened condensed milk, the company's original product, had another record year. Major consumer promotions focused on use in candies and desserts.

▪ Wyler drink mixes stabilized after years of deteriorating market position and Wyler bouillon made gains in volume and profits, retaining its position as the nation's No. 1 brand bouillon.

In August, 1979, Borden reentered controlled store tests in Fort Wayne and Chattanooga, with a reformulated, repackaged ReaLemon lemonade powder drink mix. Tv spots touted a "100% natural flavor, no artificial colors, no preservatives." The product met with more success than it had two years ago in upstate New York and, earlier this year, the company expanded distribution into two-thirds of the country, including the East and West Coasts. The expansion was backed by tv and print ads.

Bama jams, jellies and preserves experienced further market shrinkage due to intense competition and decline in breakfast at home, according to the company. Bama jellies and preserves was given $24,200 worth of support in magazines and $84,600 was spent on tv commercials for Bama pies.

Snow's seafood canning operations improved volume dollar sales and profits over the previous year and cut overhead costs by reducing the size of its clam boat fleet. Spot tv ads costing $340,900 were aired for Snow's canned chowder.

▪ Although the cheese products group reported record sales, profits fell sharply due to erratic pricing and oversupply that triggered price decline, according to the company. An improved share of the national cheese market is credited to Lite-Line and Skim American diet/health cheese products.

Borden's snack group (Wise potato and corn chips) had record dollar sales volume and profits, with increased market penetration and market expansion. The group acquired Buckeye Potato Chip Co., Columbus, O., in February, 1979, and Guy's Foods Inc., Liberty, Mo., in August, 1979, using these distribution networks for rollout of Bravos Tortilla Chips. This year it bought Dallas-based Morton snack foods.

Advertised exclusively on spot tv, Wise Lights potato chips and Wise snacks in general were supported with $192,500 and $2,500, respectively. Wise potato chips were supported with spot tv ($752,600) and outdoor ($43,000). Over $991,000 was spent on Bravos tortilla chips in spot tv.

▪ The bakery group, which is known to consumers under the Drake brand name, increased sales and profits, although some items were downsized and the count in multi-unit packs was reduced, reportedly due to rising costs of ingredients, labor and distribution. Using spot tv exclusively, Borden spent $3,300 and $226,600, respectively on Drake bread and Drake cakes.

At the conclusion of last year's third quarter, the company blamed lower operating income from the confectionary and bakery operations in conjunction with new product ad and promo expenses for a slight decline in operating income for the foods division.

Earlier this year, the company announced a $6,000,000 multimedia campaign for Cracker Jack, including $500,000 worth of "super" prizes in 57,000 boxes of the snack food. Prizes reportedly will range from a Mazda station wagon filled with Mattel toys and games to tricycles and other toys. Advertising plans included newspaper supplements and tv spots highlighting the super prize promo or the company's "America's great fun family snack" theme (AA, Jan. 28). The company currently is running commercials featuring kids who are "Cracker Jack" at roller skating, water skiing, etc.

Expanded use of Elsie the Cow and designation of Borden's milk as the "official milk of the 1980 Winter Olympic Games" are parts of the marketing effort by the dairy & services division. For its Olympic t-shirt offer, Borden contributed $1 of the $3.50 purchase price to the Olympic team.

In conjunction with expanded use of Elsie, the company plans a reversal of its longstanding policy of limited ad spending for the dairy division. According to Thomas Hagerty, the dairy division's vp-marketing, the Olympics promo with Elsie is a "springboard" for a much larger corporate campaign for this year, using Elsie as the central character.

▪ In the seventh consecutive year of growth, the dairy & services division increased sales 12.4% over the previous year. Higher sales reportedly reflected substantially higher selling prices on slightly greater volume. Cultured products showed the best market share improvement for the division as Borden Kitchens developed a series of 16-page New Idea books on cottage cheese, yogurt and sour cream. About 20,000,000 books were distributed.

The division also completed rollout of Borden All Natural ice cream and introduced, in selected markets, Borden All Natural ice milk.

▪ Like the dairy & services division, Borden's chemical division recorded generally higher prices on slightly higher volume. For the first time, sales topped the $1 billion mark, up 10.4% over 1978.

Borden International also had a record year in sales, 18.8% above 1978 ($890,000,000). Sales volumes rose in Latin America. European operations were at an all-time high. Sales and profits were at record levels in Canada. And, in Asia, Borden entered a new market with the formation of Korea Borden Inc., a joint venture to provide feed supplements for milk calves, pigs, etc.

Milton Bradley

	1979	1978
Sales	$360,059,605	$259,961,810
Earnings	29,918,254	20,258,447
Advertising	31,328,000	22,538,000

Milton Bradley, Springfield, Mass., the 98th largest national advertiser, increased its domestic advertising 39% in 1979, to $31,328,000.

Sales for the year also increased 39%, as strong electronic game sales combined with "substantial" nonelectronic toy gains and strong European subsidiary sales. Earnings increased 48% over 1978.

Every domestic division and subsidiary contributed to the sales and earnings increases for the year, except South Bend Toy Co. which has experienced losses for the past two years. Toys accounted for 95.5% of net sales in 1979. Corporate sales of electronic games and toys for 1979 were $117,131,000, or 33% of total sales, compared with 19% for 1978. The company markets products under the trade names "Milton Bradley," "MB," "MB Electronics," "Playskool," "South Bend," "E.S. Lowe" and "New England School Supply."

Of the $31,328,000 spent on advertising in 1979, $22,069,000, or 70%, was placed in television, primarily spot tv. In 1978, 73% of Milton Bradley's total ad expenditures went to tv.

▪ MB Communications Inc., a subsidiary, has for the last five years supplied all national, regional and local advertising for all domestic divisions and Milton Bradley subsidiaries.

In 1977, the company introduced two games, Comp IV and Electronic Battleship, which contain electronic components (microprocessors) and are battery powered. With the introduction in 1978 of Simon, a memory-testing game, and Starbird, a toy spaceship, electronic games and toys became a "significant part" of the toy product segment. Introductions in 1979 include Big Trak, a toy vehicle with a programable course; Microvision, a hand-held device with a liquid crystal display screen on which programed games may be played, and Intruder and Avenger, variations of the Starbird spaceship.

M-B's fastest growing segment, the electronic games division, spent just under $4,000,000 on spot tv buys in 1979, according to Leading National Advertisers.

Milton Bradley was among the electronic marketers hit by silicone chip shortages in 1979, causing delays in marketing some items, sales losses and price increases. As a result, the company has decided to assemble electronic modules and study the feasibility of producing its own circuit boards and printed keyboards.

The company believes 1980 sales of nonvideo electronic games and toys will increase 25% to 40% over 1979, and that by the mid-1980s, electronic games and toys, both video and nonvideo, which also appeal to adults, could represent 50% of the total toy industry sales in the U.S.

For 1980, the electronics unit plans heavy tv support for the Super Simon and Pocket Simon extensions of its Simon best-seller, plus strong backing for Milton, Plus, its Microvision handheld game (with eight cartridges, two of them new in 1980) and the Omni Entertainment System programed with 12 cartridges. Coleco Industries puts its electronic volume ahead of Milton Bradley, but behind Mattel Toys.

▪ In nonelectronic toys, Milton Bradley spent more than $13,000,000 in network and spot tv advertising to promote its diversified line of more than 170 games and puzzles for adults and children, including Battleship, Stratego, The Game of Life, Chutes & Ladders, Candyland, Hangman and Twister.

E.S. Lowe games received just under $2,000,000 in spot tv backing in 1979, according to LNA. Focusing on family games, the division manufactures backgammon, cribbage and chess sets. This year, it will ad Jackpot Yahtzee to the highly successful Yahtzee, Triple Yahtzee and Challenge Yahtzee games.

▪ The Plyskool subsidiary in Chicago manufactures and sells toys designed for infants, toddlers and children at preschool and primary grade levels. Its brand-name products include Lincoln Logs and Bristle Block. In 1978, Playskool introduced its first electronic toy, Alphie. In 1979, Playskool brought out Star Rider, the space age sit-on toy, and Major Morgan, a hand-held electronic musical instrument for children ages 6-to-9. According to LNA, the division spent over $7,000,000 in advertising via consumer magazines (*Family Circle, Good Housekeeping, American Home, McCall's* and *McCall's Working Mother*) and network/spot tv (with CBS' "Captain Kangaroo" its main vehicle). Most heavily advertised for 1980 will be Bristle Blocks, Fetch-It Freddie and Gilligan's Island Bath Toy.

▪ Through its South Bend Manufacturing Co. subsidiary, South Bend, Ind., the company markets toys such as Li'L Lady Buggy stroller, Li'L Lady Bug Dolly chair and various doll carriages. As a result of past losses, the division will retrench to a more limited line of crafts and doll accessories, and maintain its doll carriage and stroller lines.

During the year, some major executive appointments were made. John W. O'Donnell was elected to the post of exec vp of the company, succeeding Vincent G. Martin who retired in May. Charles J. Weinscheier, formerly president of Tonka Toys, was named president of Preskool and Richard Thompson, previously regional director-Europe for Warner-Lambert, was named exec vp-general manager of Milton Bradley International.

Bristol-Myers Co.

	1979	1978
Sales	$2,752,777,000	$2,450,429,000
Earnings	231,545,000	203,048,000
Advertising*	210,600,000	192,850,000

* U.S. only, AA estimate

Bristol-Myers Co., New York, the 12th largest national advertiser, is estimated to have spent $210,600,000 for domestic advertising in 1979, an increase of 9% over the 1978 figure.

The company reported worldwide advertising and product promotion expenses of $457,623,000 for 1979, up slightly from $423,270,000 in 1978.

For the first half of 1980, B-M reported $1.528 billion in sales, 16% ahead of the previous year, and net income of $122,670,000, or 19% better than the '79 first half. Earnings growth was led by the international division, despite the unfavorable effects of foreign exchange losses. All domestic segments were well ahead of the first quarter of 1978.

Bristol-Myers' eye-stopper print ad for its top-selling roll-on antiperspirant, Ban.

These results followed record sales set in 1979, when worldwide revenues rose 12% to $2,752,000,000 while net earnings were up 14% to $231,545,000, the same percentage increase as the previous year.

▪ Volume increased in all areas—nonprescription health care, domestic consumer businesses and the international division. Higher yields on investments and the gains realized on the sale of the company's Camargo Foods subsidiary helped raise net income.

Bristol-Myers comprises four main business segments—pharmaceutical and medical products, toiletries and beauty aids, nonprescription health products and household products.

▪ Pharmaceutical and medical products remained the largest segment, as sales increased by 15% in 1979 to $945,954,000, while profits increased by 12% to $176,558,000.

Prescription medicines, mainly antibiotics, make up approximately 60% of the segment's sales. Other products include cardiovascular and anticancer drugs, orthopedic implants, surgical instruments and other pharmaceutical, medical and dental items.

The continued growth of the international antibiotic market, the company's strong performances in the domestic anticancer drug market and excellent gains in the worldwide markets for medical and dental products all contributed to the growth of the segment in 1979.

▪ In 1980, Bristol Laboratories, the company's main center for cancer research, plans to file new drug applications for two anticancer drugs, etoposide and teniposide. The Mead Johnson pharmaceutical division also plans to introduce two other anticancer drugs this year called Cyfos (ifosfamide) and tegafin.

Klotrix, a controlled-release potassium chloride tablet in the potassium supplement market, has received FDA approval and is now in the market. The company's already popular K-Lyte potassium supplement line registered strong sales increases in 1979.

Mead Johnson also introduced Tri-Vi-Flor with iron in late 1979 for use as a supplementary fluoride, vitamin D and iron nutrient for breast-fed babies. In addition, Mead Johnson came out last year with Enfamil Premature Formula with whey protein which consolidates all the nutritional needs of low birthweight infants.

▪ In 1979, Zimmer-U.S.A., one of three B-M health care divisions, achieved substantial gains. During the year, the Food & Drug Administration cleared the division's electrical Zimmer Direct Bone Growth Stimulator, designed to promote regrowth of broken bones by stimulating the bones with direct electrical current.

Through its Aspen labs subsidiary, Zimmer acquired Xomed, a leading manufacturer of middle ear implants, middle ear ventilation tubes and disposable drapes and drills, thereby placing the company into the expanding electrosurgery field.

Unitek, which joined B-M in 1978, set new sales records in 1979. During the year, this leading manufacturer of orthodontic and dental materials acquired Professional Positioners, a manufacturer of orthodontic positioners and retainers. In the dental equipment field, B-M's Pelton & Crane achieved good sales in dental chairs and lights.

▪ Toiletries and beauty aid sales increased 11% in 1979 to $857,852,000 compared with a 3% rise in 1978. Profits rose 6% to $127,342,000.

The Clairol division remained atop the hair color products category with more than half the market share. However, the division has continued to see pressure from competitive brands such as L'Oreal.

Hair product sales were up in 1979 because of substantial sales increases of Condition shampoo and Condition II after shampoo treatment. In mid-1979, Clairol also acquired Sea Breeze Labs, a manufacturer of skin care products.

Clairol beauty products and appliances were backed with nearly $50,000,000 in measured ad support, primarily in network tv. Clairol Condition* shampoo had the largest budget, $6,500,000, of which $5,800,000 went to network tv, with the remainder going to spot tv.

▪ Other products receiving substantial measured ad support included Clairesse hair color with $6,400,000; Nice & Easy hair color, $6,250,000; Loving Care hair color lotion, $4,900,000; Miss Clairol Color shampoo, $4,100,000; Herbal Essence shampoo; $2,900,000, Condition Beauty Pack treatment, $1,900,000; Frost & Tip hair kit, $1,066,600; Condition* shampoo and Condition* II conditioner,

$1,000,000, and Crazy Curl hair styler, $925,000.

■ Once again, the Clairol appliances division set new sales records, led by its Hairsetter, which was supported with $560,000 in media support. The Foot Fixer massager also continued to expand in sales with measured media support of $1,000,000. The Hand Held dryer was backed with $1,900,000 while Skinvention and Tender Tweez Tweezer were backed with $650,000 and $500,000, respectively.

In the Bristol-Myers products division, Ban, Ultra Ban and Tickle held about 20% of the $594,000,000 deodorant/antiperspirant market, with Ban accounting for a market share of more than 14.5%.

Last year, the company introduced Ban soap in test markets as it aimed for a piece of the deodorant soap market dominated by Procter & Gamble's Ivory, Safeguard, Camay and Zest, and Armour-Dial's Dial. Toilet soaps over-all are a $650,000,000 business at retail. Ban is now out of test market, but the company said plans to introduce it nationally have not been completed.

Ban deodorants and antiperspirants received total ad support of $13,000,000 compared with $8,700,000 in 1978. Ban roll-on deodorant received the biggest chunk with $7,300,000, of which $6,600,000 went to network tv.

Tickle roll-on antiperspirant received $5,640,000 in measured ad support, primarily in network tv, while the Ultra Ban line received only $45,000, a huge drop from the $2,000,000 recorded in 1978.

Other B-M toiletries and beauty aids receiving major ad support were Body-On-Tap Beer Enriched shampoo, with $9,150,000 mostly in network tv, and Vitalis Super Hold, with $2,000,000.

■ The nonprescription health care segment posted a 13% increase in sales over 1978 with an estimated $646,264,000, while profits increased 17%, the highest improvement of all the segments, to $124,106,000. Leading gains were reported in worldwide nutritional product sales, and Westwood Pharmaceuticals improved profit returns after a substantial earnings decline in 1978.

B-M's Bufferin, with about 10% of the $744,000,000 analgesic market, received ad support totaling $14,700,000, of which $11,000,000 went to network tv.

The Excedrin line received $16,900,000. While Excedrin PM got $3,900,000, Excedrin X Aspirin Free got $39,300 and Excedrin, $12,000,000. Most of the advertising was on network tv.

Comtrex, B-M's new cold remedy, carved out a 10% share of the market by the end of 1979. The cough and cold liquid and tablet remedy received more than $7,800,000 in ad support.

Other nonprescription items that received substantial media support were Congespirin children's cold liquid and tablets, with $1,343,000, and 4-Way Long Acting nasal spray, with $2,800,000.

The household products segment reported a 7% sales increase to $303,813,000, while profits were down 5% to $36,051,000. In 1979, B-M's Drackett products maintained leading market shares with Vanish bowl cleaner, Drano drain opener and O-Cedar handle goods.

Ad expenditures for the Vanish line were $7,000,000, of which $3,000,000 went to Vanish toilet bowl freshner, $2,000,000 to Vanish crystal bowl cleaner and $1,900,000 to Vanish automatic bowl cleaner.

Windex' budget was $4,854,000, of which $3,500,000 went to network tv. The O-Cedar line of brooms and mops received $1,500,000, while Drano liquid and powder drain products received $4,029,000. Endust spray was backed with $1,911,000, and Behold spray furniture polish received $2,331,000.

Source: Media Records.

Other household products receiving substantial media support in 1979 were Handle With Care liquid wash with ad support of $3,522,000, Miracle White Super cleaner with $2,123,000 and Mr. Muscle spray oven cleaner with $1,240,000.

For Bristol Labs, strong increases were reported for its two major hospital antibiotics, Amikin and Cefadyl. A major development was the successful introduction of Platinol, a chemotherapeutic agent for the treatment of certain types of cancer.

Brown-Forman Distillers Co.

	1979	1978
Sales	**$675,823,000***	**$559,764,000**
Earnings	**50,388,000***	**40,095,000**
Advertising**	**50,000,000**	**35,000,000**

***Fiscal year ended April 30, 1980**
****AA estimate**

Brown-Forman Distillers Corp., Louisville, the 79th largest national advertiser, increased its advertising to an estimated $50,000,000 in 1979, a company record 43% higher than the estimated $35,000,000 spent in 1978 and 82% higher than the $27,500,000 spent in 1977. The company has indicated that it plans to continue increasing its ad expenditures, with 1980 spending expected to be around $60,000,000 and the three-year total for fiscal 1981-82-83 to reach $210,000,000.

■ Brown-Forman's sales for the fiscal year were up 21% over the previous year to $675,823,000, while earnings rose 26% to $50,388,000 in the fiscal year.

Of the $50,000,000 spent on advertising in 1979, $29,300,000 was spent in measured media, up from $21,600,000 in 1978. Of this, $13,000,000 went to magazines, up from $8,300,000; $5,600,000 went to network television, up from $4,900,000; $4,800,000 was spent on outdoor advertising, up from $3,500,000, and $3,300,000 went to newspapers, up from $2,000,000.

Only spot television spending declined, with 1979 spending totaling $2,500,000, down from $2,800,000 in 1978.

According to Leading National Advertisers, Brown-Forman's most heavily advertised products were Canadian Mist Canadian whisky, $5,600,000, up from $3,900,000; Cella Italian wines, $5,100,000, down from $5,300,000; Bolla Italian wines, $3,100,000, up from $2,400,000; Jack Daniel's whisky, $2,900,000, up from $2,300,000, and Early Times bourbon, $2,500,000, up from $1,900,000.

■ The advertising support helped most of the Brown-Forman products enjoy unit sales increases in 1979. According to *Time* magazine marketing reports figures, for example, Jack Daniel's was the second best-selling American straight whisky and increased case sales to 2,225,000 cases in 1979 (up from 1,900,000 in 1978) while the straight bourbon category suffered an overall unit sales decline; Canadian Mist became the best-selling U.S.-bottled Canadian whisky by moving 2,450,000 cases (up from 2,300,000) while the rest of the category suffered a slight decline in sales; and Southern Comfort's sales of 1,250,000 cases pushed it past Hiram Walker to become the top-selling brand among U.S. cordials and liqueurs.

Among the company's wine products, Brown-Forman figures showed that its Cella Italian wines were the company's fastest growing label, with case sales reaching 2,077,000 during the fiscal year ending April 30, 1980, up 29% from the year before. Unit volume of the company's Bolla premium wines also rose during the last fiscal year, with case sales reaching 1,420,000, up 13%.

NEWSPAPER DATA

National newspaper advertising investments were supplied by Media Records. Reproduction of this data without written permission is prohibited.

Newspaper brand data for the top 100 newspaper advertisers and for companies with newspaper investments of $10,000 or more are available from Media Records, 370 Seventh Ave., New York 10001 (212) 736-7490.

Not all Brown-Forman labels grew last year, and *Time* marketing figures showed that the company's Early Times and Old Forester bourbons both suffered unit sales declines. Early Times volume dropped to 1,775,000 cases from 1,825,000 and Old Forester fell to 655,000 cases from 695,000.

■ The company, marking its 110th year in 1980, is the nation's leading independent, family-managed distiller (the Brown family owns the majority of the company's stock, and the company's only product is alcoholic beverages).

The company's basic marketing strategy has been to position its brands as premium, high-prestige items selling at high prices and to use heavy advertising support to establish and maintain that identity.

Each of Brown-Forman's three

product categories—American spirits, imported spirits and wines and specialties—enjoyed sales growth during the year. The inclusion of Southern Comfort (acquired in early 1979 for $94,600,000) helped the wines and specialties group post a 53% sales gain, while American spirits grew 14% and imported spirits grew 7%. Of the record annual sales of $676,000,000 during the last fiscal year, American spirits made up 48%, imported spirits made up 20% and wines and specialties made up 32%, as compared with 50%, 22% and 28%, respectively, the year before. This was the first time that American spirits made up less than 50% of the sales.

According to industry observers, the importance of American spirits to Brown-Forman will continue to decline while the wines and specialty items are expected to grow in importance.

▪ Southern Comfort is considered one of Brown-Forman's prime growth prospects, and, following its acquisition, the company undertook a substantial marketing study and evaluation as a first step toward planning a new marketing strategy for the brand. In anticipation of an expanded advertising effort, Southern Comfort switched to McCann-Erickson, New York, late in 1979, and company officials confirmed that a new Southern Comfort ad campaign would break this fall and that the brand will be receiving more advertising support than ever before. During 1979, Southern Comfort was supported by an estimated $5,000,000 ad budget, including $2,000,000 in measured media.

In another growth area, Brown-Forman's wine operations have rolled out with several recent product introductions. After several years in test market, national distribution of Bolla Trebbiano, a dry white wine companion to Soave Bolla, was begun on May 1, 1980. Trebbiano will receive a sizable share of the Bolla advertising support during the coming year and will be a part of the holiday gift selection case.

Brown also rolled national with Cella Rosato, a rose-type addition to the Cella line, in February, 1980.

▪ The company has also singled out the Martell and Old Bushmills labels for greatly expanded ad support in the coming year. Industry observers are particularly bullish on the possibilities for Martell, an imported cognac. High-priced imported cognac has been a strong growth category and, with sales of 100,000 cases in 1979 (up from 90,000 in 1978), Martell was the fourth-largest brand in the category in 1979.

CBS Inc.

	1979	1978
Sales	$3,729,701,000	$3,290,052,000
Earnings	200,707,000	198,079,000
Advertising	146,118,000	122,322,000

CBS Inc., New York, the country's 29th largest advertiser, boosted domestic ad expenditures 19% to $146,118,000 in 1979. This was the second year of sharp increases; the previous year the spending level rose 27%.

Increases, as itemized by CBS, came in direct mail, which this company uses lavishly to sell records, point of purchase, magazines and business papers, among other media. Newspapers lost ground with this spender.

The rate of total revenues' growth slowed from 16% to 13% for a total of $3.73 billion. Earnings eased, up 1% to $200,700,000. Foreign returns kept this communications giant from taking an earnings dip. Foreign sales climbed 32% to $647,500,000; profits on those sales moved ahead 11% to $79,000,000. By contrast, domestic earnings slid [illegible]% despite a revenue hike of 10%.

▪ A strong second quarter for the CBS/Broadcast Group was not enough to keep this company's income from dipping considerably during the first half of 1980. Net income dropped 19% to $67,500,000 on a 12% revenue gain which brought that total to $1.94 billion. Earnings plummeted 20% for the period.

For the second quarter, only broadcast showed an improvement in profits. The decline in the other groups was attributed to the impact of the recession and to the lack of second-quarter income from the sale of syndication right to Cinema Center movies. Other minus factors: startup expenses for CBS Video Enterprises and CBS Cable.

The year 1979 was a dramatic one for CBS as it began the start of a successful prime time rating comeback for one of its most heavily advertised services, the CBS-TV network. The CBS/Broadcast Group, paced by the tv network, contributed more than half of the domestic revenues—or $1.525 billion. Despite the tremendous outlays for program expenses that were required to push ABC-TV Network out of first place by an eyelash, this group was able to boost its earnings by nearly $28,000,000.

▪ The CBS-TV Network continued to rely mainly on print to get its message across to viewers. By CBS' count, newspapers and magazines together were budgeted at about $66,000,000 and a large share of that money went for tune-in ads in the increasingly tight competition for audiences in all dayparts.

The CBS Radio Network and stations divisons were believed to be spending a bit more to reach advertisers and listeners. Specific figures are not available, but the annual report claimed record revenues for radio in 1979. By year-end, its lineup had grown to 320 stations.

Attention for the future focuses on who will be taking over this important piece of turf soon. CBS division president Sam Cook Digges reaches the 65-and-out exit early next year. His successor is expected to come from within Black Rock.

After broadcasting, comes the CBS/Record Group. As was the case for much of the audio recording industry, 1979 was not a happy year for this operation. Profits were cut almost in two, even though revenues rose considerably to reach $1.044 billion. CBS blamed this division's troubles on the economy, rising raw materials costs, home taping of records and delayed releases for some its major stars. The company claimed an increase in market share, but advertising for this group was down.

The standout figure in the sketchy measured media lists for CBS products and services is for the Columbia Record & Tape Club, which operates under the CBS/Columbia Group. The mail order distributor was budgeted at nearly $22,500,000 in print and tv and doubtless added millions more in unmeasured media.

Columbia House also sold recorded music, books and other products directly to consumers, mainly through newspapers. The club, self-described as the world's largest mail order record distributor, registered a higher market share, but profits were off for Columbia House.

▪ Over-all within the group profits were up slightly to $35,300,000. Revenues rose substantially, going from $598,900,000 to $717,500,000. Part of the gain came from such musical instruments as Steinway pianos and Fender guitars which held their own in the marketing world with very little traceable advertising spending.

The toy division, operating as Gabriel Industries, posted gains during 1979. CBS bought Gabriel in August, 1978, and has since used it as the marketing entity for Creative Playthings as well. The favored vehicle for Gabriel toys and games was tv, network and spot. Estimated budget: $3,000,000-plus. Creative Playthings used tv too, but had considerably less money to spend.

CBS/Publishing Group managed to boost its profits 7% to $41,200,000 on a 3% revenue gain which brought it to the $455,600,000 mark. Both the educational/professional and consumer divisions contributed. The list of publications was growing. In November, 1979, *Audio* was acquired. Early in 1980, *Family Weekly*, the newspaper supplement, became a CBS property.

This group does not loom large on the measured media products list though *Woman's Day* and *World Tennis*, among other properties, were down for modest amounts.

▪ Last year brought a chain of executive shifts in the publishing group, as John Purcell moved from its presidency to exec vp CBS Inc. John Suhler succeeded him in the publishing group. Robert Krefting advanced to the presidency of the CBS consumer publishing division.

But the really big management news was made by CBS Inc. in the spring of 1980 when chairman-founder William Paley surprised everyone by firing John Backe as president of CBS Inc. In short order Tom Wyman left the Pillsbury Co. to move to Black Rock into that very hot seat marked Bill Paley's successor.

▪ There were reports that Mr. Backe lost out because he was moving a conventional broadcasting company into the newer forms of video with unseeming haste. That appears not to have been true.

Shortly after Mr. Backe left, Mr. Paley authorized the launching of CBS Cable to supply satellite fed programing to catv starting in mid-1981 on Westar III. CBS Enterprises is in business to offer videocassette and disc softwear and CBS is experimenting with teletext as a "new product" possibility for the CBS-TV Network.

ELEVEN NATURALS FOR GOOD EATING.
MAZOLA 100% PURE CORN OIL.

CPC International's Mazola corn oil ad provides nutritional information on several salad ingredients such as lettuce, carrots and onions.

CPC International Inc.

	1979	1978
Sales	$3,698,700,000	$3,221,800,000
Earnings*	178,600,000	147,300,000
Advertising†	72,000,000	65,901,700

*Worldwide
†U.S. only

CPC International, Englewood Cliffs, N.J., the 61st largest national advertiser, increased its U.S. ad spending 9% to $72,000,000 in 1979 from $65,901,700 in 1978. Sales of its CPC North America division, including the U.S., Canada and the Caribbean, were $1.37 billion, up 9% from $1.26 billion in 1978.

International ad and promotion expenditures were $205,700,000, up 15% from $179,000,000 in 1978. Corresponding sales increased 14.8% to $3.7 billion.

The company is one of the 20 largest food companies in the world and is the largest corn wet miller. Approximately 85% of CPC's business is concentrated in the U.S., Canada and Western Europe. Branded grocery products account for 58% of the company's international sales; corn wet milling, which separates corn into its component parts for food and industry uses, contributes 37%, and other businesses, which include specialty chemicals, packaging and restaurants, generate 5%.

CPC conducts its branded grocery products and corn wet milling businesses through four regional divisions—CPC North America, CPC Europe, CPC Latin America and CPC Asia.

■ CPC North America, in turn, is organized into four units. Best Foods controls the main line of the company's branded grocery package goods in the U.S.; Corn Products manages corn wet milling operations in the U.S.; the Consumer Diversified Unit oversees S. B. Thomas and Dutch Pantry brands and Caribbean, export and special products operations, and the Industrial Diversified Unit is responsible for Acme Resin Corp., Americhol Corp., Penick Corp. and Peterson/Puritan Inc.

The company's domestic branded grocery products include such well known products as Hellman's and Best Foods mayonnaise; Mazola corn oil; Knorr dehydrated soups, bouillons, sauces, gravies and base mixes; Skippy peanut butter; Mazola and Nucoa margarines; Thomas' English muffins and specialty baked goods; Karo and Golden Griddle syrups; Mrs. Fanning's bread and butter pickles; Niagara and Argo laundry starches; NuSoft fabric softener, and Rit tints and dyes.

Although CPC increased advertising expenditures 9%, its promotional spending as a percentage of sales (5.5%) was less than the industry as a whole.

■ The company traditionally has adopted a marketing strategy of developing variations of existing brands and expanding old brands into new markets, rather than investing heavily in new products. CPC uses Best Foods to generate part of the cash flow needed for other parts of CPC's operations. By not looking for rapid growth and by keeping expenses to a minimum, it has been successful in accomplishing these objectives.

In keeping with these policies, some of the corporate moves in 1979 were

- Completion of national distribution of Hellmann's Big H hamburger sauce;
- Introduction of Skippy Old Fashioned peanut butter to eastern test markets;
- Midwest introduction of Thomas' English muffins, and a Boston test market introduction of Thomas' wheat English muffins.
- Reformulation and repackaging of S. B. Thomas' Toast-r-Cakes.

■ Among Best Foods established brands, Mazola corn oil received the heaviest backing, $7,889,900, down from $8,135,300 in 1978. With mainly private label competition in corn oil itself, Mazola has pinned down and held its 16% share of the vegetable oil market, despite attempts by Procter & Gamble and Wesson to move in with low-cholesterol Puritan and Sunlite, respectively.

Mazola margarine, backed by $5,276,900 in measured media, continued to increase its market share. Ads featuring an American Indian spokeswoman who extols "the goodness of maize" were continued for the second straight year.

■ Hellmann's mayonnaise, Best Foods' biggest moneymaker and the No. 1 entry in the mayonnaise market with a 40% share, received $4,771,800 in ad spending. Other heavily-backed products included Skippy peanut butter with $7,379,300, an increase from last year's $5,030,700; Thomas' English muffins, $7,597,400, and Golden Griddle pancake syrup, $3,315,600. Spending for Big H hamburger sauce dropped to less than $500,000 from last year's figure of $2,785,600.

■ Corn Products, producer of starches, corn sweeteners, corn oil and animal feed ingredients for some 70 different industries, announced the construction of a Stockton, Cal., corn wet milling plant, the largest such facility in the western U.S. Corn Products also announced a joint study with Texaco regarding the feasibility of producing ethanol for use in gasohol. The unit's advertising and sales promotion expenditures in 1979 totaled approximately $500,000.

Campbell Soup Co.

	1979	1978
Sales	$2,248,692,000	$1,983,659,000
Earnings	132,744,000	121,410,000
Advertising*	60,524,400	56,400,000

* Estimated by AA

Campbell Soup Co., Camden, N.J. the 69th largest national advertiser, increased its domestic advertising expenditures by an estimated 7% to $60,524,400 in fiscal 1979. Consolidated marketing expenditures worldwide totaled $181,000,000, up 11% from $163,000,000 in 1978. For the fourth consecutive year, marketing expenditures represented 8% of the net sales.

Campbell's consolidated net sales increased 13% to $2,248,692,000 from $1,983,659,000 the previous fiscal year. Earnings also rose to $132,744,000 in 1979 from $121,410,000 the year before.

The canned food division accounted for more than $1.2 billion in sales in fiscal 1979. Campbell's fifty-seven varieties of red-and-white label soups control more than 80% of the world's wet-soup market, and the soups, most closely associated with the Campbell's name, account for more than 40% of the company's worldwide sales, making them the most heavily promoted product. Advertising for the line, down from 1978, totaled $11,613,800, with almost half of that going to network tv. (This does not include newspaper advertising.)

■ Late 1979 saw the introduction of the "Broth Plus" line as Campbell began promoting its chicken broth and rice, beef broth and barley and chicken broth and vegetable flavors. The campaign was launched nationally with store coupons worth 10c, newspaper and magazine ads and network radio spots.

Campbell has also continued to emphasize its 16 varieties of "Light Ones" soups, with 90 calories per 10-oz. serving, and the company has retained actress Lee Merriwether as its spokesperson.

Also added to the already existing line of single-serving Chunky soups were split pea and ham and steak and potato varieties. A 19-oz. Mediterranean vegetable and a three-bean vegetable were also being test-marketed in Cincinnati and Syracuse. Advertising expenditures for Chunky canned soups totaled $5,004,200 up from $4,622,000 in 1978.

The Food Service Products division has also added a new line of seven classic soups—Campbell's Kettle soups, especially formulated for the food service industry.

■ The Swanson division, which accounts for more than $300,000,000 in sales of frozen foods has concentrated advertising on new products that can be heated both in microwave and conventional ovens, and has begun to convert the packaging of existing products.

A line of frozen entrees and breakfasts with this dual-use packaging was launched nationally. In December, 1979, Campbell reportedly was planning to invest $10,000,000 in multimedia advertising.

Also introduced nationally were two new Swanson canned poultry products. Chunk Thigh chicken, and Chunk Style Mixin' chicken. Recipe ideas and recipe card design ads backed the line. Advertising expenditures for canned chicken in 1979 were $887,500.

Swanson's heaviest promotion was for its frozen fried chicken, which the company, in conjunction with the rest of the industry, pitted against fast-food take-out chicken. Advertising expenditures in the frozen fried chicken category alone totaled $2,127,000,

MARKETING PROFILES

almost one third of Swanson's total advertising expenditures. The campaign, which stressed taste and convenience, included a heavy four-week flight of introductory network and radio spots with newspaper clip-coupons. Swanson's discontinued its Three Compartment Frozen Meatball dinner, and its Hungry Man Beef Tamale entrees.

■ The Pepperidge Farm division generated about $300,000,000 in sales this year and spent $4,500,000 on advertising, including premium offers and excluding newspaper ads.

Moving into wider distribution this year are two "Cake Supreme" varieties that will be added to the 16-oz. frozen cakes line, which led Pepperidge Farm's advertising in fiscal 1979 with $2,438,400. Four Distinctive Cookies variations and Goldfish Thins crackers will also enjoy market distribution.

In the experimental stage is a 40 to 70 unit sweet goods line distributed boxed and fresh to supermarkets in Cleveland, Pittsburgh, Columbus and Atlanta, which, according to the company will probably be competitive with Entenmann's, itself in the process of moving into these test markets.

Frozen puff pastry sheets and pie shells have recently gone national and the company has plans to add Danish dough sheets later on. Advertising expenditures for frozen pastry, including a premium offer, reached $171,300 this year.

Discontinued was Pepperidge Farm's White with Cracked Wheat bread, Half Cakes, and Sesame Garlic Goldfish crackers, and Brown Sugar cookies. New products include Pepperidge Farm Rich 'n Moist cakes introduced nationally along with Pepperidge Farm Deli, individual frozen light meals, which will begin with regional distribution.

Spending for Franco-American canned products decreased from $2,604,900 in 1978 to $1,523,600 in 1979, with $1,424,900 going toward network and spot tv for Spaghetti-os.

■ V-8, with advertising expenditures of $5,948,500, including a premium offer, has been testing V-8 meat sauce in Indiana and South Texas. Also being promoted is the V-8 Spicy-Hot vegetable cocktail juice 12-oz. size with the offer of a V-8 cooler.

Vlasic Foods, which holds over 25% of the pickle market, spent $2,515,900 in measured media and generated over $100,000,000 in sales. Presently, the Federal Trade Commission is investigating whether the 1978 acquisition of Vlasic complies with antitrust laws.

The company's mushroom market under the Campbell's Farm Fresh mushrooms label, has expanded with the acquisition of three new mushroom farms.

A settlement was reached in May, 1980, in the H. J. Heinz vs. Campbell Soup case. The charge that Campbell was violating antitrust laws in the canned soup market was dismissed with prejudice by the federal court in Pittsburgh.

Chesebrough-Pond's

	1979	1978
Sales	$1,174,274,000	$969,833,000
Earnings	82,609,000	69,714,000
Advertising*	107,342,000	91,340,000**

* AA estimate
** Adjusted figure

Chesebrough-Pond's, Greenwich, Conn., the 44th largest advertiser, increased its domestic advertising 17.5% to $107,342,000 in 1979, from $91,340,000. In addition to breaking the $100,000,000 mark for advertising, the company for the first time in its 100-year history had sales that topped $1 billion.

The company marked its 24th consecutive year of increased sales and earnings in 1979, with sales increasing 21% and net income advancing 18.5%. All seven operating divisions contributed to the sales gain.

In domestic operations, health and beauty products accounted for $223,415,000, or 19% of corporate sales; packaged foods, $221,059,000, or 19%; Health-tex, $174,002,000, or 15%; Prince Matchabelli,$113,370,000, or 9%; Bass, $80,254,000, or 7%; Hospital Products, $33,614,000, or 3%.

■ A broad range of new products made major contributions to C-P's sales growth in 1979. Among new products successfully rolled out during the year were Rave soft hair spray, Chimere fragrance from Prince Matchabelli, Ragú Italian cooking sauces, Kidproof jeans from Health-tex and the Adolph's Meat Department line of dry-mix marinades, with ad dollars spent most intensively for Chimere, ($4,500,000) Ragú cooking sauces, ($5,000,000) and Rave hair spray ($6,000,000).

In the U.S., the health and beauty products division achieved its primary marketing objectives for 1979 by extending its foothold in the $2 billion hair care market and maintaining its leading share of the hand and body lotion market.

Introduced in mid-1978, Rave soft perm, with the first nonammonia formula, has surpassed Lilt by Procter & Gamble and Toni by Gillette to become the country's No. 1 brand, capturing 30% of the home perm market.

CAMPBELL INTRODUCES
Swiss Cheese With Ease
Campbell's
Swiss Cheese SOUP
CAMPBELL'S NEW SWISS CHEESE SOUP

Campbell Soup Co.'s "Swiss cheese with ease" is a new addition to the 50 plus varieties which now control over 80% of the world's wet-soup market.

Trading on the strength of the Rave name, Rave soft hair spray was introduced in May, 1979, representing what the company called "the first real product breakthrough in many years in its category." A $6,000,000 multimedia effort, including tv, magazines, newspapers, supplements and 30,000,000 25¢ coupons launched the soft spray into the fray with Clairol's Final Net, which had a 20% plus share of the national market, and American Cyanamid's Miss Breck, with 15% for aerosol and pump combined.

Advertising for Rave soft spray to Ogilvy & Mather announces "It gives a soft hold; you can even comb through it." Rave hair spray has already "achieved a significant position" in the market, according to the company, with the two Rave products "adding substantially" to the division's sales increase of 12.5% in 1979.

■ During 1979, in the face of intense competition, Vaseline Intensive Care lotion, the division's largest selling product, maintained its No. 1 position in the growing hand and body lotion market, the company said. Nearly $5,000,000 was spent on the brand in network television advertising in 1979, according to Leading National Advertisers. William Esty Co., Vaseline Intensive Care's agency, broke a new campaign for the product last fall, stressing the lotion's healing benefits for rough, problem hands, with one spot featuring the residents of Friendship Cove, whose hands are exposed to severe conditions.

Shoes that let you skip from one outfit to the next.

Chesebrough-Pond's G. H. Bass & Co. shoe division completed its first full year as part of the company. 1979 sales were up 35.9% from 1978.

Pond's Cream and Cocoa Butter lotion, introduced in 1978, received over $3,000,000 in measured magazine, newspaper supplement and network tv advertising in 1979, according to LNA.

For 1980, the division's objectives include continued growth for Rave products, and increased marketing support of such established products as Q-tips, Vaseline petroleum jelly and Vaseline Intensive Care lotion.

Sales in the package foods division increased 21% to $221,000,000 and operating profit grew 21%. According to the company, the division's profit margins exceed those for the company over-all and are among the best in the package foods industry.

In the division, marketing efforts focused on the introduction of two new products during the third quarter.

■ Ragú Italian cooking sauces, for making Italian restaurant style meals at home, achieved the highest initial retail distribution level of any product in the division's history, C-P said. In contrast, the Adolph's Meat Department line of dry-mix marinades and seasonings, introduced with over $3,000,000 in measured media advertising, experienced some delays in achieving full retail distribution.

The division's well established spaghetti sauce business continued to grow, spurred by rising beef prices and record levels of marketing support. Almost $10,000,000 in network and spot tv advertising beefed up sales of Ragú spaghetti sauce and strenghthened its leadership position against Hunt-Wesson and Chef Boy-ar-dee brands.

Ragú traditional sauces, Ragú Extra Thick and Zesty sauces and Ragú Classic Combinations sauces, introduced in 1978, remain the three best-selling brands, accounting for about two thirds of the category's total sales, the company said. During 1979, the package foods division spent $12,988,000 on advertising, an increase of 47% over the previous year.

For 1980, the division expects to introduce a new product nationally later in the year, the company said.

■ Operating improvements led to greater profitability in the Health-tex division during 1979. During the year, problems in coordinating production and distribution functions were largely brought under control, and the division's sales increased 9.6% to $174,000,000. Operating profit advanced 11.8%, compared with a 14.6% decline for 1978.

Sales increased in all six categories, with infants' sizes accounting for over 25% of sales, and girls' sizes 7 to 14 introduced nationally in 1978, accounting for over 10% of divisional sales. Sales also benefited from the introduction of Kidproof jeans, designed to be the longest-wearing jeans in the boys' market, which reached retail stores in the fall.

In 1980, the division plans to introduce a line of clothing in boys' sizes 8 to 14. According to LNA, the division spent $873,900 in mixed media measured advertising in 1979.

The company's fragrance business, traditionally the foundation of Prince Matchabelli division, was strenghtened significantly by the introduction of the Chimere line, the first new fragrance from Prince Matchabelli since the Aviance line in 1975. Divisional sales increased 17.9% over 1978, to $113,000,000, and operating profits advanced 16.4%.

Supported by what the company called "the heaviest advertising and promotional program in Prince Matchabelli history," Chimere is said by C-P to have generated wider consumer acceptance than any other fragrance launched by a U.S. company in 1979.

■ Begun in September, 1979, the $4,500,000 Chimere campaign, handled by Scali, McCabe, Sloves, is designed to appeal to the 25-to-35-year old professional woman of the '80s with the theme line, "To the world it's discreet and elegant, but up close it's something else."

The Chimere brand joins three other Prince Matchabelli brands—Wind Song, Cachet and Aviance. Budgets for these established brands have been increased 8% in 1979 to $8,340,000, from $7,720,000. In early 1980, C-P switched the Aviance account to William Esty Co. from Della Femina, Travisano & Partners. Esty is the fragrance's third agency since its 1975 introduction.

The Aziza line of make-up products now accounts for 25% of divisional profits, up from 5% five years ago. In 1979, Aziza moved heavily into spot and network tv, while maintaining an 11-times per year schedule in four core magazines—*Cosmopolitan*, *Glamour*, *Mademoiselle* and *Seventeen*.

Erno Lazlo, an expensive name in skincare, had sales and earnings that far exceeded 1978 levels. Leading National Advertisers put 1979 mixed media spending for the brand at $1,155,000, more than double 1978 expenditures. In the wake of upscale skin entries from Charles of the Ritz Group and Estee Lauder, a new campaign was developed this fall via Murray Salit & Associates.

■ The G. H. Bass & Co. shoe division completed its first full year as part of the company, having been acquired in July, 1978. At a time when growing sales of imported shoes are slowing domestic sales growth, Bass' sales have more than tripled in three years. 1979 sales grew to $80,000,000, up 35.9% from full-year 1978 sales. Operating profits increased 37% from the full-year 1978 total. The division is benefiting from its recent extension into spring and summer shoe styles—called Sunjuns—and Funjuns, a wider range of casual shoes. Billings for Bass, with advertising placed principally in magazines, reached $1,000,000 in 1979; during the year, the account moved from Horton, Church, & Goff, Providence, R.I., to Lord, Geller, Federico, Einstein, New York.

- In the Hospital Products division, sales for 1979 increased 18.5% to $34,000,000, the division's largest percentage increase since 1971. Operating profit advanced 19.2%. In October, 1979, C-P acquired Filac Corp., which specializes in electronic technology as applied to thermometers and blood pressure measurement instruments, for about $4,000,000. There is no measured advertising for this division.

The international division, the company's largest, accounts for 28% of total 1979 sales. At $329,000,000, the division's sales for 1979 increased 18.8%, and the division's net income margin improved to 7.2% from 6.5% in 1978.

Domestic products introduced successfully abroad during 1979 included new enriched Vaseline Intensive Care lotion and Aziza eye make-up products in the United Kingdom, Rave soft perm in Canada and the United Kingdom, Pond's Cream & Cocoa Butter lotion in Italy, and the Chimere fragrance in Puerto Rico.

The Patrichs line of men's aftershave and cologne products, developed and introduced in Spain in 1976, is now the second best-selling brand there and was expanded to Australia, Italy, Venezuela and West Germany during 1979. The Clyo fragrance, a sister product to the Patrichs line, was successfully introduced in Spain during the third quarter.

At C-P's annual meeting in 1979, Ralph Ward, chairman, was questioned about the company's stepped-up advertising spending for the year. Mr. Ward replied that "growth requires a major investment in advertising."

Chrysler Corp.

	1979	1978
Sales	$12,000,000,000	$13,600,000,000
Earnings	(1,097,300,000)	(204,600,000)
Advertising*	118,000,000	188,900,000

(Loss)
***Estimated by AA**

Chrysler Corp., Highland Park, Mich., the 40th largest national advertiser, slashed its advertising expenditures in 1979 by nearly 40% as it became the first U.S. corporation to lose more than $1 billion. Ad outlays were $18,000,000 down from $188,900,000.

- Chrysler turned to the federal government for aid and Congress approved a $1.5 billion loan guarantee program with enough strings to weave a safety net. Whether that would enable Chrysler to bounce back from twin attacks of crippling import car sales and a recession was up for grabs. Chrysler's future hinged on the reception of its 1981 K-cars, front-wheel-drive compacts.

"1979 was more than Chrysler's year of agony—it was also Chrysler's year of survival," said president J. Paul Bergmoser, yet another draftee from Ford Motor Co. by chairman Lee Iacocca, himself a Ford alumnus.

Chrysler's plain, black-and-white annual report, without the fancy four-color photos and charts, spelled it out. Talking about the operating plan it submitted for the loan guarantees, the report said:

- "The company has projected improved penetration of the industry based on its planned new product offerings.

"These projected improvements are dependent on the public acceptance of the design and engineering of the future models as well as the timely introduction of quality products and the development of innovative advertising and marketing techniques.

"There can be no assurance that the company will attain sufficient acceptance of these new models in the competitive marketplace."

That lack of assurance was prompted by 1979 results that showed the record-breaking loss of $1,097,300,000 coming off 1978's loss of $204,600,000. Sales dropped to $12 billion from $13.6 billion as vehicle sales fell to 1,796,465 units from 2,211,535. Most were sold in North America—1,551,760 in 1979, down from 1,956,573 the year before.

We build and back our cars to guarantee your satisfaction.
The New Chrysler Corporation

Despite the guarantees program, Chrysler sales continued to slip in 1979.

Chrysler continued to lose money and sales in the first quarter. The deficit amounted to $448,800,000. A credit crunch added to Chrysler's woes.

- The federal tightening of credit came as Chrysler was trying to raise the $2 billion in nonfederally guaranteed assistance the loan guarantee called for. This money was to come from banks, dealers, suppliers, employes, state and local governments and from the sale of assets. Chrysler raised the loan commitments. A prospectus for $400,000,000 in debentures to be sold to suppliers and dealers laid bare the company's problems.

It recounted how Chrysler's market penetration slipped to 8.9% in the U.S. compared to 13.7% as recently as 1976. Industry sales were slipping but not at the 12% recorded by Chrysler.

Chrysler spent $200,000,000 on sales incentives and cash rebate in the last half of 1979 in a futile effort to stem the tide.

"If industry sales and Chrysler's market share in 1980 do not exceed the fourth quarter 1979 levels (9.3% sales decline against 4.2% for the industry), Chrysler would probably not be able to continue operations," the prospectus said.

Chrysler tried in early 1980, first with $450 per vehicle rebates at a cost of $26,000,000 and then with its "New Chrysler Guarantees" with a $10,000,000 a month estimated cost. The guarantees included a "money back" offer, a $50 test drive payment, and free scheduled service for two years and membership in an auto club which were dropped later.

Admitting that 1978 ad expenditures of $188,900,000 were "excessive," Chrysler told the government in one of its loan application soul barings that it would cut 1979 outlays by 35% and actually accomplished a 37.5% slash. Chrysler ended up 1979 spending an estimated $118,000,000 which included $3,000,000 in special ad allowances to dealer groups against $11,100,000 the previous year.

That left direct factory media outlays at $115,000,000 for 1979 compared with $177,800,000 in 1978.

Tv took the largest slice—$68,425,000—but that was down substantially from the $95,600,000 Chrysler spent in 1978. Magazines dropped to $24,610,000 from $38,600,000 while less expensive media like radio and newspapers showed gains. Newspaper expenditures rose to $8,280,000 from $6,000,000, showing that rebates take a lot of explaining. Radio jumped to $13,685,000 from $5,400,000.

When it came to corporate image-building—a Herculean task—Chrysler spent $9,660,000, up from $500,000 the year before with most of that—$5,474,000—in tv.

Chrysler-Plymouth division with one more nameplate than Dodge outspent its sister unit $57,590,000 to $50,746,000.

None of it made much difference in the 1979 auto market. Only the Dodge Omni and Plymouth Horizon posted any meaningful car sales gains. Chrysler turned them out as fast as it could while other production lines were idled. In all, 124,378 Omnis were sold, up from 89,467 the previous year, and 146,740 Horizons moved, up from 118,993.

The meat of Chrysler's profit makers—the larger cars like the specialty Cordoba and Magnum-Mirada saw precipitous sales declines. Big cars like the St. Regis and Chrysler were up but a lot of those sales were to fleets. Detroit police rode around in Chrysler Newports, for instance, because there was no 1979 Plymouth brand counterpart. The standbys of Chrysler—the compact Aspen and Volare—lost ground. Chrysler put a lot of rebate emphasis on the twins. Volare sold 167,001, down from 210,125, and Aspen fell to 117,777 from 157,308. Both were billed—with a straight face—as the "only" six-passenger car under $5,000.

Trucks, long the mainstay of Chrysler profits, fell out of favor in the gas situation. Van wagons like Sportsman dropped to 30,448 from 44,376 and the Voyager lost to 10,125 from 13,895 in a continuation of a slump.

- Four-wheel-drive vehicles like the Ramcharger and Trailduster followed the same pattern but it was in regular light trucks that Chrysler took the worst drubbing. Sales fell to 310,138 from 482,755.

Imports were the only bright spot for Chrysler in both cars and mini-pickups. Colt rose to 62,705 from 44,570; Arrow and Champ rose to 48,860 from 28,296 despite supply problems. Chrysler had trouble getting enough from Mitsubishi (15% owned by Chrysler) as the Japanese showed a preference for payment first. The D-50 imported truck soared to 32,235 units from 1,929 in 1978, nevertheless, and the Arrow pickup rose to 14,897 from 1,215.

Back in the fall of 1978 when the new 1979s were introduced, Chrysler was eyeing 15% of the market from a lofty perch of about 12%. Things went wrong from the start despite Chrysler's heaviest-to-date-opening ad barrage. Chrysler-Plymouth stressed its small cars including the captive imports. There was no full-size Plymouth but the Chrysler Newport was to battle Chevrolet and Ford. Dodge had the big St. Regis and planned to push styling for the intermediate Diplomat and specialty Magnum. All of the cars were holdover models. The big cars were reskinned Fury and Monacos but production problems stifled the ballyhoo.

- When Mr. Iacocca joined up as president, he decided to double the big car budget. Neil Armstrong, former astronaut, was hired as corporate spokesman to talk about engineering. Chrysler reversed the opening strategy on its Mitsubishi captive imports and lumped them together in a campaign that mentioned the Japanese auto maker by name for the first time. BBDO (Dodge) won the assignment over Young & Rubicam (Chrysler Plymouth).

Mr. Iacocca pledged to carry Chrysler back to advertising basics. He also made advertising history when he fired BBDO and Y&R and hired Kenyon & Eckhardt away from Lincoln-Mercury. K&E would sit in on market planning, Mr. Iacocca said. Gar Laux, lured out of retirement (yes, from Ford) by Mr. Iacocca said, "nobody writes an ad who hasn't driven the car." Mr. Laux became exec vp of sales and marketing.

Chrysler also folded an extended, optional warranty program into its spring advertising but a $53,800,000 second-quarter loss proved a portent. Ad budgets for the fall and the 1980 models would be down, Mr. Iacocca said after an annual meeting. He admitted the special warranty plan wasn't working up to expectations. The featured cars were compacts and trucks and, with gas shortages, the move was on to smaller, more fuel-efficient cars. "We just can't turn our plants on a dime to stay with the market," Mr. Iacocca said.

By August Chrysler was resorting to $400 rebates and sportscaster Joe Garagiola and "Get a car, get a check" came into the vocabulary. Meanwhile, Mitsubishi offered to help Chrysler out if it would release it from an agreement that only Chrysler could sell the Japanese cars in the U.S. Since the captive imports (and domestic Omni-Horizons) were the only cars keeping dealers afloat, Chrysler was unimpressed with the offer.

- The rebates worked, for a time. Factories inventories were slashed and Chrysler began its long-awaited reorganization back into separate Dodge and Chrysler-Plymouth divisions.

Mr. Iacocca and other top execs cut their pay to $1 a year and others absorbed a 10% cutback.

Third-quarter losses grew to $460,000,000. Rebates cost the company more than $100,000,000. Ad budgets were slashed. Mirada and Cordoba were placed on Aspen-Volare compact underpinnings and starred as engineers and Ricardo Montalban extolled their virtues. Trucks got a shot at "Ram Tough" and Mr. Iacocca, by now chairman replacing John Riccardo, went on camera. "I'm not asking you to buy any car on faith. I'm asking you to compare," he said in brief tags to existing commercials.

It didn't take very, long before the bottom fell out. Chrysler's sales dropped 57% in October and Mr. Iacocca replaced Mr. Garagiola on a new round of rebates that were called a "special introductory offer." It again was ad history for Chrysler—the earliest ever for rebates.

A month later Mr. Garagiola was back again for rookie Iacocca. Mr. Iacocca had other fish to fry—the $1.5 billion loan guarantee campaign. General Motors and Ford followed with indirect rebates—dealer incentives.

Chrysler began testing the money-back idea and the $50 test drive as the year slogged to a close. Congress approved the guarantee and "The New Chrysler Corp." took to the stump to restore confidence. Chrysler also revived advertising on the captive imports and Omni-Horizon. Chrysler broke factory newspaper ads the last day of the year to say the company "is in business to stay." Mr. Iacocca went back on the tube but networks wouldn't run the spots until the President signed the bill.

Rebate hawker Joe Garagiola wasn't renewed by Chrysler because NBC wanted to expand his sports schedule and feared other auto makers would shun the shows because of his identification with Chrysler.

Sales shot up 78% in the first reporting period following the official passage of the loan guarantees and Chrysler moved its $50 test drive into more markets. Advertising was "the last place where cuts are made," said John K. Givens, director of marketing.

When Chrysler broke its "guarantees" package in January it promised to concentrate "all our advertising and marketing firepower" on the program. That's the one with the money-back, $50 test drive, free service and auto club. "This is the beginning of a whole new way of doing business in the automotive industry," said new president Bermoser. Other auto marketers greeted the idea cooly.

- The initial blast started with newspaper statements signed by Mr. Iacocca and was followed by heavy tv and magazine schedules. The idea was to sell more cars but the guarantees were not a one-shot rebate scheme. "It's a new posture for Chrysler," said Jeff Elpern, Chrysler-Plymouth ad manager. Scoffed a rival, "What have they got to lose?"

Chrysler and Peugeot-Citroen signed a deal that would trade Chrysler's marketing savvy for money in a move similar to the American Motors Corp.-Renault arrangement. Chrysler got a loan of $100,000,000 in return for helping the French automaker sell its luxury cars here. Chrysler stock in Peugeot also was pledged.

Chrysler started husbanding its ad funds for the new K-cars in the fall, although Mr. Iacocca had a special kitty designed to keep Chrysler's market share visible. "We have a pretty good idea of what kind of money it will take. With everything riding on that car we've got to tell the public it's here," said Mr. Laux.

The launch of the K-car will be "a very aggressive, expensive and good program. It's going to be the best marketing job in history—better than the first Mustang," said Mr. Iacocca, the "father" of the Ford Mustang.

- Despite the guarantees program, Chrysler sales continued to slip and by March it was back with a $450 addition to the $50 test drive if prospects bought the car. It centered on the Mirada-Cordoba and Diplomat-LeBaron—the cars that were featured in the fall. Victor Montalban, son of Riccardo, started pitching Cordoba in hopes of attracting younger buyers. A new Fifth Avenue limited model appeared on the LeBaron and full-sized New Yorker and was the subject of four-color magazine ads in April and May.

But by then Chrysler was into direct rebates once more on everything but the Omni-Horizon. Radio and newspaper were the primary vehicles for comparing Chrysler's rebates with those of other automakers.

Chrysler's Mr. Givens summed up what ailed the U.S. auto industry in a speech to the Adcraft Club of Detroit. "People are buying imports today because they like them, because they're right for the times. Any other excuse we use for their success just won't hold water," he said.

It was the first time a U.S. automotive marketing exec admitted that Detoit's problems were of its own making. Chrysler research shows, he said, "If we don't significantly accelerate development of vehicles that meet or exceed the imports in terms of quality fit and finish, features and pricing, imports will be taking a full 50% of our industry." Sales of imports then were running 27%.

"Detroit must market cars not with domestic competition foremost in mind but with the imports in mind," Mr. Givens said. "Better yet, do it with the needs and desires of the American consumer in mind," he said.

Meanwhile, Chrysler of Canada wasn't doing so hot, either. Car sales slipped to 162,018 units from 178,609 and, as in the U.S., Chrysler lost market share, falling to 16.1% from 18%. Truck sales were off less without the U.S. fuel problems. Unit sales totaled 45,502 down from 47,476 in 1978 for 11.7% of the market down from 12.7%.

- Chrysler's nonautomotive operations were a semi-bright spot. Sales rose to $712,300,000 from $679,500,000 in 1978. The divisions include the Defense Group which started production of the XMI turbine powered tank, the Huntsville unit which makes electronics systems and Chrysler Outboard Corp. That division marketed Chrysler's most fuel-efficient vehicle, a cross between a moped and a pair of skis called a Sno-Runner. It seats one person and works like a small snowmobile.

Chrysler Financial Corp. earned $57,600,000, up from $48,500,000. Chrysler Financial completed the sale of almost all its European financial operations to PSA Peugeot-Citroen.

Chrysler Realty was sold to ABKO Realty and Chrysler's Marine division was discontinued with the sale of its boat manufacturing operations.

In marketing personnel changes, Mr. Givens joined Chrysler from Wells, Rich, Greene, Los Angeles, and Arthur C. (Bud) Leibler was named director of merchandising succeeding R. (Ham) Schirmer who joined Campbell-Ewald. Fran G. Hazelroth moved to sales manager East from general manager service and parts. Charles Joiner Jr. succeeded him.

Clorox Co.

	1979	1978
Sales*	$565,400,000	$465,800,000†
Earnings*	37,300,000	34,645,000
Advertising	72,590,000	60,424,000

***Sales include figures of continuing operations, while earnings reflects both continuing and discontinued operations.**
†restated to reflect discontinued operations.

Clorox Co., Oakland, Cal., the 60th largest national advertiser, increased ad spending by about 20% to $72,590,000 in 1979 from $60,424,000 in 1978.

The company's earnings for fiscal year ending June 30, 1979, which rose 7.8% from 1978 to $37,300,000, reflected the sale of four operations. Corporate sales, meanwhile, totaled $565,400,000, up from the restated 1978 sales figure of $465,800,000.

Clorox got out of the food service business by selling the Martin-Brower Co., a distributor of food to restaurants. It also sold Jemco, a manufacturer and marketer of paper and plastic bags; Mandate-Roman, a Canadian household products company, and Country Kitchen Foods, a mushroom grower based in Great Britain.

Acquisitions during fiscal 1979 included: Duraflame, the No. 1 selling firelog in the U.S., and Emil Villa Restaurants, a $6,000,000 Oakland-based chain of barbecue restaurants.

Reflecting increased competition from generics, and branded and private label products sales of Clorox liquid bleach and Clorox 2 powdered bleach, the company's two largest brands, decreased during fiscal 1979.

Though noting inroads made by the generic and private label competitors, Clorox still maintains its position as the "leading liquid bleach," according to a company official.

Clorox put its biggest ad expenditure, $47,055,300, behind Clorox liquid bleach. The majority of that amount was in network tv. Commercials by Foote, Cone & Belding/Honig, San Francisco, featured testimonials from real life users of the bleach, and the theme of the campaign remains "Notice the difference Clorox makes *vs.* detergent alone."

Clorox also expanded its involvement in the barbecue-outdoor cooking market with the national introduction in May, 1980, of Match lite instant lighting charcoal, spending $350,600 on spot tv, newspaper and magazine advertising. Ads emphasized the fast-lighting capabilities of the lighter fluid-infused charcoal with the theme of the introductory campaign, "the no-hassle charcoal."

Thirty and 60-second tv spots by Young & Rubicam/West, San Francisco, showed Match lite being poured into a grill and lighted, followed by a steak being cooked while a voiceover extolled the attributes of the fast heating and cooking charcoal.

Clorox' regular charcoal brand, Kingsford, which dominates the regular $225,000,000 charcoal market, continued to emphasize its "edge" in ads by Botsford Ketchum, San Francisco. Clorox spent $2,215,000, mostly on network and spot tv on Kingsford ads in 1979.

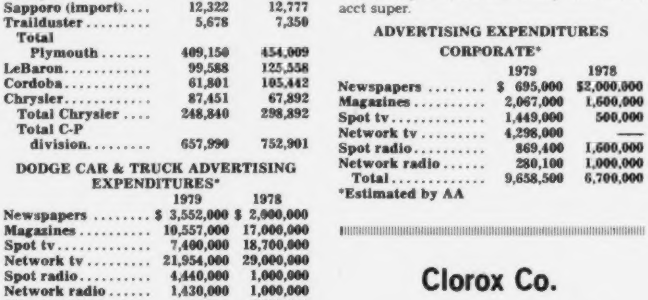
Clorox followed the example of its former parent company, Procter & Gamble, in assigning Kingsford and Match lite to different ad agencies.

"Though Match lite is considered a competitive brand, so far its sales haven't hurt Kingsford," said a marketing executive responsible for the regular charcoal brand.

Botsford also handles advertising for Duraflame, fireplace logs category.

Another Clorox brand assigned to Botsford is Litter Green cat litter, which introduced Carol Channing as a spokeswoman in 30-second tv spots. "I'm sure of only two things . . . diamonds and Litter Green," says Miss Channing as she pets a langorous feline with her bejeweled hand.

At the annual meeting in Oak-



Clorox' **Duraflame** campaign emphasizes the product's easy use.

land on Oct. 18, 1979, Mr. Shutt, who in July, 1980, became chief executive officer to succeed Robert B. Shetterly, told shareholders that Clorox will continue research and development of new brands.

The company's association with Henkel KGA, Germany's leading detergent and household products marketer, limits the German company to holdings of 20% of Clorox stock. But sources acknowledged this could change.

Coca-Cola Co.

	1979	1978
Sales	$4,961,400,000	$4,337,900,000
Earnings	420,100,000	374,700,000
Advertising*	169,271,000	138,805,300

*AA estimate

The Coca-Cola Co., Atlanta, the 18th largest national advertiser, increased its ad spending 22% to an estimated $169,271,000 in 1979.

Total net sales rose 14% to $4.96 billion in 1979, while company earnings increased 12% to $420,100,000. Overseas operations contributed 46.3% of sales income, compared with 45.7% in 1978.

Coca-Cola soft drink, the company's flagship brand, received the bulk of media spending, with $19,187,000 in spot tv and $19,072,500 in network tv. Another $2,531,900 was allocated for outdoor ads and $881,600 for magazines. Tab diet cola and Sprite lemon/lime soft drink together received about $21,500,000 in tv support.

Coca-Cola led the industry with a 23.9% market share, topping archrival Pepsi-Cola's 17.9% slice of the beverage market. Seven-Up was next with 5.6%. Tab is the No. 1 diet drink and places fifth in the over-all market, coming up with a 3% share.

■ "Have a Coke and a smile" launched Coca-Cola to new heights of advertising awareness as well as record sales. After the campaign's introduction in the summer of '79, the spot starring Pittsburgh Steelers "Mean" Joe Greene reached the highest awareness level of any Coke ad since 1975.

Continuing the sports celebrity theme, Coke recently produced spots with Jim Craig, U.S. Olympic hockey team goalie, through McCann-Erickson, New York.

Although the soft drink marketer may have scored well at the Winter Olympics, plans to move into the Soviet Union went awry with the U.S. boycott of the Moscow games. Coke agreed not to supply beverages to the summer games but has already made a $15,000,000 (unconfirmed) offer to be the official soft drink of the 1984 Summer Olympics to be held in Los Angeles.

Coca-Cola was busy on other international fronts. After a 30-year absence, Coke returned to China in January of '79. One year later in February, 1980, ground was broken for a bottling plant in Peking. The company expects the new facility to produce 1,300,000 cases per year.

■ Coca-Cola also reentered Egypt in July, 1979, thanks to President Anwar Sadat's Open Door policy. More than $100,000,000 has been spent to establish nine bottling plants and one concentrate plant in the Middle East nation. All should be in operation by late 1980 and 1982, supplying the Arab world with 40,000,000 cases of Coke a year.

A heavy advertising schedule in Cairo is helping Coca-Cola overcome Pepsi and Sport (Canada Dry) colas, which are already entrenched in the market. American-made commercials air daily on Egypt's two government-owned stations.

Another significant international development was the introduction of a 1.5-liter bottle in Great Britain and Ireland. Its immediate popularity contributed, no doubt, to the 20% growth in unit sales in those countries. The same size bottle was also introduced to Germany and Spain.

■ Back on the home front, a recent management shake-up left the industry buzzing and sparked rumors of a major agency switch, although nothing has been substantiated. Roberto Goizueta, formerly one of six vice-chairmen who reported to ceo J. Paul Austin, was named president and chief operating officer in May, 1980, filling a position empty since the August, '79, resignation of J. Lucian Smith. In early August, Mr. Goizueta was tapped to succeed Mr. Austin as chairman and chief exec after Mr. Austin's retirement next March. Mr. Goizueta, a 48-year-old chemical engineer, is known as an efficient administrator but has no direct marketing or selling experience.

Newcomers Mello Yello and Ramblin' root beer both fared well in their first full year on Coke's soft drink roster. Mello Yello reached 50% national distribution early in 1980 and is rapidly gaining a foothold in Pepsi's Mountain Dew territory. New spots by McDonald & Little, Atlanta, show athletes chugging the "world's fastest soft drink." Coca-Cola expects this citrus-flavor drink to overtake Mountain Dew by the end of this year.

Ramblin' root beer looks like another success story. Introduced in June, 1978, to the Salt Lake City market, it has become the No. 1 root beer there. "Something more" is the theme for ads by Kenyon & Eckhardt.

Sprite dropped its seven-year "tastes like a lymon" theme for "when you're reaching for more, reach for Sprite." Media weight was increased to $20,000,000 for the new campaign that broke in March. The push included new graphics—the redesigned can has an orange dot to replace the old starburst. Marschalk Co., N.Y., handled.

■ Mr. PiBB received a new formula, perceived as more thirst-quenching and refreshing, and, in April, Coke announced plans for 50% distribution of the cherry-flavored cola. Marschalk Co. designed the new ads urging consumers to head "toward the great new taste of PiBB."

Diet soft drinks constituted almost 12% of Coca-Cola's 1979 volume, with Tab the leader by far. The "beautiful drink for beautiful people" was revamped with new deep red graphics for wider appeal.

New packaging and new taste were also in the works for Fresca, Coke's diet citrus drink. Coke used the established Fresca brand name to distribute its essentially new soft drink nationwide. The new Fresca is sweeter and has less aftertaste, plus bold white, green and yellow graphics.

Coca-Cola Foods division is the company's marketing arm for a variety of products outside the carbonated beverage sphere, including the Minute Maid, Hi-C, Snow Crop, Butternut and Maryland Club brand names. About $37,000,000 was spent in media for this division in 1979.

■ Coca-Cola Foods and other non-soft drink operations account for 24.1% of net sales worldwide. Sales for the foods division broke the $1 billion mark for the first time in 1979.

Under the Minute Maid banner, the company's chilled orange juice product completed its six-year rollout with a national magazine campaign and increased use of network tv. In March, 1980, Marschalk Co. dropped ad presenter Kathryn Crosby to develop the theme, "Make sure. Make it Minute Maid."

Minute Maid is now testing shelf-stable grapefruit juice in jars. Also in test is Sofia, a liquid yogurt drink being marketed in Portland, Me., and Rockford, Ill. The new product, handled by F. William Free & Co., is aiming to capture Coke a piece of the $600,000,000 yogurt market.

Apple and tangerine flavors expanded Hi-C's 30-product line, and Five Alive, the frozen concentrate fruit beverage, was introduced nationally this fall after its successful debut in 1978.

The Wine Spectrum is Coke's fastest growing subsidiary and is now the fifth largest wine producer and marketer in the U.S. Sterling Vineyards, Monterey Vineyard, Taylor and Great Western New York State brand names make up the Coca-Cola unit.

■ New developments included more comparison ads reminiscent of 1978's controversial Taylor spots naming rival brands in a taste test. This time, Monterey Vineyard introduced its Classic California Red wine in print ads featuring John Avery, a noted wine expert, comparing the California wine with nine French red Bordeaux wines. Kenyon & Eckhardt has the account.

Taylor also launched a new line of premium generic wines, and, in December, Coke signed an agreement to become the sole U.S. marketer of Cinzano vermouth and Asti Spumanti sparkling white wine.

Coca-Cola's nonbeverage operations are divided between its industrial Aqua-Chem division and the Consumer Products division. Aqua-Chem is a world leader in the manufacture of water purification equipment and its Cleaver-Brooks division produces boilers and related equipment.

The Consumer Products division unites Presto Products (plastic film and bags), Winkler/-Flexible Products (plastic cutlery and straws), Universal Water Systems (water conditioning equipment) and Belmont Springs (bottled water) under central management. Advertising for both Aqua-Chem and Consumer Products is primarily in trade magazines and trade shows.

Colgate-Palmolive Co.

	1979	1978
Sales	$4,494,000,000	$3,980,000,000†
Earnings	113,548,000	175,572,000
Advertising*	122,500,000	122,500,000

* U.S. only; estimated by AA
† Restated

Colgate-Palmolive Co., New York, the 37th largest national advertiser, held its advertising at the $122,500,000 level during a year of major reorganization and divestment of unwanted businesses.

The year saw Colgate place more emphasis on its traditional household businesses as new chief executive officer Keith Crane took immediate steps to reshape the company.

Worldwide sales rose 13% to $4.5 billion. As the result of a study on growth potential and profitability, a number of subsidiaries were recorded as discontinued operations. These included Helena Rubinstein, Ram Golf, Leach Industries, Hebrew National and other sports equipment and restaurant companies. These companies have either been divested or are on the selling block.

A cavity in one tooth can lead to a cavity in the next tooth.
Can her toothpaste help prevent it?
Colgate

Colgate-Palmolive's Colgate toothpaste ran a series of ads on dental care.

Earnings rose 4% to $137,000,000, but net income for 1979 declined 35% to $114,000,000, reflecting the loss from discontinued operations.

Worldwide, Colgate invested $273,000,000 in advertising, a 9% hike over 1978.

By mid-year, Colgate was successful in selling Ram Golf, Hebrew National and Bancroft Sporting Goods. Several near deals to get rid of the ailing Helena Rubinstein business fell through, before Albi Enterprises bought Rubinstein for $20,000,000, to be paid to Colgate over the next 16 years.

■ Colgate also dropped its sponsorship of a number of professional golf and tennis tournaments as the company decided that those financial and management resources could be used better elsewhere. It dropped the Grand Prix of tennis, a men's professional tour; three women's golf events (Colgate Triple Crown, Colgate European Open and Colgate Far East Open) and three men's golf events (Colgate-Hall of Fame Golf Classic, World Match Play Championship in Britain and British PGA Championship).

There were reports last year that Colgate itself was on a possible acquisition list of Seagram Co. Ltd., Montreal, but the distiller denied

MARKETING PROFILES

any consideration of a Colgate takeover.

Colgate reorganized its traditional domestic businesses by uniting household and personal care marketing and sales staffs. The company reported that sales for these businesses as well as Associated Products and Marisa Christina rose 5%.

- Highlights of 1979 marketing, according to Colgate, were the national expansion of Dermassage dishwashing liquid; expansion of Fresh Start (which completed national distribution this year); testing of Fab liquid, new scents of Irish Spring and Ajax scouring creme, and strengthening of market share of Colgate toothpaste.

Colgate's share of the $1.8 billion detergent market remained under 10%. Fab powder was Colgate's biggest selling brand again with over 3%, followed by Dynamo at just under 3%. Cold Power remained at 2.5%.

Colgate's hopes are pinned on Fresh Start concentrated powder, which obtained over a 2% share nationally while in just over half of the country.

The company poured its heaviest detergent spending into the new brand, which received $6,800,000 in measured media. Packaged in a clear hard plastic bottle, the brand completed its national expansion this spring, and Colgate promised a $49,000,000 advertising and promotion budget for the debut.

In older markets, Colgate introduced new advertising showing ways that people can get a fresh start on the day with Fresh Start to brighten their dingy clothes.

- The next heaviest detergent backing went to Dynamo liquid with $6,600,000. Other brands with substantial support included Fab with $3,900,000 and Cold Power with $1,800,000.

In the light duty detergent market, Palmolive remained Colgate's strongest entry with a 12% share as backing continued to exceed $7,000,000. The company's share of the category rose slightly to 19.5%.

Spending for Dermassage dishwashing liquid was boosted to $9,700,000 and Ajax dishwashing liquid received $1,000,000 in measured media support.

The Ajax line of cleaning aids was backed by $6,400,000, with dishwashing liquid and liquid cleaner receiving most of the support.

Colgate holds about 10% of the toilet soap market. Irish Spring, its biggest entry, has about half of the total. Cashmere Bouquet, Palmolive and Dermassage account for the rest. The company continued to test Experience toilet soap. Heaviest backing went into Irish Spring with a $5,000,000 budget.

Another household product, Baggies, the No. 2 entry, received $1,500,000 in ad backing.

- Colgate acknowledged increased competition in the dentifrice category with the introduction of Beecham's Aqua-Fresh. But Colgate toothpaste continued to hold the No. 2 slot with 18% of the market although the company's Ultra Brite share slipped to 3.5%. A new campaign for Ultra Brite that broke this summer uses a fantasy woman touting the cosmetic benefits of Ultra Brite. Advertising is tagged, "For a smile so bright. It gets you noticed."

Spending for Colgate toothpaste last year was $16,400,000, the company's heaviest backed product, and $2,400,000 for Ultra Brite.

Mersene denture cleanser and Fluorigard dental rinse continued to receive significant backing during their first full year on the market. Fluorigard, which captured close to 3% of the mouthwash category, received $5,200,000 in ad backing. Mersene got $2,800,000 in measured media.

In the same division Colgate expanded testing of Hair Defense "hair cuticle protector" into additional test markets.

The company's sports and recreation division continued to wind down as Colgate sold off Ram, Bancroft and Leach businesses. The Rubinstein line, which Colgate was finally rid of this year, received $2,700,000 in ad backing last year.

- Sales in the foods division rose 6% as Colgate divested itself of Hebrew National, Lum's and Ranch House restaurants. Riviana's Success rice has become the No. 2 brand in the $90,000,000 instant rice segment as Colgate invested $1,100,000 in the brand. Riviana's combined rice brands, Carolina, Mahatma, Water Maid, Bake It Easy and Success, make it the leading U.S. marketer of branded rice, although Uncle Ben's is the leading single brand.

This year, Colgate continued to refine its management structure and moved from a traditional brand management system to a category management system. A senior level executive now heads the company's three major traditional businesses—heavy duty detergents, light duty liquids and oral hygiene products—replacing the group brand managers, whose products were not necessarily in the same categories. The category managers are Tony De Nisco (laundry detergents), David Enfield (oral hygiene) and Madi Ferenz (dishwashing liquids).

Consolidated Foods Corp.

	1979	1978
Sales	$5,000,000,000*	$4,720,266,000
Earnings	125,000,000*	111,408,000
Advertising**	105,000,000	91,500,000

(* Estimated by company for fiscal year ended July 1, 1980)
(** AA estimate for combined companies during calendar years 1978 and 1979)

Consolidated Foods Corp., Chicago, the nation's 45th largest national advertiser in 1979, spent an estimated $105,000,000 on advertising last year, with $67,000,000 of the company's budget going to measured media, up from $56,700,000 in 1978.

According to company figures for its fiscal year ending June 30, 1979, $69,700,000 of the company's $108,600,000 million ad budget was spent in measured media, with the remaining $38,800,000 going into such nonmeasured media as coupons, premiums, packaging and point of purchase. All three figures are up from the previous fiscal year.

Virtually every media category benefited from the increased Consolidated expenditures during 1979. Network television grew to $35,700,000 from $31,700,000; spot television rose to $18,600,000 from $15,800,000; magazine spending increased to $8,400,000 from $6,800,000; newspapers went to $3,100,000 from $1,800,000; and network and spot radio totaled $1,300,000, up from $549,000.

According to Leading National Advertisers, Consolidated's two most heavily advertised brands during 1979 were its L'eggs and Hanes hosiery items. L'eggs received $16,500,000 in advertising support (up from $9,800,000 in 1978), and Hanes spent a total of $10,300,000 to advertise its branded products. The bulk of both efforts was in network television.

- Other Consolidated lines that advertised heavily in measured media include L'erin cosmetics, which increased to $4,300,000 from $1,400,000 in 1978 and included $1,900,000 spent on L'erin lip color, all spot tv; Sara Lee frozen desserts, down to $3,500,000 from $5,300,000 and including

The last five years have been a period of major transition for Consolidated. During this time the corporation has reorganized from a larger number of smaller companies in many different industries into a select number of companies in a few industries.

Since 1976 the company has divested itself of approximately 50 companies with annual sales totaling approximately $600,000,000. Those transactions involved operations in 15 different industries—including fashion apparel, furniture, household products and motels—and did not involve any prominent advertiser.

▪ In addition to the divestitures, Consolidated has also made acquisitions of several companies totaling more than $1.5 billion in annual sales. This included the purchase of Hanes Corp. for $250,000,000 effective at the start of 1979.

As a result of the substantial restructuring it has undertaken, Consolidated is now positioned as a consumer package goods company with three major business portions: Consumer package goods, food services and consumer direct sales.

The consumer package goods group is the largest of Consolidated's three divisions and contains all of its most actively advertised products, including beverages, hosiery, specialty meats and frozen foods.

The group's most ambitious current project is its L'erin cosmetics marketing effort that is attempting to capitalize on the trend of women to purchase more nongrocery items at grocery stores.

Consolidated sees the cosmetics situation as similar to the conditions that existed in the hosiery market when the L'eggs products were introduced in 1970. At that time, only 18% of hosiery sales were accounted for by food stores. Today, food stores account for 30% of hosiery sales, with L'eggs commanding a 44% share.

Food stores account for only 14% of current cosmetics sales, and L'erin is hoping to parlay the same formula of unique packaging and display, heavy consumer advertising, distribution through mass merchandisers and direct store delivery into a similar success story. The Hanes delivery system is an especially important part of this strategy, with the company providing retailers with its own racks and displays and with all the inventory on consignment.

▪ Though Consolidated is optimistic about L'erin's prospects, industry analysts point to an important difference between cosmetics and hosiery that is expected to make it more difficult for L'erin to repeat L'eggs success: The reluctance of women to buy makeup without trying it first. Since L'erin products are prepackaged, this can present a significant barrier to first-time purchasers.

Indications are that Consolidated has found the L'erin introduction more difficult than it expected, although the company reports that repeat sales of the cosmetics have been strong.

L'erin had attained 50% U.S. distribution by February, 1980, with national roll-out to be completed by mid-1981. Television, full-page magazine ads and in-store promotions using a "Be Beautiful Now" theme supported the products during the spring of 1980 in the markets in which L'erin items were available.

Continuing difficulties with its Shasta soft drinks dragged down the performance of Consolidated's beverage operations during 1979. Shasta reformulated its regular and diet lines by changing from refined sugar to fructose sweeteners. The company is emphasizing its diet products more extensively, and is attempting to position Shasta as an alternative soft drink. Measured media advertising was cut sharply in 1979, and Shasta began heavy couponing in January, 1980.

Despite the change in positioning, management shake-ups, and ad agency changes, industry observers are not optimistic about the chances for a quick Shasta turnaround, with most experts predicting a bleak outlook for all smaller U.S. soft drink operations during the 1980s.

There is optimism, however, about the Capri Sun line of natural fruit drinks that is currently being test marketed. The drinks come in apple, orange and lemon and are packaged in spill-proof, disposable pouches. Indications are that the tests have been successful, and Consolidated is also buoyed by the fact that Capri Sun's counterpart is the largest-selling, noncarbonated soft drink in Germany.

▪ Consolidated's frozen foods operations introduced a number of products during 1979, the most successful of which were its Sara Lee individual Danish products. These items are aimed to cash in on the fact that 52% of all U.S. households are made up of one or two members. Introduced in March, 1979, the products currently trail only the all-butter pound cake as the best-selling items under the Sara Lee label.

Couponing is a large part of Sara Lee's promotional budget. The company's ads will soon begin to stress the quality of Sara Lee ingredients with a "Nothing's made like it, nothing tastes like it" theme. The campaign will also try to generate greater brand awareness for Sara Lee.

The Booth frozen fish operations used umbrella advertising with the theme "Booth zips up the flavor of fish" to promote its new battered fish products last year: Beer Batter, Buttermilk Batter and Crunchy Corn. The company is hoping to use television commercials and print ads with coupons to take advantage of the growing U.S. per capita consumption of fish. Heaviest media spending occurs during the fall and Lent.

The Michigan-based Chef Pierre frozen dessert operation has introduced individual pie slices and is expanding its production capacity by adding a new facility in Mississippi.

Low pork prices during 1979 helped the processed pork products of Consolidated's specialty meat producers, and each of the meat companies worked to expand its geographic area of distribution as well as to add new products.

Bryan Foods, for example, introduced Smoky Hollow Smoked Sausages, Beefy Jumbo Franks and Peg lunchmeats last year. Bryan Foods also initiated two advertising programs last year, including print advertising in Sunday supplements and television commercials in the South, its main marketing area. Consolidated also acquired Gallo Salame, a West Coast specialty meats company last year.

Among the new products introduced by Consolidated's clothing operations were a new line of Bali active bras for athletically active women; Sirena velour separates designed for casual wear, and a new line of "cotton-where-it-counts" men's knit shirts brought out by Consolidated's Robert Bruce unit.

Hanes has introduced its Knee Hi Multipack and Sheer Energy Undie-L'eggs; will introduce Winteralls, a combination panty hose and panties, nationally in September for the coming winter season; and is currently testing Hanes Too, a full line of midpriced panty hose, in 4% of the U.S.

Tyco trains and racing cars introduced four new products last Christmas. Its ad budget, including a heavy concentration during the Christmas season for its Silver Streak trains, enjoyed a sizable increase as a result of the introductions.

In the food service group, Consolidated's Ohio-based Lawsons convenience food store chain has made a variety of marketing and advertising changes. The 757-store chain—70 were added this year—has undertaken extensive remodeling in order to give its outlets a uniform look. The new stores also have been designed to have double the capacity for medium-temperature cooling for beverages than had been available in the older stores. The chain has begun a "Good things in store for you" ad theme and has added a variety of traffic-building items such as hot coffee, breakfast rolls, sandwiches and snack foods.

In the consumer direct sales group, Consolidated's Electrolux operation has added a new series of commercials on network television that stress the long life-span of the products. Electrolux was designated the "Official Vacuum Cleaner of the 1980 Winter Olympics."

Delta Air Lines

	1979	1978
Sales†	$2,654,026,000	$2,225,447,000
Earnings†	103,602,000	137,375,000
Advertising	33,500,000	28,900,000

† Restated to reflect a year ended Dec. 31

Delta Air Lines, Atlanta, the 97th largest national advertiser, increased its advertising 15.9% to $33,500,000 in 1979.

Delta boarded over 40,000,000 passengers, a record for the carrier, as operating revenues increased 19% to $2.65 billion and earnings declined 25% to $103,602,000. It was the 32nd consecutive profitable year for Delta. For the first quarter of the current year earnings were $21,816,000.

For Delta's fiscal year ended June 30, 1979, net income was up 4% to $136,744,000 on operating revenues of $2.43 billion, up 18% over the previous fiscal year.

One of the most profitable U.S. airlines, Delta is also the sixth largest domestic trunk airline in terms of revenue-passenger miles (the total number of passengers multiplied by total number of miles it has flown). In revenue-passenger miles Delta hit 26.113 billion in 1979, up from 23.332 billion in 1978.

In terms of passengers carried, Delta with 40,274,000 ranked second only to Eastern's 42,724,000. Delta's passenger ticket revenues were in excess of $2 billion.

Delta's marketing and advertising program is shaped largely by its route structure. The company has developed a system of short-haul routes feeding into its system of lucrative, long-haul routes to permit the carrying of passengers all the way to their destinations.

▪ A major portion of total Delta business comes from small and medium-size cities east of the Mississippi and the airline has the shortest average flight in miles of any major U.S. carrier.

Delta, which has served London with nonstop service from Atlanta since 1978, added an Atlanta-Frankfurt, West Germany nonstop route in 1979. The flights to both cities have proven to be popular, with load factors in the 70% range.

Under the liberal terms of airline deregulation Delta has received literally dozens of new route awards, but has preferred an orderly, planned and deliberate expansion program that allows continued growth without overextending the airline or putting it in a position that might require radical retrenchment.

Among the new cities added to Delta's route structure are Austin and San Antonio, Tex., Daytona Beach, Fort Myers and Sarasota-Brandenton, Fla., Salt Lake City, Seattle and Portland. Offering an introductory roundtrip economy fare of $199, Delta opened an Atlanta/Bermuda route July 19.

Partly because of its route structure, Delta tends to favor no-nonsense advertising instead of elaborate image campaigns. The airline's continuing major theme, "Delta is ready when you are," was created several years ago.

During 1978 and 1979, the airline industry went heavily into discount fares and special, low inaugural fares for new routes, a practice that continued, despite fuel-induced price escalations, into 1980. Delta went along reluctantly, declaring in advertising that began in 1979 that it "will not be undersold."

▪ Delta, the world's largest operator of low-cost night coach flights, also offers major discount fares. The airline is one of a limited number of carriers offering a system excursion fare that permits travel throughout the Delta domestic system. In 1979, the airline led the industry in the move to simplify discount fares. It introduced the now industry wide "Super Savers" to replace 47 old discount fares.

While discounting has continued, fuel prices have been a major problem. By the end of 1979, the average price per gallon was approaching 80¢, up from a 1973 average of 12.03¢. The price would seem low to a motorist, but every 1¢-per-gallon increase adds approximately $12,000,000 to Delta's annual fuel bill.

The airline spent $16,900,000 in newspapers and $5,416,000 in spot radio in 1979, according to Delta. Another $3,645,000 went to spot tv, $2,693,000 to outdoor and $2,626,000 to magazines, according to Delta. The portion allotted to unmeasured media was $2,220,000, bringing the 1979 total to $33,500,000, Delta reported.

According to measured media sources, Delta spent $18,117,000 in newspapers in 1979 and $5,939,100 in spot radio. The total was spent for passenger advertising, except for $18,700 in magazines to advertise its air freight service.

DuPont

	1979	1978
Sales	$12,572,000,000	$10,584,000,000
Earnings	$939,000,000	$787,000,000
Advertising*	$89,380,700	$70,000,000

* U.S. only, estimated by AA

E.I. DuPont de Nemours & Co., Wilmington, Del., the 52nd largest national advertiser, boosted its advertising budget 27.7% to an estimated $89,380,700 in 1979. Earnings, based on sales of $12,572,000,000, rose 18.9% to $939,000,000, a primary result of strong performance in overseas business.

The largest chemical company in the U.S., DuPont reported worldwide advertising expenditures of $109,000,000 in 1979, up 17% from the 1978 worldwide total of $93,000,000.

DuPont's fiber sales totaled $4,100,000,000, about 20% more than in '78 and about 32% of corporate sales. International fiber sales rose 41%, while domestic sales were up 13%; but DuPont reported that profitability dropped because selling prices lagged behind increasing petrochemical feedstock costs. Worldwide overcapacity also depressed profitability of Dacron and Orlon fibers, the company said.

Chemicals, plastics and specialty products (CPS) had total sales of $8,427,000,000 in 1979, 18% higher than in '78. Thirteen per cent of that increase represented domestic sales.

CPS sales in 1979 accounted for 67% of corporate sales, comparable to the 1978 figure.

Sales of the specialty products, which include electronic products, finishes, explosives, agricultural chemicals, medical and printing increased 15% in 1979 to $3,400,000,000. Net income, however, was up only slightly—from $278,000,000 to $281,000,000—primarily because of rapidly rising precious metals costs in the photosystems business, along with decreased demand for automotive finishes.

For the first half of 1980, DuPont sales were $6.980 billion, up 11% from '79, and earnings were $421,000,000, down 12% from $481,000,000 a year earlier. DuPont noted that declines in housing and automotive categories, due to the recession, spread to other markets in the second quarter "affecting most of our product lines."

Silverstone, a kind of nonstick cookware surface first introduced by DuPont with print ads in 1976, now outsells the company's Teflon three to one. Showing 70% household awareness, Silverstone, in '79 and continuing into the '80s, is breaking records each month in dollar sales and market penetration, according to the company.

DuPont's fabrics and finishes budget has accelerated far ahead of inflation since 1976, and the specialty products business as a whole accounted for 30% of total company net income in 1979. DuPont president Edward G. Jefferson said he will seek to expand the rapidly growing division in the '80s.

Chemical sales, meanwhile, totaled $2,133,000,000 in 1979, up 18% over 1978. Net income was $135,000,000, up 9%. That figure included a $35,000,000 charge resulting from a mid-year decision to discontinue the production and sale of dyes, an unprofitable business for several years. Plastics, also included in the CPS segment, accounted for a net income of $237,000,000 based on sales of $2,834,000,000, a 22% increase over 1978.

Capital expenditures in 1979 totaled $929,000,000, an 18% increase over the previous year. DuPont reported that the capital needs were met entirely with internally generated funds and that outstanding debt increased only slightly during the year.

DuPont's largest ongoing capital projects are expanded facilities for Kevlar aramid fiber, a new adiponitrile production plant; a new finishes facility; modernization of the neoprene process, and expanded manufacturing capacity for Mylar film.

- Of DuPont's $37,771,700 in total measured media spending, $5,900,000 went to Silverstone coating, which continued to show rapid growth in sales and earnings. Expenditures were spread among magazines, $3,691,900; network tv, $2,058,200, and spot tv and newspaper supplements, according to Leading National Advertisers.

Having traded advertising priority with Silverstone, Teflon received $3,276,800 in measured media support, with $3,158,000 going to magazines. Spending for Flair Squares home wall tiles totaled $2,865,200 while Lucite home paint received $2,418,600.

Measured media spending as a whole generally was split between magazines and network tv.

In September, 1979, an administrative law judge dismissed charges by the Federal Trade Commission that DuPont had attempted to monopolize the titanium-dioxide pigment market in the U.S. with unfair methods of competition. The judge ruled that DuPont's growth in the market was a result of "intelligent planning" and the use of a chloride development process chosen in the early '60s. The FTC has appealed the decision to the full commission and, although confident of a positive outcome for DuPont, spokesmen have not guessed as to when a decision will come.

Looking to the future, DuPont continues its research program to decrease dependence on oil and natural gas derivatives as sources of process heat. By the mid-1980s, DuPont expects coal, oil shale and tar sands to be more economical energy sources.

The company is now on a systematic conversion schedule to fuel boilers with coal rather than natural gas, and the new methanol plant in Deer Park, Tex., uses vacuum-resid as a feedstock.

Eastern Air Lines

	1979	1978
Sales	$2,881,526,000	$2,379,564,000
Earnings	57,631,000	67,257,000
Advertising	40,400,000	34,800,000

Eastern Air Lines, Miami, the 88th largest national advertiser, increased its advertising 16.1% to $40,400,000 in 1979.

The airline reported the second highest earnings in its history during 1979, reaching $57,631,000, but down from a record high in 1978. Revenues increased 21.1% to $2.88 billion.

Operating expenses increased 21.4% to $2.77 billion, and fuel costs increased by 58% to $677,200,000. The airline's load factor (percentage of available seats occupied) rose from 64.5% to 67.2%, the second highest load factor among U.S. trunk carriers.

Available seat miles rose 10.1% to 43.1 billion. In terms of revenue passenger miles, Eastern was the largest in 1979 with 28.9 billion. In number of passengers carried in 1979, Eastern's total of 42,236,000 was the largest in the free world.

- Eastern's advertising, which traditionally has covered three basic areas—business travel, vacation selling and its corporate effort featuring Frank Borman, the airline's chairman, president and chief exec, as spokesman—has shifted to reflect the industry's current marketing environment which emphasizes new route entrance and aggressive discounting.

Eastern continued expanding service from its Atlanta and Miami hubs with the following new routes: Atlanta-Salt Lake City, Atlanta-Denver, Miami-Guatemala City, Atlanta-Norfolk, Atlanta-Phoenix, Atlanta-Seattle, Atlanta-Albuquerque, Atlanta-Tucson, Atlanta-Reno and Atlanta-Rochester, N.Y. Two additional routes are Dallas-Tucson and Phoenix-Tucson.

Route expansion has continued in 1980 with Eastern joining the highly competitive transcontinental battles with new service effective June 1 between New York-Los Angeles, New York-San Francisco and, on June 15, Miami-Los Angeles. On June 1, Miami-Barbados service also was added. On July 2 service also began on more new routes: Atlanta-Las Vegas, Atlanta-El Paso, Houston-El Paso, Salt Lake City-Seattle and Las Vegas-Reno.

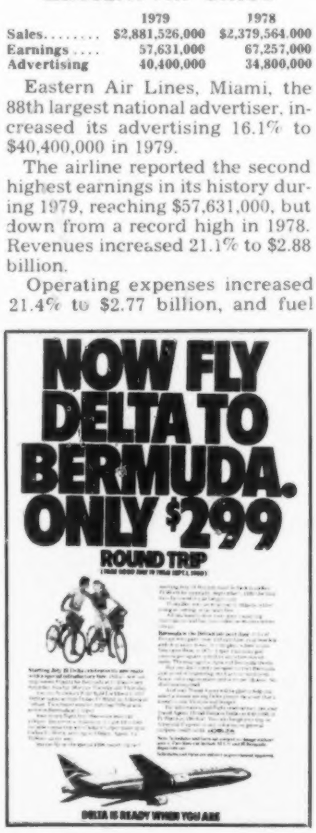
The new route introductions have been accompanied by heavy start-up advertising in all media. In the case of the New York-California service, marketed under the banner, "Eastern's Trans-Con," the airline introduced very aggressive pricing with reduced first class and coach fares and an even lower advance purchase round trip discount fare of $149 each way.

- Eastern has recently taken a number of other aggressive fare actions designed to stimulate discretionary travel and also to get travelers out of their automobiles and into the air.

Effective through Sept. 15, Eastern is offering to fly children free to and from Florida on Tuesdays, Wednesdays and Thursdays (one per adult) in conjunction with regular Super Saver discounts that can save adults 35% to 45% off regular coach fares.

For summer travel, Eastern also has introduced a special Senior Citizens fare allowing people 60 years of age or older to fly for 50% off the regular daycoach fare to 16 Florida cities.

The airline continues to offer its innovative Unlimited Mileage fare, initiated in 1977. Under the fare plan, for $462 to $496 each, two adults traveling together can take an almost unlimited 21-day tour of the airline's domestic and international destinations, excluding Canada. A special Unlimited Mileage fare for one person is available at a higher charge.



NOW FLY DELTA TO BERMUDA. ONLY $299
ROUND TRIP
DELTA IS READY WHEN YOU ARE

Delta Air Lines offered special fares to vacation spots, such as this one to Bermuda, for a specified time period.

Eastman Kodak Co.

	1979	1978
Sales	$8,028,231,280	$7,012,923,000
Earnings†	1,000,764,000	902,284,000
Advertising*	87,751,300	86,071,700

† Worldwide
*AA estimate

Eastman Kodak Co., Rochester, N.Y., the nation's 53rd largest advertiser, increased its U.S. advertising budget a slight 2% in 1979, to an estimated $87,751,300. Now one century old, Kodak's youth continued to spring eternal with the introduction of a rash of new products—new cameras, films, papers, machines.

Kodak's worldwide sales of $8,028,231,280 were up 14% from the $7,012,923,000 rung up in 1978. Those worldwide sales included another record high of $6,458,261,000 (also up 14% from the year before) for the photographic division and $1,776,977,000 for the Eastman chemicals division, up 16% from '78's total of $1,531,900. (The 1979 sales of these divisions should be reduced $1,087,600, the amount that figured in inter-divisional and intersegment sales.

- For the first quarter of 1980, Kodak's worldwide sales climbed to $2.13 billion, up a strong 30% over 1979's first quarter reading of $1.64 billion. Worldwide net earnings were up 9% to $215,900,000, as compared with the 1979 net earnings first quarter figure of $197,500,000.

For the year of 1979, Kodak reported "While all market categories showed positive performances, strong consumer product sales overseas and impressive gains for Kodak business products in the U.S. and Canada highlighted the year's results." The year marked a milestone for Kodak—the first time in the company's 100-year history that both sales and earnings crested the $1 billion peak.

Forever on the hunt for the new and improved, Kodak spent $459,000,000 in research in 1979, an increase of 18% over its 1978 expenditure. Confronted with soaring silver prices (up 361% by the end of '79), the company persisted in its two-year search for a silver substitute.

Since breaking into the instant camera market in 1978, Kodak has garnered a 40% share of the estimated $2 billion market. Instant camera sales now account for an estimated 26% of the company's bottom line.

Kodak's measured media spending for instant cameras was $12,132,800 in 1979, as compared to $12,543,300 in 1978. The company also spent $244,200 in the six measured media on instant film and an additional $3,957,400 for Colorburst instant cameras and film.

Out of a total of $34,065,900 spent in network tv, Kodak allocated $10,482,300 for instant cameras; $11,352,200 for Ektra cameras, and $5,678,900 for film. A $14,565,200 investment in magazines included $2,449,700 for Colorburst cameras and film; $3,995,000 for Ektra cameras and $1,232,200 for film.

The past year was a bustling one

Source: Figures are from Broadcast Advertisers Reports, and supplied to Leading National Advertisers.

for Kodak and new camera introductions. The company introduced six new cameras—three instant cameras (two motorized) and three pocket-size models.

■ Debuting last year was the Colorburst 50, Kodak's first instant camera with fixed focus and motorized print ejection (retailing for $44.95); the Colorburst 250, replacing the Colorburst 200; the Handle 2, replacing the Handle and complete with an electronic shutter which operates from 1/3000th of a second to two seconds at a fixed aperature of F18.

Kodak extended its Ektra line with the addition of Ektra 200 with normal focal-length lens with flipflash; the Tele-Ektra 300 with normal lens and tele lenses using flipflash; the Kodak Ektralite 500 with normal lens and built-in electronic flash and the Kodak Tele-Ektralite 600 which has both normal and tele lenses and built-in electronic flash.

With the new cameras, comes Kodak's new film—PR 10, a film in which images begin to form in 30 seconds and the picture is complete in 90 seconds.

To promote its line of pocket cameras, Kodak stuck with the star of "The Little House on the Prairie," Michael Landon. Mr. Landon and his "family man image" tapped the talents of his own family (wife, Lynn; son, Chris, and daughter, Shawna) to help sell Kodak's Ektra and Ektralite cameras. Mr. Landon also promoted Kodak's color paper in 30-second spots last summer.

The company continued its ad campaign theme "With Kodak film, you've got what it takes," in spots starring people taking delight in reliving moments captured in film.

Kodak broke a major new campaign this year during the Winter Olympics, held in Lake Placid, N.Y. Kodak became "America's Storyteller" in spots that are a montage of people with their snapshots—and some snappy remarks. Created by J. Walter Thompson Co., New York, the campaign is working as an umbrella for all the company's promotional efforts. The intent of the "storyteller" approach is to encourage people to snap shots that tell a personal story every day of the year, rather than have picture-taking as a special occasion pastime.

Supporting the campaign, and in an effort to further boost sales, Kodak tapped the rebate in 1979 in several programs. The company gave a $5 rebate on the purchase of a Colorburst camera with an additional $5 on the purchase of five packs of Kodak instant film. (Network tv supported that drive.)

In another line of Kodak's business, Kodak introduced a new Ektagraphic audioviewer projector, with sound recording and playback capabilities, and at a midwinter radiological conference, a new X-Omat M20 processor, models 1 and 2. In papers, Kodak came out with Etracolor—in a year when paper sales reached record levels.

With the economy worsening and the industry softening, Kodak was forced to lay off 500 workers last year—compared with the 2,500 laid off by competitor Polaroid Corp.

In light of the skyrocketing cost of silver, Kodak increased the cost of its film—color packs went up 25%, black & white were up 35% and phototypesetting papers were up 75%.

Kodak became part of Walt Disney Productions' latest venture—the $800,000,000 EPCOT center—or the Experimental Prototype Concept of Tomorrow. In Kodak's honor, the progenitors of Mickey and Minnie Mouse have come up with two new (Kodak) characters—"Dreamkeepers" and "Figments."

In 1979, the U.S. Supreme Court tossed out an appeal from Berkey Photo over a ruling that threw out almost all of the company's $87,100,000 victory over Kodak. With this action, the next judicial step is for a new trial to be held in federal district court on several Berkey claims.

Still pending is a 1976 suit in which Polaroid charged Kodak with infringing its patents for instant cameras and film.

Esmark Inc.

	1979	1978
Sales	$6,771,883,000	$5,863,962,000
Earnings	92,423,000	80,100,000
Advertising	170,547,000	141,431,000

*** Fiscal year ending October, 1979**

Esmark Inc., Chicago, the 17th largest advertiser, increased its advertising and promotion spending by about 20.6% to $170,500,000 in 1979. Total sales for the holding company rose 15.5% to nearly $6.8 billion for the fiscal year ending Oct. 27, 1979, while net earnings were up 15.4% to $92,400,000.

Swift & Co., the meat-packing giant from which Esmark was formed in 1973, disappointed top management in 1979 as the fresh meat and consumer divisions dragged down profits to $26,300,000 from $40,200,000 in the previous year, a 34.5% decline on an 11.2% sales increase to $4.5 billion.

In the 1979 annual report, Esmark president Donald Kelly said: "I believe the time has come for performance rather than promises. Progress at Swift during the 1980s will be judged by bottom line profit result improvements."

In June, Mr. Kelly carried out that threat when Esmark announced the closing of three meat-packing plants and the intention to sell the rest of the fresh meat division of Swift, a move which could amount to a writeoff as high as $300,000,000; that loss would be offset by the simultaneously announced plan to sell the highly profitable Vickers Energy Corp., which last year contributed 13.9% of Esmark's sales but 41.2% of its operating profit.

■ The upshot of the proposed massive restructuring is likely to be a cash-rich company in search of acquisitions, probably in the consumer products area where Esmark has had so much success with International Playtex and STP.

Despite the poor showing in earnings last year, a number of Swift's consumer products made substantial market share progress.

Swift became the leader in the brand-name breakfast meats category for the first time in many years and achieved record high market share for Brown 'N Serve sausage, which had measured ad spending of almost $1,800,000. Sizzlean attained the largest national distribution of any branded bacon or breakfast meat product, as measured advertising totaled nearly $4,100,000, including $3,400,000 for network tv.

In 1979, the basic Butterball turkey brand achieved record volume, as it continued to outsell the next six brands combined. With turkey supplies higher than a year ago and margins lower for all producers, Butterball still had its second best year in terms of profits, with measured ad spending of almost $3,500,000.

Peter Pan peanut butter reversed a market share decline and made significant gains in sales volume as a result of product reformulation and aggressive marketing, including new advertising, heavier spending and heightened sales efforts. Measured ad spending totaled $4,727,000, including more than $2,800,000 on network television.

DANSKINS ARE NOT JUST FOR DANCING
Danskin

Esmark Inc. has stretched its diversification efforts even further with its February, 1980, acquisition of Danskin Inc.

■ Homemade Soup Starter, Swift's successful new dry soup product—first distributed nationally in 1978—became a leader in the dry soup category and achieved the most widespread distribution of all Swift products in 1979 in terms of population reached as measured by stores through which the product is sold.

Swift spent nearly $6,300,000 in measured ad spending to promote Soup Starter. Still in limited markets is a spin-off product called Stew Starter.

Of continuing importance in the consumer products division is new product development, although the pace slowed last year when it became apparent that Swift's profits would be off. New products still in limited distribution include Firebrand, a bacon-like all-beef breakfast strip on which Swift spent almost $1,100,000 in measured advertising last year, and the Butterball turkey line extensions now in national rollout with national distribution planned for late 1980. The Butterball turkey products include Li'l Butterball, stuffed Butterball and Butterball breast of turkey.

Over-all advertising and promotion for all Swift brands increased by 24% in 1979 to more than $75,000,000, the company said.

Estech, Esmark's chemical and fertilizer division, had a 6.8% sales increase to $526,500,000 while operating profit slumped 10.9% to $35,000,000 compared with $39,300,000 in the previous year and $40,700,000 in 1977. Losses in the lubricating oil re-refining business partially offset gains from the dental equipment business and increased fertilizer earnings on higher prices and volume. However, excluding a one-time gain in 1978 from the sale of an interest in a potash mine, Estech increased earnings 10.4% in 1979.

Estech markets brand-name and private label fertilizers for the consumer and for professional lawn care businesses. In 1979, fertilizer revenues increased 21% to over $40,000,000. Estech's Vigoro brand, supported by almost $1,300,000 in measured ad spending, is the second largest selling fertilizer in the U.S.

■ Vigoro's sales were up 21% last year, aided by an advertising campaign featuring four-time U.S. Open winner Jack Nicklaus. In the $200,000,000 professional lawn care market, Estech's aggressive marketing of the Par-Ex brand name line of products increased revenues 34% last year.

Estech has two other subsidiaries, Estech Specialty Chemicals Corp., which manufactures and sells industrial chemicals, adhesives, petroleum waxes and lubricants, and Doric Corp., which sells to the dental industry through the Patterson Dental Co. and Centra brand name. Doric's second division is the Engineered Products group which manufactures precision engineered parts.

Estech is continuing an effort to strengthen its corporate identity with ads placed in several trade publications in 1979 that are scheduled to run throughout 1980.

During 1979 International Playtex had fiscal 1979 sales of $520,500,000, an 11.4% increase over the previous year. Earnings were $54,500,000, just a shade under 1978 results, while the division contributed 7.7% of Esmark's revenues and 22.7% of operating profits.

Last year saw a major recovery in the international division (including the acquisition of Playtex-Wallco in Sweden). On the domestic side, the intimate apparel division experienced a slow first half due to trade inventory retrenchment, but finished strongly on the company's basic lines as well as the introduction of the fashion-oriented Givenchy Underdressings collection of bras and panties.

Playtex supported its bras and girdles with more than $9,000,000 in measured ad spending, while the Givenchy line received an additional $1,400,000 million for bras and lingerie, plus about $700,000 for pantyhose by the high-fashion designer.

The Playtex hosiery division continued strong in its growing market segment, accounting for about 8.9% of Playtex sales and profits. Measured ad spending totaled $104,500.

Heavy competition from new tampon brands introduced by

MARKETING PROFILES

Johnson & Johnson and Procter & Gamble left a sales plateau and a slight profit decline for the family products division, with market share down from 35.1% in 1978 to a projected 27.5% in 1980. Measured ad spending in this category totaled more than $4,900,000 last year.

Playtex re-entered the sanitary napkin market with Maxi and Mini Pads tested in St. Louis and Dallas.

■ Playtex girdles received more than $1,800,000 in measured advertising plus $1,200,000 for multi-product Playtex ads.

During the latter part of 1979, Playtex added to its family products base by acquiring the Felicity glycerine soap brand, which it plans to market nationally. Felicity had sales of $1,700,000 in 1979.

In addition, Playtex expanded into shampoos and conditioners through a marketing agreement with the Jhirmack Co., Redding, Ca., enabling Playtex to sell this company's products to the otc market. In February, 1980, Playtex announced the acquisition of Danskin Inc., a formerly privately held company that is a leading manufacturer and marketer of active knitwear and other trendy skin-tight fashions such as leotards and swimsuits.

Vickers Energy Corp. had a stellar year as oil prices skyrocketed. Sales were up 49% to $937,000,000 from $627,800,000, while earnings tripled, reaching $98.9 million compared with $32,000,000 in 1978. Vickers accounted for 13.9% of Esmark's revenues and 41.2% of the parent company's operating profits last year.

■ A total of 21 new Vickers service stations were opened in 1979 and 19 marginal units were closed. There are currently nine more service stations under construction, and Vickers plans to continue converting its stations to 100% self service.

Measured ad spending for Vickers gasoline was $120,600 for spot tv, while dealer services and general corporate promotion received a combined $98,900 in measured spending.

Esmark's proposed restructuring depends on the sale of Vickers to pay for unfunded pension costs at Swift plants in order to make them attractive to buyers and to offset other writeoffs. Analysts think Vickers, which includes valuable land held by its wholly owned TransOcean exploration subsidiary, will fetch a minimum of $600,000,000 and possibly twice that much.

Esmark's newest acquisitions are STP Corp. and International Jensen Inc. (formerly known as Pemcor). Together they make up the high fidelity and automotive products division, which had a 27.6% increase in revenues to $279,000,000, or 4.1% of the corporate total. Operating profits for the division were up slightly from $24,300,000 to $25,200,000, accounting for 10.5% of Esmark's operating earnings.

STP Corp. markets automotive care products such as oil and gas treatments, motor oil, and oil and gas filters. In 1978 it introduced Son of a Gun!, a protective spray for vinyls, rubber and leather, which received about $2,000,000 in measured ad spending last year. The company also introduced STP Foaming Engine Degreaser last year, which is a water-based product that contains no kerosene.

STP Gasoline treatment received $4,400,000 in measured media and unit sales were up 34%. STP Oil Treatment was backed by $2,200,000 in measured ad spending. STP Oil Treatment is the leading oil additive in the world. Tests showing that it saves oil keyed a new ad campaign. International Jensen makes and distributes automotive audio equipment and home high-fidelity sound equipment, including the well known Jensen car speakers and receivers which received $2,400,000 in measured media last year.

Ford Motor Co.

	1979	1978
Sales	**$43,513,700,000**	**$42,784,100,000**
Earnings	**1,169,300,000**	**1,588,900,000**
Advertising*	**215,000,000**	**210,000,000**

***AA estimate**

Ford Motor Co., Dearborn, Mich., the 10th largest national advertiser, spent $215,000,000 on 1979 advertising, up from $210,000,000 in 1978. Ford lost an estimated $1 billion in North America Operations but recouped it overseas.

"All things considered, I would say we had a pretty good year," said chairman Philip Caldwell, who became the first non-Ford family member to head the company. He succeeded Henry Ford II who stepped down prior to the annual meeting. Earlier he turned the reins of ceo over to Mr. Caldwell who had been president. Mr. Ford remains as chairman of the finance committee.

Ford's ad spending came in the face of a fuel shortage and turn to small cars, many of them imports, that saw its U.S. sales of cars and trucks slide 17% and the company's market share shrink to 20.7% from 23.6%.

Of the $215,000,000 in ad expenditures, a total of $176,000,000 was spent in major media, Mr. Caldwell said. Other spending, including joint advertising, direct mail, outdoor and advertising for diversified product operations, amounted to $38,000,000, running the figure to $215,000,000. Sales promotion of another $38,000,000 rounded out the total to $253,000,000.

Dollar sales worldwide rose 2% to $43.5 billion from $42.8 billion but automotive operation sales declined $141,000,000 to $39.9 billion while nonautomotive sales increased $871,000,000 or 32% to $3.6 billion. Profits worldwide of $1.169 billion dropped $420,000,000 from $1.6 billion in 1978. The earnings decrease "was more than accounted for by a decline in U.S. earnings which resulted from lower volume, a smaller Ford market share as demand shifted to smaller cars and a less profitable mix of vehicles," the company said.

■ The slump in North America also "more than accounted" for unit sales falling off on a worldwide basis, the company said. Sales of cars, trucks and tractors totaled 5,940,000 units, down from 6,557,000 or 617,000 units. About half the decline in U.S. sales came in the fourth quarter when 1980 models were introduced in what usually is the busiest and most profitable period.

Ford sold 2,082,398 cars in the U.S., down from 2,679,587 the year before. Truck sales fell to 1,145,079 from 1,410,735 but still were good enough for sales leadership for the third straight year. Market share for trucks was off slightly to 32.6% from 32.8%. The total of cars and trucks was down to 3,624,074 from 4,492,562. Worldwide sales were 5,806,130 vehicles, down from 6,461,351.

Ford measured ad spending increased by almost $5,000,000 to $177,000,000. As usual, the bulk went into tv—$118,000,000. Within that category, network tv showed an increase to $89,400,000 from $79,510,600 while spot tv declined to $28,600,000 from $31,287,900. In 1978, tv spending was about $110,798,000.

Magazines shot up to $37,000,000 from $23,744,900 while newspaper expenditures at the factory level dropped to $11,000,000 from $27,209,700. Radio rose to $11,000,000 from about $7,000,000.

It was the same story within the car divisions. The Ford unit spent $119,298,000 in measured media, up from $116,879,100. Tv spending rose about $10,000,000 to $79,572,100. The use of magazines increased to $24,933,200 from $18,951,400 while newspapers fell to $7,396,700 from $19,109,700. Radio was up a bit to $7,396,300 from $6,358,300.

Source: Agricultural Marketing Information Service (Agricom).
*Agricom reported $2,646,178 for Shell last year but restated the figure in this year's report.

■ Lincoln-Mercury spent $52,038,000 on measured media, up from $50,590,400 with major reversals in the allocation of tv expenditures. The emphasis was on network tv with $26,279,000 compared with $19,330,100 a year ago. Spot tv dropped by half to $8,430,000 from $17,705,400. Magazine outlays went up to $10,875,000 from $4,705,600 and newspaper spending fell to $3,226,000 from $8,100,000.

Ford division's car sales slumped some 300,000 units. The only car lines showing gains in 1979 over 1978 were the three smallest. Mustang jumped to 304,053 units from 199,760 and the venerable Pinto went to 187,708 from 167,880. Fiesta was up a bit to 78,109 from 76,145. Fairmont was still the leading Ford division nameplate with sales of 338,619, down from 405,780,000. The newly downsized LTD and Thunderbird saw sales also shrink. The full-size Ford went to 245,565 units from 332,930 and T-Bird shrank about a third to 215,698 from 304,430. Granada was down to 141,737 from 219,026.

Ford trucks fared no better in the public's quest for maximum fuel economy. The total shrank to 2,723,102 from 3,256,501. Only the imported Courier minipickup showed a gain—from 70,557 to 78,088. Heavy trucks, including mediums, lost relatively little, moving to 92,580 from 99,015. Vans and pickups were the hardest hit. The pickups fell to 718,158 from 864,046 and vans dropped to 169,545 from 287,764. The four-wheel-drive Bronco fell to 69,724 from 82,343.

As at Ford division, small cars—and the specialty XR-7—were the only ones showing an increase at the "upscale" Lincoln-Mercury division. Bobcat, twin of Pinto, was up to 44,674 units from 30,201 and Capri (Mustang) rose to 90,850 from 18,035. Drops were precipitous in the bigger cars and even the compact Zephyr fell to 99,335 from 120,781.

The big Lincoln went to 60,797 from 97,009 and Mark V-VI dropped to 56,888 from 75,731. Mercury plummeted to 94,654 from 136,719. It had been the sales leader in 1978. That mantle fell to the XR-7 (T-Bird) with 1979 sales of 121,184, up from 159,687. Versailles was still the smallest seller, with 13,586, down from 15,747. Total sales fell to 641,270 from 772,064.

There was no hint of the sales ills to come in the fall of 1978 when the 1979 models were bravely put on sale. Indeed, it was the opening of Ford's 75th anniversary, complete with a two-hour tv special that was interrupted just five times for commercials—3½ minutes for the opening and 2½ minutes for the close. Comedian Bill Cosby was still the corporate spokesman saying, "Ford wants to be your car company."

■ Ford division entered the marketing fray with record ad budgets for an introduction. "Nothing stimulates a market more than a change," said Walter Walla, the division general manager, who expected a booming market. He didn't get it and later in 1979 took early retirement.

Mustang was new for 1979 as was the newly downsized big car, the Ford LTD. Ford was after its "traditional" small car leadership title. It was stolen by imports as gas shortages swung the market to foreign small cars. That hurt Ford because "the company's share of the small-car segment was lower than its shares of other segments," the company acknowledged.

Lincoln-Mercury also had a downsized big car, the Marquis, and the Mustang twin, the Capri. But it also had still large Lincoln Continentals and Mark Vs that it perforce sold as "the last of the breed." L-M said it would be hard-pressed to keep up with the expected demand for the big cars and that proved to be the case until the late-spring gas crunch.

- By spring, L-M and Ford divisions were thinking more about the coming General Motors X-body compacts than about gas or the imports. L-M planned a $3,000,000-plus spring campaign against the Buick and Oldsmobile X-cars. The division was backed by sales running 19% ahead of a year ago and market share had boomed to 7.1% from 6.2%.

Ford was pushing its compact Fairmont along with the elderly Granada compact. The emphasis was to counteract the strong mpg story GM was expected to tell. Mustang continued its "new breed" approach and was the Indianapolis 500 pace car. Replicas of the pace car were expected to be hot items. Ford ended up with heavy dealer incentives to clear them out.

No sooner was the spring ad campaign set than Kenyon & Eckhardt dropped its bomb: It was leaving L-M for Chrysler Corp. in a $120,000,000 account change. It left L-M surprised and with little time to ready 1980 model introductory ads.

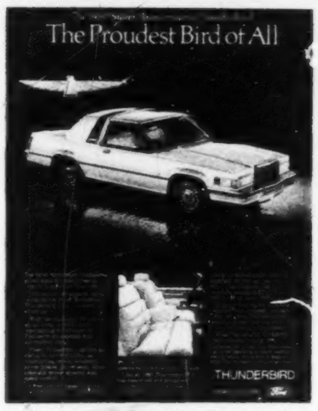
The search quickly narrowed to the former Chrysler agencies, Young & Rubicam and BBDO, with Ogilvy & Mather in the running long enough to lose the Mercedes-Benz account. Wells, Rich, Greene was a dark horse. Y&R, considered the front runner, did win L-M but WRG came on to take Ford corporate and other Ford accounts relinquished by K&E.

Y&R also gave Ford a second agency with international capability to go along with J. Walter Thompson Co., which was shakily hanging on as the Ford division agency.

- JWT had to pay Ford a "six figure" amount after billing irregularities were discovered by Ford auditors. JWT's sales promotion division failed to pass along volume credit discounts and a JWT art subsidiary took a double billing markup. JWT named Joseph W. O'Donnell as the fourth general manager of its Dearborn office in four years and he promptly closed down the sales promotion division. Ford took steps to prevent repeat of the billing problems. After all the changes, Ford gave JWT a vote of confidence.

Ford launched a $1,500,000 campaign to clear out a 75-day supply of light trucks prior to introducing 1980 models. Ford also launched a prelaunch corporate campaign, the first by WRG. It replaced comedian Cosby with a "Ford—that's incredible" pitch complete with film of Ford's Rouge plant. It also promoted tours of the facility. "If you could see tomorrow the way it looks to us today, you'd say incredible," ran a theme song. Nine months later, Ford was to cancel the Rouge tours after it closed the plant after some 52 years in a cost-cutting move.

- Ford division spotlighted the Thunderbird which finally came up for downsizing and spiffed up the other car lines. LTD gained a Crown Victoria model at the upper end and actor Terry Thomas complained in tv spots, "Your LTD was just as quiet as our Rolls-Royce. It's hardly cricket."



Influenced by the increasing small-car ardor of the U.S. consumer, even Ford's "proudest bird of all" has clipped wings.

Mustang was "certified" by the U.S. Auto Club as a "true sports car." Ford trucks, redesigned, became "the first new trucks of the '80s." That theme spilled over to the entire Ford division lineup with "a better idea for the '80s." Shortly before the campaigns broke, the division added a fuel economy campaign on top of the regular ads. The tv and 50-newspaper market drive talked of leadership in some cars and trucks and improvement in all. The nearly $2,000,000 campaign was added when official mpg figures were released.

Lincoln-Mercury was still struggling to clear out 1979 models with indirect rebates ranging from $700 to $1,300 on full-size models. Ford joined in with rebates that included the '79 trucks and cars. L-M had hopes that its downsized Lincolns and Mark VIs would catch the fancy for higher mpg after the "last of the breed" left the scene. The new luxury models were the subject of an eight-page magazine insert and got a heavy tv splash. The task was to convince buyers that luxury cars weren't gas guzzlers. Versailles, in its last model year for a while, was the car for those "who enjoy having things very much your own way."

- The first 10-day sales report of the new model season was prescient. Although Ford division sales rose 10% only Fairmont and T-Bird were winners. The LTD dropped 40%. Things were worse on the L-M side. Its biggest losers were the cars that were supposed to be the biggest winners—Continental and Mark.

Ford and L-M countered with dealer incentives (indirect rebates) to clear out the 1979s so dealers could sell 1980s.

The buys were over and above the fall introduction advertising and featured announcer Ed McMahon for Ford's "Countdown clearance." L-M had a "Smart buyer's sale." The ads said dealers would be using the incentives to cut prices.

Ford division readied a midyear push that would concentrate ad efforts on the car lines that were selling. "Special package" option cars were to be highlighted but the division was rejecting direct rebates as "distress" marketing. Actress Lauren Bacall made tv spots for a new four-door Fairmont Futura model and actor Peter Graves was talking up the LTD Crown Victoria. It was the first product pitch for Mr. Graves although he did serve as a pre-Cosby corporate spokesman.

Ford waited until February when all its dealers were gathered in solemn conclave at the National Automobile Dealers Assn. convention in New Orleans to announce it would follow GM into direct rebates.

- The rebates followed the idea of pushing the cars that were selling. But Ford and Lincoln-Mercury were convinced there was life after rebates and planned to follow the $15,000,000 to $20,000,000 rebate splurge with a similar spring effort. The rebate program budget was estimated at $75,000,000 including the advertising.

Rebates helped the Fairmont-Zephyr in February but the scattered winners at Ford and other car companies didn't stop sales from slipping another 12% or so.

It also wasn't enough to keep William O. Bourke from taking early retirement as exec vp of North America Operations. He left when Mr. Ford removed himself as chairman, gave the job to Mr. Caldwell and the president's job went to a Bourke rival for the post, Donald E. Petersen, formerly exec vp, Ford International automotive operations.

- With cars and light trucks in sales trouble, Ford turned to medium trucks—an admittedly stable market of some 160,000 units a year. "It's still a big piece of the total truck market," said Allan R. Krueger, heavy truck sales and marketing manager at Ford division. Chevrolet and Ford squared off using new diesel engines as weapons. Experts said the medium truck market could grow from 8.6% diesel to 30% diesel and both truck makers wanted in.

Both hunted the same buyers using the same media. It's a combination of specialized use magazines and general business publications aimed at businessmen who, incidentally, operate trucks rather than truckers *per se*.

The oft-maligned Pinto proved again it was a survivor. Despite awards of $6,500,000 in personal injury cases (out of $9.8 billion still being asked) Ford was found innocent of reckless homicide in the Winamac, Ind., fuel tank trial.

Indeed, Pinto not only survived the publicity but was, in effect, being held over into the 1981 model year. Ford was making twice as many as it was selling with the idea of using the inventory to backstop its 1981 front-wheel-drive replacement, the Escort. Ford feared it might not be able to meet the Escort demand. For the same reason, Fiesta was scheduled for continued importation.

Ford Parts and Service decided to go into the oil business with its Motorcraft brand. The oil, formerly available only through dealers, went public for do-it-yourselfers.

That followed Ford Parts' theme for its after-market parts of "Motorcraft . . . for sure" also aimed at do-it-yourselfers. Y&R handles that division.

Ford also put new emphasis on its service warranty plan through Ford Parts. It broke a major campaign in early 1979 for its 2-year-old plan which provides an insurance-like policy for new car buyers. GM also entered the competition calling its plan, "The option of the year."

One result was dollar sales of parts and accessories rose 7% in 1979 from the previous year with Motorcraft sparkplugs up 34%. Nearly one in five new car customers bought the extended service plan.

In addition to Pinto, Ford also had its problems with the Federal Trade Commission and the National Highway Traffic Safety Administration. Transmissions that allegedly jump from the park position into reverse were being probed by NHTSA with Ford saying it could find nothing wrong. The FTC found plenty wrong with a "hidden warranty" for four-cylinder engines with oiling problems—the "piston scuffing" case. The FTC and Ford came to an agreement under which Ford ends a practice of quietly fixing problems for only those who complain. The consent decree spelled out how Ford must promote the availability of plain language service bulletins. Ford not only has to use mailings to owners but must advertise in major media.

The FTC even named the media, making Uncle Sam a media buyer. "Imagine the federal government of the U.S. decreeing we spend so much money per year in advertising in certain publications," said Mr. Bourke, then head of Ford North America.

In the U.S., Ford Diversified Products Operation (tractors, aerospace, communications, steel and glass) "contributed significantly" to results, the company said.

Ford Tractor sales of 133,600 units in 1979 were the highest since worldwide operations were formed in 1965. Ford Aerospace & Communications had sales of $503,000,000, up from $447,000,000. Ford Motor Land Development completed construction of six office buildings in the Fairlane project in Dearborn. Construction started on twin 21-story office towers at Renaissance Center, Detroit.

Ford Motor Credit Co. had profits of $153,000,000, up 27%. In the U.S., Ford Credit financed 17% of Ford vehicles at retail and 65% of sales to dealers.

Advertising*	139,407,500	121,294,400

* AA estimate, U.S. only

General Electric Co., Fairfield, Conn., the 31st largest advertiser in the U.S., increased its domestic advertising spending by an estimated 15% in 1979 to $139,407,500. Worldwide ad spending increased to $279,562,000, a jump of 13% over 1978.

Bigger media outlays for such consumer products as flashbulbs and home burglar alarms contributed to the increase, while a trend toward general promotion of the GE brand continued in 1979 under the BBDO-created slogan, "We bring good things to life."

MARKETING PROFILES

The company increased its magazine, tv and network radio budgets while it cut its spot radio and outdoor advertising expenditures. It boosted its magazine budget $1,534,500, or 8%; enlarged its spot and network tv budget by 28%, and increased its spending on network radio by a full 377% to $842,000. Spot radio spending fell 4% and outdoor spending was cut by 51%.

▪ All of this advertising helped boost sales by 14% in 1979 to $22.46 billion, as earnings hit a new high of $1.41 billion, nearly a 15% increase.

In the first six months of 1980, GE continued to show some growth with earnings reaching $744,100,000, a 9% increase over the same period in 1979, on sales of $12.08 billion, up 13%.

The heads of GE's six operating sectors were subjected to closer public scrutiny than usual last year. In addition to individual responsibility for a significant chunk of GE business, each was regarded as an aspirant to succeed chairman Reginald Jones. Mr. Jones, now 63, is due to retire in two years, but past GE chairmen have established a tradition of jumping the gun a bit.

Consumer products and services—the most significant sector in terms of large advertising outlays—contributed $5.45 billion to company revenues and $407,000,000 to earnings.

▪ Each of the 11 individual product lines on which GE spent more than $1,000,000 in ad dollars in 1979 were in the consumer products and services sector.

These included color tv sets, $5,000,000; food processors, $2,-400,000; dishwashers, $5,500,000; flashbulbs, $1,400,000; microwave ovens, $3,000,000; home light bulbs, $1,100,000; refrigerator-freezers, $2,300,000; home air conditioning and heating systems, $1,-750,000; digital clock radios, $1,-150,000; coffeemakers, $1,150,000, and Zonar home burglar alarms, $1,500,000.

The company also spent $9,250,000 on multiproduct advertising.

One development of note was GE's move in '79 to unify the advertising applied to its various consumer items. Operating under the assumption that a consistent brand name appeal would benefit each product individually, GE shifted virtually all of its consumer product advertising to BBDO International.

The agency fielded a major, multiproduct campaign in the fourth quarter that wedded GE's products to the theme, "We bring good things to life." That signature has since become a hallmark of GE's individual product advertising.

New consumer products introduced during 1979 included a line of Light 'n Easy irons; the Great Awakening digital electronic am/-fm model with microprocessor technology; the Versatron countertop oven with family-size capacity, electronic controls and removable cleaning panels; a remote control tv system that allows viewers to program up to 20 channels for instant station selection; a programable videocassette recorder that, for each weekly period, permits recording of as many as five different programs at different times on different channels, and a tv chassis using 20% less energy on 19-inch color sets.

Also in 1979, GE announced that beginning in 1981 it would market the Halarc lamp—a $10 light bulb that is supposed to use one-third as much electricity and last much longer than conventional bulbs.

GE last year also chose its allies for the upcoming videodisc war when it signed an international *entente cordiale* with Japan Victor Co. and Britain's Thorn EMI. In choosing to align itself with JVC's disc format, the third and latest of the three announced systems, GE is pitting itself against its major tv competitors, most of whom have gone their separate ways.

The new consortium GE has elected to join will meet the Magnavox DiscoVision, a product in limited distribution involving the combined talents of Magnavox, Philips NV, MCA, IBM and Pioneer Electronic Corp., and a player developed by RCA, which won the backing of Zenith Radio Corp and CBS.

General Electric Credit Corp., GE's wholly owned finance subsidiary, turned in a strong performance last year. Earnings of $90,000,000 represented a 17% increase over the 1978 figure. Total receivables grew by $1.4 billion to $7.7 billion at the end of 1979.

Among its new programs, GECC introduced a major purchase card for use by consumers acquiring furniture and major appliances. It also began leasing foreign automobiles last year.

Industrial products and components accounted for revenues of $4.8 billion and net earnings to $272,000,000.

The company sustained its position during the year as the leading supplier of small electric motors. Besides supplying motors for use in GE products and those of other appliance and air conditioning manufacturers, motors were sold to the farming and mining industries.

GE also developed a new self-checking 600-volt relay that allows safe operation of punch press equipment, and it introduced new solid state photoelectric controls that permit more economical operation in material handling applications.

The power systems sector contributed revenues of $3.6 billion and net earnings of $114,000,000. The company made the first commercial shipment of an automatic meter reading system that allows remote reading and better load management.

Elsewhere, GE became a partner in a Taiwan joint-venture manufacturing operation to produce large steam turbine generators. The new company is called United Asia Electric Co.

Technical systems and materials contributed revenues of $6 billion and net earnings of $356,000,000. GE was selected during the year to develop a new solid state, three-dimensional radar system for the Air Force, while Genigraphics, GE's computer-generated graphic slide service, doubled both equipment sales and the size of its nationwide network of service centers.

GE's natural resources operations, mainly Utah International, set new highs. Revenues increased 22% higher in 1979, while earnings, which hit $208,000,000, increased 16%.

The remainder of GE's revenues and earnings were contributed by the international sector, which had revenues of $2.9 billion and net earnings of $65,000,000.

In the acquisitions area, a 1978 agreement by GE to buy Cox Broadcasting, one of the largest independent chains of tv and radio stations, fell through this year when Cox pulled out of the deal. GE attributed the development to the "inordinate" price demand in excess of the $500,000,000 it had originally agreed to pay.

General Foods Corp.

	1979	1978
Sales†	$5,959,600,000	$5,472,500,000
Earnings†	255,800,000	232,100,000
Advertising*	393,000,000	340,000,000

† For the fiscal year ended March 29, 1980 and 1979
*** AA estimate**

General Foods Corp., White Plains, N.Y., the 2nd leading national advertiser, upped advertising 15.5% to an estimated $393,000,000 in 1979, a year devoted to building a broad company base.

Worldwide, GF spent $403,900,-000 this fiscal year, an 8% increase due mainly to rate increases, especially in tv. GF's worldwide sales, which increased 9% to almost $6 billion, brought earnings up 10% over last year to $255,800,000.

In contrast to last year, when two of GF's product divisions sales showed a 1% to 3% decline, the three product categories this year show an average 9% sales increase in fiscal 1980. Packaged convenience foods brought in $2.8 billion, representing an 8% jump and 47% of total GF sales. Grocery coffee held 39.5% of the $4.7 billion market, to lead as the largest supermarket category in the U.S. Coffee sales increased 11% to $2.3 billion, for 39% of GF revenue. The Food-Away-From-Home division also increased sales 10% to $813,300,000, or 14% of total sales.

▪ The packaged convenience foods business was reorganized last April to "increase the effectiveness and efficiency of manufacturing and sales organizations," and to "refocus on business priorities." Three units were realigned into six separate divisions—beverages, Birds Eye agricultural products, breakfast foods, desserts, main meal and pet foods—each accountable for its own franchise and financial results.

Although packaged convenience foods attained good volume growth this year, earnings declined 15% due primarily to losses on carbonated candy products worldwide. Pop Rocks and Cosmic Candy, introduced in 13-week cycles, will no longer be marketed in the U.S. Both products were victims partly of health-related rumors and "a swift fall-off in the novelty effect."

GF's powdered beverages continued to dominate the market with Kool-Aid's 45% share backed by more than $21,000,000 in network and spot tv advertising, according to Leading National Advertisers Inc. Country Time, the leading lemonade mix, holds second place in the market with a 9.5% share and ad support totaling more than $11,000,000. Actor Harry Holcombe continues to represent the grandpa with "strong product identification" in Country Time's four-year-old Ogilvy & Mather campaign.

The division's big sellers again were Jell-O gelatin dessert and Cool Whip frozen topping, spending $12,596,400 and $10,094,700, respectively. GF's Cool Whip leads the topping industry, which grew 10% this fiscal year. And although many factors contribute to a product's growth, a spokesman said, Bill Cosby's comedy spots for Jell-O have helped buoy sales.

New arrivals in the division include Jell-O brand Pudding Pops, now expanding into additional test markets, and Increda Bubble bubble gum with bursting candy particles. Introduced this year as GF's entry to meet a demanding market, Increda Bubble met its sales objectives, GF said. Foote, Cone & Belding is the agency.

GF also broke into the dietetic dessert business this year with Anytime 50 calorie dessert treats, now in test markets. Anytime products come in four flavors, packaged in two 4-oz. cups, with a 59¢ retail price. Young & Rubicam has the product, now testing in Jacksonville, Fla., Omaha, Neb., and Rochester, N.Y.

O&M, New York, created for GF a non-sell nutrition message which explained the government's new dietary guidelines for Americans. The 16-week print campaign ran in a select list of newspapers. The introductory ad was titled, "Sane talk about food and your health."

The pride of GF's packaged convenience foods' main meal division this year is Oven Fry, a chicken coating mix which met all volume expectations. Encouraged by Oven Fry's success, GF is testing a similar coating for pork. New ads by Grey Advertising, New York, say Oven Fry "tastes southern fried—but you know it's oven fried. Fried chicken without the mess." Last year, Oven Fry was supported by $14,059,800 in advertising, mostly for network tv, more than a $13,000,000 increase.

Stove Top stuffing mixes, with heavy ad support, $12,214,900 mostly for network and spot tv, experienced significant volume gains. Minute Rice, with $8,379,000 in measured support, registered volume growth to pace the industry, GF reported.

GF has not increased its approximately 11% share of the pet food market, but in a year where all major companies lost share points, GF made some progress with previous products and new introductions. Top Choice and Gaines Burgers, the top two moist dog food brands, and Gaines Variety and Puppy Choice, were four of only five brands in that category that increased sales over 1978 figures.

MARKETING PROFILES

Cycle canned dog food increased sales from $45,000,000 to $55,000,000 last year and became No. 6 in that category. It is the only GF entry in that category. Cycle dry dog food recorded the highest sales increases in its segment, jumping from $30,000,000 in '78 to $48,000,000 in '79. The total ad budget for Cycle products was $14,898,700.

■ The three GF dry dog food entries, Gravy Train in third place, Cycle in seventh, and Gaines Meal in 15th, give he company a 10.8% share of that market area. In contrast, GF dominated 60% of moist dog food sales this year. To its Gaines line ad budget, totaling $25,140,200 in 1979, GF added Gaines Complete, a lower cost, soft-moist product. Gaines Full Course seemed to show high repeat purchase rates this year, GF said.

Within GF's giant 39.5% share in the grocery coffee market, Maxwell House brand's 22.3% share trails Folgers' 27.3% share in the regular coffee segment. The addition of GF's other brands, including Sanka, Brim and Yuban, gives GF a 31.5% share of regular coffees. The company retains its strong 47.5% share of the instant coffee segment with Maxwell House alone holding 23.4%.

You loved it as a kid.
You trust it as a mother. Kool-Aid.

General Foods' Kool-Aid ad emphasized economy and nutrition with some nostalgia for magazine advertisements.

■ In an effort to perk up ad strategy, GF traded a negative portrayal of coffee as difficult to make with often poor results, for ads that described the beverage as versatile and tasty. The switch is part of an attempt to build the over-all coffee market, GF said, by aiming at a younger, more diverse audience. Ads are nonbreakfast related, or show coffee in situations that could not be preempted by a cola drink.

The Maxwell House line was supported by $34,479,200 in measured advertising, with $14,665,700 in network tv and $12,958,500 in spot tv. Brim decaffeinated coffees, backed by a $12,591,800 total ad budget and a new campaign encouraging consumers to "fill your cup to the rim" increased volume and consumer awareness. Sanka brands put $1,581,400 of its total $20,702,300 ad budget into magazines for instant coffee, $15,010,700 into network tv, and $3,549,800 into spot tv, with a small amount going for newspaper supplements.

■ Activity in GF's grocery coffee segment this year includes the $110,000,000 September, '79, acquisition of HAG AG, a coffee interest in Bremen, West Germany. Together, GF and HAG hold 10% of the German coffee market. Although GF withdrew Mocafa, an instant chocolate-flavored coffee, its Master Blend, a higher-yield coffee tested this year, is said to be doing well.

In GF's food-away-from-home business, Burger Chef continued to operate at a loss, in fiscal 1980, although the new O&M theme—"Feel like a burger chef"—helped improve revenues, GF said. The revamped stores, complete with salad bar, new decor, and "works bar," where customers can build their own burgers, have added breakfast to their menu and a new Top Shef burger—a ⅓ lb. patty with cheese and bacon, retailing at $1.59. Burger Chef ad support totaled $5,438,000 in spot tv and $190,600 in outdoor.

■ GF's food-away-from-home business has expanded with a new subsidiary called Theme Restaurants of America. Halfway through fiscal 1980, GF acquired a controlling interest in the GuadalaHARRY'S dinner house chain, part of Mexican Foods of American, Denver. Representing GF's first venture into a U.S. restaurant business, GuadalaHARRY'S offers Mexican dishes ranging in price from $4 to $10. Soon to join Theme Restaurants in fiscal 1981 is Meriwether's, an American translation of GF's Crock & Block chain in Canada. Meriwether's will resemble English country homes with dishes and decor aimed for the family market.

In spring, 1979, General Foods joined John Blair & Co. and O&M to be the first to distribute spot tv commercials to stations via satellite. The step into space age advertising included 30-second commercial spots for 15 GF brands in 12 cities.

A $260,000,000 California class action suit, dismissed by a Los Angeles superior court judge for not including specific allegations of deceptive advertising of Post sugar-coated cereals, was appealed last fall and is still in the courts. Consumers' main point in the suit said GF's presweetened cereals and supporting commercials aimed toward children promoted lasting poor nutrition habits and tooth decay (AA, Aug. 6, '79).

GF also entered into joint ventures with AGROCOOP, the largest Yugoslav organization for food production and trade. As part of GF's first entry into eastern Europe, GF will provide equipment and technology and AGROCOOP will provide facilities, organization and labor. Three units will produce Post snack cereals, potato chips, corn puffs and Tang instant breakfast drink.

■ In May, 1980, GF added Ted Bates & Co., New York, to its agency roster with billings totaling $24,000,000. Maxim and Good Seasons salad dressings, billing approximately $15,000,000, moved from O&M. Mellow Roast moved from Grey, and Log Cabin from Young & Rubicam, all to Bates.

Other accounts which changed hands were Yuban from Grey, and Gaines Full Course, from O&M to B&B. From Benton & Bowles, Alpha Bits and Super Sugar Crisps went to O&M and Honeycomb, Grape-Nuts and other adult cereals went to Grey.

Y&R acquired Quick Thaw fruits, International Rice, Jell-O Americana Desserts, and Jell-O Cheesecake Mix. B&B acquired Orange Plus.

General Mills

	1979	1978
Sales	$4,170,278,000†	$3,745,000,000
Earnings	170,000,000†	147,000,000
Advertising*	190,746,500	170,000,000

†Fiscal year ended May 30, 1980
***AA estimate**

General Mills, Minneapolis, the 16th largest national advertiser, boosted ad spending 12.2% in 1979 and showed strong increases in sales and earnings over 1978. Ad spending was $190,746,500, for 1979, compared with expenditures of $170,000,000 in 1978.

Sales in fiscal 1980, ended May 30, 1980, increased 11.3% to $4,170,278,000 and earnings were up 15.6% to $170,000,000.

Honey Nut Cheerios, an oat cereal coated with brown sugar, honey and ground nuts introduced in mid-1979, continued to be the star performer in the Big G division stable. It has grabbed a little more than 2% of the cereal market in its debut year.

The 1979 ad spending for Honey Nut Cheerios was $7,425,400—second only to the ad spending on regular Cheerios, which hit $9,882,800. Despite many new entries into the adult/family cereal category in 1979, Cheerios retained its position as the No. 1 cereal with a leading market share. Golden Grahams, a presweetened cereal introduced in 1978, did well in 1979 and received a large chunk of the ad budget with $6,331,000 in spending.

■ General Mills has had two other major cereal introductions in recent months. Body Buddies, a honey/brown sugar-sweetened children's cereal touted as a high nutrition product, rolled national late in 1979 with nearly $4,000,000 in ad support.

MARKETING PROFILES

In April of this year, Crispy Wheats 'n Raisins rolled national after a long period of virtually test marketing. Although the brown sugar and honey-coated wheat cereal is similar to raisin bran entries, the ad campaign revolves around the theme: "Hey, this isn't raisin bran!"

Like other cereal marketers, General Mills has respondedo the public's adverse reaction to white sugar-sweetened cereals with these products, using alternative sweeteners like brown sugar and honey.

■ Competition has increased in the dessert mix arena. General Mills has responded with larger ad budgets for its Betty Crocker line and a company official says its "Bake Someone Happy" theme, created in 1979 by Needham, Harper & Steers, has helped strengthen the franchise.

The latest Betty Crocker entry is a chewy candy-like snack made with natural fruit, called Fruit Roll-ups. Side Quicks, a package noodle side dish with various sauces, rolled national last September.

Frozen foods remained a strong-performing segment for General Mills. Gorton frozen seafood set sales and earnings records and increased its share of the frozen seafood market to about 20%. Saluto Foods Corp. increased sales of its frozen pizzas, although the growth rate was slower than the previous year because of a slowdown in the frozen pizza category.

Saluto's line of Italian frozen entrees recently moved into more markets as the line is gradually expanded into national distribution. The entrees, including ravioli, lasagna, manicotti and breaded veal parmigiana, represent General Mills' first entry into the $710,000,000 frozen entree market.

■ Only eight months after its introduction into the West Coast market, General Mills' Yoplait yogurt grabbed market leadership from Knudsen. General Mills has backed up its marketing push with extensive product giveaways, sponsorship of cycling races and a Yoplait hot air balloon. Originally introduced in the Midwest, Yoplait had a shaky start and General Mills backed off with its marketing and advertising. After the West Coast successes, however, the company feels prepared to move its Yoplait attack to the East Coast.

Red Lobster Inns paced the growth of the restaurant division. Sales at the specialty seafood chain grew 10.4% in 1979, nine units were added and 34 were remodeled. York Steak Houses fared well and General Mills acquired its first full-service Mexican restaurant, Casa Galardo, in St. Louis.

The company plans to add about 20 to 25 units for both Red Lobster and York during 1980, and three Casa Gallardo restaurants. General Mills is looking to strong performance in the restaurant division and consumer foods to meet its plan for $6.6 billion in sales by 1985—double its current level.

The creative products division was again paced by Monopoly board game sales. The phenomenal success of the movie "Star Wars" and its sequel, "The Empire Strikes Back," helped Kenner toy sales skyrocket. Kenner has rights to "Star Wars" toys and capitalized on the movie series' popularity as 23 of its 85 new toys introduced in 1980 were along the "Star Wars" theme.

The diversified company's only major disappointment in 1979 was the performance of segments of the fashion line. Ship 'n Shore, a womens' shirt and blouse business acquired in 1978, had production problems and late shipments that caused sales to plunge. General Mills brought in a new president and vp-marketing to try to reverse the downturn.

Monet costume jewelry increased its sales and David Crystal, which markets the highly successful Izod (alligator label) line, performed well. General Mills discontinued its unsuccessful Kimberly women's knit sportswear line, taking about $6,400,000 in losses.

General Motors Corp.

	1979	1978
Sales	$66,311,200,000	$63,221,100,000
Earnings	2,892,700,000	3,508,000,000
Advertising	323,395,900	266,346,000

General Motors Corp., Detroit, the fourth largest national advertiser, increased 1979 advertising expenditures 21% to $323,395,900 from $266,346,000 in a year replete with a good news-bad news syndrome.

Worldwide dollar sales were a record $66.3 billion, up from $63.2 billion in 1978 but unit sales dropped 5% to 8,993,000. Profits fell to $2.9 billion from $3.5 billion. Both the unit sales and earnings reductions were blamed on the U.S. market slump. Smaller, lower margin cars also contributed to the profit decline.

U.S. vehicle sales slipped 11% to 6,300,000 vehicles from the record of more than 7,000,000 the year before. Cars fell 9% to 4,900,000 but truck sales of 1,400,000 were 18% below the year ago. The few bright spots were the X-bodies—Chevrolet Citation, Buick Skylark, Oldsmobile Omega and Pontiac Phoenix—the restyled Olds Cutlass and Buick Century four-door sedans and the Chevrolet Chevette which again was the top selling small car in the U.S.

The Diesel-Powered Cadillacs
Cadillac

Cadillac weathered the rush to small cars well in 1979, losing only 10% in sales. Ad spending was increased from $4,208,700 in 1978 to $18,035,200 in 1979.

"The year was one of very wide contrasts," chairman Thomas A. Murphy told his last annual meeting as head of GM. GM sold more vehicles in 1979 than in all but two of its 71 years; net income was exceeded by only three earlier years and GM increased its penetration to 45% of the U.S. market.

■ But the profit margin was down to 4.4% of sales, more than a point below 1978. More importantly, chairman Murphy said, "was the almost overnight reversal that took place last spring [1979] in the pattern of car and truck sales. Until then, during the first quarter of 1979, industry sales of cars and trucks had been at an annual rate of 16,000,000 units—very close to a record.

"Customer demand for mid-size and larger cars, for light-duty trucks and vans was exceptionaly strong. We were right on top of the market. In contrast, smaller cars were a drag on the market in early 1979. Our dealers had difficulty in moving them. The heaviest impact fell on the Japanese and other foreign-based manufacturers. Their sales penetration in the last two quarters of 1978 had fallen from 20% to 16% and their inventories were building up. This was part of a very significant trend.

■ "Then came the thunderbolt. Spot shortages of gasoline suddenly developed. It was a freak situation. It also proved to be a temporary one," Mr. Murphy said. But it caused "a panic in the minds of many American motorists. The market did a dramatic reversal.

"The larger cars and light-duty trucks and vans so much in demand just weeks before suddenly went begging. And smaller cars which had been so difficult to move were suddenly being snapped up. Many customers decided to wait. They seem to be still waiting," he said.

The good news was that GM's market penetration increased after the spring crisis. "The brunt of the surge in demand for small cars, and especially Japanese cars, fell not on GM but on our two largest domestic competitors [Ford and Chrysler]," Mr. Murphy said.

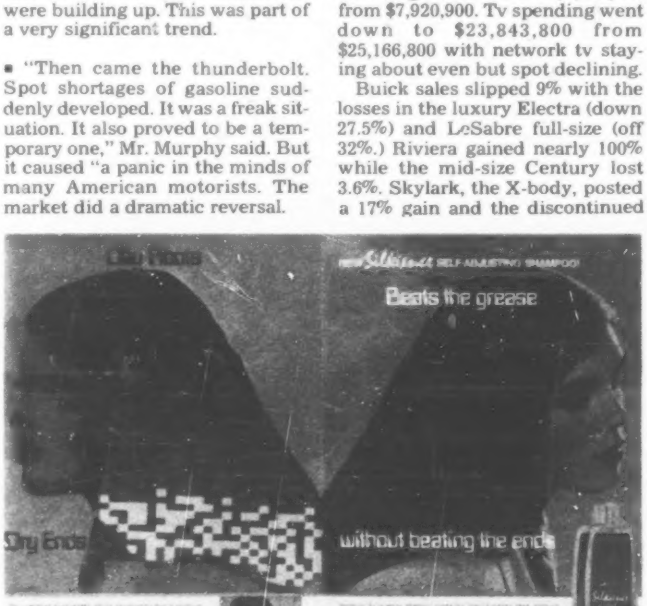
■ GM will pour some $40 billion into future product programs through 1984. It will mean front-wheel-drive vehicle capacity will rise from 1,300,000 to more than 6,000,000 by 1983. For model 1981, GM will have a revamped line of intermediate cars with up to two more mpg and in the spring of 1981 will bring out a "sporty, economical subcompact" that will be smaller than the Chevrolet Monza and Pontiac Sunbird it replaces but larger on the inside. Fuel economy will be up 27%, Mr. Murphy said. The next year will see a second round of downsizing for the big GM models. An electric vehicle is to be marketed by the mid 1980s.

As usual, Chevrolet spent the most on advertising and sold the most. Chevy's ad expenditures rose to $148,363,600 from $116,051,100 with the big increase in tv. Outlays for tv advertising rose to $68,687,100 from $52,785,900. Radio showed a jump to $21,508,500 from $16,651,000. Magazines rose to $27,562,500 from $22,725,600 and newspapers equaled magazines with $27,179,700, up from $18,131,600. Farm publications got $516,500, down from $1,316,400.

The ad spending, however, failed to prevent an 8% drop in unit car sales led by the full-size Chevrolet which was off nearly 28%. Monte Carlo sales dropped 25%. Citation, with some old Novas, racked up a 24% increase while Chevette jumped 52% to 375,724 units. The big Chevy still led the models with sales of 449,001. Monza, the other subcompact actually showed a 10% drop.

■ Buick, Oldsmobile and Pontiac were close together in their ad outlays. Buick was the highest with $48,350,100, up from $44,252,400 with newspapers and magazines the biggest gainers. Newspapers went to $12,856,200 from $8,593,300 and magazines rose to $9,149,100 from $7,920,900. Tv spending went down to $23,843,800 from $25,166,800 with network tv staying about even but spot declining.

Buick sales slipped 9% with the losses in the luxury Electra (down 27.5%) and LeSabre full-size (off 32%.) Riviera gained nearly 100% while the mid-size Century lost 3.6%. Skylark, the X-body, posted a 17% gain and the discontinued Opel dropped 28%.



Gillette Co.'s Silkience "self-adjusting" shampoo ads reflect consumer need for more proof in advertising with "scientific" computer photograph, showing beneficial effects of the product.

Pontiac spent $46,364,900, up sharply from $33,544,500 the year before. Network tv jumped to $16,500,300 from $12,603,500 and magazines and newspapers each rose to more than $10,000,000 from around $6,000,000. Radio showed the largest share drop.

Pontiac's sales were down 12% with the biggest drop in its erstwhile star, the specialty Grand Prix. It fell nearly 22% with the big Pontiac close at an 18% loss. Only the X-body Phoenix showed a gain, up 38%. Its subcompact Sunbird was off just 2.9%.

Oldmobile upped its ad expenditures to $42,713,500 from $34,090,400 with tv gaining less than $2,000,000. Newspapers rose to $13,205,500 from $8,826,800 and magazines were up to $10,752,300 from $8,919,600.

■ Olds sales dropped 5.6% with the largest loss sustained by the luxury 98—down 25%. The regular 88 lost 18% but the front-wheel-drive Toronado rose 67%. The bread-and-butter Cutlass lost only .4% of a point and led Oldsmobile sales with 518,160. That was good enough to top all GM models as well. The X-body Omega ran 16% ahead of the previous Omega.

Cadillac weathered the rush to small cars relatively well, losing 10% in sales but increasing ad outlays to $18,035,200 from $14,208,700. The major changes were spot tv up to $4,452,100 from $930,100 while network tv fell to $1,911,600 from $4,753,300. Magazines held steady while newspapers gained a bit. Network radio shot up to $1,406,500 from $260,200.

Seville and regular Cadillac were sales losers but Eldorado gained 35% in sales. Cadillac standard lost 17% and Seville was off nearly 19%.

Meeting government-mandated mpg standards—Corporate Average Fuel Economy (CAFE)—was still uppermost in the minds of GM execs in 1979. Just before the gas crunch hit, president E. M. (Pete) Estes was saying, "It's no secret that GM's strength traditionally has been in larger cars—the mid-size models and up. With a few notable exceptions—the Chevette being the brightest—our small cars have not been as successful as we'd like. Given the government's increasingly difficult CAFE requirements we have no real choice except to gain widespread market approval for our smaller, high-mileage models. We can't settle for the new Xs being anything less than a smashing success."

■ Mr. Estes needn't have worried. The X-bodies—front-wheel-drive replacement for older, bigger compacts—were a huge success. They were introduced just as the gas crunch and the Iranian revolution sent car buyers in search of small, fuel-efficient vehicles. GM aimed the cars at a "new generation" of car buyers with little brand loyalty and an inclination to imports.

GM corporate opened its ad umbrella for the Xs under the banner, "Designed and engineered for a changing world." Sunday papers carried a six-page section. Magazines were used extensively.

In all, GM poured $115,000,000 into the X-body launch—the biggest push ever for a new line. Only Cadillac didn't have an X-body, which came in hatchback versions for Chevy and Pontiac and notchback, formal roofs for Olds and Buick.

If there were lines at gas stations, the lines and waits were longer at GM salesrooms for the X-bodies. The backlogs reached six months or more in many cases.

"The first Chevrolet of the '80s," touted Chevrolet for its new Citation. Tv spots showed a bisected Citation towing a boat. The car had no rear wheels to emphasize its fwd. Commercials showed how

100 Leaders addenda

The following are additions and corrections to the 100 Leading Advertisers issue, Sept. 11:

Through printer error, advertising and sales figures for these companies on the Advertising as a Per Cent of Sales table on Page 8 appeared incorrectly. The correct figures are: Ford Motor Co., sales—$43,513,700,000; Volkswagen of America, advertising—$55,000,000, sales—$17,150,000,000, advertising as per cent of sales—0.3%; Mars Inc., sales—$887,600,000.

American Express Co.: Ron Friedman is vp-service establishment industry marketing and advertising; his name was not included.

Kraft Inc.: Ward Archer & Associates, Memphis, is the agency for Kraft Industrial Foods, not Merrill Dremer Inc.

PepsiCo Inc.: Willard C. Korn is senior vp, Frito-Lay, the name was incorrectly spelled; W. Bradford Todd is director, marketing services for Frito-Lay.

Pillsbury Co.: Harry Clark is account director at J. Walter Thompson Co. on Burger King; Ron Sherman is no longer management director on the account.

Sears, Roebuck & Co.: Chiat/Day, Los Angeles, is the agency for Allstate Savings & Loan Assn., not J. Walter Thompson Co.

UAL Inc.: The 1979 drop in sales is 124%, not 76% as reported.

Wm. Wrigley Jr. Co.: Christopher E. Sundstrom is marketing director, N. Hoegh-Guldberg is marketing manager.

Philip Morris Inc.: Correct marketing personnel for Miller Brewing are: William K. Howell, president; Lauren S. Williams, exec vp; Thomas B. Shropshire, senior vp; William A. Saupe, vp-planning and development; William C. Catlin, director of brand management; Jon Garner and Robert Toledo, group product directors; Doug Rogers, brand manager, Miller High Life; William Barrett, brand manager, Miller Lite; Jerome Schmutte, brand manager, Lowenbrau; Leonard Goldstein, vp-sales.

Transamerica Corp.: Marketing and personnel were inadvertently left out:

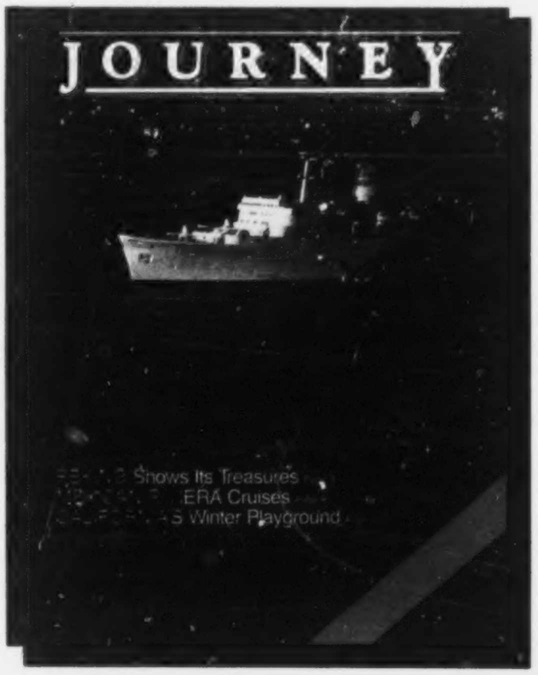
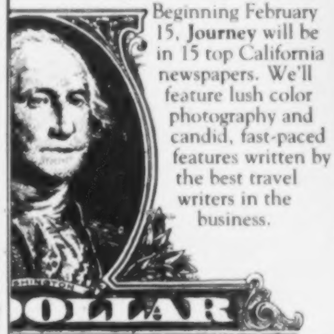
A TRAVEL MAGAZINE FOR CALIFORNIA NEWSPAPERS



JOURNEY magazine delivers the nation's richest market as no other magazine can. Our guaranteed 750,000 circulation means **Journey** reaches 1,900,000 readers. Our demographics* show that our audience is **affluent** — 29% make $30,000 a year or more; **educated** — 37% have completed college and/or graduate work; **frequent travelers** — 30% have valid passports; **mostly missed by the competition** — only 14% read Sunset and only 5% read any travel magazine.



Beginning February 15, **Journey** will be in 15 top California newspapers. We'll feature lush color photography and candid, fast-paced features written by the best travel writers in the business.

Journey is all travel, which means that our readers will not only explore far corners but also have honest, up-to-date consumer information that is usable as well as eye-catching. We'll cover destinations around the world, around the USA and around California, and provide helpful "know-before-you-go" travel tips. **Journey** is also designed to be saved. An annual index and cross-reference guide will enable readers to keep tabs on the destinations covered throughout the year.

Magazine Quality. Newspaper Reach. Plus a CPM that will stretch your '81 dollars.

These tables show the tv stations in markets 51 to 100 ranked in terms of shares for women aged 18 through 49 as reported in the Arbitron July sweeps covering July 9 through Aug. 5. The last three columns cover men aged 18 to 49, and household shares for the full telecast day and late fringe.

The people shares are based on the total station area; the last two columns on homes in Arbitron's area of dominant influence (ADI). These figures were compiled for ADVERTISING AGE from the Arbitron books by a veteran tv researcher.

Initials in parentheses indicate network affiliation (ABC, CBS, NBC); stations without initials are independents. Late fringe is 11:30 p.m. to 1 a.m. Monday-Friday in eastern and Pacific time zones. In Central and Mountain zones, each is one hour earlier.

These lists include local network affiliates and share runners-up in each market whether local indies or distant stations, affiliated or independent. Not all stations are listed. A blank under any column indicates not reported. Stations appear if they drew a minimum 3 sign-on to sign-off household share.

Network fare dominates in tv markets 51 to 100

By MAURINE CHRISTOPHER

NEW YORK—Middle-size American markets continue to be very much network tv turf, with ABC holding an edge over CBS in a spirited race, according to the latest ADVERTISING AGE analysis of Arbitron local rating sweeps.

This compilation of markets 51 through 100 concentrated on women 18 to 49 and their male counterparts as measured in July rating reports covering households and people viewing for July 9 through Aug. 5. Stations in each market were ranked on the basis of shares among young women in the total survey area. The data were compiled by a veteran broadcast researcher.

By this yardstick, ABC affiliates edged out the competing networks in 22 of the markets. CBS outlets won in 17 markets, the largest being No. 53, Greensboro-Winston Salem-High Point, where WFMY-TV scored a 39 to 35 for WGHP-TV, the ABC voice in the market.

WFMY-TV swept all four columns, scoring a 39 share with men 18 to 49, a 36 homes share in sign-on to sign-off and a 30 homes snare in late fringe. Unlike the demographic shares, the households numbers reflect viewing in Arbitron's area of dominant influence only, rather than total survey area.

NBC stations won in 11 markets in terms of women (18 to 49) viewers. Its territory included market No. 54, Wichita-Hutchinson, where KARD-TV bested KAKE-TV (ABC) 38 to 34. The NBC outlet also won by a landslide in late fringe, scoring a 42.

NBC also was looking good in Columbia, S.C., where WIS-TV dominated all four columns in a walkaway. With young women shares it was 38 for WIS-TV to 19 for runner-up WLTX-TV (CBS). WIS-TV is in the fortunate position of being a vhf station up against two less powerful uhfs.

One of ABC's powerhouses was KSAT-TV in the No. 51 ADI, San Antonio. Its scores: A 45 share

videotech/ BY MAURINE CHRISTOPHER

Can't go home again—at least to see cable

Television in my native East Tennessee is a far cry from what it is in channel-rich New York.

My grandmother's farmhouse near Russellville sits in a dip in the valley and picks up only WATE-TV (ABC) and WBIR-TV (CBS) from Knoxville, about 50 miles south. The third choice is public station WSJK-TV from Sneedville.

No one seems to mind very much. This long has been a household more likely to gladden the hearts of publishers than telecasters. For news, my father and aunt depend mostly on the *Knoxville Journal* and the *Morristown Citizen-Tribune*. Before my grandmother died there also was a Rogersville weekly to remind her of the days when she was a bride on Clinch Mountain in Hawkins County. Aunt Mary reads fiction mainly.

- For some time, the *Knoxville News-Sentinel* has been missing since it is no longer available by carrier. (My brother and I delivered that afternoon paper when we were children.) "What do I need it a day late for?" my father replied when I asked, "Why no *Sentinel*?"

Local radio choices abound. Ten miles away in Morristown, the county seat, and an expanding industrial center, there are three stations. Other nearby little towns have daytime outlets and the ones I flicked past all seemed to have plenty of commercials.

I had intended to catch up on cable, Tennessee style, when I visited my cousin, W.D., who is one of the few people I know in that part of the world who has been a catv subscriber for years.

No luck! He's moved out of range of Sammons Communications in Morristown. He's hoping the service will be extended since he particularly misses old movies and sports from WTBS, Atlanta, sports from ESPN and films from Home Box Office.

Both Jimmy Carter and Ronald Reagan were running saturation tv campaigns during my week in Tennessee, a state said to be too close to call in the presidential race. Still, in territory that's been Republican since Abraham Lincoln's time, the Democratic incumbent drew huge crowds during a brief stopover at Tri-Cities Airport. (But can all those school children vote?)

The newspapers looked extremely healthy, especially on food ad days. In the *Citizen-Tribune* the low-tar cigaret battle raged, with full pages for Salem Lights, Barclay and Vantage. This paper gave front-page play to two Jefferson County Piggly Wiggly stores that removed all tampons from their shelves after 16-year-old Angela French of Dandridge died of toxic shock syndrome.

- "We just decided until we got this thing cleared up we better pull all the brands off the shelves just to be on the safe side," Ronnie Sharp, manager of the stores, explained. He said Procter & Gamble had asked him to take Rely off the shelves, but he had received no instructions from other manufacturers.

The same day's paper carried the P&G ad asking consumers to stop using Rely and to return any supplies on hand to P&G for refunds.

* * *

Before leaving for Indian Summer and wild flower picking in the South, I had talked to Bill Rasmussen about why he was quitting ESPN.

Asked if Getty Oil forced him out at ESPN, the company he founded in mid-1978, Mr. Rasmussen said he resigned voluntarily to join his son, Scott, also an ESPN alumnus, in launching Enterprise Radio, which is due up on Westar III in January.

Chairman of ESPN at the time of his departure, the elder Mr. Rasmussen will assume the same title at Enterprise Radio, which, like ESPN, will concentrate on sports. He emphasized that he has signed a year's consultancy contract with Getty Oil, 85% owner of ESPN and a partner in the new Premiere pay tv network. He also retains his 14% interest in ESPN, which is now running a 24-hour a day schedule on Satcom I.

Already having been superseded at ESPN by Chet Simmons, president-chief executive officer, Mr. Rasmussen chose to move out to return to the center of action. "ESPN wasn't the first company I started and it won't be the last," he asserted. Preceding ESPN was Ad-Aid, an advertising packaging and distribution service, still going in Newark, but with which he is no longer associated.

For the future he indicated he looks forward to Enterprise Radio—satellites are perfect for radio, he thinks—and to working in pioneer projects for satellite-to-home program services.

- In California, Stuart Evey, the Getty Oil vp who watches over its cable interests, said the chairman's post would not be filled at ESPN. The network, he noted, set a new monthly record for cable homes added in September—900,000—and is now up to nearly 6,000,000 subscribers. #

Nets dominate 51 to 100

(Continued from Page 82)

with young women and just one below that with young men and a 35 household share throughout the broadcast day, climaxing with a 53 homes share in late fringe. CBS' KENS-TV was the runner-up in all four columns.

This study, like the earlier one on May sweeps, demonstrates again the scarcity of station choices in many markets below the 50 largest cities. Independents are not strong competitors in most of this territory.

In numerous cases these 51-100 markets reports are less complete than those for the major markets. Our researcher counted a minimum of 18 markets in which the number of reportable stations (by Arbitron's standards—call letters were in the books, but no figures) decreased from May to July. The most notable were West Palm Beach, where the number went from seven in May to three in July, and Lansing, where it dropped from eight to two.

An Arbitron spokeswoman explained that the data is not as comprehensive because July is not considered a "regular" sweeps month.

As a result, information on independents or other distant stations that scored at least a three sign-on to sign-off share in the ADI is more sketchy than it was in the May analysis (AA, Aug. 4). There are more blank columns in the tables this time around.

Independent superstation WTBS, Atlanta, turned up with a three sign-on to sign-off homes share in Mobile-Pensacola and in Jacksonville only.

The top 10 stations in the top 100 markets (the first 50 were in AA, Oct. 6) in sign-on to sign-off homes shares were paced by WBRC-TV (ABC), Birmingham, with a 51. Next at 46 were KYTV (NBC), Springfield, Mo., and KELO-TV (NBC), Sioux Falls.

The big three with women in markets 51 to 100, all scoring a 50 share with females 18-49: KTUL-TV (ABC), Tulsa; WBIR-TV (CBS), Knoxville, and KYTV (NBC), Springfield. WBIR-TV led with men in that age group at 46, followed by KSAT-TV, San Antonio, at 44.

Standouts in late fringe in order of their homes shares rank in markets 51-100 were: KSAT-TV, San Antonio, KWWL-TV, Cedar Rapids-Waterloo, and KYTV, Springfield, Mo., all clocking in with a 53. WBRZ, Baton Rouge, scored a 50 with stay-up-late homes. KATV, Little Rock, and WLBT, Jackson, Miss., both came in with a 47. #

There has been talk that Warner Amex might be gearing up for a January start for a music channel, which would showcase pop music just as the Movie Channel does films. But some Warner Amex officials say the go-ahead has not yet been given so "we're not definitely sure it'll happen yet."

The commercial tv networks have long run Halloween-themed specials in the evenings leading up to that date. Now, Home Box Office has come up with a Halloween week schedule, with movies "Halloween," "Dracula" and "Magic," plus specials "Great American Ghost Tour" and "Monsters, Madmen & Machines."

* * *

General Foods' "Hot Fudge Show," now in its sixth year, has been barter-syndicated to 90 markets for 78% coverage of U.S. tv households, according to Lexington Broadcast Services and producer MG Films, both New York. Next year, 78 past episodes will be offered for weekday stripping.

* * *

Michael J. Dorfsman, vp-pr at Charnas Inc., Hartford, Conn., agency, adds the title of executive director of the Connecticut Cable Television Assn., which is a Charnas pr account. Mr. Dorfsman will administer CCTA's operations, edit its newsletter and deal with legislative and regulatory agencies.

* * *

The 1980 Miss World beauty pageant will be carried live by satellite on Home Box Office on Nov. 13 at 8:30 p.m. (EST). It previously had been shown in syndication, weeks after the event.

* * *

Thinking Christmas yet? Some broadcasters, syndicators and advertisers are. Besides Interstate Brands and CBS-TV, which slated a Charlie Brown yule special for December months ago, Carter-Grant Productions, via Program Syndication Services, New York, is clearing tv stations for its "24 Days of Christmas" featurettes. Tuesday Productions, San Diego, has revamped its 12-hour "A Christmas Album" package of yule-themed songs for radio stations.

* * *

Capital Cities Communications' "Family Specials" package has been barter-syndicated to 143 tv stations for the 1980-81 season, including 22 of the top 25 markets. Bristol-Myers and Nabisco are the national sponsors for the six half-hour dramas.

* * *

General Electric is the latest sponsor on Black Entertainment Television's catv package. Besides GE, with a 39-week buy, another recent BET client is the Carter/-Mondale Re-Election Committee, with a six-week buy.

* * *

Modern Satellite Network, New York, has added 500,000 subscribers and 60 market areas since the National Cable Television Assn. convention last May. Its 380 catv systems now offer a potential 2,750,000 subscribers.

* * *

"Roaring Doughnuts," a children's tv series from United Children's Television, New York, will be distributed in the home video market by Home Theatre/-VCI, Hollywood. Each program videocassette will be sold for $40, accompanied by a 16-page tie-in booklet.

Bernard exits 'Adweek'

Lawrence Bernard, formerly editor-in-chief of *Adweek* and more recently consulting editor to the magazine group, has resigned from A/S/M Communications, New York, owner of the regional publications. Mr. Bernard, who earlier had served as senior editor at ADVERTISING AGE, said he will announce his plans in the near future.

Co-op ads up in broadcast

NEW YORK—Some cooperative advertisers increased their use of tv and radio in July and August, according to Pinpoint Marketing Inc., an audit and processing service here.

The company's analysis showed that the swimming pool and floor covering companies placed national co-op spending during the two summer months as follows: 41% in newspapers, 29% in tv, 12% in radio, 11% in flyers and catalogs, 2% in outdoor and 5% in "other."

Pinpoint president Arnold Ferber, who also heads the Ferber & Strauss agency, noted that co-op spending by the photographic industry during the same period showed the following breakdown: 63% in newspapers, 2% in tv, 7% in radio, 21% in flyers and catalogs, 0.03% in outdoor and 6.97% in "other."

Mr. Ferber said the higher ratio of tv and radio in the pool and floor covering industries can be traced to sales results, greater promotion efforts by tv and radio sales representatives and "better proof of performance documentation," which gives marketers "more confidence" in broadcast for their co-op programs. #

Semimoist dog food in a can

Purina tries Maverick

By RICHARD KREISMAN

CHICAGO—Ralston Purina Co., in an unusual move, has introduced Maverick, a new semimoist dog food packaged in a large can, into controlled store tests in Erie and Peoria.

Positioned next to canned dog foods on retail shelves, Maverick is formulated to resemble cooked ground meat. Package copy claims Maverick is a "dog food with a difference . . . actually made with real, cooked ground meat." The company earlier air-tested a commercial for the brand (AA, June 30). The product includes meat by-products and higher-than-average water content levels for a semimoist.

Industry observers speculate that the company has not yet decided whether to position the product as a semimoist or a canned dog food. This speculation derives from a relatively low level of ad support, and from its shelf position.

Media support from MCA Advertising, New York, features two different spots said to be supported at about 100 gross rating points a week. One depicts a bassett hound coming home and declaring he has a "good family and a good meal with cooked ground meat taste." The other shows two women in a kitchen. One asks the other why she is mixing up ground beef for her dog when she can feed it Maverick.

The move into the semimoist category has left the St. Louis company's competitors baffled. The segment, which reached its peak in the early 1970s, has steadily lost market share in the past five years.

- In 1979, semimoist dog food sales hit $325,000,000, representing an unadjusted 1.6% sales increase, according to John C. Maxwell Jr., a Lehman Bros. Kuhn Loeb analyst. In real terms, however, the category—led by General Foods' Gainesburgers and Top Choice—has declined. Much of the shift has

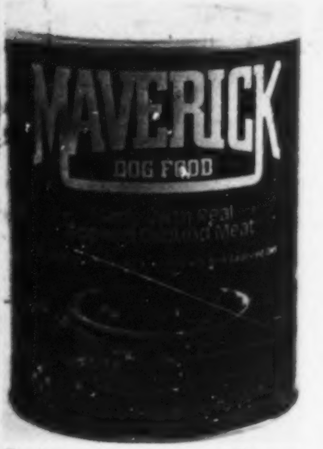
Ford at MPA

Former President Gerald Ford, a featured speaker at the Magazine Publishers Assn. meeting in Palm Springs, Cal., shares some views on the upcoming election with Ed Thompson of *Reader's Digest* and David Bunn, an MPA consultant.



Package copy notes: "Convenience of bagged dog food along with many advantages of canned . . . no need to refrigerate."

MPA forecast: Partly sunny

By CHRISTY MARSHALL

PALM SPRINGS, CAL.—Under blue and balmy California skies, magazine publishers predicted mild to sunny weather ahead for the industry in the coming year.

Assembled here for the Magazine Publishers Assn./American Society of Magazine Editors annual meeting, publishers expressed cautious optimism for the fourth quarter and the coming year.

"In a year of economic downturn, the magazine industry has fared far better than most publishers thought it would," said MPA president Kent Rhodes. "The PIB [Publishers Information Bureau] figures for the first three quarters show advertising revenues of over $2 billion, up 11% over 1979—a record. Advertising pages are up 2%, and the magazines continue to come on stream at a good rate.

"As to the immediate economic outlook, it's anyone's guess, but on the whole it would seem magazines expect to sell as many units—copies and pages of advertising—in 1981 as in 1980," Mr. Rhodes added.

- With increased ad rates taking effect for many publishers, ad revenues are generally expected to be considerably greater than in 1980.

"Certainly, in 1981, the industry will take in more money—and spend more—than ever before," Mr. Rhodes continued. "The question, as always, is how much we'll be able to keep in the bottom line."

In terms of units sold—with the exception of one doubting Thomas—publishers expressed optimism ranging from cautious to unbridled. At *New York*, marketing director Steve Walden said the fourth quarter will be up 18%, and publisher Cathy Black estimated the magazine would be up 5% in the first six months of 1981—an admittedly conservative prediction. She declined to make book on the year as a whole.

More MPA news on Page 10.

Jay Burzon, ad director at *Woman's Day*, said the magazine would be even to slightly up for the fourth quarter; but for 1981, Mr. Burzon foresees a "great recovery" starting in the third quarter and going "gangbusters" into the fourth.

From Hearst Corp., magazine division president Gil Maurer said that the fourth quarter for the Hearst Group (a stable of 10 magazines including *Good Housekeeping, Cosmopolitan, Town & Country, Harper's Bazaar* and *House Beautiful*) will be equal or ahead of last year, and ad pages will be up in 1981. Noting that Sears has come back into magazine advertising—"in a more modest fashion"—Mr. Maurer added it was good to see that name on order forms again.

- *Ms.* magazine will be up 7% in the fourth quarter and, according to publisher Pat Carbine, "it would be nice if we could maintain that 7% to 10% increase in 1981."

One magazine publisher who is

In-flight movie ads

Airlines trying new tactic to defray costs

By JENNIFER PENDLETON

LOS ANGELES—Eastern Airlines is set to begin the first use of paid advertising during in-flight movies, as the nation's airlines start taking a close look at airborne ads as a way to cut back on escalating costs.

Starting in January, tv commercials for Hertz Corp. will run before the in-flight movie on some Eastern flights. The Miami-based airline also has tentative agreements with American Express Co., Airbus Industrie and Lanier Office Products for similar in-flight ads starting in 1981. Ad rate is $11.75 per minute per movie flight.

Other carriers—like American Airlines and several international airlines—are already using a more subtle approach. American has started using an eight to 10-minute informational film entitled "World on Parade," which contains soft-sell commercial messages from the Chrysler Corp. and New York-based Citibank. Japan Air Lines, SAS, Philippine Airlines and British Airways also are reported using similar soft-sell films.

The pros and cons of ads on airlines will be the key question under consideration at the first meeting of the Airline Entertainment Assn. in Phoenix starting Oct. 27. Participating in the in-flight entertainment industry group meeting are Eisaman, Johns & Laws' president Joe Eisaman and reps from most major airlines. Coca-Cola Co. is among the national advertisers attending the conference.

In an industry hard hit by rising jet fuel costs and air fare price slashing, in-flight entertainment has been a "very unprofitable" part of airline operations, one source said. Industry sources say that the cost of an in-flight film varies from $50,000 to $75,000 per plane—a cost not covered by the usual $2.50 charge for head sets.

But some airlines are hesitant to start using paid ads for fear of passenger resentment, and there also is uncertainty on the extent to which paid ads would actually cut costs.

A spokesman for United Airlines said the subject has been discussed, but "no conclusions have been reached yet on whether it would be right for us."

Both Eastern and American

last minute news

WRG loses Citicorp, Schoenfeld accounts

NEW YORK—Citicorp and Wells, Rich, Greene have "mutually agreed" to part. The $10,000,000 account, which includes the New York Banking division, Citibank (N.Y. state), Citibank Trust (London) and Citicorp Homeowners, a mortgage subsidiary, probably will go to Doyle Dane Bernbach, which picked up the Citicorp travelers checks account early this year, or SSC&B, which handles other Citicorp business. *(See related story on Page 128.)* Separately, Schoenfeld Industries, Seattle, split from WRG, Los Angeles, on its $8,000,000-plus Brittania and El Paso jeans account, and is in contract talks with an unidentified Seattle agency.

Northwest Airlines conducting review

MINNEAPOLIS—Northwest Airlines will hear late November or early December pitches from C&W, Grey, K&E, all New York, and incumbent Campbell-Mithun here, for its $10,000,000 domestic business, at C-M for 25 years.

Wendy's $13 million account goes to DFS

DUBLIN, O.—Wendy's International has chosen DFS, New York, for its national advertising account estimated at $13,000,000. The chain also has held initial discussions with Bozell & Jacobs, Clinton E. Frank Inc., Chicago, and Stockton-West-Burkhart, Cincinnati, about setting up a regional agency network.

Maxwell House freeze-dried rolling out

WHITE PLAINS—General Foods is rolling out Maxwell House freeze-dried coffee. It will join stablemate Maxim freeze-dried in competing

Southwest founder reassembles team

Muse is flying again

By TOM BAYER

DALLAS—The team that 10 years ago helped create Southwest Airlines and its highly competitive marketing strategy is forming a new Texas-based national short-haul commuter airline, Muse Air Corp., and has assigned the company's $1,500,000-plus ad budget to Keller Crescent Co., becoming that agency's first Southwest client.

M. Lamar Muse, chairman of Muse Air Corp. and former president of Southwest Airlines, filed his certificate authority application with the Civil Aeronautics Board Monday for low-fare, high-frequency service to 24 cities as far south as Brownsville and as far north as Pittsburgh.

Mr. Muse is chief executive officer of the new company while his son, Michael L. Muse, is president, treasurer and chief operating officer. The company is temporarily headquartered in Dallas, but will be basing itself in Houston.

Mr. Muse and his son are already working on their marketing strategy with Ray Trapp, president of Keller Crescent/Southwest, and formerly account supervisor at The Bloom Agency, where he headed the account team that handled Southwest Airlines for the airline's first eight years. (Bloom still handles that account.)

Muse Air Corp. also has selected another veteran of the early Southwest Airlines days, Mantz & Associates, which will develop a coordinated graphics program.

NBC phases rollout

By COLBY COATES

NEW YORK—NBC's multiphased rollout of its new prime time tv schedule, concern about flagrant abuses of the opening prime time or family hour and informal betting on the outcome of the November ratings sweeps were the hot topics in the agency-tv fraternity last week.

In a nutshell, NBC will bring out its half-hour programs in November, air a bevy of new variety and long-form programs from late November through December and then round out the schedule with the addition of seven freshmen and returning programs in January. "Harper Valley," "Sanford" and "Boomer," shows that held down slots in NBC's first prestrike schedule announced months ago, will remain in production and be added to the lineup later when openings become available.

The new programs coming on, above and beyond new entries such as "Hill Street Blues" and "Flamingo Road," include "Gangster Chronicles," "Walking Tall," "Fitz and Bones" (starring the Smothers brothers) and "Number 96," the Australian import spin-off.

▪ Though some agency execs wondered if NBC would encounter problems in getting some of the January programs sampled, others preferred to think that the extended rollout gives NBC added maneuverability. They also pointed out that most of these late

Two Fords offer advice

A book by Ann (left) and Charlotte Ford, daughters of Henry Ford II, former chairman of Ford Motor Co., will be sold through Ford and Lincoln-Mercury dealers as part of the company's sales effort to women. The 60-page, softcover book (cover shown here) offers advice to women drivers, traveling tips and motoring etiquette. In cover photo, Ford says its first booklet aimed at women was published in 1912. "The Woman and the Ford" then said women were using cars to "escape from the artificial conditions and worries of the drawing room or kitchen." The new Ford book ($4.95) was published by Mobius Press, Chicago, under Ford sponsorship.

Morale booster

Sale of trouble-plagued 'Denver Post' comes just in time for some employes

DENVER—Applause from the staff of the *Denver Post* as they were told of the paper's agreement to acquisition by the Times Mirror Co. told the story—that the deal was made just in time to keep morale around the *Post* from slipping to a dangerous low.

"It's no secret the *Post* had been having an increasing number of problems, particularly morale, in the past two or three months. They lost some good people," said a Denver native who has been watching the battle between the afternoon *Post* and Scripps-Howard's a.m. *Rocky Mountain News* shift more and more in the latter's favor.

Earlier this year, the *Rocky Mountain News* passed the *Post* for the first time in weekday circulation, with about 271,000 compared with the *Post's* 260,000. Sources said the *News* also may have pulled a bit ahead of the *Post* in ad linage in the last few months whereas the *Post* had been far and away the leader before the Scripps-Howard paper started its move about five years ago.

One problem that staffers said added to waning enthusiasm around the *Post* was the fact the whole town knew the *Post* was for sale. President-publisher Donald R. Seawell had been openly seeking bids for the paper at a price of around $100,000,000. Denver oilman Marvin Davis reportedly offered an $80,000,000 lump sum plus a hefty outlay for new presses and the start of a morning edition in a deal, but he later backed out.

Los Angeles-based Times Mirror reached agreement to buy the *Post* for about $95,000,000—$25,000,000 cash and $70,000,000 over the next 20 years. Phillip Williams, TM vp-newspapers and tv, said it was too early to say whether the *Post* will be pitted head to head with the morning competitor. But it was noted that the *Post* already has moved in that direction, switching to a.m. publication on Saturdays two years ago. The *Post* leads the *Rocky Mountain News* by a substantial margin Sundays—351,149 circulation to 293,004.

Mr. Williams said the fact that Denver appears headed into a major growth period because of surrounding energy resources "wasn't the overriding reason" TM decided to make the acquisition. "Denver has lots of things going for it already. We see it as similar to our other markets like Dallas."

When final, the purchase will put a fifth daily into the Times Mirror's newspaper stable. It owns the *Los Angeles Times*, *Newsday*, the *Dallas Times-Herald* and the *Hartford Courant*. All are on a continual upgrading program and nobody expects TM to remain idle with the *Post*.

There was concern expressed about possible upcoming union contract problems, but the *Post's* competitive situation was seen by some sources as not so gloomy as has been painted elsewhere.
